(b) Any fishing vessel which has operated in the regulatory area at any time during the calendar year and which departs on any fishing voyage within the Pacific Ocean after the notice described in this section is published in the FEDERAL REGISTER, shall be restricted to the incidental catch limitations as provided in § 280.7(a).

§ 280.15 Restrictions applicable to cargo vessels.

(a) Any fishing vessel shall be deemed to have completed a fishing voyage whenever any part of its catch is transferred to a cargo vessel in conformity with the requirements of this section.

(b) In keeping with the provisions of 46 U.S.C. 251, no foreign-flag vessel, whether documented as cargo vessel or otherwise, is permitted to land in port of the United States any fish or fish products taken on board such vessel on the high seas.

(c) The transfer of fish from a fishing vessel to a cargo vessel while in a foreign country or in waters over which each country has recognized jurisdiction is subject to the applicable laws and regulations of such foreign country.

(d) During the closed yellowfin tuna season, no fishing vessel shall transfer on the high seas any part of its catch to a cargo vessel documented under the laws of the United States and no such cargo vessel shall receive, possess, or bring to any place in the United States, fish taken on board on the high seas from a fishing vessel unless the cargo vessel shall hold a permit issued in conformity with paragraph (e) of this section.

(e) Upon written application made to him, the Regional Director may issue a permit authorizing a cargo vessel documented under the laws of the United States to receive, possess, transport to the United States, fish transferred from fishing vessels on the high seas during the closed yellowfin tuna season. Such permit may authorize the possession and transportation of yellowfin tuna by a cargo vessel without regard to the quantities of fish received, but it shall contain restrictions as the Regional Director shall determine to be necessary to achieve compliance with the regulations in this part and the objectives of the yellowfin tuna conservation program.

(f) Any cargo vessel seeking permission to enter into the United States a cargo of round tuna (that is, tuna that has not been gilled, gutted, or beheaded) any part of which was received ex-vessel through a port facility in the Americas shall provide to the nearest Customs Office as a prerequisite to obtaining such permission from Customs the following information with respect to the part of such cargo received ex-vessel through a port facility in the Americas:

(1) Name, official number, and flag of each fishing vessel (including, for purposes of this paragraph, any foreign flag fishing vessel) from which was received any tuna that is aboard the cargo vessel at the time the aforesaid permission to enter is sought;

(2) Date and location of such receipt of tuna; and

(3) Certification from the master of each such fishing vessel setting forth, as to tuna received by the cargo vessel:

(i) Tonnage by species of tuna caught inside the regulatory area;

(ii) Tonnage by species of tuna caught in waters west of the regulatory area to the meridian of 150° west longitude;

(iii) Tonnage by species of tuna caught in other waters; and

(iv) As to each caetgory, the dates of the fishing voyages on which the tuna were caught.

(g) Any cargo of round tuna for which permission to enter into the United States is sought by a cargo vessel shall be accompanied by a bill of lading indicating whether the tuna was received ex-vessel through a port facility (and, if so, from what vessels and what ports) or by other named means, such as from freezer or other storage facilities, and such bill of lading shall be provided to Customs at the time permission to enter is sought.

(h) For the purpose of this section, round tuna requiring documentation shall not include albacore (*Thunnus alalunga*).

(i) Any cargo vessel failing to provide the documentation required by paragraphs (f) and (g) of this section shall be denied permission to enter into the United States undocumented lots of round tuna. If tuna is denied entry under the provisions of these regulations, the District Director of Customs shall refuse to release the tuna for entry into the United States and shall issue a notice of such refusal to the importer or consignee: Provided, however, that the tuna not accompanied or covered by the required documentation or certification when offered for entry may be entered into the United States if the importer or consignee gives a bond on Customs Form 7551, 7553, or 7595 for the production of the required documentation or certification. The bond shall be in the amount required under 19 C.F.R. 113.14. Within 90 days after such Customs entry, or such additional period as the District Director of Customs may allow for good cause shown, the importer or consignee shall deliver a copy of the required documentation and certification to the District Director of Customs, and the original of the required documentation and certification to the Regional Director of the National Marine Fisheries Service. If such documentation and certification is not delivered to the District Director of Customs for the port of entry of such fish within 90 days of the date of Customs entry or such additional period as may have been allowed by the Distirct Director of Customs for good cause shown, the importer or consignee shall redeliver or cause to be redelivered to the District Director of Customs those fish which were released in accordance with this paragraph. In the event that any such tuna is not redelivered within five days following the date specified in the preceding sentence, liquidated damages shall be assessed in the full amount of a bond given on Form 7551. When the transaction has been charged against a bond given on Form 7553 or 7595, liquidated damages shall be assessed in the amount that would have been demanded under the preceding sentence under a bond given on Form 7551. Tuna refused entry or released for entry into the United States through the use of bonding procedure provided in this paragraph may be subject to the forfeiture provisions of the Tuna Conventions Act of 1950 as is any other tuna imported into the United States in violation of the Act. Tuna which is denied entry or which is redelivered in accordance with the above and which is not exported under Customs supervision within 90 days from the date of notice or refusal of admission or date of redelivery shall be disposed of under Customs laws and regulations.

(j) Any person who knowingly enters or permits the entering of round tuna from a cargo vessel in violation of paragraph (f) or (g) of this section, or who knowingly provides false information with respect to the requirements of paragraph (f) or (g) of this section, shall, as well as the cargo of tuna, be subject to the penalties provided in the Tuna Conventions Act of 1950 (16 U.S.C. 951–961).

§ 280.16 Restrictions applicable to purchasers.

(a) Except as provided in paragraphs (b) and (d) of this section, it shall be unlawful for any person knowingly to receive, purchase, sell, offer for sale, import, export, or have in custody, possession, or control any yellowfin tuna taken or retained by a fishing vessel in violation of the regulations in this part.

(b) In view of the perishable nature of yellowfin tuna when not processed otherwise than by chilling or freezing, and persons authorized to enforce the regulations in this part may cause to be sold, and any person may purchase, for not less than its reasonable market value such quantities of perishable yellowfin tuna as may be seized and forfeited pursuant to the Tuna Conventions Act of 1950, as amended (16 U.S.C. 951–961).

(c) The proceeds of any sale made pursuant to paragraph (b) of this section after deducting the reasonable costs of the sale, if any, shall be remitted by the purchaser to the Regional Director for deposit and retention in the Suspense Account of the National Marine Fisheries Service (Account No. 13X6875(17)) pending judgment of the court or other disposition of the case.

(d) If a duly constituted official acting under authority and in behalf of a State of the United States, of the Commonwealth of Puerto Rico, or of American Samoa seized any yellowfin tuna under the applicable laws or regulations of such government, such yellowfin tuna may be forfeited and sold or otherwise disposed of pursuant to such laws or regulations. Any yellowfin tuna so seized by an official of State, the Commonwealth of Puerto Rico or American Samoa shall not be seized by an officer or employee of the Federal Government unless it is voluntarily turned over to him to be processed against under applicable Federal laws or regulations.

§ 280.17 Recordkeeping and written reports.

(a) The master or other person in charge of a tuna vessel or such person as may be authorized in writing to serve as the agent of either of such persons shall throughout the open and closed yellowfin tuna fishing seasons:

(1) Keep an accurate log of all operations conducted from the vessel entering therein for each day the date, noon position (stated in latitude and longitude or in relation to known physical features), and the tonnage of fish aboard by species. The record and bridge log maintained at the request of the Commission shall be sufficient to comply with this paragraph provided the items of information specified herein are fully and accurately entered in such log.

(2) Furnish on form obtainable from the Regional Director, following the sale or delivery of a catch of fish made by such vessel, a report, certified to be correct as to facts within the knowledge of the reporting individual giving the name and official number of the fishing vessel, the dates of beginning and ending of the fishing voyage, the port of departure, and a listing separately by species of the round weight quantities (pounds or short tons) of fish sold or delivered. At the option of the vessel master or other person in charge, a copy of the fish ticket, weighout slip, settlement sheet, or similar record issued by the fish dealer or his agent may, however, be used for reporting purposes in lieu of the form obtainable from the Regional Director, if such alternate record is similarly certified and contains all items of information required by this paragraph. In addition, any vessel landing its catch in California and reporting by means of a copy of the California fish ticket, the California Fish and Game boat number may be indicated in lieu of the vessel's official number. Such sale and delivery reports shall be delivered or mailed to the Regional Director within 72 hours after weighout has been completed.

(3) The requirements of this section shall apply to the sale or delivery of a catch of tuna regardless of whether the transaction occurs in a U.S. or a foreign port.

(b) Any person authorized to carry out enforcement activities under the regulations in this part and any person authorized by the Commission shall have power, without warrant or other process to inspect, at any reasonable time, log books, catch reports, statistical records, or other reports as required by the regulations in this part to be made, kept or furnished.

§ 280.18 Persons and vessels exempted.

Nothing contained in § 280.2 to § 280.18 shall apply to:

(a) Any person or vessel authorized by the Commission, the Service Director, or any State of the United States to engage in fishing for research purposes.

(b) Any person or vessel engaged in sport fishing for personal use.

§ 280.19 National Oceanic and Atmospheric Administration Employees designated as enforcement agents.

Any employee of the National Oceanic and Atmospheric Administration duly appointed and authorized to enforce Federal laws and regulations administered by the National Oceanic and Atmospheric Administration is authorized and empowered to carry out enforcement activities under the Tuna Conventions Act of 1950, as amended (16 U.S.C. 951–961).

§ 280.20 State Officers designated as enforcement agents.

Any officer or employee of a State of the United States, of the Commonwealth of Puerto Rico or of American Samoa who has been duly designated by the Service Director or his delegate with the consent of the Government concerned is authorized to function as a Federal law enforcement agent and to carry out enforcement activities under the Tuna Convention Act of 1950, as amended (16 U.S.C. 951–961).

Title 29—Labor

CHAPTER XXV—PENSION AND WELFARE BENEFIT PROGRAMS, DEPARTMENT OF LABOR

PART 2520—RULES AND REGULATIONS FOR REPORTING AND DISCLOSURE

Annual Report—Request for Additional Comments

AGENCY: Department of Labor.

ACTION: Request for additional comments on annual report regulations under Title I of the Employee Retirement Income Security Act of 1974.

SUMMARY: The Department of Labor is requesting additional comments on proposed regulations concerning annual reports and summary annual reports for employee benefit plans, which appeared in the FEDERAL REGISTER on August 3, 1976 (41 FR 32522).

COMMENT DATE: Comments should be submitted on or before July 5, 1977.

ADDRESSES: Send comments to: "Annual Report Regs.," Room C4526, Office of Regulatory Standard and Exceptions, Pensions and Welfare Benefit Programs, U.S. Department of Labor, Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT:

Peter A. Straub, Pension and Welfare Benefit Programs, U.S. Department of Labor, Washington, D.C., Telephone 202–523–8684.

SUPPLEMENTARY INFORMATION:

Solicitation of Comments

On August 3, 1976 (41 FR 32522) the Department of Labor published regulations under the Employee Retirement Income Security Act of 1974 concerning annual reports, which must be filed with the Department, and summary annual reports, which must be furnished to plan participants and beneficiaries, by employee benefit plans.

In order to facilitate the preparation of annual reports for the 1975 plan year, these regulations were made effective immediately. However, comments were solicited for consideration in the preparation of final annual report regulations, the comment period ending on

December 31, 1976. The Department received extensive comments on the August 3, 1976 regulations and is currently considering those comments in preparing the annual report regulations for final publication.

In conjunction with the publication of a request for comments on revising the annual report forms (DOL/IRS Form 5500) elsewhere in this issue of the FEDERAL REGISTER, the Department is hereby soliciting further comments on the August 3, 1976 regulations. Of particular concern to the Department in this regard is that members of the public be afforded an opportunity to consider the annual report regulations together with the annual report forms in the light of practical experience in using the regulations. Of course, additional comments submitted by interested persons should not duplicate comments made by such persons during the earlier comment period.

Accordingly, interested persons are invited to submit additional written data, views or arguments concerning the August 3, 1976 regulations on or before July 5, 1977. Such data, views and arguments should be submitted to "Annual Report Regs.," Room C4526, Office of Regulatory Standards and Exceptions, Pension and Welfare Benefit Programs, U.S. Department of Labor, Washington, D.C. 20216.

All comments should be clearly referenced to the numbers of the sections to which the comments are directed.

Signed at Washington, D.C. this 19th day of May, 1977.

TRAVIS KNIGHT,
Assistant Administrator of Pension and Welfare Benefit Programs.

[FR Doc.77–14632 Filed 5–19–77;10:30 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 967]

[Docket No. AO-354-A2]

CELERY GROWN IN FLORIDA

Decision on Proposed Further Amendment of Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision would amend the Federal marketing agreement and order for celery grown in Florida. Celery growers will vote in a referendum to determine whether they favor the proposed changes in the order.

The major purpose of the proposed amendment is to provide a method for producers to enter the celery industry and increase the size of existing celery operations. Additional proposed changes include the addition of a public member to the administrative committee, and provision of authority to fund production research under the order.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, Department of Agriculture, Washington, D.C. 20250 (202-447-3545).

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing published January 13, 1977 (42 FR 2691) with a supplement on January 28, 1977 (42 FR 5362).

Notice of Recommended Decision issued March 29, 177 and published April 1, 1977 (42 FR 17458).

Preliminary Statement

A public hearing was held on proposed further amendment of the marketing agreement, as amended, and Order No. 967, as amended (7 CFR Part 967), (hereinafter referred to collectively as the "order") regulating the handling of celery grown in Florida. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the appliacable rules of practice (7 CFR Part 900), at Orlando, Florida, on February 1, 1977, pursuant to notice thereof.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Acting Administrator, on March 29, 1977, filed with the Hearing Clerk, U.S. Department of Agriculture, his recommended decision containing notice of the opportunity file written exceptions there to through April 18, 1977, later extended to May 1, 1977.

The material issues, findings and conclusions, rulings, and general findings of the recommended decision are hereby approved and adopted and are set forth in full herein, subject to correction of inadvertent, grammatical or obvious errors and the following modifications:

1. Under Material Issue No. (2) concerning the method of establishing Base Quantities paragraph 8 is revised.

2. Under Material Issue No. (3) concerning the method of determining celery producers' annual sales allotments paragraphs 3 and 5 are revised and a new paragraph is added immediately following paragraph 5.

Material Issues

The material issues of record are as follows:

(1) Providing for a public member on the committee;

(2) Amending § 967.37 "Base Quantities" to clarify the basis for determining Base Quantities, to provide conditions for obtaining and retaining Base Quantities and to add authority to require annual registration by producers;

(3) Amending § 967.38 "Marketable Allotments" to revise the basis for determining each celery producer's annual sales allotment;

(4) Amending § 967.44 Research and Development" to authorize production research;

(5) Providing for the receipt of voluntary contributions to finance research projects;

(6) Making such changes in the order as may be necessary to bring the entire order, as amended, into conformity with the amendatory action resulting from the hearing.

Findings and Conclusions

The following findings and conclusions on the material issues are based on the record of the hearing:

(1) The Florida celery marketing agreement and order (hereinafter in the text of findings and conclusions collectively referred to as the "order") should be amended to provide for a representative of the public on the administrative committee. To effectuate such a change, § 967.25 of the current order providing for the establishment and membership of the Florida Celery Committee should be revised to enlarge the committee from 15 members to 16 members, with the additional member to be a public member. Further, § 967.26 providing for eligibility of committee members should be revised to indicate the criteria for the public member, and a new paragraph (f) should be added to § 967.27 "Nominations" to indicate the procedures which should be used in the nomination of the public member.

Record evidence indicates that public representation on commodity committees could improve the exchange of information and viewpoints between industry members and the public. Proponent witnesses indicated that the industry likely would benefit from the judgment and knowledge that a public member could contribute to industry decisions. In turn, such a member could be effective in enlightening the general public with respect to the nature and operation of the celery order. As is provided for producer or handler members, the additional public member should have an alternate.

Individuals selected from the public to serve on the committee should meet specified eligibility requirements. The record indicates that it would be appropriate that public member and alternate member nominees not have a direct financial interest nor be closely associated with the production, processing, financing or marketing of agricultural commodities. Also, such nominees should be able to devote sufficient time and express a willingness to attend committee meetings regularly and to familiarize themselves with the practices and the economics of the industry. The evidence further indicates that preference should be given to selecting nominees who are residents of the production area so that participation in committee meetings and other activities will be more convenient and less expensive.

The public member and alternate member should be nominated by the committee in accordance with rules or regulations which should indicate the qualification requirements for public member nominees and the procedure by which the committee will receive names of candidates. The committee should have the duty of recommending such procedural rules for approval by the Secretary. Record evidence indicates that the public member should be nominated by July 1 each year. This will insure sufficient time for the Secretary to consider the nominations so that selection can be made prior to the beginning of each term of office which would be the same as the terms for producer or handler members. However, the nomination of the initial public member may be made later than July 1 but as soon as practical after said member's position on the committee is authorized.

The committee's responsibility with regard to nominations of public members will require a conforming change in § 967.31 "Duties." A paragraph (m) should be added specifying that one of the committee's duties will be to secure suitable candidates for the public member and alternate positions and to nominate eligible persons to be the public member and alternate on the committee.

(2) Section 967.37 "Base Quantities" should be amended by clarifying the basis for determining Base Quantities, adding a requirement for periodic review of Base Quantities, and modifying the procedure for allocating an annual reserve. The order became effective on November 15, 1965. Since then significant changes have taken place in the distribution of sales authority among producers as reflected in individual producers' holdings of Base Quantities, and the use made of the Base Quantity provisions of the order to establish and maintain orderly marketing conditions. To ensure that regulatory activities related to the Base Quantity provision are more in accord with current and prospective production and marketing trends in the Florida celery industry, this section should be modified as follows:

Paragraphs (a) and (b) specify the procedures which were used in determining the initial Base Quantities under the order. Since these provisions are obsolete, they should be deleted and replaced by a new paragraph (a) which should provide that Base Quantities of producers with a history of production and participation under the order shall be those in effect for the 1976-77 season, as recorded by the committee.

Under the present order, as amended, initial Base Quantities for each producer were determined on the basis of the greatest number of crates of harvested celery sold by him or on his behalf during a specified historical representative period. This method of determining Base Quantities, which is authorized by Section 8c(6)(B) of the act, resulted in allocations to existing producers of authority to sell celery on the basis of a uniform rule for the first season (1965-66) of operation under the Florida Celery Marketing Order. In subsequent years a number of producers transferred their Base Quantities to other producers. Such transfers are authorized by § 967.39 "Transfers" of the order which provides that any producer's Base Quantity may be transferred in part or total for a specified period of time subject to approval of the committee. As a result, producers' Base Quantities in effect for the 1976-77 season as recorded by the Committee on December 15, 1976 are the product of the Base Quantities originally issued under a uniform rule, as subsequently modified by authorized transfers by producers to other producers. Therefore the proposed basis for determining Base Quantities of producers with a history of sales under the order is substantially the same as the basis set forth when the order was issued in 1965.

Provision also should be made for determining Base Quantities for other producers; i.e. those without a history of sales under the order. Under proposed requirements discussed later herein, such producers may acquire a base from a reserve to be established and allocated annually. Base Quantities of both existing and new producers would be subject to modification because of periodic updating of the method of determining Base Quantities, any increases which might accrue from additive allocations from a reserve to be established by the committee, cancellation of a Base Quantity due to non-use, or transfers of Base Quantity pursuant to § 967.39.

A new paragraph (b) should be incorporated to require the committee to review Base Quantities periodically, and recommend appropriate changes in the basis for determining Base Quantities. This requirement would provide a means of keeping Base Quantities consistent with sales performance.

The record indicates that over a period of time, individual producers often modify their participation in the celery business, increasing or decreasing the size of their operation and in some instances discontinuing celery production and marketing. This results in a disparity between the aggregate of Base Quantities and the production and marketing capacity of the celery industry which affects other aspects of operations under the order. For example, when a grower does not grow and market celery for one or more years, there may be an important effect on the annual sales allotments issued to producers. Each year a determination is made of the total quantity of celery to be marketed (Marketable Quantity). The ratio of the Marketable Quantity to total Base Quantities is applied to individual producers' Base Quantities to determine the quantity or allotment of celery handlers may acquire from each producer. When total Base Quantities include unused individual Base Quantities, some allotments go to inactive producers while active producers may have allotments smaller than warranted by their productive capacity and the total market requirements.

The record indicates that revisions which should be made in the order to provide for entry of new producers, expansion of existing producers' celery operations, or elimination of Base Quantities of persons who do not make a bona fide effort to grow and market celery, could have a substantial effect upon the structure of the industry in terms of numbers of producers and the size of individual celery enterprises. Therefore, in order for the Base Quantities to continue to reflect the productive and market capacity of the industry, it is appropriate to require the committee to review the use being made of Base Quantities. Such appraisals should be made at least every five years but may be made more often to correlate with the rate of change within the industry. In the event a change is deemed necessary, and after due consultation with the industry to solicit their views and suggestions, the committee should so recommend to the Secretary. Record evidence shows, and so should the proposed amendment to the order, that the Secretary may then establish through rule making procedure a revised appropriate basis for determining Base Quantities.

Paragraph (d) should be revised to require a reserve to be established and allocated annually, and to indicate the procedures which should be followed in allocating such reserve. This paragraph currently authorizes a reserve on a permissive basis whereas the proposed reserve requirement would be mandatory.

The order's present reserve authority was designed to permit adjustments in Base Quantities of producers who for various reasons had been adversely affected in their marketing operations during the representative period, or to expand the industry's production capacity in the event existing capacity was unable to satisfy increased market demand. The proposed reserve provision would permit Base Quantity adjustments for the same reasons, and in addition, should reduce the monetary value accuring to Base Quantities. Record evidence shows that until recently Base Quantities were transferred among producers for various financial considerations. However, with a substantial amount of Base Quantity available for acquisition by bona fide producers at no cost, existing Base Quantities should have little or no monetary value. This would be consistent with respect to the objective of the order, which is to achieve orderly marketing rather than to create value in a sales base. For these reasons, the proposed revision should be implemented.

Evidence in the record shows that the annual reserve should amount to six percent of total Base Quantities. Such a reserve would insure year to year stability, and still be adequate to permit new producers to gain entry into the industry, and to allow established producers to expand. The reserve to be allocated for a given year should be calculated from the total Base Quantities in effect the preceding year. The record indicates that half of the reserve should be available to new producers and the other half to existing producers. This is a reasonable and appropriate method of distributing the reserve, and should properly serve the equity interests of both new and existing producers.

Proponent witnesses recommended that the order should provide for any unallocated reserve Base Quantities for new producers to be prorated at the committee's discretion among existing producers on a uniform basis. Such a distribution would be contrary to the basic intent of the reserve authority as it relates to existing producers. The record shows that existing producers may be granted increases in Base Quantities from the reserve upon request, supported by substantial evidence of a production and marketing capability consistent with such request. To grant Base Quantities otherwise, even though on a uniform basis, would serve no useful purpose and, further, would tend to dilute the significance of Base Quantities granted to new producers. Therefore, any reserve for new producers which is unallocated should not be made available to other producers.

FEDERAL REGISTER, VOL. 42, NO. 98—FRIDAY, MAY 20, 1977

The record indicates, and so should the proposed amendment, that additive Base Quantities issued to existing producers from a reserve should be valid for only one season but Base Quantities issued or allocated to new producers should be permanent. Allocations to existing producers would be related to new or additional resources acquired by them or a potential new market. If experience warrants continued production and marketing at the higher level, the producer could again request an additive Base Quantity. The new producer faces different circumstances justifying different treatment with regard to receiving a Base Quantity for a reserve. The establishment of a new farming operation to produce and market celery requires the expenditure of a large amount of money. A producer may not be willing or able to make resource commitments of the magnitude required for a celery business without assurance of an opportunity to market future crops. Therefore, it is fair and reasonable to provide that Base Quantities issued to new producers should not be subject to reissuance each year. At the same time, new producers should be obligated to demonstrate their intent to maintain a viable celery operation. For this reason, and to preclude speculation with respect to reserve Base Quantities, the record shows that the order should provide that Base Quantities issued to new producers cannot be transferred within three years after issuance.

The order should continue to provide that the committee shall establish, subject to approval of the Secretary, rules and procedures to be used in determining the reserve and the adjustments to be made in Base Quantities. The guidelines set forth in the order for the size of the reserve and its allocation to new and existing producers, and for obtaining Base Quantities will help insure equitable treatment for both an applicant and other producers. Therefore, such standards are determined to be proper and adequate for administration of the order. The specific criteria would help insure that adjustments would be fair and reasonable.

Requests for Base Quantity under the reserve authority, together with supporting material, should be made to the committee not later than April 1. This would provide adequate time for the committee to evaluate each request and inform each person of its decision early enough for those granted new Base to initiate plans for the ensuing season. Because of the time required to develop procedures governing the establishment and distribution of the reserve, the order should provide that the reserve feature of the program will become effective for the 1978–79 season.

A new paragraph (e) should be added to empower the committee to cancel a producer's Base Quantity if he does not make a bona fide effort during two consecutive seasons to produce and market celery thereunder. The record indicates that two consecutive years of not marketing should be construed to be evidence of a producer's withdrawal from the celery industry. Cancellation of unused Base Quantities would make the annual calculation of the Marketable Quantity more realistic, should enhance the committee's ability to evaluate potential production, and should contribute to more efficient program operation. This provision should not be mandatory, however, in order that exceptions may be made to recognize extenuating circumstances. Record evidence indicates that one indication of a bona fide effort to produce and market celery would be a producer's marketing of at least half of the alloted celery in which he has a proprietary interest; that is, celery which he owns in part or in total. Other criteria may be similarly designed to preclude token production to preserve a Base Quantity. Rules and regulations should be developed by the committee for approval of the Secretary indicating the procedures to be used in implementing this procedure.

A new paragraph (f) should be added to require annual registration by producers. Under such a requirement, each person planning to grow celery during the ensuing season would have to register with the committee, and indicate his commitments to produce and market celery. Commitments as used in the order relate to the obligation of resources of production, either potentially or in fact. Such resources would include not only the land, labor, and facilities, but also the finances which are necessary to produce celery. The registration procedure would impose no unreasonable burden on the individual, and would contribute greatly to more efficient operation of the order. Registration would provide the committee with a better indication of the potential for production so that a meaningful Marketable Quantity and individual producers' sales allotments could be determined. In the event a producer chose not to register, his Base Quantity should not be affected for that season but he should not receive a marketable allotment. Otherwise, the beneficial effect of the program in achieving a balance of supply with market requirements would be greatly diminished.

The record indicates that all producers should register no later than May 1 each year. This is necessary so that the committee will have sufficient time prior to June 15 to evaluate commitments of registering producers to grow and market celery in the ensuing season. June 15 is the final date for the committee to meet and adopt a marketing policy, including a recommended Marketable Quantity. The 45 day interval from May 1 through June 14 probably is the minimum amount of time needed to evaluate the industry's production capacity and its relationship to prospective market demands. The committee may find through experience that more time would be desirable. If it should be decided that registration should be required by some date other than May 1, the order should allow for such a change.

Proponent witnesses testified that although May 1 should normally be the final date for registration, a later date in 1977 should be specified by the Secretary, provided that such date be no later than July 31 Such a deadline is necessary because producers would not have sufficient time in which to adjust their farming operation to an allocation calculated on the basis of Base Quantities registered after July 31. The requested latitude in setting an initial registration date would permit the implementation of this feature of the proposal a year earlier than would otherwise be practicable and therefore should be provided.

(3) Paragraph (a) of § 967.38 Marketable Allotments should be revised to provide that the Uniform Percentage shall be calculated each year by dividing the Marketable Quantity by the total Base Quantities of producers who register with the committee. As discussed earlier, some Base Quantities may not be used every year. The inclusion of such Base Quantities in the calculation of the Uniform Percentage would distort the relationship between production capacity and market requirements, contrary to the objective of the order.

Such a change in calculation of the Uniform Percentage would require a conforming change in § 967.15 Uniform Percentage so that it would state that such percentage would be derived by dividing the Marketable Quantity by the total Base Quantities of registered producers as provided in § 967.38.

Also, paragraph (e) of § 967.38 Marketable Allotments should be revised to provide that whenever the Marketable Quantity is equal to or smaller than total Base Quantities, the first 37,500 crates of all producers' Base Quantities shall be omitted in the calculation and application of the Uniform Percentage. The order presently specifies that only the Base Quantities of those producers with Base Quantities of 37,500 crates or less must be omitted in calculation of the Uniform Percentage.

The objective of the current provision is to prevent undue hardship for the relatively small producers. Each year the Secretary determines the total amount of celery which should be marketed (Marketable Quantity). The Marketable Quantity is divided by the total Base Quantities of registered producers, with the result being the Uniform Percentage. This percentage is then applied to each producer's Base Quantity to determine each producer's annual sales allotment. However, the Base Quantities of the smaller producers, those with 37,500 crates or less of Base Quantity, are excluded from both the calculation and the application of the Uniform Percentage. Their annual sales allotments must be equal to (or in the event of a Uniform Percentage above 100 percent, larger than) their total Base Quantity. While this provision is beneficial to producers who choose to maintain a small celery business, it tends to discourage expansion on the part of other small producers. For example, a producer with a Base Quantity of 37,500 crates acquiring one additional crate of Base Quantity becomes subject to application of the Uniform Percentage; if such percentage were 90.

his Marketable Allotment would be 33,751 crates. By acquiring the additional crate of Base Quantity, he would reduce his sales allotment by 3,750 crates.

The proposed revision would still protect the small producer from a reduction in his sales allotment when the Marketable Quantity is smaller than total Base Quantities. However, by exempting the first 37,500 crates of every producer's Base Quantity from application of the Uniform Percentage under such circumstances, a deterrent to expansion on the part of small producers would be eliminated.

It was proposed that in the event the Uniform Percentage exceeded 100 percent, such percentage should be applied to both the exempted first 37,500 crates and the additional base, if any, of each producer. This would result in a total of producers' marketable allotments exceeding the Marketable Quantity which would be contrary to the objective of the program. Therefore, the order should provide that when the Marketable Quantity is larger than total Base Quantities there shall be no exemption for the first 37,500 crates in the calculation of the Uniform Percentage.

A new paragraph (f) should be added to this section to provide that Marketable Allotments shall be issued only to those producers who register with the committee by May 1 each year. As discussed earlier herein, registration by producers to indicate their intent and commitment to produce and market celery is essential to effective operation of the order. Therefore, such a requirement is appropriate.

(4) Section 967.44 of the order should be amended to authorize production research. The order presently contains authority for the committee to undertake or finance marketing research and development projects and marketing promotion. Celery growers in Florida requested of the Secretary that the order be amended to authorize committee expenditures for production research to broaden the possibilities for reseach beneficial to the Florida celery industry and its customers.

The record indicates that the need for research on matters related to the production of celery is great. Producers of this crop are beset by a variety of problems ranging from those associated with attacks by disease and insects to the need for varieties better suited to the production area.

Expert witnesses testified to the continuing requirement for research in order to solve the severe problems caused in recent years by insects, particularly the leaf miner which is a relative newcomer on the local list of problem pests. Leaf miner infestations have sharply curtailed yields of good quality celery, and control efforts thus far have been only partially effective. Harmful soil organisms remain a problem, as do virus and root disease, and the various blights.

The improvement of existing varieties and development of new varieties might contribute significantly to the production of celery that is better able to withstand the attacks of the many pests. Varietal research may also lead ultimately to a reduced incidence of premature bolting or growth cracks, and lower the susceptibility of celery to damage by low temperatures.

Research in any or all of the aforementioned areas would contribute to lower costs and more efficient production. However, production research should not be limited to such areas. The committee should have broad and flexible authority for timely development of production research programs on any problems that arise.

In recent years, there has been active competition for research dollars within the agricultural community. Celery must share with many other crops, with similar production problems, the available research time, effort, and funds. Indications are that a relatively small amount of celery industry money, provided by the committee, will encourage research into the areas especially desired by the industry. The act provides that an assessment can be levied for specific purposes including production research. With these added funds, the committee can make a substantial commitment to such research.

Record evidence shows that currently most production research on celery in Florida is performed by public agencies, such as the University of Florida or the U.S. Department of Agriculture. Research funded by the committee would most likely also be carried out by such public agencies. However, this would not rule out having private organizations or the committee itself conduct such research.

All proposals for research must be submitted to the Secretary for approval. Also, the committee should have the authority to make any necessary changes in the format of the research project as long as it does not change the original objectives. Any change that required a greater expenditure of funds would require Departmental approval. Activity reports on research conducted should be issued by the committee annually, although interim reports on research projects may be issued. Reports should also be issued in writing or verbally by the organization conducting the research. All written reports should be provided to the Secretary and committee members as well as any other interested parties.

The record has demonstrated that a program of production research administered by the marketing order committee should have a positive effect upon the production of Florida celery, thereby increasing returns to growers. In view thereof, it is concluded that the order should be amended to authorize production research.

(5) A new § 967.63 should be added to the order to provide for the receipt of voluntary contributions to be used only for research and development projects. Record evidence indicates that research and market development projects for Florida celery directly benefit growers of that commodity, and secondarily benefit other groups and businesses whose interests are allied with the production and marketing of celery. These groups frequently desire to contribute resources to research and development projects and the order should provide that such contributions may be accepted by the committee. It is important, however, that the committee have complete control over the use of any contributions, which must be free of any encumbrances by the donor.

(6) Some of the amendatory actions included in this recommended decision require that certain conforming changes be made so that the order, as amended, will be in conformity with those actions. One such change (add a new paragraph (m) to § 967.31, *Duties*) is discussed with the issue to which it is pertinent. All such changes should be incorporated in the recommended amendment of the order.

Rulings on briefs of interested persons. At the conclusion of the hearing, the Administrative Law Judge fixed February 11, 1977, as the final date for interested persons to file proposed findings and conclusions, and written arguments or briefs, based upon the evidence received at the hearing. One brief was filed by John Joseph Cassidy, Esq., and Jamie S. Gorelick, Esq., on behalf of Gressinger and Sons. Every point in the brief was carefully considered along with record evidence in making the findings and reaching the conclusions herein set forth. To the extent that the findings and conclusions in the brief are inconsistent with findings and conclusions contained herein, requests to make such findings or to reach such conclusions are denied on the basis of the facts found and stated in connection with this recommended decision.

In addition to containing proposed findings and conclusions on the material issues, the brief recommended that all information obtained by the committee concerning transactions, activities, and use being made of base quantities and marketable allotments be available to committee members. The act prohibits the disclosure of information that may affect detrimentally the business operations of the persons who furnish reports required under marketing orders. However, since the operation of this allocation program is inextricably involved with individual producers' base quantities and marketable allotments, this information should not be treated as confidential. All other information must remain confidential and in the custody of the committee staff, as required under § 967.73 of the order.

Rulings on exceptions. Within the period provided therefor, an exception to the proposed amendment was filed by the Federal Trade Commission. The exception endorsed the objectives of the proposed changes but recommended several modifications. One recommendation was that the order provide that the Uniform Percentage should not be so changed each season as to nullify the effect on the Marketable Quantity of increasing total Base Quantities. This would require that the Marketable Quantity be established each year as a constant relative to total

Base Quantities. Such a procedure would differ materially from that now used. Under the Florida celery marketing order, the Secretary establishes each year a Marketable Quantity which is the total amount of celery which may be marketed. The Marketable Quantity is determined after careful evaluation by the committee and the Secretary of the numerous factors associated with the production and marketing of celery, and is the amount of celery deemed necessary to meet market requirements and establish orderly marketing conditions. It is obvious that to substitute an inflexible method of determining the Marketable Quantity, which might have little or no relevance to the amount of celery needed to balance supply with market requirements, for the procedures now in use would defeat the purpose of the order. Therefore, the recommendation must be denied.

Another suggestion was that issuance of Base Quantities from the reserve be mandatory. The record evidence and the recommended decision based thereon showed that under the proposed amendments the Committee would be required each year to establish a reserve in the amount of six percent of total Base Quantities, with the implied understanding that such reserve was to be allocated to bona fide producers who apply for additional base. However, for clarification the recommended decision and order are revised to indicate that a reserve shall be established and allocated annually to producers who apply for such base.

It was also recommended that the order provide that Base Quantities be allocated to existing producers ranked on the basis of their sales relative to allotments the previous year and that a minimum economic unit be considered in allocating a base quantity to a new producer. Such considerations may be appropriate in allocating reserve Base Quantities to producers, but as discussed in the recommended decision and order the committee should take into consideration many more factors including past production of celery by applicant, acreage planted, average yields, the production capacity of the farm or land the applicant expects to use, land, labor, and equipment available to applicant for celery production, economic and marketing factors, and other factors deemed pertinent by the committee.

Contentions were made that the requirement for established producers to renew requests for additional Base Quantities annually might discourage such requests. On the other hand, the record shows that this provision is needed to prevent the unwarranted acquisition and transfer of reserve Base Quantities by individuals who have no basic desire to expand their celery operation. For this reason, the exception must be denied. Another contention with regard to the requirement for annually renewing requests for additive base was that it might result in little actual increase in production by existing producers. The record shows that established producers would have available to them 50 percent of the reserve Base Quantities and that the size of the reserve would increase each year. Thus, actual expansion could be significant for individual established producers.

Contentions also were made that the proposed provision under the order for forfeiture of unused Base Quantities may permit large quantities of base to lie idle if the only indication of non-use would be a producer marketing less than half of his total Base Quantity. Such a development appears unlikely, however. The order provides that additional criteria shall be developed by the committee, subject to approval of the Secretary, as to whether bona fide efforts are being made to produce and sell celery. Additionally, the record shows that the requirement for periodic review and updating of Base Quantities should materially reduce the incidence of unused allotments or Base Quantities. Producers who intend to stay in the celery business will have a strong incentive to market as much celery as authorized and thereby maximize their history of sales which may be incorporated when an updated basis for establishing Base Quantities is promulgated.

Each point in the exception was given careful consideration in conjunction with the record evidence. To any extent that any exception is not specifically ruled upon or the findings and conclusions contained herein are at variance with the exception, such exception is hereby overruled for the reasons previously stated in this decision.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement, as Amended, Regulating the Handling of Celery Grown in Florida," and "Order Amending the Order, as Amended, Regulating the Handling of Celery Grown in Florida," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the annexed marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of the marketing agreement are identical with those contained in the order as hereby proposed to be amended by the annexed order which is published with this decision.

Referendum order. It is hereby directed that a referendum be conducted in accordance with the procedure for the conduct of referenda (7 CFR 900.400 *et seq.*), to determine whether the issuance of the annexed order as amended and as hereby proposed to be amended, regulating the handling of celery grown in Florida, is approved or favored by producers, as defined under the terms of the order, who during the representative period were engaged in the production area in the production of the regulated commodity for market.

The representative period for the conduct of such referendum is hereby determined to be August 1, 1976, through May 15, 1977.

The agents of the Secretary to conduct such referendum are hereby designated to be William C. Knope and James B. Wendland.

Signed at Washington, D.C., on: May 16, 1977.

ROBERT H. MEYER,
Assistant Secretary for Marketing Services.

ORDER[1] AMENDING THE ORDER, AS AMENDED, REGULATING THE HANDLING OF CELERY GROWN IN FLORIDA

Findings and determinations. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon proposed amendment of the marketing agreement, as amended, and Order No. 967, as amended (7 CFR Part 967, regulating the handling of celery grown in Florida.

Upon the basis of the record it is found that:

(1) The order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The order, as amended, and as hereby further amended, regulates the handling of celery grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(3) The order, as amended, and as hereby further amended, is limited in its application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) The order, as amended, and as hereby further amended, prescribes, so far as practicable, such different terms applicable to different parts of the production area as are necessary to give

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

due recognition to the differences in the production and marketing of celery grown in the production area; and

(5) All handling of celery grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof the handling of celery grown in Florida, shall be in conformity to and in compliance with the terms and conditions of the order, as hereby amended, as follows:

The provisions of the proposed marketing agreement and order, amending the order, contained in the recommended decision issued by the Acting Administrator on March 29, 1977, and published in the FEDERAL REGISTER on April 1, 1977 (42 FR 17458), with a slight modification in § 967.38(e), shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein.

1. Revise § 967.15 to read as follows:

§ 967.15 Uniform percentage.

"Unform Percentage" means the percentage for any given season resulting from dividing the Marketable Quantity by the total Base Quantities registered by producers as provided in § 967.38.

2. Revise § 967.25 to read as follows:

§ 967.25 Establishment and membership.

There is hereby established a Florida Celery Committee consisting of 16 members, including 15 producer or handler members and one public member to administer the terms and provisions of this part. Each shall have a respective alternate who shall have the same qualifications as the member.

3. Revise § 967.26 to read as follows:

§ 967.26 Eligibility.

Each member and alternate of the committee, except for the public member and alternate, shall be at the time of his selection and during his term of office, a producer or handler, or an officer or employee of a producer or handler in the group for which selected. The public member shall be neither a producer nor handler and shall have no direct financial interest in the production or marketing, except as a consumer, of agricultural products.

4. Revise § 967.27 by adding a new paragraph (f) to read as follows:

§ 967.27 Nominations.

* * * * *

(f) The members of the committee selected by the Secretary pursuant to § 967.32 shall nominate a public member and alternate member of the committee. The committee shall recommend rules for receiving names of persons to be considered for nomination to the public member and alternate positions. Rules shall also be recommended for establishing eligibility of persons nominated to the public member and alternate positions. The persons nominated for the public member and alternate positions shall be submitted with the incumbent committee to the Secretary by July 1 of each year together with information deemed pertinent by the committee or as requested by the Secretary.

5. Amend § 967.31 by adding paragraph (m) to read as follows:

§ 967.31 Duties.

* * * * *

(m) To secure suitable candidates for the public member and alternate positions, and to nominate persons for such positions on the committee.

6. Amend § 967.37 to read as follows:

§ 967.37 Base Quantities.

(a)(1) Base Quantities for producers with a history of production and order participation for the period 1965–66 through 1976–77 shall be Base Quantities in effect for the 1976–77 season, as recorded by the Florida Celery Committee on December 15, 1976, subject to modifications relating to current production and marketing experience specified in (b) through (e) of this section, or to transfers pursuant to § 967.39.

(2) Base Quantities for other producers shall be established pursuant to Base Quantity reserve as specified in paragraph (d) of this section, subject to modifications relating to current production and marketing experience specified in (b) through (e) of this section, or to transfer pursuant to § 967.39.

(b) Periodically, but at least once each five years, the committee shall review Base Quantities and recommend any change in the formula, to be prescribed by the Secretary, for determining Base Quantities which may be deemed appropriate.

* * * * *

(d)(1) Beginning with the 1978/79 season, a reserve in the amount of six percent of the total Base Quantities shall be established annually. Such reserve shall be used for the issuance of Base Quantities to new producers and adjustments in Base Quantities for producers with existing Base Quantities, with 50 percent being made available for new producers and 50 percent available for adjustments for producers with existing Base Quantities.

(2) Base Quantities issued to new producers shall be permanent, subject to requirements of § 967.37(e). Base Quantities issued to new producers shall not be transferrable within three years after issuance. Any adjustments in Base Quantities issued to producers with existing Base Quantities shall be effective for one season only and a new request by such producers for adjustment in Base Quantity shall be submitted each season.

(3) The committee may recommend rules for establishing such reserve and for procedures whereby persons may apply for Base Quantities thereunder. Such rules shall be subject to approval by the Secretary. Rules may provide for open informal hearings by the committee on applicants' requests and may establish guides or standards for equitable and thorough consideration of pertinent factors relating to each case, including but not limited to past production of celery by applicant, acreage planted, average yields, the production capacity of the farm or land the applicant expects to use, land, labor, and equipment available to applicant for celery production, economic and marketing factors, and other factors deemed pertinent.

(4) Each person filing an application hereunder for a new Base Quantity or adjustment in an established Base Quantity shall be notified by the committee of its determination thereon. Such determination and considerations appertaining thereto shall be subject to review by the Secretary. If a Base Quantity is issued to an applicant hereunder, the requirements of § 967.38(c) shall then apply.

(e) A condition for the continuing validity of a Base Quantity is production of celery thereunder. If no bona fide effort is made to produce and sell celery thereunder for two consecutive seasons commencing with the 1977–78 season, the Base Quantity may be declared invalid due to lack of use and cancelled at the end of the second season of nonproduction. The committee shall determine criteria, subject to approval by the Secretary, as to whether a bona fide effort has been made to produce and sell celery, including one requirement that the producer must have sold at least 50 percent of each of his seasonal Marketable Allotments, unless prevented from doing so by acts of God or other circumstances beyond his control.

(f) Annual registration of Base Quantity holders will be required no later than May 1 or such other date as may be approved pursuant to regulations. For the 1977–78 season Base Quantity holders shall register within 30 days following the effective date of this part but no later than July 31, 1977. Any Base Quantity holder who does not register or who has not made firm and substantial commitments to produce celery for the forthcoming season shall have his Base Quantity eliminated from the calculations in determining the Uniform Percentage. However, such procedure will not cause the Base Quantity holder to lose his Base Quantity.

7. Amend § 967.38 to read as follows:

§ 967.38 Marketable Allotments.

(a) When the Secretary establishes a season's Marketable Quantity, a percentage shall be determined by dividing the amount fixed as the season's Marketable Quantity by the total Base Quantities of producers who have registered with the committee pursuant to § 967.37(f).

* * * * *

(e) When the Marketable Quantity is equal to or smaller than total Base Quantities, the first 37,500 crates of each producer's Base Quantity shall be subtracted from both the Marketable Quan-

Base Quantities. Such a procedure would differ materially from that now used. Under the Florida celery marketing order, the Secretary establishes each year a Marketable Quantity which is the total amount of celery which may be marketed. The Marketable Quantity is determined after careful evaluation by the committee and the Secretary of the numerous factors associated with the production and marketing of celery, and is the amount of celery deemed necessary to meet market requirements and establish orderly marketing conditions. It is obvious that to substitute an inflexible method of determining the Marketable Quantity, which might have little or no relevance to the amount of celery needed to balance supply with market requirements, for the procedures now in use would defeat the purpose of the order. Therefore, the recommendation must be denied.

Another suggestion was that issuance of Base Quantities from the reserve be mandatory. The record evidence and the recommended decision based thereon showed that under the proposed amendments the Committee would be required each year to establish a reserve in the amount of six percent of total Base Quantities, with the implied understanding that such reserve was to be allocated to bona fide producers who apply for additional base. However, for clarification the recommended decision and order are revised to indicate that a reserve shall be established and allocated annually to producers who apply for such base.

It was also recommended that the order provide that Base Quantities be allocated to existing producers ranked on the basis of their sales relative to allotments the previous year and that a minimum economic unit be considered in allocating a base quantity to a new producer. Such considerations may be appropriate in allocating reserve Base Quantities to producers, but as discussed in the recommended decision and order the committee should take into consideration many more factors including past production of celery by applicant, acreage planted, average yields, the production capacity of the farm or land the applicant expects to use, land, labor, and equipment available to applicant for celery production, economic and marketing factors, and other factors deemed pertinent by the committee.

Contentions were made that the requirement for established producers to renew requests for additional Base Quantities annually might discourage such requests. On the other hand, the record shows that this provision is needed to prevent the unwarranted acquisition and transfer of reserve Base Quantities by individuals who have no basic desire to expand their celery operation. For this reason, the exception must be denied. Another contention with regard to the requirement for annually renewing requests for additive base was that it might result in little actual increase in production by existing producers. The record shows that established producers would have available to them 50 percent of the reserve Base Quantities and that the size of the reserve would increase each year. Thus, actual expansion could be significant for individual established producers.

Contentions also were made that the proposed provision under the order for forfeiture of unused Base Quantities may permit large quantities of base to lie idle if the only indication of non-use would be a producer marketing less than half of his total Base Quantity. Such a development appears unlikely, however. The order provides that additional criteria shall be developed by the committee, subject to approval of the Secretary, as to whether bona fide efforts are being made to produce and sell celery. Additionally, the record shows that the requirement for periodic review and updating of Base Quantities should materially reduce the incidence of unused allotments or Base Quantities. Producers who intend to stay in the celery business will have a strong incentive to market as much celery as authorized and thereby maximize their history of sales which may be incorporated when an updated basis for establishing Base Quantities is promulgated.

Each point in the exception was given careful consideration in conjunction with the record evidence. To any extent that any exception is not specifically ruled upon or the findings and conclusions contained herein are at variance with the exception, such exception is hereby overruled for the reasons previously stated in this decision.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement, as Amended, Regulating the Handling of Celery Grown in Florida," and "Order Amending the Order, as Amended, Regulating the Handling of Celery Grown in Florida," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the annexed marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of the marketing agreement are identical with those contained in the order as hereby proposed to be amended by the annexed order which is published with this decision.

Referendum order. It is hereby directed that a referendum be conducted in accordance with the procedure for the conduct of referenda (7 CFR 900.400 *et seq.*), to determine whether the issuance of the annexed order as amended and as hereby proposed to be amended, regulating the handling of celery grown in Florida, is approved or favored by producers, as defined under the terms of the order, who during the representative period were engaged in the production area in the production of the regulated commodity for market.

The representative period for the conduct of such referendum is hereby determined to be August 1, 1976, through May 15, 1977.

The agents of the Secretary to conduct such referendum are hereby designated to be William C. Knope and James B. Wendland.

Signed at Washington, D.C., on: May 16, 1977.

ROBERT H. MEYER,
Assistant Secretary for Marketing Services.

ORDER[1] AMENDING THE ORDER, AS AMENDED, REGULATING THE HANDLING OF CELERY GROWN IN FLORIDA

Findings and determinations. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon proposed amendment of the marketing agreement, as amended, and Order No. 967, as amended (7 CFR Part 967, regulating the handling of celery grown in Florida.

Upon the basis of the record it is found that:

(1) The order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The order, as amended, and as hereby further amended, regulates the handling of celery grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(3) The order, as amended, and as hereby further amended, is limited in its application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) The order, as amended, and as hereby further amended, prescribes, so far as practicable, such different terms applicable to different parts of the production area as are necessary to give

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

due recognition to the differences in the production and marketing of celery grown in the production area; and

(5) All handling of celery grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof the handling of celery grown in Florida, shall be in conformity to and in compliance with the terms and conditions of the order, as hereby amended, as follows:

The provisions of the proposed marketing agreement and order, amending the order, contained in the recommended decision issued by the Acting Administrator on March 29, 1977, and published in the FEDERAL REGISTER on April 1, 1977 (42 FR 17458), with a slight modification in § 967.38(e), shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein.

1. Revise § 967.15 to read as follows:

§ 967.15 Uniform percentage.

"Uniform Percentage" means the percentage for any given season resulting from dividing the Marketable Quantity by the total Base Quantities registered by producers as provided in § 967.38.

2. Revise § 967.25 to read as follows:

§ 967.25 Establishment and membership.

There is hereby established a Florida Celery Committee consisting of 16 members, including 15 producer or handler members and one public member to administer the terms and provisions of this part. Each shall have a respective alternate who shall have the same qualifications as the member.

3. Revise § 967.26 to read as follows:

§ 967.26 Eligibility.

Each member and alternate of the committee, except for the public member and alternate, shall be at the time of his selection and during his term of office, a producer or handler, or an officer or employee of a producer or handler in the group for which selected. The public member shall be neither a producer nor handler and shall have no direct financial interest in the production or marketing, except as a consumer, of agricultural products.

4. Revise § 967.27 by adding a new paragraph (f) to read as follows:

§ 967.27 Nominations.

* * * * *

(f) The members of the committee selected by the Secretary pursuant to § 967.32 shall nominate a public member and alternate member of the committee. The committee shall recommend rules for receiving names of persons to be considered for nomination to the public member and alternate positions. Rules shall also be recommended for establishing eligibility of persons nominated to the public member and alternate positions. The persons nominated for the public member and alternate positions shall be submitted by the incumbent committee to the Secretary by July 1 of each year together with information deemed pertinent by the committee or as requested by the Secretary.

5. Amend § 967.31 by adding paragraph (m) to read as follows:

§ 967.31 Duties.

* * * * *

(m) To secure suitable candidates for the public member and alternate positions, and to nominate persons for such positions on the committee.

6. Amend § 967.37 to read as follows:

§ 967.37 Base Quantities.

(a) (1) Base Quantities for producers with a history of production and order participation for the period 1965–66 through 1976–77 shall be Base Quantities in effect for the 1976–77 season, as recorded by the Florida Celery Committee on December 15, 1976, subject to modifications relating to current production and marketing experience specified in (b) through (e) of this section, or to transfers pursuant to § 967.39.

(2) Base Quantities for other producers shall be established pursuant to Base Quantity reserve as specified in paragraph (d) of this section, subject to modifications relating to current production and marketing experience specified in (b) through (e) of this section, or to transfer pursuant to § 967.39.

(b) Periodically, but at least once each five years, the committee shall review Base Quantities and recommend any change in the formula, to be prescribed by the Secretary, for determining Base Quantities which may be deemed appropriate.

* * * * *

(d) (1) Beginning with the 1978/79 season, a reserve in the amount of six percent of the total Base Quantities shall be established annually. Such reserve shall be used for the issuance of Base Quantities to new producers and adjustments in Base Quantities for producers with existing Base Quantities, with 50 percent being made available for new producers and 50 percent available for adjustments for producers with existing Base Quantities.

(2) Base Quantities issued to new producers shall be permanent, subject to requirements of § 967.37(e). Base Quantities issued to new producers shall not be transferrable within three years after issuance. Any adjustments in Base Quantities issued to producers with existing Base Quantities shall be effective for one season only and a new request by such producers for adjustment in Base Quantity shall be submitted each season.

(3) The committee may recommend rules for establishing such reserve and for procedures whereby persons may apply for Base Quantities thereunder. Such rules shall be subject to approval by the Secretary. Rules may provide for open informal hearings by the committee on applicants' requests and may establish guides or standards for equitable and thorough consideration of pertinent factors relating to each case, including but not limited to past production of celery by applicant, acreage planted, average yields, the production capacity of the farm or land the applicant expects to use, land, labor, and equipment available to applicant for celery production, economic and marketing factors, and other factors deemed pertinent.

(4) Each person filing an application hereunder for a new Base Quantity or adjustment in an established Base Quantity shall be notified by the committee of its determination thereon. Such determination and considerations appertaining thereto shall be subject to review by the Secretary. If a Base Quantity is issued to an applicant hereunder, the requirements of § 967.38(c) shall then apply.

(e) A condition for the continuing validity of a Base Quantity is production of celery thereunder. If no bona fide effort is made to produce and sell celery thereunder for two consecutive seasons commencing with the 1977–78 season, the Base Quantity may be declared invalid due to lack of use and cancelled at the end of the second season of nonproduction. The committee shall determine criteria, subject to approval by the Secretary, as to whether a bona fide effort has been made to produce and sell celery, including one requirement that the producer must have sold at least 50 percent of each of his seasonal Marketable Allotments, unless prevented from doing so by acts of God or other circumstances beyond his control.

(f) Annual registration of Base Quantity holders will be required no later than May 1 or such other date as may be approved pursuant to regulations. For the 1977–78 season Base Quantity holders shall register within 30 days following the effective date of this part but no later than July 31, 1977. Any Base Quantity holder who does not register or who has not made firm and substantial commitments to produce celery for the forthcoming season shall have his Base Quantity eliminated from the calculations in determining the Uniform Percentage. However, such procedure will not cause the Base Quantity holder to lose his Base Quantity.

7. Amend § 967.38 to read as follows:

§ 967.38 Marketable Allotments.

(a) When the Secretary establishes a season's Marketable Quantity, a percentage shall be determined by dividing the amount fixed as the season's Marketable Quantity by the total Base Quantities of producers who have registered with the committee pursuant to § 967.37(f).

* * * * *

(e) When the Marketable Quantity is equal to or smaller than total Base Quantities, the first 37,500 crates of each producer's Base Quantity shall be subtracted from both the Marketable Quan-

tity and total Base Quantities when the Uniform Percentage is calculated in this section (§ 967.38(a)), and the Uniform Percentage for the first 37,500 crates will be 100 percent. In the event the Marketable Quantity exceeds total Base Quantities, there shall be no exemption for the first 37,500 crates and the Uniform Percentage shall be applied to each producer's total Base Quantity.

(f) Marketable allotments shall be issued only to producers who have registered by May 1, or such other date prescribed by the Secretary, and indicated firm and substantial commitments for the production of celery for the forthcoming season.

8. Revise the section heading and the first two sentences of § 967.44 to read as follows:

§ 967.44 Research and development.

The committee may, with the approval of the Secretary, establish or provide for the establishment of projects involving production research, marketing research and development projects, and marketing promotion including paid advertising, designed to assist, improve or promote the marketing, distribution and consumption or efficient production of celery. The expenses of such projects shall be paid by funds collected pursuant to §§ 967.61 or 967.63.* * *

9. Add a new § 967.63 to read as follows.

§ 967.63 Contributions.

The committee may accept voluntary contributions but these shall only be used to pay expenses incurred pursuant to § 967.44. Furthermore, such contributions shall be free from any encumbrances by the donor and the committee shall retain complete control of their use.

§ 967.91 Counterparts.

This agreement may be executed in multiple counterparts and when one counterpart is signed by the Secretary, all such counterparts shall constitute, when taken together, one and the same instruments as if all signatures were contained in one original.

§ 967.92 Additional parties.

After the effective date hereof, any handler may become a party to this agreement if a counterpart is executed by him and delivered to the Secretary. This agreement shall take effect as to such new contracting party at the time such counterpart is delivered to the Secretary, and the benefits, privileges, and immunities conferred by this agreement shall then be effective as to such new contracting party.

§ 967.93 Order with marketing agreement.

Each signatory handler requests the Secretary to issue, pursuant to the act, an order providing for regulating the handling of celery in the same manner as is provided for in this agreement. The undersigned hereby authorizes the Director, or Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, to correct any typographical errors which may have been made in this marketing agreement.

In witness whereof, the contracting parties, acting under the provisions of the act, for the purpose and subject to the limitations therein contained, and not otherwise, have hereto set their respective signatures and seals.

---------- By: ----------[2]
(Firm Name) (Signature)

(Mailing Address) (Title)

(Corpoorate Seal; if none, so state) (Date of Execution)

[2] If one of the contracting parties to this agreement is a corporation my signature constitutes certification that I have the power granted to be by the Board of Diretcors to bind this corporation to the marketing agreement.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 730-3]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Air Pollution Control; State Statutes and State and Washoe County Regulations; State of Nevada

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed approval with exceptions.

SUMMARY: Through this notice EPA proposes to approve with exceptions certain State statutes, and State and local regulations pertaining to motor vehicles, new and modified stationary sources, power plants, public availability of emission data, stack testing, and other miscellaneous items. These items have been submitted by the State on February 20, and June 14, 1974; and July 7, September 10, and October 31, 1975 as revisions to various portions of the State implementation plan (SIP) for attainment and maintenance of the National Ambient Air Quality Standards. EPA also proposes to disapprove portions of the approved SIP which have not been resubmitted and to rescind certain previous disapproval and substitute rulemaking actions. EPA has reviewed the submissions, identified those portions which are considered revisions, and evaluated the revisions for consistency with 40 CFR Part 51, Requirements for Preparation, Adoption, and Submittal of Implementation Plans, and the Clean Air Act, as amended.

DATE: Comments by: June 20, 1977.

ADDRESS: Send comments to: Regional Administrator, Attn: Air & Hazardous Materials Division, Air Programs Branch (A-4), EPA, Region IX, 100 California Street, San Francisco, California 94111.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air & Hazardous Materials Division, Attn: Morris Goldberg, EPA, Region IX, 100 California Street, San Francisco, California 94111. Telephone 415-556-7473.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On January 28, 1972, pursuant to section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the State of Nevada submitted to EPA an implementation plan for the attainment and maintenance of the National Ambient Air Quality Standards. The plan contained State statutes, State and local regulations, control strategies and other information. On May 31, 1972 (37 FR 10842) the Administrator approved the SIP with specific exceptions. Since then, Nevada has submitted to EPA numerous revisions to portions of the SIP including new and revised legislative actions and regulations adopted by the State and local agencies. EPA has reviewed, or is in the process of reviewing these revisions. Revisions to various portions of the SIP were submitted on February 20, and June 14, 1974; and July 7, September 10, and October 31, 1975.

DISCUSSION OF ACTION

The adoption of regulations by the State and local agencies and the adoption of SIP revisions by the State were in conformance with the procedural requirements of 40 CFR 51.4. Pursuant to 40 CFR 51.4, all regulations and SIP revisions were the subject of a public hearing. Notice of such hearings were prominently advertised at least thirty days in advance. Also the items subject to hearing were available for public inspection in the region affected for at least thirty days prior to the hearing date.

The SIP revisions submitted on February 20 and June 14, 1974 have been subdivided. Some portions have been proposed for approval and others have been approved or disapproved in other FEDERAL REGISTER issuances. The remaining portions have been superseded by the SIP revision submitted on October 31, 1975.

The SIP revision submitted on July 7, 1975 contained Air Pollution Control Regulations of the District Board of Health of Reno-Sparks-Washoe County (Washoe County Regulations) for the review of new and modified stationary and complex (indirect) sources.

The SIP revision submitted on September 10, 1975 contained revisions to the Nevada Revised Statutes. The statutes relating to air pollution control address authority for vehicular inspection and testing, complex source review, power plant emissions, public availability of emission data, stack testing, and other miscellaneous items.

The SIP revision submitted on October 31, 1975 contained only a revised version of the Nevada Air Quality Regulations covering amendments adopted through September 18, 1975.

Items submitted as revisions to the SIP on which no action is being taken at this time include: (1) State statutes and resolutions relating to non-air pollution control matters and those upon which the Administrator has no authority to act, (2) State statutes and State and county regulations relating to complex source review and authority because revisions to these statutes are being considered in the present legislative session and because EPA is currently precluded from enforcing its comparable indirect source regulations, and (3) variances to air pollution control regulations because they have expired. The complex source review authority termination will be the subject of a future FEDERAL REGISTER document.

Other items excluded from this action include those which have been the subject of previous proposed or final approval or disapproval actions and have not been revised, with two exceptions. These exceptions are: (1) Article 2.11.4 of the Nevada Air Quality Regulations on the subject of public hearings on the renewal of variances, approved on May 31, 1972 (37 FR 10842), now proposed for disapproval because it does not meet the requirements of 40 CFR 51.4(a)(1); and (2) the control strategy portions of the SIP for carbon monoxide and hydrocarbons-photochemical oxidants in the Las Vegas area of Clark County, Clark-Mohave-Yuma Interstate Air Quality Control Region (AQCR), approved on May 31, 1972 (37 FR 10842), now proposed for disapproval because they do not meet the requirements of 40 CFR 51.14(a)(1).

Disapproval is proposed for a portion of the Nevada Revised Statutes, NRS 445.635, submitted to EPA on September 10, 1975 as Section 1. of Senate Bill 612. The amendment to the statute limits the authority of the State to control emissions from motor vehicles by limiting the authority to inspect and test vehicles. This amendment severely limits the effectiveness of an important part of the SIP approved control strategies for carbon monoxide and hydrocarbons-photochemical oxidants for the Clark-Mohave-Yuma Interstate AQCR (Las Vegas area). Other controls will be needed to remedy the deficiency found in the control strategies, proposed for disapproval in another paragraph of this notice.

Disapproval is also proposed for a portion of the Nevada Revised Statutes, NRS 445.546(7), submitted on September 10, 1975 as portions of Assembly Bills 480 and 708. The amendment to the statute places a moratorium on all actions relating the enforcement of county regulations for power plants with a capacity greater than 1000 megawatts. EPA must propose disapproval of the moratorium because it renders the EPA approved regulations unenforceable by the State or county through July 1, 1977.

The Regional Administrator proposes to approve all portions of the specified revisions with the exception of those mentioned above.

Nevada Revised Statute, NRS 445.576, and Nevada Air Quality Regulation, NAQR Article 2.7.1, were disapproved on September 26, 1974 (39 FR 34537) because they could, in some circumstances, prohibit the disclosure of emission data to the public as is required by 40 CFR 51.11(a)(6), Legal Authority, and 40 CFR 51.10(e), General Requirements. Revisions to NRS 445.576 submitted on September 10, 1975 and to NAQR Article 2.7 submitted on October 31, 1974 correct the deficiencies. Thus, the Regional Administrator proposes to approve these revisions and to rescind the disapprovals at 40 CFR 52.1473(a), as it applies to emission data for sources under the jurisdiction of the State agency, at 40 CFR 52.1473(c), and at 40 CFR 52.1474(a). Also, the substitute regulations promulgated at 40 CFR 52.1473(b) will no longer apply to sources under the jurisdiction of the State.

The Washoe County regulations were disapproved on May 14, 1973 (38 FR 12709) because they did not include legally enforceable means of preventing the construction or modification of a stationary source if it would interfere with the attainment or maintenance of a national standard as is required by 40 CFR 51.18(c). The revision to the Washoe County regulations, Section 030., submitted on June 14, 1974, corrects the deficiency. Thus, the Regional Administrator proposes to approve the revision, as it applies to the review of new and modified stationary sources, and to rescind the disapproval and substitute regulations promulgated at 40 CFR 52.1478 (a) and (b), respectively.

PUBLIC COMMENTS

Interested persons are invited to submit comments concerning the proposed action to the Regional Administrator, Attention: Air and Hazardous Materials Division, Air Programs Branch, 100 California Street, San Francisco, California 94111. Relevant comments received on or before June 20, 1977, will be considered. All comments received will be available for inspection during normal working hours at the EPA-Region IX office and the EPA Public Information Reference Unit. The receipt of comments will be acknowledged, but substantive responses to individual comments will be provided only in the preamble to the final rulemaking.

AVAILABILITY OF DOCUMENTS

Copies of the applicable regulations and statutes, the EPA evaluation report and this FEDERAL REGISTER notice are available for public inspection during normal business hours at the following locations:

Environmental Protection Agency, Regional Office, Region IX, Library, 100 California Street, San Francisco, California 94111.
Nevada Department of Human Resources, Environmental Protection Services, 201 South Fall Street, Carson City, Nevada 89710.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 83]

[RM-2833; Docket No. 21240; FCC 77-320]

SHIP RADIO STATIONS OPERATING ON FREQUENCIES IN THE 1605-3500 kHz BAND

Channel Operation Requirements

AGENCY: Federal Communications Commission.

ACTION: Rulemaking proposal.

SUMMARY: This is a proposal to change the rules in response to a public request to provide that ship radio stations that operate in the frequency band 1605-3500 kHz need be equipped with only one, rather than two, working channels, if they are also equipped for operation in high frequency bands above 3500 kHz. This will permit ship stations to operate on more high frequency channels. The action also denies a request for certain relaxation of the 2182 kHz distress and calling frequency equipment and listening watch requirements. This denial will continue a requirement for a listening

watch on 2182 kHz for safety and efficient operational reasons.

DATES: Comments to be filed by: June 27, 1977, and reply comments by: July 7, 1977.

ADDRESSES: Send comments to Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

S. W. Pratt, Aviation and Marine Division, Safety and Special Radio Services Bureau (202–632–7197).

SUPPLEMENTARY INFORMATION:

In the matter of amendment of Part 83 of the rules concerning equipment required for ship radio stations operating on frequencies in the 1605–3500 kHz band; Docket No. 21240; RM–2833.

Adopted: May 11, 1977

Released: May 18, 1977

1. Notice of Proposed Rule Making in the above-captioned matter is hereby given.

2. We have received a petition from WJG, Inc., licensee of a public coast station at Memphis, Tennessee, to amend our rules in Parts 81 and 83 concerning required listening watches on the distress and calling frequency 2182 kHz and concerning the number of channels in the 1605–3500 kHz band with which a ship station operating in that band must be equipped for navigations exclusively in the Mississippi River system and connecting inland waters.

RULE CHANGES REQUESTED

3. Specifically, as we understand its petition, WJG requests as follows:

a. Section 81.104 (b) and (c) and 81.191(c)(1) of the rules, and any related sections, that require public coast stations operating in the band 1605–3500 kHz to be equipped to operate and maintain a listening watch on the frequency 2182 kHz, should be amended to exclude stations that communicate exclusively with vessels that are operating "solely within the waters of the Mississippi River system and connecting inland waterways".

b. Section 83.106(a) and any related sections that require all ship radio stations operating in the band 1605–3500 kHz to be equipped for operation on the frequency 2182 kHz and at least two other frequencies within that band, should be amended by reducing the requirement to "one other frequency", for vessels operating "solely within the waters of Mississippi River system and connecting inland waterways".

c. Section 83.213(b) and any related sections that require a listening watch buy noncompulsorily equipped vessels on the frequency 2182 kHz should be amended to exclude vessels operating "solely within the waters of the Mississippi River system and connecting inland waterways".

REASONS FOR RULE CHANGES

4. In support of its petition, WJG asserts, essentially, as follows:

a. There is no need for the subject public coast stations to be equipped for operation on 2182 kHz, and to maintain a listening watch on that frequency because the coast stations maintain watches on their working frequencies, and can, thus, be contacted by vessels on the working frequencies.

b. There is no need for vessels to maintain listening watches on 2182 kHz for safety reasons because there is now adequate VHF maritime radiocommunication service on the subject waters and distress or other communications can be established in that band (on the distress and calling frequency 156.8 MHz).

c. The requirement for vessels operating in the subject bands to have transmitters equipped with 2182 kHz and two working channels prevents vessel operators, who increasingly are operating ship stations on high frequencies above 3500 kHz, from equipping their stations with needed high frequencies. WJG asserts that most ship stations are using six channel radio sets and a reduction in the number of now required channels below 3500 kHz would make a proportionate number of channels available for operations on the higher frequencies.

DISCUSSION

5. With respect to WJG's request for rule changes to reduce the listening watch requirements on the distress and calling frequency 2182 kHz, and the elimination of the requirement that ship and public coast stations be equipped for operation on that frequency, we are going to deny that request. We do not conclude that the public interest would be adequately served at this time by diminishing the capability or role of those stations to participate in the maritime safety system and thereby furnish assistance to vessels in need of help. We recognize that the use of VHF maritime radio is widely used on the subject waters and elsewhere. We understand, however, there are still some areas on the Mississippi River, or its connected waterways, where a VHF signal, because of technical, atmospheric, operational, or other reasons, may not be heard, in which instance the only practicable method of summoning help would be by using the frequency 2182 kHz. Aside from the safety considerations, it may be true, as asserted by WJG, that a public coast station maintains watches on its working frequencies and can thus be so contacted, by ship stations. Vessel stations, however, do not often maintain watches on public coast station working channels and therefore can only be contacted from a point on shore by the coast station calling on the designated calling frequency 2182 kHz. Further, the ITU Radio Regulations are clear in their intent that all ships and coast stations licensed for operation in the 2 MHz band will be fiitted with and listen for calls on 2182 kHz during their hours of operation. For these reasons we think it contrary to the international Radio Regulations and the public interest to relax the listening watch requirements on 2182 kHz, or to eliminate the existing requirements that vessel and coast stations be equipped for operations on that frequency.

6. Regarding WJG's request that the number of mandatory working channels for operation in the band 1605–3500 kHz in a ship station be reduced from two to one for vessels that are operating on other high frequencies, we conclude that this request may have merit. Consequently, we are proposing herein, as shown in the attached Appendix, that our rules be amended to so provide. This change would permit the licensee of a ship station, using a six channel radio set, to equip the station with up to four high frequencies above 3500 kHz, if the station were also equipped for operation on 2182 kHz and one working frequency in the band 1605–3500 kHz.

ORDER

7. Accordingly, the Petition of WJG, Inc., for rule making IS GRANTED, to the extent indicated in the attached Appendix, and in all other respects IS DENIED.

8. These rule changes, as set forth in the Attached Appendix, are proposed pursuant to sections 4(i) and 303(r) of the Communications Act of 1934, as amended.

9. Pursuant to applicable procedures set forth in Section 1.415 of the Commission's rules, interested persons may file comments on or before June 27, 1977, and reply comments on or before July 7, 1977. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this notice.

10. In accordance with the provisions of Section 1.419 of the rules, an original and 5 copies of all statements, briefs, or comments filed shall be furnished to the Commission. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION.
VINCENT J. MULLINS,
Secretary.

Part 83 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

The footnotes (1 through 4) in § 83.106 are deleted, and paragraph (a) is amended to read as follows:

§ 83.106 Required frequencies for radiotelephony.

(a) Each ship radiotelephone station licensed to operate in the band 1605 to 3500 kHz shall be able to receive and transmit the emission A3H on the carrier frequency 2182 kHz, and, if the station is used for other than safety communications, it shall be capable also of receiving and transmitting the emission A3A and A3J on at least two other frequencies in that band; Provided, however, that for ship stations on vessels operating (1) exclusively on the Mississippi River and its connecting waterways, and (2) also on high frequency bands above 3500 kHz, such stations may be equipped with only one, instead of two, other frequencies within the band 1605–3500 kHz in addition to the frequency 2182 kHz.

[47 CFR Parts 89, 91, 93 & 95]

[Docket No. 21137]

AUTOMATIC MORSE CODE IDENTIFICATION EQUIPMENT

Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Order Extending Time for Filing Comments and Reply Comments in Docket 21137.

SUMMARY: The Engineering Industries Association (EIA) petitioned for a 60 day extension of time for filing comments in Docket 21137 (amendment of Parts 89, 91, 93 and 95 of the Commission's Rules to permit the use of automatic Morse Code equipment) in order to evaluate potentially adverse effects on paging and notch-filtered data communications systems.

The Chief, Safety and Special Radio Services Bureau, acting under delegated authority, concurred with the EIA request, and extended the time for filing comments from May 17, 1977, to July 18, 1977, and the time for filing reply comments from July 18, 1977, to August 18, 1977.

DATES: Comments must be received on or before July 18, 1977 and reply comments must be received on or before August 18, 1977.

ADDRESSES: Send Comments to: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Federal Communications Commission, Safety and Special Radio Services, Bureau, Mr. James E. McNally, Jr. at (202) 632–6497.

SUPPLEMENTARY INFORMATION:

In the matter of amendment of Parts 89, 91, 93, and 95 of the Commission's rules and regulations to permit the use of automatic Morse Code identification equipment. (See 42 FR 14124).

Adopted: May 12, 1977.

Released: May 16, 1977.

1. The Chief, Safety and Special Radio Services Bureau, acting under delegated authority, has under consideration a petition filed by the Electronic Industries Association (Communications Division) for an extension of time for filing comments in the above-captioned proceeding. The prescribed time for filing comments ends May 17, 1977. The petitioner requests that this deadline be extended to July 18, 1977.

2. In support of its petition, the Electronic Industries Association (EIA) indicates that there may be some technical problems with automatic Morse Code identification as proposed, particularly with respect to its potential adverse impact when used in paging or notch-filtered data communications systems. EIA states that it has not had the opportunity to fully explore these technical problems, and that others may arise during technical-level industry discussion of this proposal. Accordingly, they feel that the requested extension of time would serve the public interest.

3. Because the proposed automatic Morse Code station identification would be optional, it seems to us that advance determination of its suitability in various types of communications systems may not be a necessary prerequisite to our making a proper decision in this matter. Nevertheless, the availability of a comprehensive technical analysis of potentially adverse technical ramifications of automatic Morse Code identification would be of value from an informational standpoint, and could serve to alert those licensees contemplating the use of automatic Morse Code with potentially incompatible communications systems. For this reason, we believe the requested extension of time is reasonable and would serve the public interest.

4. Accordingly, it is ordered, pursuant to the authority contained in §§ 0.331 and 1.46 of the Commission's rules, That the time for filing comments in Docket 21137 is extended to July 18, 1977, and that the time for filing reply comments is extended to August 18, 1977.

CHARLES A. HIGGINBOTHAM,
Chief, Safety and Special Radio Services Bureau.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 191]

GUIDANCE AND COUNSELING PROGRAMS

Proposed Criteria for Award of Grants

AGENCY: Office of Education, HEW.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: Under the authority contained in Part D, Title III of the Education Amendments of 1976, Pub. L. 94–482 (20 U.S.C. 2531–34) (the Act), the Commissioner of Education, with the approval of the Secretary of Health, Education, and Welfare, proposes to issue regulations governing the Guidance and Counseling programs that were enacted as part of the Act.

The proposed regulations set forth rules and criteria governing the award of grants by the Commissioner of Education to eligible applicants under these guidance and counseling programs. (See purposes under Supplementary Information.)

DATES: Interested persons are invited to submit written comments, suggestions, or objections regarding this proposed regulation. All written comments must be received on or before July 5, 1977.

ADDRESS: Written and oral comments may be directed to Dr. Donald Twiford, Guidance and Counseling Program, U.S. Office of Education, 400 Maryland Avenue SW. (Room 3608, ROB No. 3) Washington, D.C. 20202. Written responses to this notice may be inspected by the public in Room 3608, ROB No. 3, Washington, D.C. Monday through Friday between 8:30 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT:

Dr. Donald Twiford, Telephone: (202) 245–2243.

SUPPLEMENTARY INFORMATION:

PURPOSES

The Act authorizes three new guidance and counseling initiatives described below, with the intent of (1) providing programs, projects and leadership activities by States in guidance and counseling for FY 1977, (2) increasing the coordination of guidance and counseling activities at the Federal, State, and local levels, and (3) improving the qualifications of guidance and counseling personnel, with special emphasis on inservice training which takes educational professionals into the work-places of business, industry, and the professions.

Subpart B of the regulations governs a program of grants to States in Fiscal Year 1977 for "programs, projects, and leadership activities to expand and strengthen guidance and counseling services in elementary and secondary schools." These grants will be allotted to the States on a formula grant basis, and to Guam, American Samoa, the Virgin Islands, the Trust Territory, schools for Indian children operated by the Department of the Interior, and the overseas dependent schools of the Department of Defense on the basis of their respective needs.

Subpart C of the regulations governs a competitive grant program for Fiscal Years 1978 and 1979 to assist State and local educational agencies, institutions of higher education, and private nonprofit organizations in conducting institutes, workshops, and seminars to improve the professional guidance qualifications of teachers, counselors, and supervisory and technical personnel having responsibilities for guidance and counseling, and to improve guidance and counseling supervisory services in State and local educational agencies and nonpublic elementary and secondary school systems.

Subpart D governs a program of grants to be made to States to assist them in

carrying out programs to coordinate new and existing programs of guidance and counseling.

Additionally, the Congress provides for the establishment or designation of an administrative unit within the Office of Education to (1) provide information regarding guidance and counseling activities to Federal, State, and local governments, (2) advise the Commissioner on coordinating guidance and counseling at the Federal level and, where practicable, at the State and local levels, and (3) administer the programs under this part.

CITATIONS OF LEGAL AUTHORITY

As required by section 431(a) of the General Education Provisions Act (20 U.S.C. 1232(a)), a citation of statutory or other legal authority for each section of the regulation has been placed in parenthesis on the line following the text of the section. References to "Sec." in the citations of authority following provisions of the proposed regulation refer to sections of the Education Amendments of 1976, Pub. L. 94–482. If the citation uses the word, "interprets," the regulation provisions include an interpretation of the cited statutory provision. If the citation uses the word, "implements," the regulation provisions include rules deemed necessary to implement the statute.

PUBLIC RESPONSE TO THE NOTICE OF INTENT TO ISSUE REGULATIONS

On November 22, 1976 the Office of Education published in the FEDERAL REGISTER a Notice of Intent to Publish Regulations, which provided the public with an opportunity to offer ideas and to make recommendations regarding the Guidance and Counseling Program under Part D of Title III of Pub. L. 94–482.

Thirty-five responses were received as a result of this notice. The responses were representative of eligible applicants under Part D, with more responses from State and local educational agencies than from institutions of higher education and private, nonprifit organizations. A number of responses were received from State and national professional associations and advisory councils, which are concerned with guidance and counseling.

These responses were addressed primarily to the 12 issues set forth in the Notice of Intent. The issues are restated from the Notice of Intent in the order in which they appeared, accompanied by a summary of the public's comments and a response by the Office of Education.

Issue No. 1: Definition of State agency for Purposes of Sections 342(a) and 344(b). Should there be regulation provisions to define what State agencies may apply on behalf of the "State" or to avoid multiple applications from within a particular State under Sections 342(a) and 344(b)?

Comments: A majority of the responses addressing this issue indicated that the State educational agency should be the only agency applying for Federal funds on behalf of the State under Sections 342(b) and 344(b) of the Act; also, a significant number of comments expressed the view that all applications received for competitive grant projects under Section 344(a) of Part D should be coordinated by, or cleared through the State educational agency.

Response: The proposed regulations in § 191.17(b) and § 191.42 provide that the eligible agency to receive grants to States under Sections 342(b) and 344(b) is the State agency which is vested with the direct and primary responsibility for State supervision of programs of guidance and counseling at the elementary and secondary levels. Also, to further assure coordination at the State level, an applicant for competitive grants under Section 344(a) must provide a copy of the application to the State educational agency for its review and comment as set forth in § 191.32.

Issue No. 2: Training needs of Counselors and Teachers. In seeking to improve the guidance and counseling qualifications of teachers and counselors through the competitive grant program authorized by Section 344(a) of Part D, the Office of Education is interested in comments on the specific areas in which guidance and counseling professionals are most in need of further training. Should these areas of need be reflected in the priorities developed for evaluation of applications?

Comments: Responses to this issue expressed a wide variety of training needs, such as: career development, group guidance, decision making, problem solving, placement, counseling and consultation skills, and projects to serve as models for training practices and procedures. A number of responses emphasized the importance of flexibility in order that training needs may be determined in accordance with varying needs of the applicants and expressed the position that national priorities for training should not be stipulated in the regulations.

Response: In response to comments received, national priorities are not stipulated in the proposed regulations, thus permitting flexibility in terms of developing projects to meet the varying needs of applicants. Emphasis has been given in § 191.33(g) to the establishment of demonstration models which can be replicated by other agencies or institutions with similar educational needs. Also consistent with the statute and its legislative history, emphasis is given in the application criteria, set forth in § 191.33 (h) and (i), on the extent to which a proposed project has the potential to contribute to the alleviation of unemployment among youth, through interrelationships with the world of work, and the extent to which the project involves inservice training to increase the understanding of teachers and counselors of the world of work, and to provide for increased use of persons in business, industry, the professions and other occupational pursuits in the guidance and counseling program.

Issue No. 3: Needs Assessment. Should applicants be required to submit a needs assessment plan so as to ensure targeting of funds to areas of need?

Comment: Responses almost unanimously endorsed "a needs assessment" to provide a basis for determining types of training projects as a requirement for project applications. The comments reflected the view that the projects should provide inservice training for teachers, counselors, and supervisory and technical personnel who currently are functioning in those capacities.

Response: The proposed regulations reflect the recommendations received by requiring in § 191.31(d)(1) a needs assessment.

Issue No. 4: Achievement of Maximum Impact in Grant Program. Given the limitations on the levels and duration of Federal funding, how should the competitive grant program under Section 344(a) be designed to achieve the maximum impact?

(a) Should the emphasis be upon funding many small grants or a few large grants?

(b) Should projects be funded as seed grants, as demonstrations, or as service projects?

(c) Should geographic distribution of projects be a funding consideration?

(d) Should there be specific limits in the regulation on the types of expenditures which will be allowable in these projects?

Comments: Small or large grants: The majority of responses favor a large number of small grants rather than a few large grants. However, several responses indicated that both small and large grants should be considered depending upon need. One recommendation would have two or more large "National" grants, each fielding a large number of small teams to cover specified target areas.

Demonstration-seed-service: For the most part responses favored demonstration and service grants over seed grants, with more opting for demonstration than for service.

Geographic distribution: There was strong consensus that geographical distribution should be considered in funding of projects. A number of responses specified that there should be balance among urban, rural, and suburban areas.

Types of Expenditures: Many responses addressing this issue indicated that expenditures should be for program or services rather than capital outlay or equipment. Some would eliminate stipends but recommend reasonable amounts for necessary costs such as travel and per diem.

Response: The position taken in the proposed regulations incorporates the predominant recommendations from the responses. Flexibility has been provided in § 191.36 with reference to size of grants, but with an expressed intention to fund mostly grants of limited size. Flexibility also has been provided with reference to types of grants (demonstration, service, or seed) with more emphasis upon demonstration in relation to model projects as indicated in § 191.29(a)(4) and § 191.30(b)(5). Consideration is given in § 191.33(f)(1) to geographic distribution in the funding of projects, and in § 191.35 to types of expenditures by way of de-emphasizing equipment and excluding stipends.

Issue No. 5: Involvement with World of Work. How can the Office of Education ensure that in the grants made under Section 344(a) there is coordination and involvement of business, industry, and the professions, as provided for under the statute? Should payments to business, industry, and other institutions for the costs of involvement and coordination be an allowable expenditure for a recipient of a grant under Section 344(a)?

Comments: None of the responses would specifically require involvement of business and industry, the professions, and other occupational pursuits in all training applications. A number of responses stated that such involvement should not be required in all training projects. Responses dealing with payment to these agencies would, for the most part, either not allow payments or would limit them to costs incident to participation in training projects such as travel, and per diem costs.

Response: The proposed regulations do not require that each training project include activities related to business and industry, the professions and other occupational pursuits. Such involvement, however, is encouraged by including reference to it in § 191.29(a), and in § 191.33 (h) and (i) in the application review criteria. Payment to trainees and participants from occupational pursuits by recipients is limited in § 191.35 to costs such as travel and per diem costs.

Issue No. 6: Improvement of Supervisory Services. How can supervisory services in guidance and counseling be improved?

(a) Do the supervisory services needs differ according to the agency or institution providing the guidance and counseling?

(b) Where are the most pressing needs for Federal funding in the area of supervisory services for guidance and counseling?

Comments. The comments reflected agreement that needs for improving supervisory services differ according to the agency or institution. Some expressed the view that experimentation in supervisory models should be encouraged. There was no consensus on the most pressing needs for improving supervisory services, except that a majority believe such services should be expanded.

Response: In accordance with the opinions expressed by a majority of the comments, no attempt has been made in the proposed regulations to establish priorities for improvement of supervisory services. It was clear from the comments that needs vary widely according to the individual agency or institution. However, special consideration in the application review criteria, § 191.33(g), is given to project applications which reflect a model approach to supervisory services.

Issue No. 7: Duration of Training. What should be the duration of the training to be provided under grants:

(a) For improvement of professional guidance and counseling qualifications of teachers and counselors; and

(b) For improvement of supervisory services?

Comments: There was no consensus for duration of training in terms of specific time limits. A majority of the responses stressed flexibility, but more favored short-term than long-term.

Response: The proposed regulations provide in § 191.34 for a grant period of up to one year. Short-term training only is authorized, as provided in § 191.29(a)(5).

Issue No. 8: Number of Counselors and Teachers to be Served. Should projects funded under Section 344(a) plan on training all of the counselors in a given school system or a few counselors from each of a number of school systems?

Comment: A majority of the responses addressing this issue indicate that all counselors in a school system should have the opportunity for training, but that this is a matter to be left to the individual applicant.

Response: In compliance with comments and recommendations received, this issue has not been addressed in the proposed regulations.

Issue No. 9: Competitive Grants to States. In making grants to States under Section 344(b) should a limited number of competitive awards be made, or should every State be funded, subject to certain standards of quality?

Comment: Responses to this issue were almost unanimous in support of funding every State subject to certain standards of quality.

Response: The proposed regulations in § 191.47 express the intent to make a grant to all those States that meet the requirements and satisfy the criteria which are established for funding.

Issue No. 10: Funding Criteria for Coordination Grants to States. Under the grant program authorized by Section 344(b), what should be the funding criteria or standards?

Comment: Many of the responses did not specifically address this issue. The major emphases among those that did respond to the question were upon the needs, objectives, activities, evaluation, size, and scope as criteria for funding proposed projects.

Response: Required application data in § 191.44 and the criteria in § 191.45 in the proposed regulations incorporate the recommendations.

Issue No. 11: Coordination by States. For the purpose of determining project eligibility under Section 344(b), what should the term "coordinate" include? Should there be specific allowable expenditures?

Comments: Responses to this issue were limited. The responses which addressed this issue generally interpret "coordinate" broadly to include leadership by the State educational agency in coordinating total guidance efforts within a given State (including guidance and counseling activities supported jointly or separately by Federal programs and by State and local programs) in the establishment and implementation of State-wide guidance and counseling objectives and activities.

Response: The concept of coordination as expressed by a number of respondents has been incorporated in § 191.43 in the proposed regulations.

Issue No. 12: Teachers as Counselors. Under Section 344(a), to what extent should emphasis be given to preparing teachers as professional counselors?

Comment: The majority of comments and recommendations did not favor preparing teachers as professional counselors. The view expressed by most of the responses to this issue recognize specific guidance roles and responsibilities of teachers within the framework of a total guidance program.

Response: In accordance with the prevailing point of view expressed in comments received, the proposed regulations in § 191.26 limit in-service training to that which assist teachers, counselors, and supervisory and technical personnel more effectively to carry out their specific current roles in a guidance program.

INVITATION TO COMMENT

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposed regulation to Dr. Donald Twiford, Guidance and Counseling Program, U.S. Office of Education, 400 Maryland Avenue SW. (Room 3608, ROB No. 3) Washington, D.C. 20202. Written responses to this notice may be inspected by the public at the above office Monday through Friday between 8:30 a.m. and 4 p.m.

All written comments must be received on or before July 5, 1977.

It is expected that the opportunity for written comments will constitute an adequate opportunity for public response to the proposed regulation, particularly given the non-controversial nature of its contents. Since this is a new budget authorization in which no final funding decisions have been made, no public hearings are scheduled on the proposed regulations.

Oral inquiries concerning the proposed regulation may be directed to: Dr. Donald Twiford, U.S. Office of Education, 400 Maryland Avenue SW. (Room 3608, ROB No. 3) Washington, D.C. 20202. Telephone: 202–245–2243.

It is hereby certified that this proposed rule has been screened pursuant to Executive Order No. 11821, and does not require an Inflationary Impact Evaluation.

Dated: February 18, 1977.

WILLIAM F. PIERCE,
Acting U.S. Commissioner of Education.

Approved: May 13, 1977.

JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare.

(Catalog of Federal Domestic Assistance No. 13.577 Guidance and Counseling Program.)

PART 191—GUIDANCE AND COUNSELING

Subpart A—General

Sec.
191.10 Scope.
191.11 Purpose.
191.12 Definitions.
191.13–14 [Reserved]

Subpart B—Strengthening Guidance and Counseling Services

191.15 Scope.
191.16 Purpose.
191.17 Eligible recipients.
191.18 Required application.
191.19 Distribution of funds.
191.20 Allowable costs.
191.21–24 [Reserved]

Subpart C—Improving Guidance Qualifications of Personnel and Improving Supervisory Services

191.25 Scope.
191.26 Purpose.
191.27 Eligible applicants.
191.28 Eligible participants.
191.29 Projects for training.
191.30 Projects for improving supervisory services.
191.31 Content of application.
191.32 State review of application.
191.33 Application review criteria.
191.34 Project duration.
191.35 Allowable costs.
191.36 Amount of award.
191.37–39 [Reserved]

Subpart D—Coordinating Guidance and Counseling Programs

191.40 Scope.
191.41 Purpose.
191.42 Eligible applicants.
191.43 Activities.
191.44 Required application data.
191.45 Review criteria.
191.46 Project duration.
191.47 Project funding.
191.48 Allowable costs.

AUTHORITY: Secs. 341–44, Pub. L 94–482 (20 U.S.C. 2531–34).

Subpart A—General

§ 191.10 Scope.

(a) The regulations in this part govern the award of grants with funds appropriated pursuant to Part D of Title III of the Education Amendments of 1976, Pub. L. 94–482.

(b) The award of grants under this part is subject to applicable provisions contained in subchapter A of this chapter (relating to fiscal, administrative, property management, and other matters, 45 CFR Parts 100, 100a) except that application requirements set forth in § 100a.16 and evaluation criteria set forth in § 100a.26(b) do not apply to awards under this part.

(Sec. 341, 20 U.S.C. 2531, 1221c.)

§ 191.11 Purpose.

The purpose of this part is through Federal financial assistance, to:

(a) Provide programs, projects, and leadership activities by the State to expand and strengthen counseling and guidance services in elementary and secondary schools.

(Sec. 342(b)(1), 20 U.S.C. 2532(b)(1).)

(b) Improve the professional guidance qualifications of teachers and counselors.

(Sec. 344(a), 20 U.S.C. 2534(a).)

(c) Provide training for supervisory and technical personnel having responsibilities for guidance and counseling.

(Sec. 344(a), 20 U.S.C. 2534(a).)

(d) Improve guidance and counseling supervisory services; and

(Sec. 344(a), 20 U.S.C. 2534(a).)

(e) Coordinate new and existing programs of guidance and counseling in the States.

(Sec. 344(b), 20 U.S.C. 2534(b).)

§ 191.12 Definitions.

As used in this part:

(a) "Guidance" means a program provided by or under the leadership and supervision of, professional counselors, involving teachers and resource personnel, to assist elementary and secondary school students in their educational, vocational, and personal-social development. A program of guidance services includes, but is not limited to, counseling, information, placement, appraisal, and follow-up and research.

(Interprets Sec. 341, 20 U.S.C. 2531.)

(b) "Counseling" is one of the basic components which constitute a program of school guidance services, and means a process conducted by a professional counselor in face-to-face or group settings to assist the student for the purpose of resolving or better understanding a problem, or planning and carrying out a course of action.

(Interprets Sec. 341. 20 U.S.C. 2531.)

(c) "Elementary school" means a day or residential school which provides elementary education, as determined under State law, and "Elementary school level" means the educational level at which elementary education is provided under State law.

(Interprets Secs. 342, 344, 20 U.S.C. 2532, 2534.)

(d) "Inservice training" means institutes, workshops, or seminars to improve guidance qualifications of teachers, counselors, and guidance supervisory and technical personnel in State and local educational agencies or nonpublic elementary and secondary school systems during their time of service.

(Interprets Sec. 344(a), 20 U.S.C. 2531(a).)

(e) "Institution of higher education" means an institution of higher education in any State as defined in section 1201 of the Higher Education Act of 1965, as amended (20 U.S.C. 1141).

(Interprets Sec. 344(a), 20 U.S.C. 2534(a).)

(f) "Local educational agency" means a public board of education or other public authority legally constituted within a State for either administrative control or direction of or to perform a service function for public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or a combination of school districts or counties recognized in a State as an administrative agency for its public elementary or secondary schools. This term also includes any other public institution or agency having administrative control and direction of a public elementary or secondary school.

(Interprets Sec. 344(a), 20 U.S.C. 2534(a).)

(g) "Nonprofit organization" means an organization owned and operated by one or more nonprofit corporations or associations no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual.

(Interprets Sec. 344(a), 20 U.S.C. 2534(a).)

(h) "Nonpublic elementary and secondary school system" means two or more private elementary and/or secondary schools joined together in a common education program under central administrative control or direction.

(Interprets Sec. 344(a), 20 U.S.C. 2534(a).)

(i) "Secondary school" means a day or residential school which provides secondary education as determined under State law except that it does not include any education provided beyond grade 12, and "Secondary school level" means the educational level (not beyond grade 12) at which secondary education is provided as determined under State law.

(Interprets Secs. 342, 344, 20 U.S.C. 2532,

(j) "State" includes, in addition to the several States of the Union, the Commonwealth of Puerto Rico, the District of Columbia, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(Interprets Secs. 342, 344, 20 U.S.C. 2532, 2534.)

(k) "Students" refers to elementary or secondary school students and not teachers, counselors, supervisors, and technical personnel who are participants in institutes, workshops, and seminars.

(Implements Sec. 344(a), 20 U.S.C. 2534(a).)

(l) "Supervisory services" means those activities which are specifically designed to improve programs of guidance and counseling, and which are carried out by professional guidance personnel who have responsibilities within State and local educational agencies and nonpublic school systems for directing and coordinating the guidance and counseling efforts of staff members in the respective agencies or school systems.

(Interprets Sec. 344(a), 20 U.S.C. 2534(a).)

(m) "State educational agency" means the State board of education or other agency or officer primarily responsible for State supervision of public elementary and secondary schools, or, if there is no such officer or agency, an officer or agency designated by the Governor or by State law.

(Interprets Sec. 344(a), 20 U.S.C. 2534(a).)

§§ 191.13—191.14 [Reserved]

Subpart B—Strengthening Guidance and Counseling Services

§ 191.15 Scope.

This subpart applies to the program of guidance and counseling for which grants are authorized by Section 342(b) of Part D of Title III of Pub. L. 94–482. This program is authorized for fiscal year 1977.

(Sec. 342, 20 U.S.C. 2532.)

§ 191.16 Purpose.

The purpose of the program authorized by this subpart is to provide for programs, projects, and leadership activities designed to expand and strengthen guidance and counseling services in elementary and secondary schools through grants (a) to States and (b) to other recipients set forth in § 191.17(a).

(Sec. 342, 20 U.S.C. 2532.)

§ 191.17 Eligible recipients.

(a) Eligible recipients under this subpart include: (1) the States, (2) the Department of the Interior (for children and teachers in elementary and secondary schools operated for Indian children in the Department of Interior), and (3) the Department of Defense (for children and teachers in the overseas dependent schools of the Department of Defense).

(b) A grant to a State under this subpart will be made to that State agency which is vested with the direct and primary responsibility for State supervision of programs of guidance and counseling at the elementary and secondary school levels.

(Implements Sec. 342, 20 U.S.C. 2532.)

§ 191.18 Required application.

Any State or other eligible applicant under § 191.17 desiring to receive funds for the purpose of this subpart shall, as a condition to the receipt of these funds, file an application with the Commissioner providing the following information:

(a) Documentation that the applicant agency is the appropriate grant recipient under § 191.17;

(b) The needs to be met by the proposed activity;

(c) Objectives which are clearly related to the purposes of this program and capable of being attained by the proposed activities;

(d) A description of the activities to be carried out with these funds which satisfies the Commissioner (1) that these activities are designed to achieve the stated objectives, and (2) that funds will be used only to carry out the purposes of this subpart;

(e) A description of the program staff and other resources to carry out the activities;

(f) Provision for such methods of administration as are necessary for the proper and efficient administration of the proposed project; and

(g) Provisions for such fiscal control and fund accounting procedures and reports as may be required pursuant to applicable provisions of Part 100a of this chapter.

(Implements Sec. 342, 20 U.S.C. 2532, 1232c (b) 1221e–3(a)(1).)

§ 191.19 Distribution of funds.

(a) From sums appropriated for purposes of this subpart, the Commissioner will first allot amounts to Guam, American Samoa, the Virgin Islands, and the Trust Territories of the Pacific according to their respective needs. The Commissioner generally bases a determination of these needs on the number of children aged five to seventeen inclusive in each jurisdiction.

(b) The amounts allotted to the Department of Defense (for children and teachers in the overseas dependent schools of the Department of Defense) and to the Department of the Interior (for children and teachers in the elementary and secondary schools operated for Indian children in the Department of the Interior) are based upon the amounts necessary for the programs, projects, and activities authorized under this subpart. These amounts are to be determined with reference to the number of children aged five to seventeen inclusive in these schools.

(c) After the amounts under paragraphs (a) and (b) have been allotted, the Commissioner allots to each State, other than Guam, American Samoa, the Virgin Islands, and the Trust Territories of the Pacific, from those amounts that remain, in accordance with Section 342(b)(3)(B) of the Act, an amount which bears the same ratio to those remaining amounts as the number of children in that State, aged five to seventeen inclusive, bears to the total number of children in all these States.

(Implements Sec. 342, 20 U.S.C. 2532.)

§ 191.20 Allowable costs.

The Commissioner determines allowable costs pursuant to this subpart in accordance with principles set forth in Appendix B of Subchapter A of this chapter (Office of Education General Provisions Regulations).

(20 U.S.C. 1221c.)

§§ 191.21—191.24 [Reserved]

Subpart C—Improving Guidance Qualifications of Personnel and Improving Supervisory Services

§ 191.25 Scope.

(a) This subpart applies to the award of grants under the program of guidance and counseling authorized by section 344(a) of Part D of Title III of Pub. L. 94–482.

(b) The award of any contracts under Section 344(a) will be made in accordance with applicable procurement regulations in 41 CFR Chapters I and 3 and the provisions of specific requests for proposals, and will not be subject to the provisions of this subpart.

(Sec. 344(a), 20 U.S.C. 2534(a).)

§ 191.26 Purpose.

(a) The purpose of this subpart is (1) to improve the professional guidance qualifications of teachers, counselors, supervisory personnel, and technical personnel through inservice training to enable them more effectively to carry out their specific current roles, and (2) to improve supervisory services in the field of guidance and counseling;

(b)(1) Two kinds of projects will be funded under this subpart:

(i) Inservice training projects described in § 191.29; and

(ii) Projects to improve supervisory services described in § 191.30.

(2) An applicant may propose a single project with activities described under both of these sections.

(Interprets Sec. 344(a), 20 U.S.C. 2534(a).)

§ 191.27 Eligible applicants.

The following agencies and organizations are eligible for grants under this subpart: (a) State educational agencies; (b) Local educational agencies; (c) Institutions of higher education; and (d) Private nonprofit organizations.

(Sec. 344(a), 20 U.S.C. 2534(a).)

§ 191.28 Eligible participants.

The following persons are eligible to participate as trainees in training programs funded under § 191.29:

(a) Teachers and counselors in State and local educational agencies;

(b) Teachers and counselors in nonpublic elementary and secondary school systems;

(c) Supervisory and technical personnel in State and local educational agencies with responsibilities for guidance and counseling; and

(d) Supervisory and technical personnel in nonpublic elementary and secondary school systems with responsibilities for guidance and counseling.

(Sec. 344(a), 20 U.S.C. 2534(a).)

§ 191.29 Projects for training.

(a) *Nature of project.* (1) The projects funded under this section support inservice training programs in the form of institutes, workshops, and seminars to improve the professional guidance qualifications of teachers, counselors, and supervisory and technical personnel in their current roles, for the purpose of improving the guidance and counseling program provided to students in elementary and secondary schools.

(2) Two major emphases which an applicant may choose to address in these projects are:

(i) To increase the understanding of teachers and counselors about the world of business, industry, professions, and other occupational pursuits through exposure to these areas; and

(ii) To provide for increased use of persons experienced in business, industry,

the professions, and other occupational pursuits in guidance and counseling programs, by (A) bringing these persons into the schools as counselors and advisors for students; and (B) bringing students into the workplace for observation and participation to acquaint them with the nature of the work.

(3) To receive assistance under this part, an inservice training project must:

(i) Be designed on the basis of a needs assessment for a specific group of trainees; and

(ii) Serve as a resource for contributing to improved programs of guidance and counseling services within the schools served by the trained counselors or teachers. (For example, a counselor, as a participant in an institute provided by a grant recipient, could spend one day a week in industry so that, upon completion, the counselor would be more aware of the opportunities and requirements of different occupations and would thus be able to provide a better program of guidance and counseling services.)

(4) Applicants may wish to propose specific training activities designed to demonstrate exemplary ways of involving persons from business and industry, the professions, and other occupational pursuits in guidance and counseling programs.

(5) Inservice training programs supported under this subpart must be short-term, with no program exceeding a year for each group of trainees. Normally, a workshop, institute, or seminar conducted on a daily basis may not exceed a three-month period for each group of trainees. However, training may be carried out on a more extended, but periodic basis, e.g., 1 to 6 hours a week, but for a period not to exceed a year.

(Implements Secs. 341, 344(a), 20 U.S.C. 2531, 2534(a).)

(b) *Types of activities.* Projects designed for training purposes may include, among other training activities, one or more of the following:

(1) Inservice training programs which involve counselors and teachers in demonstration models which bring individuals with experience in occupational pursuits into schools as counselors or advisors for students, and which bring students into work-places to acquaint students with the nature of the work;

(2) In service training programs for teachers and guidance counselors in State and local educational agencies and non-public elementary and secondary school systems so that they can obtain experience in business and industry, the professions, and other occupational pursuits. (These programs may include individual and group experiences in observing or participating in various occupational pursuits); and

(3) Training of supervisory and technical personnel designed to improve the supervisory knowledge and skills, including effective management and administrative procedures, of persons assigned to guidance and counseling programs. As used in this subparagraph, "supervisory and technical personnel" means professional guidance staff who have designated responsibilities within State and local educational agencies or nonpublic school systems for directing and coordinating the efforts of staff working in guidance programs in the respective agencies or school systems, or for providing technical assistance in such areas of specialty as elementary school guidance, student appraisal, career development, occupational information, counseling, techniques, and group procedures, to improve the quality of services within guidance and counseling programs.

(Implements Secs. 341, 344(a), 20 U.S.C. 2531, 2534(a).)

§ 191.30 Projects for improving supervisory services.

(a) *Nature of projects.* (1) Projects under this section are designed to improve supervisory services of guidance and counseling in State and local educational agencies and nonpublic school systems, as opposed to concentrating on personnel qualifications of supervisory personnel.

(2) The Commissioner encourages the submission of projects providing for exemplary supervisory practices which may serve as models for replication by other State and local educational agencies and nonpublic school systems. Exemplary approaches to accountability in terms of evaluating guidance outcomes is an example of a type of project which has potential for improving supervisory services. (Educational accountability includes a process of establishing objectives, delineating tasks and activities, and having personnel who are held responsible for accomplishing the objectives.)

(b) *Types of activities.* Activities designed to improve supervisory services in the field of guidance and counseling in State and local educational agencies and nonpublic elementary and secondary school systems may include, but are not limited to, one or more of the following:

(1) Expanding and coordinating supervisory services in guidance and counseling programs;

(2) Providing or increasing technical or consultative assistance to guidance and counseling personnel;

(3) Implementing or improving accountability through:

(i) Assessment of students' needs for guidance;

(ii) Planning and implementing guidance objectives; and

(iii) Evaluating guidance outcomes;

(4) Planning and preparing guidance and counseling materials and information; and

(5) Demonstrating successful supervisory practices in guidance and counseling.

(Implements Secs. 341, 344(a), 20 U.S.C. 2531, 2534(a).)

§ 191.31 Content of application.

An eligible applicant which seeks to receive a grant under this subpart shall file an application which must include:

(a) A cover sheet(s) which includes the following:

(1) The identification of the purpose and the type of activity such as training or improved supervisory services to which the application is addressed; and

(2) A brief abstract of the proposed project;

(b) A copy of the letter of transmittal of the application which was submitted to the appropriate State educational agency for the purpose of State review and comment as provided under § 191.32;

(c) A statement that the special needs of handicapped students and the need for reducing race and sex stereotyping have been considered in the development of the operational plan described in paragraph (d); and

(d) An operational plan describing in detail how the applicant proposes to achieve the purpose(s) identified in the application.

(1) This plan must include, but need not be limited to:

(i) A description of the needs determined by a needs assessment (including an assessment of needs of students, such as unemployment needs, to be served in guidance and counseling programs) and the procedures used in carrying out the needs assessment;

(ii) Objectives which are related to the purposes of this subpart;

(iii) A description of project activities and information on the size, scope, and duration of the proposed project;

(iv) An evaluation design;

(v) Milestones and dates for the completion of project activities;

(vi) Identification of all proposed staff positions, and a description of the duties and qualifications required for these positions;

(vii) An estimated cost for each of the program activities;

(viii) A description of the resources available to the applicant to carry out the proposed project; and

(ix) A description of any activities to be contracted.

(2) If the applicant proposes to improve the professional guidance qualifications of personnel, in addition to the other information required by this section, the following information must be included in the operational plan:

(i) A description of the target population, methods, and criteria to be used in selecting participants;

(ii) Evidence of any commitment already received from outside organizations, groups, or individuals to cooperate in the implementation of the proposed activities, including any evidence of involvement with persons from business and industry, the professions, and other occupational pursuits and evidence of cooperation with other agencies and organizations which are involved in providing guidance and counseling services; and

(iii) In cases where an applicant proposes to train personnel who are not in their employ, a copy of the training agreement between the applicant and the agency or organization where the prospective trainees are located.

(3) The applicant is encouraged to respond in the operational plan to each criterion in § 191.33. Except with respect to paragraph (f) of § 191.33, if the plan does not provide information responsive to a particular criterion, this will deny the applicant the opportunity to receive points for that criterion.

(Implements Sec. 344(a), 20 U.S..C 2534(a).)

§ 191.32 State review of application.

(a) The applicant must provide a copy of its application to the State educational agency of each State in which is located the agency or organization where the prospective trainees are employed concurrently with its submission of the application to the Commissioner.

(b) The Commissioner will not approve an application submitted by an applicant unless each appropriate State educational agency under paragraph (a) has been given an opportunity to review and comment on the application.

(c) The Commissioner may establish a cut-off date for submission of comments on applications by State educational agencies. If the Commissioner establishes such a date, failure by a State educational agency to submit comments to the Commissioner within the period specified shall be deemed a waiver of the State educational agency's opportunity to comment on that application.

(Implements Secs. 343(a)(3), 344(a), 20 U.S.C. 2533(a)(3), 2534(a).)

§ 191.33 Application review criteria.

Applications submitted under this subpart will be reviewed to determine the extent to which they meet specific program criteria. Each criterion is assigned a maximum score and is weighted in terms of its relative value to the rest of the application criteria. The total number or points for all criteria is 100. The criteria and the maximum point score for each criterion are as follows:

(a) *Need.* Maximum score, 10. The application clearly describes the need, through documented evidence for training and/or improved supervisory services, and the procedures used in determining the need. The need should be based on the guidance needs of students in the location where trainees are employed.

(b) *Objectives and activities.* Maximum score, 30. The application:

(1) Clearly sets forth objectives which are: designed to meet the purposes of this subpart; sharply defined; clearly stated; capable of being attained; and capable of being measured;

(2) Sets forth activities, tasks, and strategies, which, when implemented, will achieve the stated objectives, including milestones and dates by which to monitor the completion of each of the proposed activities;

(3) Sets forth training or supervisory objectives and activities which respond effectively to the needs of students documented in the needs assessment;

(4) Sets forth project activities which are designed to serve as a resource for improving guidance and counseling services within schools which receive supervisory services, or which are served by teacher and counselor trainees;

(5) Gives evidence, in those applications proposing to provide training, of commitments from outside organizations, groups, or individuals to cooperate in the implementation of proposed activities or in those applications proposing to improve supervisory services, of plans for working with other appropriate units;

(6) Clearly describes the criteria and processes for selecting participants in training activities and clearly describes criteria and processes for developing comprehensive and coordinated guidance programs in activities to improve supervisory services.

(c) *Evaluation plan.* Maximum score, 10. The quality of provisions set forth in the application for evaluating the effectiveness of the project and for determining the extent to which each of the objectives will be achieved.

(d) *Personnel.* Maximum scores, 10. The qualifications and experience of project staff and strength of commitment from individuals and groups whose assistance is needed to accomplish the proposed objectives.

(e) *Budget.* Maximum score, 10. The application gives evidence that the size, scope, and duration of the project are reasonable and that the estimated cost is reasonable in relation to the anticipated results of each of the proposed activities.

(f) *Distribution of projects.* Maximum score, 10. The extent to which approval of the project will contribute to:

(1) An equitable geographic distribution of programs funded under this subpart throughout the United States in both urban and rural areas; and

(2) The funding of a wide variety of projects which collectively can demonstrate diverse approaches to meet effectively the purposes of this subpart.

(g) *Models.* Maximum score, 10. The extent to which approval of the project will contribute to the establishment of a model or models which can be replicated by other agencies or institutions with similar educational needs. In applying this criterion, the Commissioner shall consider (1) the extent to which similar needs to those addressed by the proposed project exist in other agencies or institutions and (2) the design of the proposed project.

(h) *Alleviation of unemployment among youth.* Maximum score, 5. The extent to which approval of the project has potential for contributing to the alleviation of unemployment among youth through interrelationships with business and industry, the professions, and other occupational pursuits.

(i) *World of work.* Maximum score, 5. The project involves inservice training to increase the understanding of teachers and counselors of the world of business, industry, professions, and other occupational pursuits through exposure to these areas, and to provide for increased use of persons employed in business, industry, the professions and other occupational pursuits in the guidance and counseling programs, by bringing these persons into the schools to assist teachers and counselors, and bringing students into the work-place for observation and participation in order to acquaint them with the nature of the work.

(Implements Sec. 344(a), 20 U.S.C. 2534(a).)

§ 191.34 Project duration.

Project awards pursuant to this subpart will be for a grant period of up to one year. If a grantee seeks to receive assistance under this part for an additional period beyond the grant period, it must submit a new application for a new grant award. The new application will be evaluated in competition with applications from other former grantees as well as from applicants which have not previously received assistance under this part.

(Implements Sec. 344(a), 20 U.S.C. 2534(a).)

§ 191.35 Allowable costs.

(a) Allowable costs in grants pursuant to this subpart are determined in accordance with principles set forth in the applicable appendices to Subchapter A of this chapter (Office of Education General Provisions for Programs), subject to the following provisions.

(b) Costs of materials and equipment are limited and allowed only if essential and reasonable in relation to anticipated results.

(c) Allowable costs may include travel, meals, lodging, and other costs incident to trainees' participation in institutes, workshops, and seminars, designed to improve professional guidance qualifications, but shall not include stipends or other forms of compensation. Payment of substitutes for teachers and counselors during the time of their participation in the inservice training is allowable only if specifically approved in writing by the Commissioner.

(d) (1) The costs of bringing representatives of business and industry, the professions, and other occupational pursuits into schools as counselors or advisors to students, and of bringing students into work-places to acquaint them with the nature of the work are allowable program costs only if carried out through workshops, institutes, or seminars and if they serve training purposes for participant counselors and teachers.

(2) Allowable costs of these activities (operated in institute, workshop, or seminar settings) are limited to travel, per diem expenses, and other incidental costs, and do not include stipends or other types of compensation to participant students, trainees, or representatives of occupational pursuits.

(Implements Sec. 344(a), 20 U.S.C. 2534(a). 1221c.)

§ 191.36 Amount of award.

The amount of an award will be affected by the quality of the project pursuant to criteria in § 191.33. It is expected that the amount of an award for in-service training projects as specified in § 191.29 will be relatively small, with most awards within the range of $5,000 or less to $25,000, and normally will not exceed $50,000. Awards for projects to improve supervisory services, as specified in § 191.30, normally will not exceed $100,000. Nothing in this section shall be construed as a limitation on the amount of a particular grant.

(Implements Sec. 344(a), 20 U.S.C. 2534(a).)

§§ 191.37—191.39 [Reserved]

Subpart D—Coordinating Guidance and Counseling Programs

§ 191.40 Scope.

This subpart applies to the program of guidance and counseling for which grants are authorized by section 344(b) of Part D of Title III of Pub. L. 94–482.

(Sec. 344(b), 20 U.S.C. 2534(b).)

§ 191.41 Purpose.

The purpose of the program authorized by this subpart is to assist States in coordinating new and existing programs of guidance and counseling in the States, working with the assistance of and in cooperation with the administrative unit within the Office of Education responsible for coordinating and providing information on guideance and counseling under section 343(a), Part D, Title III of Pub. L. 94–482.

(Sec. 343(a)(3), 344(b), 20 U.S.C. 2533(a)(3), 2534(b).)

§ 191.42 Eligible applicants.

Grants under this subpart may be made only to that State agency within each State which is vested with the direct and primary responsibility for State supervision of programs of guidance and counseling at the elementary and secondary school levels.

(Implements Sec. 344(b), 20 U.S.C. 2534(b).)

§ 191.43 Activities.

Coordination of guidance and counseling programs supported under this subpart may include, but is not limited to, the following activities:

(a) Identification of guidance and counseling programs supported jointly or separately by Federal programs, and by State and local programs;

(b) Initiating and conducting a Statewide guidance and counseling needs assessment to determine priorities for program development;

(c) Development of a plan and strategies for implementing these programs in terms of common goals and objectives as determined through the needs assessment;

(d) Planning and conducting appropriate action steps to accomplish goals and objectives such as preparation of position statements, providing for consultative or technical assistance, conducting conferences and workshops, sharing information through appropriate publications and other means, evaluating program outcomes in terms of established objectives, and other related activities necessary for the coordination and improvement of new and existing programs of guidance and counseling in the State; and

(e) Participating in the activities of the Office of Education's administrative unit pursuant to section 343(a) of Pub. L. 94–482.

(Interprets Sec. 344(b), 20 U.S.C. 2534(b).)

§ 191.44 Required application data.

Each applicant for assistance under this subpart must submit an application which includes:

(a) A cover sheet(s) which includes a brief abstract of the proposed project; and

(b) An operational plan describing in detail how the applicant proposes to achieve the purposes of the program.

(1) The operational plan must include, but need not be limited to:

(i) A description of the needs to be met by the proposed plan, e.g., the need to reduce duplication of efforts in the State in guidance and counseling;

(ii) Objectives which are clearly related to the purposes of this subpart;

(iii) A description of the project activities and information on the proposed size, scope, and duration of the project;

(iv) Plans to include other institutions and agencies in the proposed activities;

(v) An evaluation design;

(vi) Identification of all proposed staff, their duties, and a description of the qualifications possessed by all proposed professional staff;

(vii) An estimated cost for each of the proposed activities;

(viii) Milestones and dates for the completion of each project activity; and

(ix) A description of any activities to be contracted.

(2) Applicants are encouraged to respond in the operational plan to each of the criteria in § 191.45 in the sequence described.

(Implements Sec. 344(b), 20 U.S.C. 2534(b).)

§ 191.45 Review criteria.

(a) Applications submitted under this subpart will be reviewed to determine the extent to which they meet the criteria in this section. Each criterion is assigned a maximum score and is weighted in terms of its relative value to the rest of the criteria. The total number of points for all criteria is 100.

(b) The following criteria will be utilized by the reviewers in reviewing applications:

(1) *Need.* Maximum score, 10. The need for the proposed plan to reduce duplication of efforts in the State in guidance and counseling is clearly established.

(2) *Objectives.* Maximum score, 25. The proposed plan includes sharply defined and clearly stated objectives which are related to the purpose of this subpart and which are capable of being attained by the proposed activities and capable of being measured.

(3) *Activities.* Maximum score, 25. The project activities are designed to achieve each of the proposed objectives, and milestones and dates for completing each project activity are clearly set forth.

(4) *Evaluation.* Maximum score, 10. The quality of the evalution design to determine the attainment of objectives.

(5) *Personnel.* Maximum score, 10. The quality of staff with specified duties and qualifications necessary to achieve objectives.

(6) *Budget.* Maximum score, 10. The estimated cost for each of the proposed activities is reasonable in relation to anticipated results, and the size, scope, and duration of the project is adequate to secure productive results.

(7) *Cooperative arrangements.* Maximum score, 10. The strength and quality of arrangements made by the applicant to work with other appropriate institutions and agencies.

(Implements Sec. 344(b), 20 U.S.C. 2534(b).)

§ 191.46 Project duration.

Project awards pursuant to this subpart will be for a grant period of up to one year. If a grantee seeks to receive assistance under this part for an additional period beyond the grant period, a new application for a new grant award must be submitted.

(Implements Sec. 344(b), 20 U.S.C. 2534(b).)

§ 191.47 Project funding.

(a) While there is no formula for the distribution of funds under this subpart, the Commissioner intends to make a grant to all States that meet the requirements in § 191.44 and propose projects of sufficient quality under the criteria set forth in § 191.45.

(b) The size of an award will be affected by the Commissioner's intent to fund all the States in accordance with paragraph (a) of this section and by the scope and quality of the project as measured by criteria set forth in § 191.45.

(Implements Sec. 344(b), 20 U.S.C. 2534(b).)

§ 191.48 Allowable costs.

Allowable costs pursuant to this subpart shall be determined in accordance with principles set forth in appendix B of Subchapter A of this chapter (Office of Education General Provisions Regulations).

(20 U.S.C. 1221c.)

ADMINISTRATOR, EMERGENCY NATURAL GAS ACT OF 1977

[Docket No. E77–102]

EL PASO NATURAL GAS CO., ET AL.

Emergency Order

On May 9, 1977, El Paso Natural Gas Company (El Paso) filed, pursuant to Section 6 of the Emergency Natural Gas Act of 1977 (Act), Pub. L. 95–2 (91 Stat. 4 (1977)), an application for authorization to make certain emergency purchases of natural gas. For the reasons set forth below, I authorize these emergency purchases.

El Paso has executed the following contracts to purchase natural gas under Section 6 of the Act:

1. By contract dated May 5, 1977, El Paso agreed to purchase the natural gas produced, pending completion, from eleven wells of Yates Petroleum Corporation in Eddy County, New Mexico.

2. By contract dated May 5, 1977, El Paso agreed to purchase the natural gas produced from three wells, pending completion, of Yates Drilling Company in Eddy County, New Mexico.

3. By contract dated May 5, 1977, El Paso agreed to purchase the natural gas produced from two wells of Alan J. Antweil and Moranco in Eddy County, New Mexico.

4. By contract dated May 5, 1977, El Paso agreed to purchase the natural gas produced from six wells of Depco, Inc. in Eddy County, New Mexico.

5. By contract dated May 6, 1977, El Paso agreed to purchase the natural gas produced from five wells of Husky Oil Company in Eddy County, New Mexico.

Each contract executed by El Paso as purchaser and Yates Petroleum Corporation, Yates Drilling Company, Alan J. Antweil and Moranco, Depco, Inc., and Husky Oil Company (Sellers) will begin as soon as practicable as an emergency purchase and will continue until July 31, 1977.

El Paso will purchase these supplies at a price of $2.25 per MMBtu inclusive of all state and local taxes and other adjustments. I find the price to be fair and equitable in accordance with Order No. 2.

El Paso advises and I find that the gas made available by Sellers will result in a commingling of interstate natural gas with Sellers' normal intrastate system gas supply and with volumes of gas owned by other parties. The contractual provisions between Sellers and their producers, transporters and other suppliers of gas prohibit the sale of natural gas in interstate commerce and the commingling of their intrastate pipeline system gas supplies with gas moving in interstate commerce. The sale of gas for which El Paso seeks approval may result in some commingling of interstate natural gas with Sellers' normal intrastate gas supplies and with gas owned by other third parties. This order shall be considered as applying to all such commingled gas.

Under the provisions of section 9(b), (c) of Pub. L. 95–2 (91 Stat. 4, 9), the suppliers of such gas, which is so commingled, may not terminate existing contracts with Sellers or such other parties or require a redetermination of the prices provided in such contracts by reason of this transaction. Contractual termination, prohibition or redetermination provisions in any such contracts referred to above are not enforceable by reason of Section 9 of Public Law 95–2 since Sellers are selling gas for El Paso pursuant to Section 6(a) of that Act. Sellers and any third person whose gas is commingled with ElPaso's gas shall refer all relevant information concerning any attempt to terminate existing contracts or require a redetermination of prices to the Administrator for appropriate action.

According to the official files of the Federal Power Commission, Yates Petroleum Corporation, Yates Drilling Company, Alan J. Antweil and Moranco, Depco, Inc., and Husky Oil Company are not classified as natural gas companies within the meaning of the Natural Gas Act. Section 6(b)(1)(A) of the Act provides in part that "[t]he provisions of the Natural Gas Act shall not apply * * * to any sale to an interstate pipeline * * * under the authority of subsection (a) or to any transportation by an intrastate pipeline in connection with such sale * * *." Stat. at 8. In addition section 6(c)(2) provides:

Compliance by any pipeline with any order under this subsection shall not subject such pipeline to regulation under the Natural Gas Act or to regulation as a common carrier under any provision of state law.

El Paso shall submit weekly reports as required by Order No. 4.

Pursuant to Section 6(a) of the Act, I hereby authorize Yates Petroleum Corporation, Yates Drilling Company, Alan J. Antweil and Moranco, Depco, Inc., and Husky Oil Company as sellers to sell El Paso natural gas from said wells located in Eddy County, New Mexico, on the terms and conditions set forth in El Paso's filing in this proceeding.

This order is issued pursuant to the authority delegated to me by the President in Executive Order No. 11969 (February 2, 1977), and shall be served upon El Paso, Yates Petroleum Corporation, Yates Drilling Company, Alan J. Antweil and Moranco, Depco, Inc., and Husky Oil Company. This order shall also be published in the FEDERAL REGISTER.

This order and authorization granted herein are subject to the continuing authority of the Administrator under Pub. L. 94–2 and the rules and regulations which may be issued thereunder.

RICHARD L. DUNHAM,
Administrator.

MAY 17, 1977.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

GRAIN STANDARDS

Indiana Grain Inspection Point

Notice is hereby given that the Frankfort Grain Inspection, which is designated under section 7(f) of the U.S. Grain Standards Act (7 U.S.C. 79(f)) to operate as an official agency at Frankfort, Indiana, has changed its name to Frankfort Grain Inspection, Inc. The change in name does not involve a change in management or ownership.

Done in Washington, D.C. on May 13, 1977.

D. R. GALLIART,
Interim Administrator.

[FR Doc.77–14832 Filed 5–19–77;8:45 am]

Food and Nutrition Service

SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS AND CHILDREN

Public Hearings

Notice is hereby given of seven public hearings to be held by the Department of Agriculture to consider comments regarding possible legislative changes for the Special Supplemental Food Program for Women, Infants, and Children (WIC Program) (42 U.S.C. 1786). The program is currently conducted under regulations published at 7 CFR Part 246.

The legislation governing the administration of the WIC Program expires at the end of Fiscal Year 1978. These hearings are being held to solicit public comment for consideration in formulating new legislative proposals which will be submitted to Congress.

The WIC Program is a grant-in-aid program which provides funds to State agencies to operate the program. The State agencies fund local agencies to provide specified nutritious food supplements to pregnant and nursing women, and to infants and children up to 5 years

of age who are determined by competent professionals to be at "nutritional risk" because of inadequate nutrition and inadequate income. Additionally, a primary component is nutrition education for adult recipients and the guardians of child and infant recipients.

As of February 1977, there were 64 State agencies (49 States, Puerto Rico, the Virgin Islands and 13 Indian agencies) serving 785,700 participants per month. Services are provided to participants through local health facilities.

All hearings will be held between the hours of 9 a.m. and 3 p.m. and on the dates and at the locations listed at the end of this notice.

If you are interested in attending any of these hearings, please contact Ms. Jennifer Nelson, Chief, Program Operations and Monitoring Branch, Special Supplemental Food Division, FNS, U.S. Department of Agriculture, 500 12th Street SW., Washington, D.C. 20250. Please indicate which hearing you will attend, who will be speaking in your behalf and approximately how long your testimony will be.

If you wish to contact the Department by phone, please call (202) 477–8704 and state the nature of your call. Written statements may be submitted before or after the hearings for those that wish to comment and are unable to attend one of the hearings in person.

The hearings will be held as follows:

JUNE 6—PORTLAND, OREGON

Room 827, 385 Federal Building, 1220 Southwest 3rd.

JUNE 8—ALBUQUERQUE, NEW MEXICO

Room 1410, Federal Building, 517 Gold, SW.

JUNE 13—MINNEAPOLIS, MINNESOTA

Room B–15, Federal Building, U.S. Courthouse, 110 S. 4th Street.

JUNE 15—KANSAS CITY, MISSOURI

Room 148, Federal Building (east end of 1st floor), 601 E. 12th Street.

JUNE 20—HARTFORD, CONNECTICUT

Hartford Public Library (Auditorium), 500 Main Street.

JUNE 22—PHILADELPHIA, PENNSYLVANIA

Conference Room B, 11th Floor, Federal Building, West, 1241 Cherry Street.

JUNE 27—BIRMINGHAM, ALABAMA

Room 345, Federal Building, Courthouse, 1800 5th Avenue, N.

Dated: May 17, 1977.

CAROL TUCKER FOREMAN,
Assistant Secretary for Food and Consumer Services.

Rural Electrification Administration

ARKANSAS ELECTRIC COOPERATIVE CORP.

Final Environmental Impact Statement

Notice is hereby given that the U.S. Army Corps of Engineers, as lead agency, on behalf of itself and the Rural Electrification Administration (REA) has prepared a Final Environmental Impact Statement, in accordance with Section 102(2)(C) of the National Environmental Policy Act of 1969, for the White Bluffs Generating Plant, to be constructed near Redfield, Arkansas.

REA has cooperated in the preparation of this document and gives notice of the issuance of the Final Environmental Impact Statement, in connection with an anticipated loan guarantee to Arkansas Electric Cooperative Corporation, P.O. Box 9469, Little Rock, Arkansas 72209.

The anticipated loan will provide AECC with the financing required to participate with Arkansas Power and Light Company and the City Water and Light Plant of the City of Jonesboro, Jonesboro, Arkansas, in the joint construction of the above 1400 MW coal-fired generating plant.

Additional information may be secured on request, submitted to Mr. Richard F. Richter, Assistant Administrator, Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250. The Final Environmental Statement may be examined during regular business hours at the offices of REA in the South Agriculture Building, 12th and Independence Avenue, SW., Washington, D.C., or at the borrower address indicated above.

Final REA action with respect to this matter (including any release of funds) may be taken after 30 days, but only after REA has reached satisfactory conclusions with respect to its environmental effects and after procedural requirements set forth in the National Environmental Policy Act of 1969, have been met.

Dated at Washington, D.C., this 9th day of May 1977.

DAVID A. HAMIL,
Administrator, Rural Electrification Administration.

[FR Doc.77–14213 Filed 5–19–77;8:45 am]

PLAINS ELECTRIC GENERATION AND TRANSMISSION COOPERATIVE, INC.

Environmental Impact Statement

Notice is hereby given that the Rural Electrification Administration anticipates that it will prepare an Environmental Impact Statement in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969 in connection with a possible loan guarantee for Plains Electric Generation and Transmission Cooperative, Inc., 2401 Aztec Road, NE., Albuquerque, New Mexico, 87107, which will provide financing for an EHV transmission line, together with related terminal facilities, to be constructed in the countries of Rio Arriba and Taos, in the State of New Mexico.

The facilities are needed to meet the projected load growth of Kit Carson Electric Cooperative of Taos, New Mexico, which is served by Plains Electric Generation and Transmission Cooperative, Inc. Present studies indicate that the line should be built to operate at a nominal voltage level of 345 kV. It is anticipated that the line, the length of which will be approximately 40 miles, will be constructed to current Rural Electrification Administration wood pole construction standards.

Additional information may be secured by request submitted to Mr. Richard F. Richter, Assistant Administrator—Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C., 20250.

Comments concerning the environmental impact of the construction proposed should be addressed to Mr. Richter at the address given above. Comments must be received on or before June 20, 1977, to be considered in connection with the proposed use of loan funds.

Any loan which may be made pursuant to this possible application will be subject to, and release of funds thereunder will be contingent upon, REA's reaching satisfactory conclusions with respect to environmental effects and final action will be taken only after compliance with Environmental Statement procedures required by the National Environmental Policy Act of 1969.

Dated at Washington, D.C., this 12th day of May 1977.

JOSEPH VELLONE,
Acting Administrator, Rural Electrification Administration.

Soil Conservation Service

FOURCHE CREEK WATERSHED PROJECT, MISSOURI, ARKANSAS

Availability of Negative Declaration

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for a portion of the Fourche Creek Watershed Project, Ripley County, Missouri; Randolph County, Arkansas.

The environmental assessment of this Federal action indicates that this portion of the project will not create significant adverse local, regional, or national impacts on the environment and that no significant controversy is associated with this portion of the project. As a result of these findings, Mr. Kenneth G. McManus, State Conservationist, Soil Conservation Service, has determined that the preparation and review of an environmental impact statement is not needed for this part of the project.

The project concerns a plan for watershed protection, flood prevention, agricultural water management, and nonagricultural water management. The planned works of improvement, as described in the negative declaration, include conservation land treatment supplemented by three single-purpose floodwater retarding structures.

The negative declaration is being filed with the Council on Environmental Quality and copies are being sent to various Federal, State, and local agencies. The basic data developed during the environmental assessment are on file and may be reviewed by interested parties at the Soil Conservation Service, 555 Vandiver Drive, Columbia, Missouri 65201. A limited number of copies of the negative declaration is available from the same address to fill single copy requests.

No administrative action on implementation on the proposal will be taken until June 6, 1977.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program, Public Law 83–566, 16 U.S.C. 1001–1008.)

Dated: May 13, 1977.

JOSEPH W. HAAS,
Assistant Administrator for Water Resources, Soil Conservation Service, Department of Agriculture.

CIVIL AERONAUTICS BOARD

[Order 77–5–61; Docket 29123, Agreement C.A.B. 26588]

IATA

Agreement Adopted Relating to Baggage Matters

Issued under delegated authority May 13, 1977.

An agreement has been filed with the Civil Aeronautics Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA). The agreement, adopted by mail vote, has been assigned the above C.A.B. agreement number.

The agreement would amend the baggage-allowance rules reached in a limited agreement by certain IATA members which was approved by the Board subject to conditions in Order 77–4–97 (April 20, 1977). Specifically, the instant agreement would add Sapporo to the Japanese points designated in the resolution governing the level of excess-baggage charges between Osaka, Fukuoka, and Tokyo on the one hand, and U.S. west-coast points on the other hand. The agreement will be approved subject to the conditions set forth in Order 77–4–97.

Pursuant to authority duly delegated by the Board's Regulations 14 CFR 385.14, it is not found that Resolution JT31 (Mail 127)311, incorporated in Agreement C.A.B. 26588, is adverse to the public interest or in violation of the Act, provided that approval is subject to the conditions stated in Order 77–4–97.

Accordingly, *it is ordered*, That:

Agreement C.A.B. 26588 be and hereby is approved subject to the condition stated herein.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[Docket 26354]

NORTH CENTRAL AIRLINES, INC.

Certificate Application (Milwaukee/Duluth/Superior-Winnipeg); Hearing

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that the hearing in the above-entitled proceeding, which was assigned to be held on May 31, 1977 (42 FR 21635), is assigned to be held on June 10, 1977, at 9:30 a.m., in Room 1003, Hearing Room B, Universal North Building, 1875 Connecticut Avenue, NW., Washington, D.C.

Dated at Washington, D.C., May 13, 1977.

KATHERINE A. KENT,
Administrative Law Judge.

[FR Doc.77–14434 Filed 5–19–77; 8:45 am]

[Order 77–5–44; Docket 30721]

TRANS WORLD AIRLINES, INC.

Proposed Reduced Cargo Charter Minimum Charges

Order Dismissing Complaint

By tariff revisions[1] bearing an issue date of April 7 and marked to become effective May 7, 1977, Trans World Airlines, Inc. (TWA) proposes to remove the minimum charge provision for westbound cargo charters originating in Europe (excluding Algeria, Greece, Morocco, Tunisia, and Turkey) departing between the hours of 9:00 p.m. Saturday and 3:00 p.m. on the following Monday. The current minimum charge is based upon $7.25 per plane mile multiplied by the total number of charter miles. Removal of the minimum charge provision will result in a rate of $6.00 per charter mile.

A complaint has been filed by Seaboard World Airlines, Inc. (Seaboard) requesting suspension pending investigation. The complainant alleges, inter alia, that by TWA's own admission the resulting round-trip average revenue of $6.63 per mile is below its operating expenses of $6.68; that in Order 76–12–98, which approved in part the North Atlantic IATA cargo rate package reached at Miami, the Board showed a TWA freighter rate of return as a negative 21.4 percent; that in support of the Miami package, the carrier stated its plane mile costs to be $8.50; and that TWA has not indicated that the shippers that will use this weekend rate are new to air transportation, and that the proponent will merely attract current users of either scheduled or charter air service and will dilute its own revenues in the process.

In support of its proposal and in answer to the complaint TWA asserts, inter alia, that this revision is necessary to attract return cargo charter trips from Europe during the hours when TWA has available cargo aircraft and would allow TWA to increase its cargo fleet utilization during otherwise inoperative periods of the week when scheduled cargo demand is low; that the domestic cargo fleet operates on a five-day per week basis and is essentially grounded from early Saturday until after midnight on Monday; that if these aircraft can be operated in charter service at a price which exceeds variable expenses, they will help to defray a portion of the overhead expenses assigned to the freighter operation and thereby help achieve more profitable operations; that the proposal is marginally below operating expenses per mile of $6.68, however, to the extent that these trips will be performed by aircraft which would otherwise not be in operation, they provide a positive contribution to operating results since the revenues exceed variable costs; that the variable costs are only $5.34 per mile; that the proposed level will not have any dilutionary effect on present revenues since TWA is not participating in any westbound charter trips; and that the proposal is expected to increase revenues by approximately $5.5 million per year, and will exceed variable costs and offset overhead expenses by $1.1 million, thereby reducing the need of the scheduled operations to bear this burden.

Upon full consideration of the tariff filing, the carrier's justification, the complaint, the answer, and all other relevant factors, the Board has determined to dismiss the complaint and permit the filing to become effective.

The proposal has, according to the carrier, the capability of attracting additional volumes of new traffic with a minimal possibility for diverting existing traffic. It is noted that the complainant does not allege the proposal will result in any specific diversion from existing air traffic, and TWA indicates no meaningful dilution of current revenues will result since it is not now participating in westbound charter trips. We believe the proposal has the potential for generating new traffic to air transport and for increasing cargo fleet utilization during otherwise inoperative periods.

[1] Revisions to tariff C.A.B. No. 270 issued by Trans World Airlines, Inc.

Accordingly, *it is ordered*, That:

The complaint of Seaboard World Airlines, Inc. in Docket 30721, be and hereby is dismissed.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board: [2]

PHYLLIS T. KAYLOR,
Secretary.

TEXAS INTERNATIONAL AIRLINES, INC.

Application For Amendment of Certificate of Public Convenience and Necessity

MAY 16, 1977.

Notice is hereby given that the Civil Aeronautics Board on May 16, 1977, received an application, Docket 30887, from Texas International Airlines, Inc. for amendment of its certificate of public convenience and necessity for route 82 so as to delete the requirement contained in condition (4) of Texas International's certificate that one intermediate stop be made on services between Dallas-Fort Worth, Texas, and Los Angeles-Long Beach, California.

The applicant requests that its application be processed under the expedited procedures set forth in Subpart M of Part 302 (14 CFR Part 302).

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-14435 Filed 5-19-77;8:45 am]

[Order 77-5-81; Dockets 30277, et al.]

WRIGHT AIRLINES, ET AL.

Chicago-Midway Low-Fare Route Proceeding

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 17th day of May, 1977.

In the matter of Chicago-Midway Low-Fare Route Proceeding, Docket 30277; applications of Wright Air Lines (Docket (29911), Midway Airlines (Docket 29914), Continental Air Lines (Docket 30030), Midway (Southwest) Airway (Docket 30189), Chicago Airlines (Docket 30407), Delta Air Lines (Docket 30409), Northwest Airlines (Docket 30410), North Central Airlines (Docket 30412), Southern Airlines (Docket 30413), Trans World Airlines (Docket 30414), Ozark Air Lines (Docket 30417), for authority pursuant to Section 401 of the Federal Aviation Act of 1958, as amended. Application of Allegheny Airlines and Chicago Airlines (Docket 30443), pursuant to Sections 408 and 409 of the Federal Aviation Act of 1958, as amended. Application of Southwest Airlines, M. Lamar Muse, and Herbert D. Kelleher (Docket 30415), pursuant to Sections 408 and 409 of the Federal Aviation Act of 1958, as amended.

By Order 76-12-149, December 28, 1976, the Board requested all interested persons to submit comments concerning the scope of this proceeding. In addition, the Board requested that all other applications and motions to consolidate be submitted within 30 days.

In response to this order, applications were filed by Chicago Airlines, Docket 30407; Delta Air Lines, Docket 30409; North Central Airlines, Docket 30412; Northwest Airlines, Docket 30410; Ozark Air Lines, Docket 30417; Southern Airways, Docket 30413; and Trans World Airlines, Docket 30414.[1]

In addition to these route applications, applications for approval of control and interlocking relationships were filed by Allegheny Airlines, Chicago Airlines, and Marvin S. Kahn in Docket 30443, and by Southwest Airlines, M. Lamar Muse, and Herbert D. Kelleher in Docket 30415. All of the foregoing applications were accompanied by motions to consolidate with this proceeding.

Petitions for leave to intervene have been filed by Braniff Airways, Frontier Airlines, Southern Airways, Texas International Airlines, United Air Lines, the City of Chicago, Cincinnati, Dayton, Illinois Department of Transportation, Iowa Department of Transportation, Kansas City, Minneapolis/St. Paul Airports Commission, Minnesota Department of Transportation, Niagara Frontier Transportation Authority, Ohio Department of Transportation, Pittsburgh, St. Louis, the Texas Aeronautics Commission, and the Wayne County Board of Road Commissioners and Greater Detroit Chamber of Commerce. An answer to the petition of Texas International was filed by Midway (Southwest). In turn, Texas International filed a reply accompanied by a motion for leave to file an otherwise unauthorized document.[2]

Comments in response to Order 76-12-149 were filed by American Airlines, Continental Air Lines, Delta Air Lines, Midway Airlines, Midway (Southwest) Airway, Trans World Airlines, United Air Lines, the Louisville and Jefferson County Air Board, Des Moines, Detroit, the Department of Justice, and the Department of Transportation. Answers to the comments were received from several parties. All the pleadings are summarized in Appendix B. (All appendices filed as part of the original document).

The comments and answers received have been helpful in assisting the Board to define the scope of the proceedings. As expected, however the pleadings presented a wide spectrum of route, rate and control issues. At one extreme it is argued that the Board must reconsider virtually every element of the Domestic Passenger Fare Investigation together with every standard route case consideration; at the other extreme it is contended that the impact of the proposed services on other carriers and the system as a whole need not even be considered, and that the only question to be resolved is the fitness of the applicants.

Neither extreme is acceptable. Because this case may have a profound impact upon the air transportation system, the Board has the responsibility of assuring that the issues are explored in sufficient detail for it to make a reasoned final decision. Nevertheless, there are limits as to how much can be accomplished in one proceeding. This is particularly true since the Board has an obligation to reach a final decision as expeditiously as possible. Accordingly, the number of issues and markets must be limited to keep the case within manageable proportions.

To be assured of an informed decision in a reasonable amount of time, the Board has made the following determinations which are explained in detail below: (1) the number of markets to be considered will be the six largest proposed; (2) the only Chicago authority at issue will be to serve Midway Airport; (3) there will be no pretrial restrictions on fares and services, although all such restrictions will be in issue; (4) mandatory joint fares will not be considered within the scope of this investigation; (5) while the parties should explore, to the extent necessary, the implications of this service on the Board's domestic fare policies, this proceeding will not be used as a forum for parties to challenge or alter our previous DPFI findings; and (6) the various section 408 and 409 applications will be consolidated and heard contemporaneously herewith.

1. NUMBER OF MARKETS

The Board has determined that it must limit the number of markets at issue in order to make this case manageable. A total of 15 nonstop city-pair markets have been proposed for consolidation into this proceeding. Midway (Southwest), North Central, Northwest, and Southern seek nonstop authority from Chicago to Buffalo, Cincinnati, Cleveland, Columbus, Dayton, Des Moines, Detroit, Kansas City, Louisville, Memphis, Minneapolis/St. Paul, Omaha, Pittsburgh, and St. Louis. Each other application includes from one to twelve of the above markets. In addition, Wright proposes service to an additional point—Indianapolis.

Even if only one city-pair market were in issue in this case, it would be far more complex from an analytical point of view than most route cases the Board tries. Not only are the traditional route case questions—traffic, service quality, and carrier selection—at issue, but complicated questions relating to price must be considered, such as the extent of price elasticity, cross elasticity, and diversion from other markets resulting from price differentials. With a potential impact far beyond the local markets, each city-pair market considered magnifies by geometric proportions the scope of analysis necessary to build an adequate record. Moreover, as explained below, we will not impose a pretrial restriction completely prohibiting direct service between coterminal points in issue. Thus, to the extent that there is a possibility of direct service between coterminal points via Midway, the direct diversionary impact on those markets must be considered as well.

In determining how to scope its cases, the Board must continually appraise the effect upon its own limited resources. While this case is certainly an important one, it must not be permitted to so dominate the staff's workload that other important applications cannot be heard or that pending cases will be delayed. The Board expects the staff to contribute substantially to the development of the record in this case by (1) developing DPFI cost-based fares for each market in issue; (2) developing DPFI fares for each market in issue adjusted to reflect individual carrier operations and costs of the proposed service; (3) analyzing individual carrier costs for each market at issue; (4) analyzing traffic and revenue forecasts for each market at issue as to diversion, generation, direct price elasticity, cross price elasticity, quality/price tradeoff and other factors; (5) analyzing the impact of these low-fare filings on other markets (domino effect); and (6) analyzing the effect of these low-fare filings on the DPFI as it relates to the remaining system. Considering the scope of this effort, the impact on workload of considering even a few markets will be substantial.

For example, with six nonstop city-pairs in issue, the potential number of single-plane markets for study is 21. If all markets are heard, the potential number of single-plane markets increases six-fold to a total of 120. The domino effect on other markets in the system increases similarly.

There would be only two ways to achieve the monumental task of processing this case with all 15 nonstop markets in issue. Either the proceeding would have to be extremely time consuming, or other route cases would have to be deferred in order to devote adequate staff to this case. Neither is an acceptable alternative.

Accordingly, the Board has determined that the line should be drawn at the top six Chicago markets which have been proposed.[3] In order of size they are Minneapolis/St. Paul, Detroit, St. Louis, Cleveland, Kansas City, and Pittsburgh. The difference between the Chicago-Pittsburgh market and the seventh largest, Cincinnati, is substantial. In CY 1975 Chicago-Pittsburgh generated 269,740 true O&D passengers while Chicago-Cincinnati generated 194,430. This represents a difference of over 200 passengers per day, and hence a logical place to limit the proceeding. Other criteria, such as population and enplanements, also generally support the selection of these points.[4]

The Board has considered the argument of Midway (Southwest) that service to all the proposed points would enhance the development of Midway Airport as a viable alternative to O'Hare. While this argument has some appeal, the Board nevertheless has determined that the potential benefits do not outweigh the administrative burdens and delay which the inclusion of all the proposed markets would entail. It is our view that the viability of Midway Airport will not be appreciably diminished if six, rather than fifteen markets, are in issue.

2. ONLY MIDWAY AUTHORITY WILL BE CONSIDERED

We have determined that any new Chicago authority awarded in this case will be restricted to Midway Airport. In any event, only three applicants—North Central, TWA, and Continental are seeking awards which would not be restricted to Midway Airport. These applications will be consolidated only to the extent that they seek authority at Midway Airport. In addition Continental's restriction removal application will be limited to consideration of unrestricted Kansas City-Midway Airport authority.

Our decision on this point is based on the unique circumstances of this case and will not necessarily apply in other low-fare proceedings. This case is unique insofar as the applicants and civic parties have contended that, on the one hand, there is a large pool of potential air travelers in the local Chicago markets who would fly if low price transportation were made available, and, on the other hand, there is a completely unutilized airport convenient to downtown Chicago which could easily absorb the increased frequencies needed to tap this market. No one is arguing that service from O'Hare Airport to the cities in issue is inadequate. Indeed, it would be counterproductive if the result of this proceeding would be increased activity at O'Hare. On the contrary, the reduction of traffic at O'Hare as a result of diversion from Midway Airport flights will be evaluated with respect to the Board's policy of encouraging service that will reduce congestion at saturated facilities. We do not necessarily view O'Hare and Midway Airports as constituting two different markets. Rather, at issue is a proposal for high frequency short- to medium-haul air service which depends upon the availability of adequate facilities and the opportunity for well-timed flights throughout the day.

Since O'Hare authority will not be in issue for any applicant, the same will hold true for Continental's application for restriction removal in the Chicago-Kansas City market. No applicant will be able to obtain authority superior to that which Continental could obtain; therefore, Continental will not be prejudiced.

3. PRETRIAL RESTRICTIONS

Upon consideration of the pleadings, the Board has determined that there is not enough information available to properly decide prior to the hearing whether restrictions on services and fares are required. Accordingly, all such proposed restrictions will be in issue in this case.

4. JOINT FARES

As indicated, the Board has determined that the issue of mandatory joint fares for services between the points at issue herein and all other certificated points will not be included within the scope of this investigation. In doing so, the Board is simply following its normal policy regarding this issue in route cases. For example, the question of mandatory joint fares was not considered in either the Air New England or Air Midwest certification proceedings.[5] Further, it is apparent that the types of service proposed by the applicants are dissimilar to the types of service covered by our Phase 4 decision. Thus, a de novo examination of the joint fare question would have to be made and such litigation would add to the complexity of this case and unduly delay its completion. In the event that a certificate is awarded to any of the applicants and the circumstances warrant, the issue of joint fares can be considered in a separate proceeding.[6]

5. CONSIDERATION OF THE DPFI

The relationship between the DPFI and the proposals in this case not only generated a great deal of comment from the parties, but also produced a great deal of confusion. The Board wishes to make clear that we do not intend for the parties to relitigate the DPFI in this route case, nor do we believe there is any need to do so. Any significant technical adjustments to the DPFI fare formula or changes in policies that may be necessary as a result of this investigation can be handled in a subsequent proceeding.[7]

This does not mean that the standards established in the DPFI can be ignored in this case since the institution of low-fare service in the markets at issue would undoubtedly have a major impact on the fares currently in effect in these markets

---

[1] Applications for service to Midway Airport had previously been filed by Wright Air Lines in Docket 29911, Midway Airlines in Docket 29914, and Midway (Southwest) Airway in Dockets 30188 and 30189.

[2] The motion will be granted.

[2] O'Mella, Vice Chairman, filed a dissent, filed as a part of original document.

[3] The Board's authority to so limit a case is well established. City of *San Antonio* v. *C.A.B.*, 374 F.2d 326 (D.C. Cir. 1967).

[4] See Appendix A.

[5] New England Service Investigation, Docket 22973; Air Midwest Certification Proceeding, Docket 28262.

[6] Again we are following the same procedure used previously. Both Air Midwest and Air New England were required to maintain joint fares only after they were certificated and only after the Board determined that both carriers could be brought within the scope of Phase 4 without producing any significant impact on the rest of the system. See Orders 74-10-101 (October 18, 1974) and 74-10-102 (October 18, 1974) for Air New England; and Orders 76-11-3 (November 2, 1976) and 76-12-22 (December 6, 1976) for Air Midwest.

[7] However, if an award permitting institution of a low fare service is made to a carrier currently subject to our orders in Phases 4 or 9 of the DPFI, modifications of those orders may be made in this investigation to the extent necessary to allow those carriers to conduct service at the fares contemplated, and any party may offer evidence in support of such modifications.

and could affect the fares in other markets. The Board clearly must be in a position to weigh this impact in determining the merits of any application. Accordingly, we expect the parties to focus upon the effect this low-fare service would have on the rest of the certificated system, examining such questions as matching fares, on-line fares, the effect on load factors, the domino effect that these fares may have on fares in other markets, and the potential for cross-subsidization of the low fares in these markets by fares in other markets. But, again, we must emphasize that while we expect the parties to explore the implications that institution of these low-fare services may have on the Board's domestic fare policies, we do not intend this route proceeding to be used as a forum for the parties to challenge or alter our DPFI findings.

6. CONTROL QUESTIONS

Midway Airlines suggests that the Board should not hear the Sections 408 and 409 applications of Alleghany and Southwest in this proceeding. The Board has decided to consolidate these applications with the instant proceeding. Contrary to the views of Midway Airlines, the Board believes that consideration of the control issues will not unduly burden or delay the proceeding. The evidentiary presentation required will virtually duplicate that relating to the fitness issue; the basic questions remaining will be those of law and policy.

7. CONSOLIDATION AND INTERVENTION

It is argued by Midway (Southwest) that the Board is not required by Ashbacker principles to consolidate competing applications of the current interstate carriers since these are not premised on the type of low fare service proposed; or, in the alternative, that the Board should, by pretrial restriction, limit the case to the consideration of low-fare service. Whether or not the Board could lawfully exclude non-low-fare applications, as a matter of discretion the Board has determined to grant consolidation of all competing applications and not limit the scope of the proceeding by imposing a pretrial low-fare restriction. While the Board contemplates that the primary focus of the case will be on proposals for low-fare service between Midway Airport and the enumerated cities, it does not intend to preclude the litigation of proposals for service between Midway and the named cities that lack this low-fare feature. Accordingly, the Board believes that all elements of the public convenience and necessity should be in issue and considered, including possible public benefits that might flow from the diversion of traffic and flights from O'Hare to Midway Airport.

All motions for leave to intervent will be granted. The Board is especially desirous of the full participation of Texas International which, along with Braniff and Midway (Southwest), will be able to contribute substantially to the Board's knowledge concerning the experience of low-fare air transportation in Texas.

8. PROCEDURAL AND OTHER CONSIDERATIONS

Due to the complexity and potential importance of this proceeding to the future of air transportation regulation, the Board has directed the staffs of the Bureal of Economics and the Bureau of Operating Rights to prepare jointly a proposed statement of issues, evidence request, and proposed schedule which are attached to this order. A notice will be issued shortly setting forth the date for responses by the parties to the evidence request and the date for the prehearing conference. The administrative law judge assigned to this case will retain full discretionary authority to modify any and all of the staff submissions based on the comments of the parties received prior to the prehearing conference. Each Bureau will be free when they become separate and independent parties to suggest modifications or additions.* In light of these considerations the Board desires to set forth certain general procedural principles, directions, and requests to the parties.

First, the Board desires that this case be processed through the various procedural steps rapidly, but consistent with the development of an evidentiary record sufficient to allow the Board to reach a final decision. To this end, the Board earnestly requests the cooperation of the applicants, carrier intervenors and all other parties to expedite the case. The administrative law judge will have full discretionary power to allow sufficient time for all parties to develop the minimum evidentiary presentation described below, as well as any other evidence which the Judge deems to be relevant and material to the issues. As a preliminary matter the Board has determined that petitions for reconsideration of this order shall be due within 30 days and answers 10 days thereafter.

Second, in order to achieve the above objective, the Board considers it essential that to the extent feasible, the evidentiary presentation required by the administrative law judge be on a comparable basis with respect to all forecasts and estimates relating to costs, traffic, revenues, and diversion.

Third, the Board requests that standardized evidentiary formats be utilized so that the varying estimates in each of these categories are displayed on a comparable basis. In this connection, the Board expects the parties to strictly comply with the usual ground rules which provide that the basis for each estimate, and each subdivision of each estimate, be clearly set forth in footnotes or otherwise, and supported by narrative written discussion to the extent appropriate. For example, estimates that are essentially based on expert judgment should be expressly so-labeled; and if the experience in other markets, for example, in Texas intrastate markets, is utilized, the matter should be clearly spelled out.

To the maximum extent possible, all parties should submit prior to the hearing any proposed stipulations, conditions, limitations, and restrictions, as well as requests for exemption from any provision of Title IV.* In particular, the Board requests the administrative law judge and the parties to explore whether any or all authority which may be granted in this proceeding should be permissive in character, and if so, whether it is economically feasible and desirable to award authority to more than one carrier in each market.

Accordingly, *it is ordered*, That:

1. This proceeding is instituted pursuant to the Federal Aviation Act of 1958, as amended, particularly Sections 204, 401, 404, 408, 409, 412, 416(b), and 1002. The primary issues in this proceeding are whether the public convenience and necessity require the certification of an additional carrier or carriers between Chicago's Midway Airport, on the one hand, and Minneapolis/St. Paul, Detroit, St. Louis, Cleveland, Kansas City and/or Pittsburgh, on the other hand; what should be the duration of any authority awarded; and what terms, conditions, and limitations should be placed on such authority;

2. Any authority granted in this proceeding shall be ineligible for federal subsidy; mandatory joint fares are not at issue in this proceeding;

3. The applications of Wright Air Lines, Docket 29911, Continental Air Lines, Docket 30030; Chicago Airlines, Docket 30407; Delta Air Lines, Docket 30409; Northwest Airlines, Docket 30410; North Central Airlines, Docket 30412; Southern Airways, Docket 30413; Trans World Airlines, Docket 30414; and Ozark Air Lines, Docket 30417, be and they hereby are consolidated into the Chicago Midway Low-Fare Route Proceeding insofar as they conform to the scope of the proceeding as set forth in paragraph (1) above; to the extent not consolidated, the foregoing applicaitons be and they hereby are dismissed without prejudice;

4. The applications of Southwest Airlines, M. Lamar Muse, and Herbert D. Kelleher, in Docket 30415; and Allegheny Airlines, Chicago Airlines, and Marvin S. Kahn in Docket 30443, be and they hereby are consolidated with the Chicago Midway Low-Fare Route Proceeding, Docket 30277;

5. The petitions for leave to intervene filed by Braniff Airways, Frontier Airlines, Southern Airways, Texas International Airlines, United Air Lines, the City of Chicago, Cincinnati, Dayton, the Illinois Department of Transportation, the Iowa Department of Transportation, Kansas City, Minneapolis/St. Paul Airports Commission, Minnesota Department of Transportation, the Niagara Frontier Transportation Commission, the Ohio Department of Transportation, Pittsburgh, St. Louis, the Texas Aeronautics Commission, and the Wayne County Board of Road Commissioners and Greater Detroit Chamber of Commerce, be and they hereby are granted.

6. The motions of Texas International, the City of Chicago, United Air Lines and Midway Airlines for leave to file otherwise unauthorized documents be and they hereby are granted; and

7. Petitions for reconsideration of this order shall be filed no later than thirty days from the service date of this order and any answers thereto shall be filed ten days thereafter.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-14436 Filed 5-19-77;8:45 am]

* Because of the continuing need in this case for expert analysis of the facts and legal issues, no staff component will become a party to the proceeding until the order on reconsideration has been issued.

* This is not intended to preclude any party from advancing such proposals on brief to the administrative law judge, but only to encourage early submission in order to aid in the development of the record.

CIVIL SERVICE COMMISSION

COMMUNITY SERVICES ADMINISTRATION

Grant of Authority To Make a Noncareer Executive Assignment

Under authority of § 9.20 of Civil Service Rule IX (5 CFR 9.20), the Civil Service Commission authorizes the Community Services Administration to fill by noncareer executive assignment in the excepted service on a temporary basis the position of Special Assistant to the Director for Transition Planning, Office of the Director.

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

CARNEGIE—MELLON UNIVERSITY

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00049. Applicant: Carnegie-Mellon University, 5000 Forbes Avenue, Pittsburgh, Pa. 15213. Article: Phototitus Light Valve. Manufacturer: LEP (Laboratories d' Electronique et de Physique Applique), France. Intended use of article: The article is intended to be used for the study of electro-optical effect in DKDP. The phenomena to be investigated will include cycle time, resolution contrast, wavelengths of write and read same.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides the capability to read, write, and store data. The National Bureau of Standards (NBS) advises in its memorandum dated April 28, 1977 that (1) the capability described above for the article is pertinent to the applicant's intended purposes and (2) it knows of no domestic instrument or apparatus of

equivalent scientific value to the foreign article for the applicant's intended use.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

RICHARD M. SEPPA,
Director, Special Import Programs Division.

[FR Doc.77-14366 Filed 5-19-77;8:45 am]

FLORIDA A&M UNIVERSITY ET AL.

Consolidated Decision on Applications for Duty-Free Entry of Scientific Articles

The following is a consolidated decision on applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 201).

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Decision: Applications denied. Applicants have failed to establish that instruments or apparatus of equivalent scientific value to the foreign articles, for such purposes as the foreign articles are intended to be used, are not being manufactured in the United States.

Reasons: Subsection 301.8 of the Regulations provides in pertinent part:

The applicant shall on or before the 20th day following the date of such notice, inform the Deputy Assistant Secretary whether it intends to resubmit another application for the same article for the same intended purposes to which the denied application relates. The applicant shall then resubmit the new application on or before the 90th day following the date of the notice of denial without prejudice to resubmission, unless an extension of time is granted by the Deputy Assistant Secretary in writing prior to the expiration of the 90 day period. . . . If the applicant fails, within the applicable time periods specified above, to either (a) inform the Deputy Assistant Secretary whether it intends to resubmit another application for the same article to which the denial without prejudice to resubmission relates, or (b) resubmit the new application, the prior denial without prejudice to resubmission shall have the effect of a final decision by the Deputy Assistant Secretary on the application within the context of Subsection 301.11.

The meaning of the subsection is that should an applicant either fail to notify the Deputy Assistant Secretary of its intent to resubmit another application for the same article to which the denial without prejudice relates within the 20 day period, or fails to resubmit a new application within the 90 day period, the prior denial without prejudice to resubmission will have the effect of a final denial of the application.

None of the applicants to which this consolidated decision relates has satisfied the requirements set forth above, therefore, the prior denials without prejudice have the effect of a final decision denying their respective applications.

Subsection 301.8 further provides:

• • • the Deputy Assistant Secretary shall transmit a summary of the prior denial without prejudice to resubmission, to the FEDERAL REGISTER for publication, to the Commissioner of Customs, and to the applicant.

Each of the prior denials without prejudice to resubmission to which this consolidated decision relates was based on the failure of the respective applicants to submit the required documentation, including a completely executed application form, in sufficient detail to allow the issue of "scientific equivalency" to be determined by the Deputy Assistant Secretary.

Docket Number: 75-00180-33-77040. Applicant: Florida A&M University, Tallahassee, Florida 32307. Article: Mass Spectrometer, MS30B and accessories. Manufacturer: AEI Scientific Apparatus, Ltd., Japan. Date of denial without prejudice to resubmission: July 28, 1976.

Docket Number: 76-00378. Applicant: University of Oregon, Department of Geology, Eugene, Oregon 97403. Article: Scanning Electron Microscope, Model JSM-35U and accessories. Date of denial without prejudice to resubmission: January 5, 1977.

Docket Number: 76-00497. Applicant: The Johns Hopkins University, Charles and 34th Street, Baltimore, Md. 21218. Article: T.V. Projector modified for special multiplex operation with Zenon Arc Lamp, Model PGP-561. Date of denial without prejudice to resubmission: January 19, 1977.

Docket Number: 76-00480. Applicant: University of New Orleans, Lakefront Drive, New Orleans, LA 70122. Article: Gas Chromatograph-Mass Spectrometer Mat 311A with (Computer Combination, 100 MS). Date of denial without prejudice to resubmission: December 13, 1976.

MIAMI UNIVERSITY

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00075. Applicant: Miami University, Oxford, Ohio 45056. Article: Electron Microscope, Model HS-9-1 and accessories. Manufacturer: Hitachi Limited, Japan. Intended use of article: The article is intended to be used for research involving the structural and developmental characteristics of cell division and the motile reproductive cells in the Green Algae (Chlorophyta). One objective of the research is to enhance understanding of the evolutionary origin and development of the Green Algae and the line of evolution that gave rise to land plants. Another objective is to elucidate the function of certain organelles in the process of cell division. The article will also be used for training graduate and undergraduate students in the courses: Botany 750—Special Problems, Botany 645—Plant Ultrastructure, Botany 643—Phycology, and Botany 421/521—Mycology. In addition, the article is to be used as a backup instrument to teach Zoology 648.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (April 21, 1976). Reasons: The foreign article is a relatively-simple, easy to operate, medium resolution electron microscope designed for confident use in teaching beginning students with a minimum of detailed programming. The article provides 6Å point-to-point resolution, an accelerating voltage of 75 kilovolts, and low distortion magnification from 500X through 100,000X plus 200X for scanning which permits an overlap of light and electron microscopy. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated April 22, 1977 that relative simplicity and full magnification range without a pole piece change are pertinent to the applicant's intended purposes. HEW also advises that it knows of no domestic instrument which provided all the pertinent features at the time the article was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651; 80 Stat. 897).

Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Special Import Programs Division, Office of Import Programs, Washington, D.C. 20230, on or before June 9, 1977.

Amended regulations issued under cited Act, (15 CFR 301) prescribe the requirements applicable to comments.

A copy of each application is on file, and may be examined during ordinary Commerce Department business hours at the Special Import Programs Division, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00206. Applicant: Northwestern University Medical School, Department of Pharmacology, 303 E. Chicago Avenue, Chicago, Illinois 60611. Article: Recording Oscilloscope Camera, PC-3A and accessories. Manufacturer: Nihon Kohden Kogyo Co., Ltd., Japan. Intended use of article: The article is intended to be used for studies of bioelectric potential changes from excitable tissues. Membrane potential and membrane current are recorded from nerve and muscle tissues displayed on an oscilloscope, and photographed on a film. Membrane electrical properties including ionic conductances are then measured from the recorded film. Application received by Commissioner of Customs: April 21, 1977.

Docket Number: 77-00207. Applicant: University of Chicago, Billings Hosp., Department of Pathology, 950 East 59th Street, Chicago, Illinois 60637. Article: Electron Microscope, Model EM 201 and accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used in the investigation of atherosclerosis and atherosclerotic heart disease. Research is performed mainly on experimental animals and also utilizes some human tissues obtained at autopsy. The article will also be used for the training of future scientists as well as for the instruction of medical students, residents and staff scientists and physicians. Application received by Commissioner of Customs: April 21, 1977.

Docket Number: 77-00208. Applicant: National Institutes of Health, National Eye Institute, Bldg. 6, Rm. 213, 9000 Rockville Pike, Bethesda, MD 20014. Article: Ultrotome IV Ultramicrotome, Model LKB 2128-010 and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of eye tissues of the human in both normal and pathological conditions. Experiments on the visual system will include: (1) fine structural study of the photosensitive lamellar membranes of the photoreceptor cells following light exposure in various conditions; (2) phagocytic activity of the pigment epithelium of the retina; (3) fine structural study of the retina and cornea of vitamin A deficient animals (4) cytologic study of the cataractous lenses; and (5) experimentally induced eye diseases in animals. Materials will be embedded in the epoxy resin appropriate for the material being studied before sectioning. Application received by Commissioner of Customs: April 22, 1977.

Docket Number: 77-00209. Applicant: National Radio Astronomy Observatory Associated Universities, Inc., 2010 N. Forbes Blvd., Suite 100, Tucson, Arizona 85705. Article: Klystron, Model VRB 2113A 30 SN. 70443. Manufacturer: Varian Associates of Canada, Ltd., Canada. Intended use of article: The article will be used as a phase-locked local oscillator in a millimeter wave radio astronomy receiver. This receiver is used in conjunction with a microwave antenna to measure the intensity, polarization, frequency and direction of cosmic radiation. Application received by Commissioner of Customs: April 25, 1977.

Docket Number 77-00210. Applicant: University of California, Lawrence Livermore Laboratory, P.O. Box 808, Livermore, California 94550. Article: Combination Scanning Microinterferometer and Scanning Microdensitometer, Model M85/M86 with accessories. Manufacturer: Vickers Instruments Inc., United Kingdom. Intended use of article: The article is intended to be used to measure the coatings that develop on targets used in laser fusion energy production experiments and to inspect the final target themselves. For transparent argets, such as the hollow glass spheres currently being used, the instrument will be interfaced to a computer controlled ball manipulator and data taking station which will "map" the entire sphere. For spheres with opaque coatings, a modification of the optics will be made to allow reflection interferometric measurements of surface features. In this configuration, the computer controlled scan and data readout will again be used to map the sphere surface. Application received by Commissioner of Customs: April 25, 1977.

Docket Number 77-00211. Applicant: University of Miami (Rosenstiel School of Marine and Atmospheric Science), 4600 Rickenbacker Causeway, Miami, Florida 33149. Article: Deep Sea Reversing Thermometer. Manufacturer: Watanabe Keiki Manufacturing Co., Ltd., Japan. Intended use of article: The article is intended to be used for the collection of temperature, depth and conductivity of sea water in the study of the oceans. Application received by Commissioner of Customs: April 25, 1977.

Docket Number: 77-00212. Applicant: NASA/Headquarters, Contracts Division, Code JHC-4, Washington, D.C. 20546. Article: Six (6) Ultrasonic Flowmeters and Associated Electronics and Spares. Manufacturer: O.N.E.R.A., France. Intended use of article: The article will be used to ascertain the oscillatory flow component of liquid oxygen being perturbated by a positive displacement pulser as it flows through a turbopump. The accurate determination of the flow disturbance, both upstream and downstream of the turbo pump are essential in the use of the four terminal network method for establishing the transfer function characteristics of the turbo pump and subsequently the Space Shuttle Main Engine System. The determination of the transfer functions is essential in the definition of the Space Shuttle Vehicle dynamic characteristics relative to the Pogo phenomenon. Application received by Commissioner of Customs: April 25, 1977.

Docket Number: 77-00213. Applicant: U.S. Department of Commerce, Maritime Administration, U.S. Merchant Marine Academy, Steamboat Road, Kings Point, New York 11024. Article: TD-35 Varimax Test and Research Engine Rig and accessories. Manufacturer: Tecquipment Ltd., United Kingdom. Intended use of article: The article is intended to be used for instruction of Marine Engineering students in the courses Internal Combustion Engines E 464 and Internal Combustion Engines E465. Application received by Commissioner of Customs: April 25, 1977.

Docket Number: 77-00214. Applicant: Birth Defects Institute, Embryology Laboratory, Albany Medical Center Receiving Dock, 12 New Scotland Ave., Albany, New York 12208. Article: Ultramicrotome, Model LKB 8800A and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section animal tissues that have been embedded in hardened epoxy resins. These speciments will be used for ultrastructural studies on tissues and cells, cyto and histochemical studies on enzyme and subcellular organelle localization in cells and tissues and subcellular changes in cells induced by changes in their biochemical and physical environments. Application received by Commissioner of Customs: April 25, 1977.

Docket Number: 77-00215. Applicant: University of Hawaii, Chemistry Department, 2545 The Mall, Honolulu, HI 96822. Article: Low Temperature Flash Photolysis Apparatus. Manufacturer: Applied Photophysics, United Kingdom. Intended use of article: The article is intended to be used to detect extremely short-lived excited states of organic compounds. Investigations will be conducted in order to understand the photochemical processes of vision pigments and related compounds immediately after their exposure to light. The article will also be used in the course Chemistry 699 Directed Research to conduct research projects leading to a better general understanding of decay processes of electronically excited organic molecules, including those related to the visual process. In addition, the article will be used for informal instruction of researchers. Application received by Commissioner of Customs: April 27, 1977.

Docket Number: 77-00216. Applicant: Medical College of Ohio, C.S. 10008, Toledo, Ohio 43699. Article: Scanning Electron Microscope, Model S180. Manufacturer: Cambridge-Imanco, United Kingdom. Intended use of article: This article is intended to be used in various

research projects by faculty and students which include the following:

1. Yeast Survival: An Indicator of Environmental Health.
2. Bacterial Control of Aquatic Blue-Green Algae.
3. Quantitative Analysis of Scanning Electron Microscope Images.
4. Scanning Transmission Electron Microscopy of Autoradiographs.
5. Sertoli Cell—Germ Cell Association.
6. Detection and Measurement of Extracellular Material (Seminiferous Tubules).
7. Structural difference of chemically-treated and untreated normal and abnormal human sperm without any artifact due to a prolonged waiting period.
8. Detecting and estimating the low level of radioactivity in autoradiographs of very small intracellular structures of mouse and sea urchin sperm.
9. Study of mouse egg fertilized under in vitro and in vivo conditions.
10. Other research in anatomy, pathology, obstetrics and gynecology, and surgery.

In addition, the article is intended to be used for educational purposes in the following courses: Electron Microscopy, Scanning Electron Microscopy, Advanced Techniques in Microscopy for anatomy, pathology, microbiology, and physiology; and Graduate M.D. training. Application received by Commissioner of Customs: April 27, 1977.

Docket Number: 77-00217. Applicant: Northeastern Ohio Universities—College of Medicine, 275 Martinel Drive, Kent, Ohio 44240. Article: NMR spectrometer, Model WP-80 and Accessories. Manufacturer: NMR Bruker Scientific, West Germany. Intended use of article: The article is intended to be used for studies of the liquid-gel phase transitions of model and biological membranes and, the interaction of proteins, bile salts, drugs, carcinogens with these membranes. The experiments to be conducted include:

(1) Study of the effect of proteins, inserted into the membrane, on the segmental order parameters of the phospholipid alkyl chains,

(2) Study of the effect of bile salts, heat, detergents, drugs, carcinogens on the same order parameters, and

(3) Examination of the effect of Na^+, K^+, Ca^{+2} and Mg^{+2} on the order parameters for various positions in the phospholipid aklyl chains.

Application received by Commisioner of Customs: April 28, 1977.

Docket Number: 77-00218. Applicant: Simon Greenberg Foundation, Post Office Box 8244, Philadelphia, PA 19101. Article: Combined Scanning Interferometer & Densitometer and Accessories. Manufacturer: Vickers, Ltd., United Kingdom. Intended use of article: The article is intended to be used for investigation of the changes in the stratum corneum, the outmost layer of the epidermis, in relation to aging and a variety of disease processes. In aging studies exfoliative cytological specimens are collected from protected and exposed regions of two age cohorts. In the disease, studies of psoriasis and dandruff, exfoliative cytological specimens will be collected before and during various treatment schedules. The objective of these studies are to develop non-invasive, non-intrusive methods for evaluating changes in the human stratum corneum. This will provide a foundation for the development of effective therapeutic and prohylactic treatment for easing various dermatologic problems. In addition, the article will be used for instruction in the courses: Independent Study (U399), Independent Study and Research (G999) and Dermatologic Research (M800). Basic instruction on the article is achieved by having the student calibrate the projected area meter using standard polystyrene spheres of two different radii. Application received by Commissioner of Customs: April 28, 1977.

TEXAS CHRISTIAN UNIVERSITY

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00486. Applicant: Texas Christian University, Chemistry Department, Fort Worth, Texas 76129. Article: Nuclear Magnetic Resonance Spectrometer, Model JNM-FX-60. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for rapid proton and C-13 studies of CIDNP phenomena induced by the photochemical decomposition of dioxetanes and related materials, the determination of organic natural product structures using C-13 NMR. These will usually involve small amounts of materials and pose problems of line assignments which can only be resolved by using sophisticated experimental techniques.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (September 24, 1975). Reasons: This application is a resubmission of Docket Number 76-00218-01-77030 which was denied without prejudice to resubmission on April 16, 1976 for informational deficiencies. The foreign article provides a dual frequency (for ^{13}carbon and proton) variable temperature, 10 millimeter sample probe. The National Bureau of Standards (NBS) advises in its memorandum dated April 22, 1977 that (1) the specification of the article described above is pertinent to the applicant's intended use and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

UNIVERSITY OF CALIFORNIA—LOS ALAMOS

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00070. Applicant: University of California—Los Alamos Scientific Laboratory, P.O. Box 990, Los Alamos, NM 87545. Article: Laser System, Pulsed CO_2. Manufacturer: Lumonics Research Ltd., Canada. Intended use of article: The article is intended to be used for the study of laser induced fusion of cryogenic targets. Typical targets would include various hydrocarbon and materials such as carbon dideuterium. The system will be used to investigate radiation damage in materials and the feasibility of controlled thermonuclear fusion.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides a small signal gain at 10.6 microns greater than or equal to 50. The National Bureau of Standards (NBS) advises in its memorandum dated April 25, 1977 that the specification described above is pertinent to the applicant's intended purposes. NBS also advises that it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

UNIVERSITY OF CHICAGO—ARGONNE

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00055. Applicant: University of Chicago, Operator of Argonne National Laboratory, 9700 South Cass Avenue, Argonne, Illinois 60439. Article: Oxygen Meter Probe. Manufacturer: Interatom, West Germany. Intended use of article: The article is intended to be used to measure the concentration of oxygen in liquid sodium, as a means of detecting a leak of water into Na in a fast breeder reactor steam generator. Experiments will be conducted to develop an accurate reliable method for detecting water leaks into sodium, for use in the CRBR and future IMFBR sodium-heated steam generators.

Comments: No comments have been received with respect to this application. Decision: Application approved: No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (June 2, 1976). Reasons: The foreign article provides a metal-to-ceramic seal capable of withstanding high temperatures (approx 371 to 426.7 degrees centigrade) for a long period of time (2½ to 3 years). The National Bureau of Standards advises in its memorandum dated April 20, 1977 that (1) the specification of the article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use which was available domestically at the time of order.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the foreign article was ordered.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

UNIVERSITY OF MONTANA

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00069. Applicant: University of Montana, Missoula, Montana 59801. Article: Reaction Coulometer Mark IIA with accessories. Manufacturer: Reaction Coulometers Ltd., United Kingdom. Intended use of article: The article is intended to be used for studies of cellulose, raw wood and foliage in which the heat of combustion of volatile pyrolysis products will be investigated to determine the available heat content of forest fuels.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides the capability of directly relating oxygen consumption to the heat of combustion. The National Bureau of Standards (NBS) advises in its memorandum dated April 25, 1977 that the capability of the article described above is pertinent to the applicant's intended uses. NBS also advises that it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

UNIVERSITY OF SOUTH FLORIDA

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00025. Applicant: University of South Florida, College of Medicine, Dept. of Medical Microbiology, Box 10, 12901 N. 30th St., Tampa, FL 33612. Article: Tachonhor, Model LKB 2127-001 and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of biological molecules which include proteins, peptides, and metabolites from animal tissue. The investigations to be conducted will involve studies on in vitro and/or in vivo reactions between molecules following increase, decrease or absence of one or all of the reacting molecules. The objective pursued in the course of these investigations is to understand the interrelationship between the biological molecules and to correlate these changes with chemical alterations seen in human diseases. Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides sensitivities in nanomole quantities with sample volumes of 0.1 to 50 microliters. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated March 21, 1977 that (1) the capability described above is pertinent to the applicant's intended purposes and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended purposes.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

[FR Doc.77-14369 Filed 5-19-77;8:45 am]

UNIVERSITY OF UTAH

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77–00084. Applicant: University of Utah, Department of Biology, Room 225 South Biology Building, Salt Lake City, Utah 84112. Article: Electron Microscope, Model EM 201 with High Goniometer Stage and Refrigerated Water Circulating System. Manufacturer: Philips Electronics Instruments, NVD, The Netherlands. Intended use of article: The article is intended to be used for the following research projects:

(1) Examination of the characterization of the DNA made in vitro of eukaryotic and prokaryotic systems.

(2) Study of the effect of methylation on DNA replication in vivo and in vitro in an attempt to relate the distribution of methyl groups to the in vitro synthesis of the small DNA pieces which are synthesized after methylation.

(3) A plant cell project in which the article will provide a rapid assay in the preparation for materials for autoradiographic experiments.

(4) Work on chemotaxis and *Escherichia coli* seeking rapid characterization of mutants which can be carried out by examination of flagella under the electron microscope.

(5) Investigation of the control assembly and termination of proteins which is aimed at obtaining conditional (temperature-sensitive) lethal mutants of animal cell viruses in an attempt to elucidate the mechanism of viral neoplastic transformation.

Graduate students of the Biology Department will receive training in use of the article which will ultimately benefit them in their chosen careers of independent biological research.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the article was ordered (November 6, 1976). Reasons: The foreign article is equipped with a high tilt (± 60 degrees) eucentric goniometer stage. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated April 23, 1977 that the eucentri-goniometer stage of the article is pertinent to the applicant's intended uses. HEW further advises that it knows of no domestic instrument which provided a scientifically equivalent eucentric goniometer stage at the time of order.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

Office of the Secretary

PRIVACY ACT OF 1974

Proposed Additional System of Records

The purpose of this notice is to propose an additional Privacy Act System of Records for the National Bureau of Standards, COMMERCE/NBS–8, Nuclear Reactor Operator Licensees File.

The purpose of the system is to provide documentation that operators of the nuclear reactor facility, which NBS operates under license from the Nuclear Regulatory Commission, are trained, tested, qualified, and periodically requalified, as required by the NRC.

The principal routine use of information in this system is disclosure to the NRC for the purpose of conducting audits of the qualifications of reactor operators. The proposed system is printed below.

The Commerce Department submitted a New System Report dated May 3, 1977, to the Congress, the Office of Management and Budget, and the Privacy Protection Study Commission, as required by the Privacy Act.

Although the Act requires the opportunity for public comment only as to the proposed "routine uses", comments regarding any portion of this Notice will be given due consideration before final publication. Any interested person may submit written data, views or arguments to the Assistant Secretary for Administration (Attn: Information Management Division, Room 5026), U.S. Department of Commerce, 14th and E Streets, NW., Washington, D.C. 20230, any time on or before June 20, 1977. The comments received will be available, as received, for public inspection at the above address between the hours of 9 a.m. and 4 p.m. Monday through Friday (except holidays).

This system of records will become effective 30 days from the date of publication (June 20, 1977), provided the Department's request for a waiver of the 60-day advance notice requirement is granted by the Office of Management and Budget, or unless the Department notices to the contrary.

AUTHORITY: 5 U.S.C. 552a(e) (4), (11), sec. 3, Privacy Act of 1974 (Pub. L. 93–579, 88 Stat. 1896).

Dated: May 3, 1977.

GUY W. CHAMBERLIN, JR.,
Acting Assistant Secretary for Administration.

COMMERCE/NBS–8

System name:

Nuclear Reactor Operator Licensees File—COMMERCE/NBS–8.

System location:

Reactor Operations Section, Reactor Radiation Division, Institute for Materials Research, National Bureau of Standards, Washington, D.C. 20234.

Categories of individuals covered by the system:

NBS employees who are licensed as Nuclear Reactor Operators, those whose applications for licenses are being processed, and those whose licenses have expired.

Categories of records in the system:

These records contain information relating to the application for a Nuclear Reactor Operator's license, certification of competency, certification of medical history, results of medical examination and related correspondence, reactor operator examination and examination results, records of training, and license or denial letter.

Authority for maintenance of the system:

Sections 107, 161(i), Atomic Energy Act of 1954, as amended, 42 U.S.C. 2137, and 2021(i), 15 U.S.C. 272.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Information in these records may be disclosed: To the Nuclear Regulatory Commission for the purpose of conducting audits of the qualifications of reactor operators. Also see routine use paragraphs of the Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Storage:

Paper records in file folders.

Retrievability:

Filed alphabetically by name.

Safeguards:

Records are maintained in a locked filing cabinet in a limited access building.

Retention and disposal:

All records relating to an individual's license and documentation for license including requalification requirements will be retained as long as is required by the Reactor License and will thereafter either be turned over to the individual concerned or destroyed.

System manager(s) and address:

Deputy Chief, Reactor Operations Section, Reactor Radiation Division, Institute for Materials Research, National Bureau of Standards, Washington, D.C. 20234.

Notification procedures:

Information may be obtained from:

Associate Director for Administration, Room 1105, Administration Building, National Bureau of Standards, Washington, D.C. 20234.

Requester should provide name and additional factual data as appropriate, pursuant to the inquiry provisions of the Department's rules, would appear in 15 CFR Part 4b.

Record access procedures:

Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures:

The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories:

Subject individual, licensed physician, employees of the Reactor Radiation Division, and those authorized by the subject individual to supply information.

[FR Doc.77–14288 Filed 5–19–77; 8:45 am]

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1977

Proposed Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Addition to Procurement List.

SUMMARY: The Committee has received a proposal to add to Procurement List 1977 commodities to be produced by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: June 23, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street, North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher (703–557–1145).

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77.

If the Committee approves the proposed addition, all entities of the Government will be required to procure the commodities listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities to Procurement List 1977, November 18, 1976 (41 FR 50975):

Class 7930

Rinse Additive, Dishwashing 7930–00–619–9575 (for 60% of Government's requirements).
7930–00–619–9573.

C. W. FLETCHER,
Executive Director.

[FR Doc.77–14410 Filed 5–19–77; 8:45 am]

COUNCIL ON ENVIRONMENTAL QUALITY

ENVIRONMENTAL IMPACT STATEMENTS

Receipt Period of May 9 through May 13, 1977

The following is a list of environmental impact statements received by the Council on Environmental Quality from May 9 through May 13, 1977. The date of receipt for each statement is noted in the statement summary. Under Council Guidelines the minimum period for public review and comment on draft environmental impact statements is forty-five (45) days from this FEDERAL REGISTER notice of availability (July 4, 1977). The thirty (30) day period for each final statement begins on the day the statement is made available to the Council and to commenting parties.

Copies of individual statements are available for review from the originating agency. Back copies are also available at 10 cents per page from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

DEPARTMENT OF AGRICULTURE

Contact: Mr. Errett Deck, Coordinator, Environmental Quality Activities, U.S. Department of Agriculture, Room 359–A, Washington, D.C. 20250, 202–447–6827.

FOREST SERVICE

Draft

San Gabriel Unit, Angeles National Forest, San Bernardino and Los Angeles Counties, Calif., May 13: This statement proposes several alternative land use management plans for the 186,570-acre San Gabriel Planning Unit, Angeles National Forest, California. The unit includes the 36,000-acre San Gabriel Wilderness, the 3,500-acre Cucamonga Wilderness Study Area, the 56,000-acre Sheep Mountain Wilderness Study Area, the 6,060-acre San Dimas undeveloped area, and the 17,000-acre San Dimas Experimental Forest. Impacts vary according to the alternate selected. (ELR Order No. 70590.)

Final

Ninemile-Mill Unit Plan, Lolo National Forest, several counties, Montana, May 9: The proposed action is the implementation of a revised multiple use plan for the Ninemile-Mill Planning Unit, Lolo National Forests. This action affects 120,950 acres of National Forest land of which 115,262 acres are in Missoula County, 5,120 acres are in Mineral County, 330 acres are in Lake County, and the remaining 238 acres are in Sanders County. Adverse effects include alteration of the natural landscape and disturbance of the natural condition of vegetation, soil, water, and wildlife. Comments made by: FPC, EPA, DOI, State agencies, and concerned citizens. (ELR Order No. 70566.)

Supplement

Alaskan National Forests, Herbicide Use (S–2), Alaska, May 12: This statement is a final addendum to the final EIS on the use of herbicides on the National Forests of Alaska in 1977. The proposed action is control of vegetation through the use of herbicides on road, railroad, and powerline rights-of-way. The herbicides proposed for use include 2,4-D, picloram, amitrole, sodium metaborate, sodium chlorate, and bromacil. Susceptible target and nontarget vegetation in the treatment areas will be reduced in vigor and, in most cases, killed. (ELR order No. 70581.)

1976 Coop. Western Spruce Budworm Plan (S–1), several counties, Washington, May 9: This statement is a final addendum to a final EIS filed with CEQ in 1976 on the Western Spruce Budworm Pest Management Plan. Based on entomological and biological considerations, the USDA-Forest Service, in cooperation with the Washington State Department of Natural Resources, USDI-Bureau of Indian Affairs, and USDI-Bureau of Land Management, will treat western spruce budworm on 460,000 acres out of a total infestation of 1,100,020 acres in the spring and summer of 1977. The method of treatment will be aerial application of carbaryl (Sevin 4 Oil). Application of the chemical will result in reduction of wild bee populations, microathopods, and aquatic insect populations. (ELR order No. 70568.)

RURAL ELECTRIFICATION ADMINISTRATION

Draft

Beluga Station Nos. 7, 8, 9—Bernice Lake Unit 3, Alaska, May 12: Proposed is the granting of financial assistance to Chugach Electric Association for the construction of additional generating capacity at the Beluga Station and the Bernice Lake Power Plant in Alaska. Plans include expansion of Units 7, 8, and 9 at the Beluga Station, located 40 air miles west and across Cook Inlet from Anchorage, and expansion of Unit 3 at the Bernice Lake Power Plant, located at Nikiski, within the Kenai Peninsula Borough. The major impact resulting from the action will be release of some oxides of nitrogen from the new generating station facilities. (ELR order No. 70582.)

DEPARTMENT OF COMMERCE

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Contact: Dr. William Aron, Director, Office of Ecology and Environment Conservation, NOAA—Room 5813, Department of Commerce, Washington, D.C. 20230, 202–967–5181.

Draft

Atlantic Clam Fishery Management, May 13: The Mid-Atlantic Regional Fisheries Management Council has proposed the adoption of this management plan for surf clam and ocean quahogs caught off the Mid-Atlantic and Northeastern United States. The plan proposed the following objectives, to: rebuild the declining surf clam stocks within a 10-year period; minimize the short term economic dislocation to the extent possible consistent with the rebuilding of the surf clam stocks, and promote economic efficiency: and prevent overfishing of the ocean quahog stocks. Few adverse effects are anticipated. (ELR order No. 70592.)

DEPARTMENT OF DEFENSE

ARMY CORPS

Contact: Dr. C. Grant Ash, Office of Environmental Policy Department, Attn: DAEN–CWR–P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000

Independence Avenue, SW., Washington, D.C. 20314, 202–693–6795.

Draft

Packer River Terminal, Barge Terminal Expansion, Dakota County, Minn., May 12: The proposed action is expansion of an existing barge terminal in South St. Paul, Minnesota, by the Packer River Terminal Inc. (Packer). Packer plans to fill approximately 22 acres of wetlands to increase the capacity of their terminal to store and handle an estimated additional 635,000 tons of commodities per year. The primary impact would result from loss of the wetlands, which presently serve the functions of water quality, food chain production, general habitat, nesting and rearing habitat, and flood storage. Also, the habitat value of adjacent wetlands would be reduced. (ELR order No. 70585.)

Pembiller Lake and Dam (2), Pembia and Cavalier Counties, N. Dak., May 9: The proposed project calls for the construction of a rolled earth type dam across the Pembina River about 2 miles southwest of Walhall, North Dakota, near the Cavalier-Pembina County Line. The reservoir would have a controlled storage capacity of 147,000 acre-feet of which 15,000 acre-feet would be in an 800 foot surface area conservation pool. Storage within the conservation pool would be allocated to water supply, recreation, and sedimentation. The project would result in the permanent inundation of about 800 acres of the valley. (St. Paul District.) (ELR order No. 70570.)

Port Clinton Harbor, Maintenance Operations, Ottawa County, Ohio, May 12: The proposed action is the intermittent dredging of the existing navigation channel at Port Clinton Harbor, Ohio. Structure maintenance of the existing jetties, by replacing the rubble and improving the safety for pedestrian uses, would be performed when necessary. An open area of Lake Erie and possible beach nourishment areas have been proposed for disposal of dredged materials. In the dredging, disposal, and repair areas, temporary turbid conditions will be created and water quality will decline, disturbing or destroying aquatic life. (Detroit District.) (ELR order No. 70578.)

Final

Punta Gorda Isles, Inc.-Section 15 (Permit), Charlotte County, Fla., May 13: This statement concerns the application by Punta Gorda Isles, Inc., for a permit to conduct activities in the navigable waters of the United States for the purpose of constructing a boat lock in a canal connecting to the north branch of Alligator Creek. The development involves approximately 922 acres. The proposed work would cause the removal of the mangrove and Juncus Grass communities, and would adversely affect water quality. Approximately 146 acres of wetlands would be filled. (Jacksonville District.) Comments made by: USDA, DOC, HEW, DOI, EPA, State and local agencies, and concerned citizens. (ELR order No. 70588.)

Removal of Water Hyacinth, Aquatic Plant Control, Louisiana, May 9: This statement discusses two actions which are similar in scope. The first project consists of the removal of water hyacinth and other plants from navigable waters of Louisiana, so far as they are or may become an obstruction to navigation. The second action is the control and progressive eradication of water hyacinth, alligator-weed, Eurasian watermilfoil, and other obnoxious aquatic plant growths from navigable waters, tributary streams, connecting channels, and other allied waters of the United States. The primary effort under these programs is the spraying of herbicide 2, 4-D under strictly controlled conditions. No adverse effects are anticipated. (New Orleans District.) Comments made by: DOC, DOT, EPA, AHP, State and local agencies and Concerned Citizens. (ELR order No. 70564.)

Vermilion Lock Replacement, Gulf ICW, Vermilion County, La., May 10: This final EIS updates a revised draft EIS filed with CEQ in November, 1975. The project provides for construction of an earth-chambered sector-gated replacement lock for the existing Vermillion Lock, Gulf Intracoastal Waterway, Louisiana Section. The primary adverse impacts will be the loss of 806 acres of marsh and existing vegetation and wildlife, increased turbidity, and the loss of some benthic organisms. (New Orleans District.) Comments made by: EPA, DOI, DOC, USDA, DOT, HEW, AHP, State and local agencies, concerned citizens. (ERL Order No. 70573.)

Appalachian Power Co., Power Plant, New Haven, Mason County, W. Va., May 13: Proposed is the construction and operation of a 1,300,000 kV coal-fired power plant in New Haven, West Virginia. The plant will use cooling water from the Ohio River and will discharge station waste to the river. Adverse impacts of the project include the discharge of waste from ash disposal and station drains, and passage of water through the station system, the use of chemical additives to water used in the station system, and the breakdown of the pollution control system. The project will also require the clearing of forest land and the relocation of Little Broad Run. (Huntington District.) Comments made by: EPA, DOI, USDA, DOC, FPC, DOT, ORBC, AHP, State and local agencies, concerned citizens. (ERL Order No. 70591.)

Supplement

Buena Vista Flood Protection (S–1), Rockbridge County, Va., May 9: Proposed is the Buena Vista Flood Protection Project which provides for flood protection measures consisting of an 11,700-foot levee and floodwall, a 200-foot wide channel 2,800 feet long, a 5,700-foot interior drainage canal and three closures. Adverse effects include the covering of 72 acres of low-use habitat with levee and floodwall, loss of vegetation on riverbank adjacent to channel, and increased rate of sedimentation into the Maury River during construction. Relocation of businesses, utilities, and transportation facilities will also result. (Norfolk District.) (ERL Order No. 70563.)

NAVY

Contact: Mr. Ed Johnson, Department of the Navy, Room 4B466, Pentagon, Washington, D.C. 20350, (202–697–3639).

Draft

San Diego Naval Sta., Berthing/Repair Pier No. 2, San Diego County, Calif., May 11: Proposed is the construction of a reinforced concrete pier 120 feet wide by 1,005 feet long at the Naval Station, San Diego, California. The project site of the proposed new berthing pier No. 2 will be midway between berthing piers No. 1 and 3, where the water is approximately 300 feet MLLW. The project will deepen the area to 35 MLLW and the dredged material will be disposed of about 8 miles west of Point Loma. Dredging will temporarily disturb marine and bottom life. (ELR Order No. 70576.)

FEDERAL ENERGY ADMINISTRATION

Contact: Mr. Robert Stern, Director, Office of Environmental Impact, Federal Energy Administration, New Post Office Building, Room 7119, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461 (202–566–9760).

Final

Coal Conversion Program, May 13: This statement proposes FEA's issuance of orders to fossil fuel-fired facilities prohibiting them from burning natural gas or petroleum products as their primary energy source and requiring facilities in the early stages of planning to be built with the capability of burning coal. The following impacts are generally associated with coal burning and vary in degree from site to site: (1) An increase in emissions of air pollutants, (2) increases in solid waste generation, (3) potential increases in land requirements, (4) increases in water pollution, and (5) increases in coal mining, processing, and transport. Comments made by: ICC, USDA, FPC, EPA, HEW, distribution system. (ELR Order No. 70586.)

Supplement

Bayou Choctaw Salt Dome—SPR (S–1), Iberville County, La., May 13: This statement supplements a final EIS filed with CEQ in December, 1976. Proposed is the implementation of the Strategic Petroleum Reserve, Title I, Part B of the Energy Policy and Conservation Act of 1975 through the development of a 94 million barrel crude oil storage facility at the Bayou Choctaw Salt Dome. The oil transportation proposed in the final EIS has been revised to provide direct connections by pipeline to the existing oil distribution system at St. James, Louisiana. This supplement is concerned with the construction and operation of this revised oil distribution system (ELR Order No. 70586.)

GENERAL SERVICES ADMINISTRATION

Contact: Mr. Andrew E. Kauders, Environmental Affairs Division, General Services Administration, 18th and F Streets NW., Washington, D.C. 20405, 202–566–0405.

Supplement

Fort Holabird Disposal, Amended (S–3), Baltimore County, Md., May 13: This statement supplements a final EIS filed with CEQ in November, 1975. Proposed is the disposal of 226.85 acres of Fort Holabird, Baltimore City and Baltimore County, Maryland. This acreage will be disposed of as follows: (1) approximately 179.20 acres through negotiated sale with the city of Baltimore for general public purposes; (2) approximately 37 acres by assignment to BOR for conveyance to the city of Baltimore for park and recreational purposes; (3) approximately 4 acres by assignment to BOR for conveyance to Baltimore County for park and recreational purposes; and (4) approximately 6.65 acres through Sealed Bid Sale. (ELR Order No. 70594.)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director, Office of Environmental Quality, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410, 202–755–6308.

Draft

Parkway Forest Subdivision, Harris County, Tex., May 11: Proposed is the approval, for mortgage insurance purposes, of the 543.42-acre Parkway Forest Subdivision in eastern Harris County, Texas. The development plan calls for construction of 2680 housing units with additional acreage reserved for commercial, open space, and recreational uses. Plant and animal communities currently existing on the site will be disrupted. The action will also result in increases in automobile traffic, vehicle emissions, and noise levels. (ELR Order No. 70574.)

CandleRidge—South Ridge Communities, Tarrant County, Tex., May 12: Proposed is the approval of an application by CandleRidge Development Corporation and the Poster Financial Company for FHA mortgage insurance for the proposed communities of CandleRidge and South Ridge. The 1,684-acre project is located 8 miles southwest of

the Fort Worth Central Business District and is designed to accommodate a 1985 population of 15,500 persons with a housing supply of 5,664 units. Of these units, 2,796 are low-density single family homes, 1,164 units are medium-density apartments, and another 1,704 units are cluster housing, condominiums, townhomes and duplexes. Adverse effects include loss of prairie lands, and degradation of water. (ELR Order No. 70583.)

Final

Georgetown ASP 75–28, Chatham County, Ga., May 9: Proposed is the planned unit development of 2206 acres in Chatham County, Georgia. The planned land uses include single-family detached houses, apartments and townhouses, regional and neighborhood commercial areas, recreation facilities, a school complex, an office park, a warehouse/light industry area, an activity center and a sewage treatment plant. The major adverse impacts will be increased demands on schools and highways, and loss of agriculturally productive and. Comments made by: AHP, COE, FPC, ERDA, EPA, GSA, USDA, DOC, HEW, DOI, state and local agencies, and concerned citizens. (ELR order No. 70565.)

The following are Community Development Block Grant statements prepared and circulated directly by applicants pursuant to section 104(h) of the 1974 Housing and Community Development Act. Copies may be obtained from the office of the appropriate local chief executive. (Copies are enot available from HUD).

SECTION 104 h

Draft

Santa Rosa, S. Park Neighborhood Development, Sonoma County, Calif., May 9: This statement provides a comprehensive analysis of the environmental consequences of full implementation of the South Park Neighborhood Development Program in Santa Rosa, California. Redevelopment activities have been underway in the neighborhood for over three years and are anticipated to continue for another ten. Specific features of the plan are the rezoning of a seven-block area to be totally commercial, the expansion of a neighborhood park, and the construction of a new roadway completing a beltway around the neighborhood. Alternatives include cessation of redevelopment, and reduced funding. (ELR order No. 75069.)

Renton, Cedar River Trail System, King County, Wash., May 9: Proposed is the construction of a continuous multi-use recreational system along the Cedar River from the mouth of the river at Lake Washington to the proposed King County Park, adjacent to the Maplewood Golf Course five miles up river. The project is to be completed in phases and includes three different environmental zones: the Industrial/Park Zone, the Urban Zone, and the Natural Zone. These areas fall directly within Census Tracts 253, 256, and 257. Adverse impacts are expected to be minimal. (ELR order No. 70571.)

Final

Memphis, Tenn.—New Chicago Area, Tennessee, May 12: Proposed are a number of improvements to the New Chicago area in Memphis, Tennessee. Plans include improvements to streets, curbs, gutters, and structures. The 2689-acre project area is in north Memphis, bounded by Wolf River on the north, Chelsea Avenue on the south, North Cypress Creek on the east, and an industrial complex on the west. No adverse effects are anticipated. Comments made by: EPA, DOI, and interested parties. (ELR order No. 70584.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 5311, Department of the Interior, Washington, D.C. 20240, 202–343–3891.

BUREAU OF LAND MANAGEMENT

Final

Navajo Reservation, Coal Lease and Mining Plan, San Juan County, N. Mex., May 11: Proposed is the approval of a coal mining lease and associated mining and reclamation plan on the Navajo Indian Reservation in New Mexico. The major environmental impacts of the proposal will include substantial income to the Navajo Tribe, relocation of the Navajo people residing on the mining area, and the temporary disruption of all surface uses in the area. The audio-visual impact of strip mining and railroad operations, and the permanent alteration of topography also will result. Comments made by: EPA, DOT, ICC, FEA, HEW, DOI, state agencies, Navajo Tribe, and interested parties. (ELR order No. 70575.)

BUREAU OF OUTDOOR RECREATION

Final

Continental Divide and Kit Carson Trails, May 9: Proposed is the designation of a 3,100-mile route from Canada to Mexico as the Continental Divide National Scenic Trail, pursuant to the National Trails System Act (P.L. 90-543). The designated trail would be limited to those sections already in existence on Federal lands, while new trail development would be deferred until the more immediate trail needs of population centers in the vicinity are met. Adverse impacts would occur for some of the trail segments due to anticipated increased use by hikers, horseback riders and pack animals, and increased disposal of wastes. Comments made by: USDA, DOT, HUD, EPA, DOI, state and local agencies, and interested parties. (ELR order No. 70567.)

BUREAU OF RECLAMATION

Final

Dolores Project, Colorado, Montezuma and Dolores Counties, Colo., May 9: The proposed project involves the diversion of water from the Dolores to the San Juan River Basin, Colorado. The project would include McPhee Reservoir on the Dolores River, the smaller Monument Creek and Dawson Draw Reservoirs in the San Juan River Basin, and two major conveyance systems. An average of 126,600 acre-feet of water annually would be developed for the irrigation of 26,300 acres of supplemental service land and 35,360 acres of full service land, for municipal and industrial use, and for fish and wildlife enhancement. Adverse effects include relocation of 42 families, and the inundation of about 4,850 acres. Comments made by: DOI, AHP, USDA, DOD, EPA, HEW, HUD, DOT, state and local agencies, and concerned citizens. (ELR order no. 70562.)

Final

Monongahela River Basin Study, Maryland, Pennsylvania, and West Virginia, May 9: Proposed is adoption of the Monongahela R. Basin Plan for implementation of one major reservoir, one upstream watershed project, flood zoning and insurance at 13 locations, four local protection projects, 104 municipal wastewater treatment facilities, 130 mile drainage abatement areas, and the replacement of one navigation lock and one lock and dam. Adverse impacts of the plan include the inundation of 4,376 acres of open and green space, disruption of 55 miles of existing natural stream channel by four projects, and the possible loss of 2,650 acres of coal resources and associated jobs. Comments made by: USDA, USA, DOC, HEW, HUD, DOI, DOT, ERDA, FPC, EPA, CEQ state agencies, and concerned citizens. (ELR order No. 70559.)

Contact: Mr. Lindsey Grant, Director, Office of Environmental Affairs, Room 7822, Department of State, Washington, D.C. 20520, 202–632–9278.

Final

AID Pest Management Program: This EIS addresses all activities of the Agency for International Development (AID) which are intended to control or eliminate pests. Conceptually, the AID program is organized according to: (a) program area (food production and preservation, public health, and all other pest management programs); (b) program element (pesticide activity, research, training and technical assistance, other pest management activities); and (c) geographical region (the United States, less developed countries, and extraterritorial global areas). AID activities will include development assistance through land and grant programs of technical assistance and training. Comments made by: USDA, HEW, DOI, USCG, DOT, EPA, CEQ, international organizations, foreign governments. (ELR Order No. 70593.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street SW., Washington, D.C. 20590, 202–426–4357.

BONNEVILLE POWER ADMINISTRATION

Draft

Fiscal year 1978 Bonneville Dam Integrations Transmission, Clark and Skamania Counties, Wash., May 12: The proposed action is construction of transmission facilities to integrate the electricity from the second powerhouse at Bonneville Dam, in the State of Washington, into BPA's grid system. Two alternatives are discussed, both of which involve the construction of approximately 1.3 miles of new 230–kV line and the addition of 21 miles of conductor to the vacant side of existing BPA double circuit towers. Depending upon the final route location chosen, between 6 and 24 acres of new right-of-way would be required, and approximately 100 acres of trees and brush would be cleared for construction. (ELR Order No. 10579.)

FEDERAL AVIATION ADMINISTRATION

Draft

Hollywood-Burbank Airport, California, May 9: Proposed is the public acquisition and continued operation of the existing Hollywood-Burbank Airport. Lockheed Air Terminal, Inc., the current owner/operator, has given notice that it will close the airport to public use, and divest itself of the airport facility. The alternatives to public acquisition and operation of the airport consist of two basic options: "No Action" and the substitution of "Alternative Transportation Modes" for the transportation functions presently served by the Airport. (Western Region.) (ELR Order No. 70572.)

FEDERAL HIGHWAY ADMINISTRATION

Draft

Lee's Summit Rd. Improve, U.S. 24—I–70, Jackson County, Mo., May 9: Proposed is the improvement of Lee's Summit/Kiger Roads within the corporate boundary of the City of Independence, Missouri, from U.S. 24 Highway on the north to and including the proposed I–70 diamond interchange on the south. It is a north-south arterial street between Noland Road on the west and M–291

on the east. The existing roadway is two lanes to be improved to four lanes for a length of approximately four miles. Adverse effects include the acquisition of 25.4 acres of land for right-of-way and the relocation of 30 families. (Region 7.) (ELR Order No. 70560.)

S.R. 42, Algood Bypass—Livingston Bypass, Overton and Putnam Counties, Tenn., May 12: Proposed is the construction of State Route 42 in Putnam and Overton Counties, Tennessee. The 13-mile project begins at the proposed Algood Bypass and extends in a northeasterly direction on new location to south of the Livingston Bypass. Plans call for construction of a 4-lane divided highway on a minimum right-of-way width of 250' utilizing various proposed typical roadway sections. Adverse effects include displacement of residences, loss of natural habitat, introduction of a new source of noise and air pollution, and temporary siltation of all involved streams during construction. (Region 4.) (ELR Order No. 70577.)

Final

U.S. 81 and U.S. 30, Columbus, Nebr.; Polk, Butler, and Platte Counties, Nebr., May 12: The project consists of the improvement of two separate roadways, U.S. 81 and U.S. 30 south of Columbus, and L-71-D, U.S. 81 to U.S. 30 connection in the city of Columbus. The improvement includes the construction of new bridges over Platte and Loup Rivers as well as over various creeks and drainageways. The project will require the acquisition of 50 acres of land for right-of-way and the displacement of families and businesses. A 4(f) statement concerning Pawnee Park is included. Comments made by: DOT, USAF, COE, USDA, DOI, EPA. (ELR Order No. 70580.)

Mapleton Center Street, Utah County, Utah, May 9: Proposed is the improvement and extension of Mapleton Center Street from Maple Street to Hobble Creek Canyon Road, a distance of 1.5 miles. Bituminous surface will cover 2 12-foot lanes and 2 8-foot shoulders, for a total width of 40 feet. Adverse impacts include the relocation of 3 families and construction disruption resulting especially from a cut and fill section and structure for Hobbel Creek. (96 pages.) Comments made by: DOI, USDA, EPA, HUD, DOC, HEW, AHP, State agencies, interested parties. (ELR Order No. 70558.)

Oneida St. Bridge and approaches, Appleton; Outgamie County, Wis., May 9: The proposed project involves the construction of a new bridge across the Fox River and a Government Lock Canal and its approaches in the City of Appleton. The bridge, located 600' west of the present Oneida Street crossing, would be four lanes wide and .67 mile long. The construction of the north approach roadways will require the acquisition of a portion of Jones Park (a 4(f) statement is included) and the south approach will sever the practice area of Riverview Country Club's golf course. Three residences will have to be relocated, one warehouse will have to be acquired and Peerless Point Co. will be displaced by construction. (Region 5.) Comments made by: USCG, DOI, COE, USDA, HEW, EPA, State and local agencies, concerned citizens. (ELR Order No. 70561.)

U.S. COAST GUARD
WASHINGTON, D.C. 20590
202-426-2010

Draft

Tanker Regs—Double Bottoms, Segregated Ballast, May 13: Proposed are certain changes in regulations related to two earlier rulemakings that were issued under Title II of the Ports and Waterways Safety Act of 1972. The regulatory changes would apply segregated ballast requirements to tank vessels both new and existing of 20,000 deadweight tons or greater and would require that all new tank vessels have double bottom spaces to achieve the required segregated ballast capacity. These regulations would apply to U.S. tankers and to foreign tankers entering U.S. waters. Beneficial impacts are anticipated. (ELR Order No. 70587.)

NICHOLAS C. YOST,
Acting General Counsel.

DEPARTMENT OF DEFENSE

Department of the Army

PRIVACY ACT OF 1974

New System of Records

The Department of the Army systems of records notices as prescribed by the Privacy Act of 1974 have been published in the FEDERAL REGISTER as follows:

FR Doc. 75-21075 (40 FR 35151) August 18, 1975.
FR Doc. 75-22781 (40 FR 41970) September 9, 1975.
FR Doc. 75-26296 (41 FR 2952) January 20, 1976.
FR Doc. 76-20187 (41 FR 28806) July 13, 1976.
FR Doc. 76-21185 (41 FR 30824) July 26, 1976.
FR Doc. 76-27015 (41 FR 39798) September 16, 1976.
FR Doc. 76-32920 (41 FR 49960) November 11, 1976.
FR Doc. 77-5005 (42 FR 9700) February 17, 1977.
FR Doc. 77-9080 (42 FR 16465) March 28, 1977.
FR Doc. 77-11071 (42 FR 20172) April 18, 1977.
FR Doc. 77-11277 (42 FR 20326) April 19, 1977.
FR Doc. 77-11857 (42 FR 21310) April 26, 1977.

Notice is hereby given that the Department of the Army submitted a proposed new system of records on May 10, 1977 pursuant to the provisions of Office of Management and Budget (OMB) Circular No. A-108, Transmittal Memorandum No. 1, dated September 30, 1975, and Transmittal Memorandum No. 3, dated May 17, 1976, which provide supplemental guidance to Federal agencies regarding the preparation and submission of reports required by the Privacy Act of 1974 (Pub. L. 93-579, 5 U.S.C. 552a(o)). This OMB guidance was set forth in the FEDERAL REGISTER (40 FR 45877) on October 3, 1975.

The Department of the Army invites public comments concerning the proposed new record system. Interested persons are invited to submit written data, views and arguments to Headquarters, Department of the Army, ATTN: DAAG-AMR-R, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20314 on or before June 20, 1977. The system will become effective, within 30 days (June 20, 1977), as proposed without further notice unless comments are received which result in a contrary determination.

A0727.05bDAPE

System name:

DOD Discharge Review Program (Special)

System location:

a. Primary manual/paper file record located at the Joint Liaison Office, US Army Reserve Components Personnel Administration Center (RCPAC), St. Louis, MO; at the National Personnel Records Center (NPRC) of General Services Administration (GSA), St. Louis, MO; US Army Administration Center, Ft. Harrison, IN; Army Discharge Review Board, The Pentagon, Washington, DC 20310; Army Council of Review Boards, Office, Secretary of the Army, The Pentagon, Washington, DC 20310. Demographic data on people applying will exist in the Office, Secretary of Defense.

b. Automated case summary information for all former military members, regardless of Service, maintained by Headquarters, Department of the Army (HQDA), US Army Management Systems Support Agency, The Pentagon, Washington, DC 20310.

Categories of individuals covered by the system:

Former members of the Army who seek discharge upgrade action in accordance with Department of Defense special discharge review program and case summary sheet data on former military members of the Navy, Marine Corps, and Air Force, and the Coast Guard.

Categories of records in the system:

Contains information initially provided by individual when seeking discharge upgrade consideration; includes but is not limited to: Name, social security number (SSN), mailing address, telephone number, former service number(s), and dates of military service. File subsequently contains information provided by requester in written form; information includes discharge date (between August 4, 1964 and March 28, 1973 except where otherwise noted), type discharge, desertion data (if applicable), branch of service, SSN, service number(s), address, hearing method, and dates of confirmation letter.

Case data sheet consolidates preceding information as well as information provided from official military records pertaining to the requester and includes, but is not limited to, the following: index reference and case number associated with individual request, date official military personnel file received from NPRC, date of birth, home of record, officer or inductee/enlistee, sex, race, date entered/discharged from service, reason and authority for discharge, documents submitted by individuals meriting special consideration, dates of accomplishment of steps related to processing of request: discharge review date; conclusions (upgrade to honorable, general, or appeal denied); vote of discharge review board and reasons (special considerations, mitigating factors, compelling reasons, deserving post service conduct); date of applicant notification of discharge review determination, and application for rehearing if applicable.

Information which may be obtained from military service records pertaining

to the requester includes whether individual completed tour in Southeast Asia or Western Pacific, was wounded in combat, decorated for valor or merit, honorably discharged from previous tour, satisfactorily served 24 months prior to discharge or completed alternative service, or was excused in accordance with Presidential Proclamation 4313. Mitigating data pertaining to request include general aptitude, length of service at time of discharge, education level, socio-economic background, factors related to personal distress, waiver(s) granted for service entry, offense(s) motivated by conscience, drug/alcohol related discharge, and good citizenship. Disqualifying data include whether discharged for act(s) of violence/dishonor, offense(s) subject to civilian criminal prosecution, and desertion in or from combat theater.

Automated record contains summary data from case data summary sheet described above, accumulated by Army for all military services, and includes type record, SSN or service number(s), discharge date (between August 4, 1964 and March 28, 1973), name, address, telephone number, hearing method, date of inquiry, date of confirmation letter.

Authority for maintenance of the system

Title 5 U.S.C., Section 301; Title 10 U.S.C., Sections 3012, 1553, and 1554.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses

To support Army Discharge Review Board actions and notify appropriate government agencies (e.g., Veterans Administration) of matters pursuant to such action.

To render recurring reports on number of cases processed by each military service, and matters associated therewith.

To respond to inquiries from individuals to whom records pertain, their counsel, members of Congress, and other government agencies concerning the status and disposition of cases.

To obtain views and recommendations, as required, from other governmental activities within their area of responsibility, including The Attorney General and other law enforcement agencies in those cases alleging acts of force or violence and criminal conduct deemed to be so serious as to warrant continued investigation or possible prosecution.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in files, card indexes, computer magnetic tapes/disks, computer punch cards, and computer printouts.

Retrievability:

By name, SSN or service number, case number or other individually unique identifier assigned the record. Case Summary may be grouped by military service Discharge Review Board and thereunder filed alphabetically by name, case number, SSN or service number, or by other appropriate identifier.

Safeguards:

Manual records are stored in buildings which employ security guards; records are accessible only to authorized personnel.

Automated records are under the control of a cardkey access system which requires positive identification and authorization, and are located in a designated controlled area to which access is limited to selected personnel only.

Retention and disposal:

Final determination and associated supporting documentation incorporated into the Official Military Personnel Folder of the Army member and returned to NPRC, GSA upon completion of action by the Discharge Review Board. Copy of case data summary sheet for each former military service member (Army, Navy, Marine Corps, Air Force) and copy of a comprehensive final report by each military service upon completion of the program will be retained by the Army Council of Review Boards for a period not yet determined.

Automated record information retained for 5 years or until such time as necessary to complete all special Discharge Review Board program actions and attendant administrative matters associated with accounting, reporting, and historical file maintenance in support of DOD requirements. Subsequently destroyed.

System manager(s) and address:

HQDA, ATTN: DAPE-HRL, The Pentagon, Washington, DC 20310.

Army Discharge Review Board, OSA, Room 1E-474, The Pentagon, Washington, DC 20310.

Commander, US Army Management and Systems Support Agency (for ADP portions of the DOD system).

Notification procedure:

Information may be obtained by contacting the respective military department discharge review boards. Addresses are as follow:

Office of the Secretary of the Army, ATTN: Discharge Review Board (Special Discharge Review Program), Room 1E-474, The Pentagon, Washington, DC 20310, Telephone: Area Code 202/697-3071.

Office of the Secretary of the Navy, ATTN: Discharge Review Board (Special Discharge Review Program), Room 910, Ballston Centre Tower No. 2, 801 North Randolph Street, Arlington, VA 22203. Telephone: Area Code 202/692-4991.

Office of the Secretary of the Air Force, ATTN: Discharge Review Board (Special Discharge Review Program), Room 920, Commonwealth Building, 1300 Wilson Boulevard, Arlington, VA 22209, Telephone: Area Code 202/694-5669.

Record access procedures:

Requests from individuals formerly with the Army should be addressed as indicated above. Written requests should contain the full name, SSN, former service number(s), address, telephone number and case number (if known) of the requester, and the fact that the request is related to the DOD Discharge Review Program (Special). Requests for information from other former service personnel should be addressed as indicated under "Notification procedure". (Requests of former members of the Coast Guard should be addressed to the Navy Discharge Review Board.)

For personal visits, the individual should be able to provide some acceptable identification such as driver's license and verbal information which can be used to verify that information contained in the record sought (e.g., SSN, former service number(s), address, and case number).

Contesting record procedures:

The Army's rules for contesting contents and appealing initial determinations may be obtained from HQDA, ATTN: DAPE-HRL, The Pentagon, Washington, DC 20310.

Record source categories:

Official Army personnel files and related records.

Reports from the Navy, Marine Corps, and the Air Force.

Correspondence, documents, and other material generated as a result of action required by the DOD Discharge Review Program (Special).

Systems exempted from certain provisions of the act:

None.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Office of the Assistant Secretary of Defense (Comptroller).

MAY 17, 1977.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 732-3; OPP-00051A]

FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT SCIENTIFIC ADVISORY PANEL

Amended Meeting

The three-day meeting of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel scheduled for Wednesday, May 25, Thursday, May 26, and Friday, May 27, 1977 has been changed to a two-day meeting now scheduled for Thursday, May 26 and Friday, May 27, 1977. The meeting will be held in Room 2812 (a) and (b), Waterside Mall, 401 M Street, SW., Washington, D.C.

This change is due to the postponement of the third item on the agenda, namely the Subpart on proposed chem-

on the east. The existing roadway is two lanes to be improved to four lanes for a length of approximately four miles. Adverse effects include the acquisition of 25.4 acres of land for right-of-way and the relocation of 30 families. (Region 7.) (ELR Order No. 70560.)

S.R. 42, Algood Bypass—Livingston Bypass, Overton and Putnam Counties, Tenn., May 12: Proposed is the construction of State Route 42 in Putnam and Overton Counties, Tennessee. The 13-mile project begins at the proposed Algood Bypass and extends in a northeasterly direction on new location to south of the Livingston Bypass. Plans call for construction of a 4-lane divided highway on a minimum right-of-way width of 250' utilizing various proposed typical roadway sections. Adverse effects include displacement of residences, loss of natural habitat, introduction of a new source of noise and air pollution, and temporary siltation of all involved streams during construction. (Region 4.) (ELR Order No. 70577.)

Final

U.S. 81 and U.S. 30, Columbus, Nebr.: Polk, Butler, and Platte Counties, Nebr., May 12: The project consists of the improvement of two separate roadways, U.S. 81 and U.S. 30 south of Columbus, and L-71-D, U.S. 81 to U.S. 30 connection, in the city of Columbus. The improvement includes the construction of new bridges over Platte and Loup Rivers as well as over various creeks and drainageways. The project will require the acquisition of 50 acres of land for right-of-way and the displacement of families and businesses. A 4(f) statement concerning Pawnee Park is included. Comments made by: DOT, USAF, COE, USDA, DOI, EPA. (ELR Order No. 70580.)

Mapleton Center Street, Utah County: Utah, May 9: Proposed is the improvement and extension of Mapleton Center Street from Maple Street to Hobble Creek Canyon Road, a distance of 1.5 miles. Bituminous surface will cover 2 12-foot lanes and 2 8-foot shoulders, for a total width of 40 feet. Adverse impacts include the relocation of 3 families and construction disruption resulting especially from a cut and fill section and structure for Hobbel Creek. (96 pages.) Comments made by: DOI, USDA, EPA, HUD, DOC, HEW, AHP, State agencies, interested parties. (ELR Order No. 70558.)

Oneida St. Bridge and approaches, Appleton; Outgamie County, Wis., May 9: The proposed project involves the construction of a new bridge across the Fox River and a Government Lock Canal and its approaches in the City of Appleton. The bridge, located 600' west of the present Oneida Street crossing, would be four lanes wide and .67 mile long. The construction of the north approach roadways will require the acquisition of a portion of Jones Park (a 4(f) statement is included) and the south approach will sever the practice area of Riverview Country Club's golf course. Three residences will have to be relocated, one warehouse will have to be acquired and Peerless Point Co. will be displaced by construction. (Region 5.) Comments made by: USCG, DOI, COE, USDA, HEW, EPA, State and local agencies, concerned citizens. (ELR Order No. 70561.)

U.S. COAST GUARD
WASHINGTON, D.C. 20590

Draft

Tanker Regs—Double Bottoms, Segregated Ballast, May 13: Proposed are certain changes in regulations related to two earlier rulemakings that were issued under Title II of the Ports and Waterways Safety Act of 1972. The regulatory changes would apply segregated ballast requirements to tank vessels both new and existing of 20,000 deadweight tons or greater and would require that all new tank vessels have double bottom spaces to achieve the required segregated ballast capacity. These regulations would apply to U.S. tankers and to foreign tankers entering U.S. waters. Beneficial impacts are anticipated. (ELR Order No. 70587.)

NICHOLAS C. YOST,
Acting General Counsel.

DEPARTMENT OF DEFENSE

Department of the Army

PRIVACY ACT OF 1974

New System of Records

The Department of the Army systems of records notices as prescribed by the Privacy Act of 1974 have been published in the FEDERAL REGISTER as follows:

FR Doc. 75-21075 (40 FR 35151) August 18, 1975.
FR Doc. 75-22781 (40 FR 41970) September 9, 1975.
FR Doc. 75-26296 (41 FR 2952) January 20, 1976.
FR Doc. 76-20187 (41 FR 28806) July 13, 1976.
FR Doc. 76-21185 (41 FR 30824) July 26, 1976.
FR Doc. 76-27015 (41 FR 39798) September 16, 1976.
FR Doc. 76-32920 (41 FR 49960) November 11, 1976.
FR Doc. 77-5005 (42 FR 9700) February 17, 1977.
FR Doc. 77-9080 (42 FR 16465) March 28, 1977.
FR Doc. 77-11071 (42 FR 20172) April 18, 1977.
FR Doc. 77-11277 (42 FR 20326) April 19, 1977.
FR Doc. 77-11857 (42 FR 21310) April 26, 1977.

Notice is hereby given that the Department of the Army submitted a proposed new system of records on May 10, 1977 pursuant to the provisions of Office of Management and Budget (OMB) Circular No. A-108, Transmittal Memorandum No. 1, dated September 30, 1975, and Transmittal Memorandum No. 3, dated May 17, 1976, which provide supplemental guidance to Federal agencies regarding the preparation and submission of reports required by the Privacy Act of 1974 (Pub. L. 93-579, 5 U.S.C. 552a(o)). This OMB guidance was set forth in the FEDERAL REGISTER (40 FR 45877) on October 3, 1975.

The Department of the Army invites public comments concerning the proposed new record system. Interested persons are invited to submit written data, views and arguments to Headquarters, Department of the Army, ATTN: DAAG-AMR-R, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20314 on or before June 20, 1977. The system will become effective, within 30 days (June 20, 1977), as proposed without further notice unless comments are received which result in a contrary determination.

A0727.05bDAPE

System name:

DOD Discharge Review Program (Special)

System location:

a. Primary manual/paper file record located at the Joint Liaison Office, US Army Reserve Components Personnel Administration Center (RCPAC), St. Louis, MO; at the National Personnel Records Center (NPRC) of General Services Administration (GSA), St. Louis, MO; US Army Administration Center, Ft. Harrison, IN; Army Discharge Review Board, The Pentagon, Washington, DC 20310; Army Council of Review Boards, Office, Secretary of the Army, The Pentagon, Washington, DC 20310. Demographic data on people applying will exist in the Office, Secretary of Defense.

b. Automated case summary information for all former military members, regardless of Service, maintained by Headquarters, Department of the Army (HQDA), US Army Management Systems Support Agency, The Pentagon, Washington, DC 20310.

Categories of individuals covered by the system:

Former members of the Army who seek discharge upgrade action in accordance with Department of Defense special discharge review program and case summary sheet data on former military members of the Navy, Marine Corps, and Air Force, and the Coast Guard.

Categories of records in the system:

Contains information initially provided by individual when seeking discharge upgrade consideration; includes but is not limited to: Name, social security number (SSN), mailing address, telephone number, former service number(s), and dates of military service. File subsequently contains information provided by requester in written form; information includes discharge date (between August 4, 1964 and March 28, 1973 except where otherwise noted), type discharge, desertion data (if applicable), branch of service, SSN, service number(s), address, hearing method, and dates of confirmation letter.

Case data sheet consolidates preceding information as well as information provided from official military records pertaining to the requester and includes, but is not limited to, the following: index reference and case number associated with individual request, date official military personnel file received from NPRC, date of birth, home of record, officer or inductee/enlistee, sex, race, date entered/discharged from service, reason and authority for discharge, documents submitted by individuals meriting special consideration, dates of accomplishment of steps related to processing of request; discharge review date; conclusions (upgrade to honorable, general, or appeal denied); vote of discharge review board and reasons (special considerations, mitigating factors, compelling reasons, deserving post service conduct); date of applicant notification of discharge review determination, and application for rehearing if applicable.

Information which may be obtained from military service records pertaining

to the requester includes whether individual completed tour in Southeast Asia or Western Pacific, was wounded in combat, decorated for valor or merit, honorably discharged from previous tour, satisfactorily served 24 months prior to discharge or completed alternative service, or was excused in accordance with Presidential Proclamation 4313. Mitigating data pertaining to request include general aptitude, length of service at time of discharge, education level, socio-economic background, factors related to personal distress, waiver(s) granted for service entry, offense(s) motivated by conscience, drug/alcohol related discharge, and good citizenship. Disqualifying data include whether discharged for act(s) of violence/dishonor, offense(s) subject to civilian criminal prosecution, and desertion in or from combat theater.

Automated record contains summary data from case data summary sheet described above, accumulated by Army for all military services, and includes type record, SSN or service number(s), discharge date (between August 4, 1964 and March 28, 1973), name, address, telephone number, hearing method, date of inquiry, date of confirmation letter.

Authority for maintenance of the system

Title 5 U.S.C., Section 301; Title 10 U.S.C., Sections 3012, 1553, and 1554.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses

To support Army Discharge Review Board actions and notify appropriate government agencies (e.g., Veterans Administration) of matters pursuant to such action.

To render recurring reports on number of cases processed by each military service, and matters associated therewith.

To respond to inquiries from individuals to whom records pertain, their counsel, members of Congress, and other government agencies concerning the status and disposition of cases.

To obtain views and recommendations, as required, from other governmental activities within their area of responsibility, including The Attorney General and other law enforcement agencies in those cases alleging acts of force or violence and criminal conduct deemed to be so serious as to warrant continued investigation or possible prosecution.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in files, card indexes, computer magnetic tapes/disks, computer punch cards, and computer printouts.

Retrievability:

By name, SSN or service number, case number or other individually unique identifier assigned the record. Case Summary may be grouped by military service Discharge Review Board and thereunder filed alphabetically by name, case number, SSN or service number, or by other appropriate identifier.

Safeguards:

Manual records are stored in buildings which employ security guards; records are accessible only to authorized personnel.

Automated records are under the control of a cardkey access system which requires positive identification and authorization, and are located in a designated controlled area to which access is limited to selected personnel only.

Retention and disposal:

Final determination and associated supporting documentation incorporated into the Official Military Personnel Folder of the Army member and returned to NPRC, GSA upon completion of action by the Discharge Review Board. Copy of case data summary sheet for each former military service member (Army, Navy, Marine Corps, Air Force) and copy of a comprehensive final report by each military service upon completion of the program will be retained by the Army Council of Review Boards for a period not yet determined.

Automated record information retained for 5 years or until such time as necessary to complete all special Discharge Review Board program actions and attendant administrative matters associated with accounting, reporting, and historical file maintenance in support of DOD requirements. Subsequently destroyed.

System manager(s) and address:

HQDA, ATTN: DAPE-HRL, The Pentagon, Washington, DC 20310.

Army Discharge Review Board, OSA, Room 1E-474, The Pentagon, Washington, DC 20310.

Commander, US Army Management and Systems Support Agency (for ADP portions of the DOD system).

Notification procedure:

Information may be obtained by contacting the respective military department discharge review boards. Addresses are as follow:

Office of the Secretary of the Army, ATTN: Discharge Review Board (Special Discharge Review Program), Room 1E-474, The Pentagon, Washington, DC 20310, Telephone: Area Code 202/697-3071.

Office of the Secretary of the Navy, ATTN: Discharge Review Board (Special Discharge Review Program), Room 910, Ballston Centre Tower No. 2, 801 North Randolph Street, Arlington, VA 22203, Telephone: Area Code 202/692-4991.

Office of the Secretary of the Air Force, ATTN: Discharge Review Board (Special Discharge Review Program), Room 920, Commonwealth Building, 1300 Wilson Boulevard, Arlington, VA 22209, Telephone: Area Code 202/694-5669.

Record access procedures:

Requests from individuals formerly with the Army should be addressed as indicated above. Written requests should contain the full name, SSN, former service number(s), address, telephone number and case number (if known) of the requester, and the fact that the request is related to the DOD Discharge Review Program (Special). Requests for information from other former service personnel should be addressed as indicated under "Notification procedure". (Requests of former members of the Coast Guard should be addressed to the Navy Discharge Review Board.)

For personal visits, the individual should be able to provide some acceptable identification such as driver's license and verbal information which can be used to verify that information contained in the record sought (e.g., SSN, former service number(s), address, and case number).

Contesting record procedures:

The Army's rules for contesting contents and appealing initial determinations may be obtained from HQDA, ATTN: DAPE-HRL, The Pentagon, Washington, DC 20310.

Record source categories:

Official Army personnel files and related records.

Reports from the Navy, Marine Corps, and the Air Force.

Correspondence, documents, and other material generated as a result of action required by the DOD Discharge Review Program (Special).

Systems exempted from certain provisions of the act:

None.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Office of the Assistant Secretary of Defense (Comptroller).

MAY 17, 1977.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 732-3; OPP-00051A]

FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT SCIENTIFIC ADVISORY PANEL

Amended Meeting

The three-day meeting of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel scheduled for Wednesday, May 25, Thursday, May 26, and Friday, May 27, 1977 has been changed to a two-day meeting now scheduled for Thursday, May 26 and Friday, May 27, 1977. The meeting will be held in Room 2812 (a) and (b), Waterside Mall, 401 M Street, SW., Washington, D.C.

This change is due to the postponement of the third item on the agenda, namely the Subpart on proposed chem-

istry requirements of the Guidelines for Registering Pesticides in the United States. The other agenda items remain the same as published in the FEDERAL REGISTER on May 11, 1977. However a discussion on the National Pesticide Monitoring Plan will be added as an additional agenda topic. For further information contact: Dr. H. Wade Fowler, Jr., Executive Secretary, FIFRA Scientific Advisory Panel, Office of Pesticide Programs (WH–567), Room E–315, EPA, 401 M St., SW., Washington, D.C. 20460, telephone 202–755–4851.

(Sec. 25(d) of FIFRA, as amended (86 Stat. 97; 89 Stat. 751; 7 U.S.C. 136(a) et seq.) and sec. 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 86 Stat. 770).)

Dated: May 18, 1977.

JAMES M. CONLON,
Deputy Assistant Administrator for Pesticide Programs.

[OPP-30000/14; FRL 729–8]

PESTICIDE PROGRAMS

Notice of Rebuttable Presumption Against Registration and Continued Registration of Pesticide Products Containing Pronamide

The Deputy Assistant Administrator, Office of Pesticide Programs, Environmental Protection Agency (EPA), has determined that a rebuttable presumption exists against registration and continued registration of all pesticide products containing pronamide [N-(1,1-dimethyl - 2 - propynyl) 3,5 - dichlorobenzamide].[1]

I. REGULATORY PROVISIONS

A. *General.* Title 40, Part 162.11, of the Code of Federal Regulations for the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (86 Stat. 971, 89 Stat. 751, 7 U.S.C. 136 et seq.), provides that a rebuttable presumption against registration shall arise if the Agency determines that a pesticide meets or exceeds any of the risk criteria relating to acute and chronic toxic effects set forth in § 162.11(a)(3). If it is determined that such a rebuttable presumption has arisen, the regulations require that the registrant be notified by certified mail and afforded an opportunity to submit evidence in rebuttal of the presumption. In addition, the Agency has determined that the public should also be given notice of the bases for the presumption to provide an opportunity for comment and to solicit additional information relevant to the presumption.

A notice of rebuttable presumption is issued when the evidence related to risk meets the criteria set forth in § 162.11(a)(3). It is emphasized that a notice of rebuttable presumption against registration and continued registration of a pesticide is not a notice of intent to cancel the registration of a pesticide, and may or may not lead to cancellation. The notice of intent to cancel is issued only after the risks and benefits of a pesticide are carefully considered and it is determined that the pesticide may generally cause unreasonable adverse effects to the environment.

Accordingly, all registrants and applicants for registration are invited pursuant to § 162.11(a)(4) to submit evidence in rebuttal of this presumption, and, in the case of oncogenicity, to submit information which relates to the assessment of oncogenic risks as set forth in the Agency's Interim Procedures and Guidelines for Health Risk and Economic Impact Assessment of Suspected Carcinogens (May 25, 1976; 41 FR 21402). Registrants and other interested parties may also submit for consideration data on benefits which they believe would justify registration or continued registration. In addition, any registrant may petition the Agency to voluntarily cancel a current registration pursuant to section 6(a)(1) of FIFRA.

B. *Rebuttal Criteria.* Section 162.11(a)(4) provides that a registrant may rebut the presumption by sustaining the burden of proving:

(1) In the case of a pesticide presumed against pursuant to the acute toxicity or lack of emergency treatment criteria, "that when considered with the formulation, packaging, method of use, and proposed restrictions on and directions for use and widespread and commonly recognized practices of use, the anticipated exposure to an applicator or user and to local, regional or national populations of non-target organisms is not likely to result in any significant acute adverse effects" (40 CFR 162.11(a)(3)(i) and (iii));

(2) In the case of a pesticide presumed against pursuant to the chronic toxicity criteria, "that when considered with proposed widespread and commonly recognized practices of use, the pesticide will not concentrate, persist or accrue to levels in man or the environment likely to result in any significant chronic adverse effects" (40 CFR 162.11(a)(ii)); or

(3) In either case, that "the determination by the Agency that the pesticide meets or exceeds any of the criteria for risk was in error."

(C) *Benefits Information.* In addition to submitting evidence to rebut the presumption of risk, § 162.11(a)(5)(iii) provides that a registrant "may submit evidence as to whether the economic, social and environmental benefits of the use of the pesticide subject to the presumption outweigh the risk of use." If the risk presumptions are not rebutted, the benefit evidence submitted by the registrant,[2] applicants and other interested persons will be considered by the Administrator in determining the appropriate regulatory action. Specifically, § 162.11(a)(5)(iii) provides that if the "benefits appear to outweigh risks," the Administrator may (1) issue a notice of intent to hold a hearing pursuant to Section 6(b)(2) of FIFRA rather than a notice of intent to cancel or (2) deny registration pursuant to section 3(c)(6) of FIFRA. Alternatively, if the "benefits do not appear to outweigh the risks, the Administrator shall issue a notice pursuant to section 3(c)(6) or section 6(b)(1) of the Act, as appropriate." Moreover, if at any time the Administrator determines that a pesticide poses an "imminent hazard" to humans or the environment, a notice of suspension may be issued pursuant to Section 6(c) of the Act.

Stated below is the § 162.11(a)(3) risk criterion which the Agency has found to have been met or exceeded by registrations and applications for registration of pesticide products containing pronamide. The Agency's basis for concluding that this risk criterion has been met or exceeded is set out in "Pronamide: Position Document 1", which follows. This document was prepared by an Agency Working Group. Copies of the attachments to the Position Document which are not published with this notice are available for public inspection. Information protected from disclosure pursuant to FIFRA Section 10 cannot be provided. Specific inquiries concerning the Position Document should be directed to Project Manager Richard Troast, Office of Special Pestiside Reviews (WH–566), EPA, Rm. 447, East Tower, 401 M St. SW., Washington, D.C. 20460 (202–755–8050).

II. PRESUMPTION

40 CFR 162.11(a)(ii)(A) provides, "A rebuttable presumption shall arise if a pesticide's ingredient(s). * * * (i)nduces oncogenic effects in experimental mammalian species or in man as a result of oral, inhalation or dermal exposure * * *." As a further clarification of the provision, the preamble to the Agency's Interim Procedures and Guidelines for Health Risk and Economic Impact Assessment of Suspected Carcinogens (May 25, 1976; 41 FR 21402) states that "a substance will be considered a presumptive cancer risk when it causes a statistically significant excess incidence of benign or malignant tumors in humans or animals."

On the basis of scientific studies and information summarized in the Position Document, the Agency has concluded that this risk index has been exceeded by all registrations and applications for registration of pesticide products containing pronamide, and that a rebuttable presumption against new or continued registration of such products has therefore arisen.

III. REGISTRATIONS AND PRODUCTS SUBJECT TO THE NOTICE

All registrants and applicants for registration listed below are being notified by certified mail of the rebuttable presumption existing against registration and continued registration of their products.

The registrants and applicants for registration shall have 45 days from the date this notice is sent or until June 27, 1977, to submit evidence in rebuttal of the presumption. However, the Administrator may, for good cause shown, grant an additional 60 days during which such evidence may be submitted. Notice of such an extension, if granted, will appear in the FEDERAL REGISTER.

IV. DUTY TO SUBMIT INFORMATION ON ADVERSE EFFECTS

Registrants are required by law to submit to EPA any additional information regarding any adverse effects on man or the environment which comes to a registrant's attention at any time, pursuant to section 6(a)(2) of FIFRA and 40 CFR 162.8(d). If any registrant of pronamide products has any published or unpublished information, studies, reports, analyses, or reanalyses regarding any adverse effects in animal species or humans, residues, and claimed or verified accidents to humans, domestic animals, or wildlife, which has not been previously submitted to EPA, the material must be submitted immediately. When responding to this notice, each registrant shall submit a written certification to the Agency that all information regarding any adverse effects known to the registrant has been submitted. In addition, the registrants should notify EPA of any studies currently in progress, including the purpose of the study, the protocol, the approximate completion date, and a summary of all results observed to date.

V. PUBLIC COMMENTS

During the time allowed for submission of rebuttal evidence, comments on the presumptions set forth in this notice and on the material contained in the Position Document are solicited from the public. In particular, any documented episodes of adverse effects to humans, domestic animals, or wildlife, and information as to any laboratory studies in progress or completed, are requested to be submitted to the EPA as soon as possible. Similarly, any studies or comments on the benefits from the use of pronamide are requested to be submitted. All comments and information received, as well as any other relevant information and analysis thereof, which come to the attention of the Agency may serve as a basis for final determination pursuant to Section 162.11(a)(5).

All comments and information should be sent to:

Federal Register Section, Technical Services Division (WH–569), Rm. 401 East Tower, 401 M Street, SW., Washington, D.C. 20460.

Three copies of the comments or information should be submitted if possible to facilitate the work of the Agency and others interested in inspecting them. The comments and information should bear the identifying notation "OPP–30000/14." Comments and information received within the specified time limit shall be considered before it is determined whether a notice shall be issued in accordance with § 162.11(a)(5)(ii).

Comments received after the specified time period will be considered only to the extent feasible consistent with the time limits imposed by § 162.11(a)(5)(ii). All written comments and information filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. on normal working days.

Interested persons are encouraged to take advantage of the opportunity to inspect Agency files during normal working hours since (1) All of the information received may serve as a basis for final determination pursuant to § 162.11(a)(5) and (2) the Agency will not generally publish a summary of information received in the FEDERAL REGISTER at the close of the rebuttal period.

Your cooperation is solicited in identifying any errors or omissions which may have been made in the following computer listings. Corrections to the listings may not necessarily be published in the FEDERAL REGISTER, but rather handled by mail with affected parties. Omissions will be corrected by notice in the FEDERAL REGISTER.

Dated: May 9, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

Federally Registered Products Containing Pronamide

PRONAMIDE WORKING GROUP, RICHARD TROAST, PROJECT MANAGER, U.S. ENVIRONMENTAL PROTECTION AGENCY

Contents

I. Background.
A. General Chemistry.
B. Residue Chemistry.
C. Environmental Chemistry.
D. Toxicology.
E. Uses and Production.
F. Alternative Pesticides.
G. Human Exposure.
II. Regulatory History.
III. Summary of Scientific Evidence to Support Rebuttable Presumption on the Basis of Chronic Toxicity.
A. Chronic Feeding Studies in Which Oncogenic Effects Were Observed.

[1] This notice of presumption differs in presentation from previously published notices. Specifically, in the past the Agency has published a notice of rebuttable presumption which included a discussion of the substantive reasons for the action taken. This notice does not include such a discussion, but instead incorporates the substantive discussion contained in the lengthy Position Document which is also published. These changes were made in order to streamline the process of information dissemination while providing as much information as possible to affected and interested parties.

[2] Registrants or other interested persons who desire to submit benefit information should consider submitting benefit information on the following subjects, along with any other relevant information they desire to submit.

1. Identification of the major uses of the pesticide, including estimated quantities used by crop or other application.
2. Identification of the minor uses of the pesticide, including estimated quantities used by category such as turf and agricultural uses.
3. Identification of registered alternative products for the uses set forth in (1) and (2) above, including an estimate of their availability.
4. Determination of the change in costs to the user of providing equivalent pesticide treatment with any available substitute products.
5. Assessment of regulation impact upon user productivity (e.g. yield per acre and/or total output) from using available substitute pesticides or from using or no other pesticide.
6. If the impacts upon either user costs or productivity are significant, a qualitative assessment of the regulation's impact on production of major agricultural commodities and retail food prices of such commodities.

B. Chronic Feeding Studies Reporting No Oncogenic Effects.

1. "Toxicology Study on the Effect of Adding RH-315 to the Diet of Rats for a Period of Two Years."
2. "Toxicologic Study on the Effect of Adding RH-315 to the Diet of Beagle Dogs for a Period of Two Years."

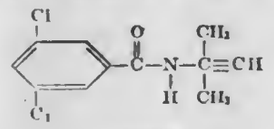
List of Appendices.

1. *Background.*—A. *General Chemistry.* Pronamide (N-(1,1-dimethyl-2-propynl) 3, 5-dichlorobenzamide) was patented as a herbicide in 1964 by Dr. A. Crovetti of Abbott Laboratories, Northbrook, Ill.[2] The proprietary rights to the compound were transferred to Rohm and Haas Company, Inc., in 1968. Abbott Laboratories still receives a royalty from Rohm and Haas from pronamide production.

There are no currently registered pesticides that are chemically similar to pronamide. Rohm and Haas has indicated that pronamide is probably the most biologically active compound of its type (*1*).

Physical characteristics of this compound are:

Melting point, 155° C; solubility in H_2O, 15 ppm; vapor pressure, 8.5×10^{-6} mm.



Pronamide

Pronamide is synthesized as a solid. The technical chemical is packaged as a coarse powder formulation. Pronamide products that are ready for application are wettable powders or granules.

B. *Residue chemistry.* In a study of pronamide metabolism, cows and rats fed pronamide excreted over half the amount they ingested directly through the gastrointestinal tract in the feces. Radioisotope studies in the cows and rats indicated that only a slight percentage of the ingested pronamide is metabolized in the gastrointestinal tract. However, once pronamide is absorbed through the intestinal lining, at least seven metabolites can be identified in the urine (*2*).

Pronamide metabolism in mammals is similar to fatty acid metabolism in that the aliphatic chain is modified by a series of carboxylic acid transformations. Since these chemical transformations follow fatty acid metabolism, which is a liver function, pronamide metabolism may also largely be a function of the liver.

Metabolism of pronamide by plants was demonstrated by Yih and Swithenbank in 1971 (*3*). A plant study using alfalfa revealed that at least ten metabolites could be identified in the alfalfa tissue after treatment with pronamide. This study indicated that the treated crop should not be harvested until 120 days after the last pronamide application. A list of pronamide metabolites and media in which they occur may be found in Figure 1 and Table 1.

C. *Environmental chemistry.* Soil degradation patterns of pronamide follow pathways similar to the metabolic pathways found in plants and animals. Residues of pronamide in soil were detectable in amounts of 0.27 ppm for up to 112 days after field application (*3*). In a study using ^{14}C-pronamide, Fisher found that 13 percent of the pronamide changed to $^{14}CO_2$ after 33 days. Fisher speculates that this change was accomplished by soil bacteria since there was no significant $^{14}CO_2$ liberation in a similar test in sterilized soil (*4*).

Walker (*5*), Yih et al. (*6*), and Leistra et al. (*7*) conducted additional studies of the persistence of pronamide in soil. All of these studies indicated that pronamide may persist in soil. The half-life of the molecule is wholly dependent on soil temperature and moisture. A 10 percent soil moisture, Walker reported half-lives of 29 days at 23°C, 63 days at 15°C, and 140 days at 8°C. Reducing the soil moisture to 5 percent increased half-life by a factor of almost two at 23°C. Leistra et al. additionally found that the mobility of pronamide is slight beneath the top 5 cm of soil and is totally dependent on the breakdown kinetics of the herbicide.

FIGURE 1.—*Pronamide Metabolites*

Data submitted by Rohm and Haas on the hydrolysis of pronamide in water indicated that pronamide is relatively stable when the pH is nearly neutral. Little if any ^{14}C-pronamide was converted to $^{14}CO_2$. Other studies of pronamide in aqueous systems showed that it is slowly degraded by light and microorganisms in water and sludge (*8*).

D. *Toxicology.* On the basis of toxicological data submitted by Rohm and Haas, pronamide products are in Toxicity Category III (40 CFR 162.10) because pronamide exhibits only slight to moderate irritation to the skin and eye and has an acute toxicity in excess of 500 mg/kg. A complete chart of reported toxicology values is included in the Tables 2 and 3.

Since pronamide and most of its identified metabolites (3) contain an amide functional group with one amino hydrogen, the question of N-nitroso formation must be raised since N-nitroso compounds are extremely potent animal carcinogens. An evaluation forwarded to the Office of Special Pesticide Reviews from the Chemistry Branch, Criteria and Evaluation Division, Office of Pesticide Programs (OPP) stated, "• • • pronamide could be nitrosated • • • This appears unlikely during manufacture • • • but could occur subsequent to application" (*9*).

[2] U.S. Patents 3,534,098 and 3,640,699 granted on October 13, 1970, and February 8, 1972.

TABLE 2.—*Acute toxicity of pronamide products*

Test	Species and sex	Product	LD_{50}
Oral	Rat—male	Kerb 75 WP (RH-315 75 WP)	4,125 mg/kg.
Do	Rat—male	Kerb technical (RH-315)	8,350 mg/kg.
Do	Rat—female	do	5,620 mg/kg.
Do	Rat—male	Kerb 50W (RH-315 50 WP)	16,000 mg/kg.
Do	Rat—female	do	16,000 mg/kg.
Do	Dog	Kerb—technical (RH-315)	>10 g/kg.
Dermal	Rabbits	do	>3.16 g/kg.
Do	do	Kerb 50W (RH-315 50 WP)	>10 g/kg.
Primary skin irritation	do	do	Not considered primary irritant at 0.5 g.
Percutaneous	Rabbits—male.	Kerb 75 WP (RH-315 75 WP)	>20 g/kg.
Eye irritation	Rabbits	Kerb technical (RH-315)	Slight conjuntual redness at 3 mg; no corneal damage.
Do	do	Kerb 50W (RH-315 50 WP)	Slight irritant to unwashed eye at 100 mg.
Inhalation	Rats	do	No mortality, but spots on lungs at 3.32 mg/l air.

The potential for N-nitroso formation is especially likely since some pronamide is marketed in a formulation with nitrogen fertilizers. N-nitroso formation may also occur after the pesticide is applied if there are nitrates present. This formation is therefore possible in soil, water, air, plants, and animals including man.

While some data show that pronamide does metabolize, the metabolites have essentially the same molecular structure except for the last two carbons. If the amide moiety of the molecule undergoes nitrosation to form an N-nitrosoamide, which is in a class of compounds shown to be potent oncogens in laboratory animals, then some pronamide metabolites may be oncogens. Moreover, there are no experimental data that demonstrate clearly that pronamide breaks down or is metabolized to harmless substances. Presence of CO_2 as a byproduct does not constitute sufficient evidence that this has occurred.

Other Rohm and Haas data show that pronamide is a low order toxicant in cold and warm water fish, waterfowl, and game birds. Pronamide had no effect on pollinating bees (*10*).

E. *Uses and production.* Rohm and Haas is the only registered producer of technical grade pronamide and is also the largest formulator of pronamide products. Most of the technical grade pronamide manufactured and Haas Kerb 50 W (EPA Reg. No. 707–98). and Haas Karg 50 W (EPA Reg. No. 707–98). Rohm and Haas produces most of the pronamide products registered for agricultural uses. Because production data are confidential, they are available for internal use within EPA only (Table 4).

Pronamide is most widely used on certain grasses and broad leaf weeds in alfalfa, other forage crops, and lettuce. Ornamental turf weed and grass control is the major nonagricultural pronamide use. All formulators hold registrations for this use. Pronamide is marketed in formulations for turf grass weed control in several concentrations and occasionally with fertilizers in the formulation as nutrient for the remaining grass. Other ornamental uses include weed control in commercial forest plantings. However, the use of pronamide on ornamental turf appears minor when compared to the agricultural uses.

Rohm and Haas exports varying amounts of formulated pronamide each year. Use patterns abroad are similar to those in the United States. Countries to which pronamide is exported include Canada (alfalfa), South Africa (pasture management), Spain (citrus), Italy (orchard crops, lettuce), United Kingdom (beans, peas, lettuce), France (lettuce), and Japan (pasture management) (*1*).

F. *Alternative pesticides.* Alternative pesticides are registered for most of the uses and sites but not all the target organisms covered by pronamide registrations. Of the 41 alternatives currently identified, five are candidates for RPAR (three arsenicals, paraquat, and pentachlorophenol). In addition several other chemicals have been referred to the Office of Special Pesticide Reviews but have not yet been reviewed and accepted as candidates.

G. *Human exposure.* Humans are most likely to be exposed to pronamide from the ingestion of treated lettuce. Residue data provided in the Rohm and Haas tolerance petitions for lettuce indicate that residues range from <0.01 to 1.8 ppm with a mean level of 0.3 ppm (*10*).

Other raw foods treated with pronamide which humans may ingest directly are cane fruits (blackberries, boysenberries, and raspberries), and blueberries. Use patterns for these crops indicate that pronamide is applied in the winter and 100 days or more before berries are harvested for human consumption.

While alfalfa has the highest permissable pronamide tolerance of all raw agricultural commodities, the amount of alfalfa that humans consume directly is very small. Residues from alfalfa are usually ingested via secondary routes of exposure: consuming meat, milk, and eggs of animals fed treated alfalfa. Levels of pronamide found in chickens fed field-aged alfalfa ranged from 0.02–0.09 ppm in the kidney <0.01–0.04 ppm in the liver, <0.01–0.02 in the gizzard, and <0.01–0.03 in fat (*11*).

Pronamide levels found after feeding cows alfalfa treated with pronamide also showed a wide variance. Concentrations in the liver varied from 0.02–0.17 ppm and those in the kidney were from <0.01 to 0.04 ppm. In a study performed in 1975, L. E. St. John and D. J. Lusk fed cows pure pronamide and found residues in milk ranging from 0.01–0.08 ppm (*12*).

The Food and Drug Administration (FDA) has not reported pronamide residues in samples from in their Market Basket Survey. However they have not been specifically examining food for pronamide residues (*13*).

H. *Regulatory History.* Since the first pronamide product was registered, there have been no restrictive or enforcement actions taken by EPA.

Tolerances for residues resulting from the direct application of pronamide have been established (40 CFR 180.317) 10 ppm. alfalfa; 5 ppm, clover and forage legumes; 2 ppm, lettuce and endive (escarole); 0.05 ppm, cane fruits (blackberries, boysenberries, and raspberries) and blueberries.

The following tolerances for secondary residues resulting from feeding treated material to animals that produce meat, milk, and eggs were also established (40 CFR 180.137):

0.2 ppm	Kidney and liver of beef cattle, goats, hogs, poultry, horses, and sheep.
0.02 ppm	Eggs, milk, meat, fat, and meat byproducts (except kidney and liver) of cattle, goats, hogs, horses, poultry, and sheep.

A temporary tolerance based on an experimental use permit was granted on August 9, 1974 (39 FR 29418) for the use of pronamide on almonds, apples, apricots, cherries, grapes, nectarines, peaches, pears, pistachio nuts, plums, prunes, and walnuts. The experimental permit was for the 1974–75 growing season and was limited to 1500 lb pronamide. Rohm and Haas withdrew this permit in July 1976.

III. *Summary of Scientific Evidence to Support ..ebuttable Presumption on the Basis of Chronic Toxicity.* 40 CFR 162.11(a)(3) provides that a rebuttable presumption shall arise if a pesticide's ingredient(s), metabolite(s), or degradation product(s) meet or exceed (i) acute toxicity risk criteria relating to hazards to humans, domestic animals or wildlife, or (ii) chronic toxicity risk criteria relating to oncogenic, mutagenic, and delayed toxic effects in man and/or test animals, or relating to population reductions in nontarget organisms or fatality to members or endangered species.

The Pronamide Working Group has concluded that pesticide products containing pronamide meet the chronic risk criteria relating to oncogenic effects in test animals set forth in this Section.

A. *Chronic Feeding Study in Which Oncogenic Effects Were Observed.* The Working Group recommendation to presume against pronamide because of its oncogenic effects is based on data presented in a chronic feeding study submitted with a petition for tolerances for alfalfa and fresh hay: "Eighteen Month Study on the Carcinogenic Potential of Kerb (RH–315; Pronamide) in Mice" (*14*). Rohm and Haas, who submitted the study, holds that the results indicate that pronamide is not a true carcinogen and does not represent a substantial hazard to humans. However, three groups within EPA

have reviewed this data and each has concluded that pronamide is a carcinogen.

The first reviews occurred in 1974–75 when Toxicology Branch specialists in the Registration Division evaluated these petitions and concluded that pronamide was a potential human carcinogen.[4]

Later, in connection with the current RPAR review of pronamide, a CED contractor, Battelle Memorial Laboratories, Columbus, Ohio, received this data and concluded that pronamide is an oncogen (*15*). The Criteria and Evaluation Division further stated in summary:

"Based on the assumption that an adequate histopathology * * * was conducted * * * it may be concluded that pronamide is a carcinogen in (C57BL/6) x (C3HAnf) F1 male mice (*16*). The EPA Carcinogen Assessment Group (CAG) also concluded that the study indicated that pronamide is a carcinogen. CAG wrote "The mouse study showed a statistically significant excess of liver carcinomas in males associated with a 78 week exposure to 1,000 and 2,000 ppm of pronamide in the Diet" (*17*).

Data from the chronic feeding studies upon which these conclusions are based are presented in Tables 5, 6, and 7. The data in Table 5 indicate that 19 percent of 100 mice ingesting 1,000 ppm pronamide daily in the diet developed malignant tumors, and that 28 percent of 99 mice ingesting 2,000 ppm pronamide developed malignant tumors. By contrast, malignant tumors were found in 8 percent of 100 control animals.

[4] On November 29, 1974, the Toxicology Branch, Registration Division (RD), reviewed an 18-month feeding study submitted with a tolerance petition for alfalfa (*14*). Because of the increased frequency of hepatic carcinomas in male mice in this study, he concluded that pronamide might be a carcinogen (*18*).

The Chief of the Toxicology Branch, in a memo dated Dec. 9, 1974 to Pesticide Science Officer, Registration Division reported the findings of the study and requested that the opinion of "at least one additional pathologist be secured before a recommendation that the tolerance be granted is made." (*19*)

On the basis of the Toxicology Branch memo, Registration Division then requested an advisory opinion from the Director of CED. The Director of CED replied in a memo dated December 18, 1974, "You may request an additional pathiologist * * * to analyze the slides. However, given the usual residue analysis of these materials on foodstuffs, 2,000 ppm or 1,000 ppm would be orders of magnitude different to the point where we do not anticipate a human toxicological problem with carcinogenicity." (*20*)

The study was subsequently reexamined by Toxicology Branch and review dated October 10, 1975, reaffirmed the initial conclusion that pronamide may be a carcinogen (*21*). In this review Toxicology Branch stated, "The evidence submitted * * * is very strong that (pronamide) is a potential human carcinogen. * * * It does produce * * * cancers * * * in the mouse." The Registration Division referred pronamide to the Office of Special Pesticide Reviews for further study.

TABLE 5.—*Tumors at all sites in male mice ingesting pronamide* [1]

Dose	Mice with benign tumors		Mice with malignant tumors		Total mice with tumors	
	Number	Percent	Number	Percent	Number	Percent
Parts per million:						
0	0/100	0	8/100	8	8/100	8
1,000	0/100	0	19/100	[2] 19	19/100	19
2,000	1/99	1	28/99	28	29/100	29

[1] This table records the number of mice with tumors and not the total number of tumors. Thus a mouse with more than 1 tumor is counted only once.
[2] 3 questionable tumors are not included.

The CAG review also noted other liver lesions found in male mice that included adenomatous hyperplasia, degeneration, hyperplasia, intrahepatic cholestasis, necrosis, and/or fatty change (Table 6). Mice which had cholestasis, an extremely rare lesion, did not have carcinomas of the liver. There were no lesions of the liver reported for female mice in the control group and only 1 and 2 percent in the liver of female mice ingesting 1000 and 2000 ppm pronamide, respectively (Table 7).

TABLE 6.—*Liver lesions in male mice ingesting pronamide* [1]

Dose	Mice with hyperplasia		Mice with adenomatous hyperplasia		Mice with carcinomas		Total mice with lesions	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent
Parts per million:								
0	0/100	0	0/100	0	7/100	7	7/100	7
1,000	0/100	0	3/100	[2] 3	18/100	18	21/100	21
2,000	5/99	5	6/99	[2] 6	24/99	[2] 24	36/99	36

[1] 28 mice had intrahepatic cholestasis which were not tabulated. The number of mice in each group would be slightly higher if results were corrected for survival time.
[2] Includes 2 mice with questionable carcinomas.
[2] 1 mouse also had biliary cirrhosis.

TABLE 7.—*Liver lesions in female mice ingesting pronamide* [1]

Dose	Mice with adenomatous hyperplasia		Mice with carcinomas		Total mice with lesions	
	Number	Percent	Number	Percent	Number	Percent
Parts per million:						
0	0/100	0	0/100	0	0/100	0
1,000	0/100	0	1/100	1	1/100	1
2,000	0/99	0	2/99	2	2/99	2

[1] The number of mice in each group would be slightly smaller if results were corrected for survival time.

Metastases of the liver tumors were not observed in this study. CAG explained that because this study was terminated at 18 months, the animals had not lived long enough for metastases to develop. Therefore, although there were no reported metastases by the conclusion of the study, this data does not conclusively demonstrate that metastases would not have occurred if the study had gone to 24 months, i.e., the full life expectancy of the mouse. Moreover, CAG predicted that if the study had not terminated after 18 months and if known histological trends were followed, mice that had hyperplasia would most likely have developed carcinomas. CAG characterized the nonhepatic tumors as lymphomas.

In summary, both CED and CAG reported that pronamide increases hepatic carcinomas in male (C57BL/6 x C3HAnf) F1 mice, CAG also identified additional tumors which cannot be properly evaluated because of the method of tissue collection.

Thus the Working Group concludes that a rebuttable presumption against the registration of pronamide products should be issued based on its oncogenic potential as demonstrated in the Rohm and Haas 18-month mouse feeding study.

B. *Chronic Feeding Studies Reporting No Oncogenic Effects.*—1. *"Toxicologic Study on the Effect of Adding RH–315 to the Diet of Rats for a Period of Two Years".* Rohm and Haas fed groups of 30 rats pronamide in their diet at levels of 30, 100, and 300 ppm for 2 years (*22*). Results of the study are reported in Tables 8–11. Rohm and Haas concluded that no toxic effects were shown. CAG reported that male and female rats developed tumors in both the control and treated groups but that no trend or dose response relationship could be observed (*17*). The CED report noted the tumor formation but could not offer comment without a complete histopathologic reexamination. CED recommended that future feeding studies include a tissue residue analysis for proper assessment of potential toxic effects (*15*). For these reasons neither CED nor CAG could conclude from these studies that pronamide caused oncogenic effects. However, because CAG also noted that a reexamination of organs containing tumors would be worthwhile, the Agency has requested that Rohm and Haas submit slides of these tissues for examination.

TABLE 8.—*Benign and malignant tumors in male rats ingesting pronamide* [1]

Dose	Rats with benign tumors		Rats with malignant tumors		Total rats with tumors	
	Number	Percent	Number	Percent	Number	Percent
Parts per million:						
0	2/22	9	0/22	0	2/22	9
30	3/22	14	1/22	[2] 5	4/22	18
100	0/21	0	0/21	0	0/21	0
300	2/19	15	0/19	0	2/19	15

[1] Tumors of the mammary glands and pituitary are listed in another table and are not included here.
[2] Reticulum cell sarcoma of the lung.

TABLE 9.—*Benign and malignant tumors in female rats ingesting pronamide* [1]

Dose	Rats with benign tumors		Rats with malignant tumors		Total rats with tumors	
	Number	Percent	Number	Percent	Number	Percent
Parts per million:						
0	1/22	5	0/22	0	1/22	5
30	0/17	0	0/17	0	0/17	0
100	3/22	14	0/22	0	3/22	14
300	4/21	19	1/21	[2] 5	5/21	24

[1] Tumors of the mammary glands and pituitary are listed in another table and are not included here.
[2] Carcinoma of the uterus with metastases to the adrenals.

TABLE 10.—*Tumors of the mammary glands and pituitary in female rats ingesting pronamide*

Dose	Rats with mammary gland tumors [1]		Rats with pituitary tumors		Total rats with tumors [2]	
	Number	Percent	Number	Percent	Number	Percent
Parts per million:						
0	12/22	55	6/22	27	15/22	68
30	9/17	53	4/17	24	12/17	71
100	11/22	50	4/22	18	13/22	59
300	11/21	52	1/21	5	11/21	52

[1] Tumors were described as fibromas or adenomas. This table records the number of rats with tumors and not the total number of tumors.
[2] Rats that had both types of tumors are counted only once in this column.

TABLE 11.—*Tumors of the mammary glands and pituitary in male rats ingesting pronamide*

Dose	Rats with mammary gland tumors [1]		Rats with pituitary tumors		Total rats with tumors [2]	
	Number	Percent	Number	Percent	Number	Percent
Parts per million:						
0	1/22	5	2/22	9	3/22	14
30	1/22	5	0/22	0	1/22	5
100	2/21	10	0/21	0	2/21	10
300	2/19	11	0/19	0	2/19	11

[1] Tumors were described as fibromas or adenomas. This table records the number of rats with tumors and not the total number.
[2] Rats that had both types of tumors are counted once in this column.

2. *"Toxicologic Study on the Effect of Adding RH–315 to the Diet of Beagle Dogs for a Period of Two Years".* This study, which was submitted by Rohm and Haas (*23*) could not be used to assess oncogenic or other chronic effects since the dogs were fed pronamide for only 2 years which is not "the greater part of the animal's life span" as required by the National Cancer Institute guidelines. In addition the number of animals tested was small. The Criteria and Evaluation Division concluded "* * * with the sacrifice of one dog at the end of one year statistical differences would be difficult to obtain with only the remaining animals of each sex per dose" (*16*). The CAG report on this study reached the same conclusion. Therefore, EPA will not request the opportunity to reevaluate these tissue slides.

[FRL 730–6]

STATE PLAN FOR CERTIFICATION OF PESTICIDE APPLICATORS

Extension of Contingency Approval

In accordance with the provisions of section 4(a)(2) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136 et seq.) and 40 CFR Part 171 (39 FR 36445 (October 9, 1974) and 40 FR 11698 (March 12, 1975)), the Honorable Richard Lamm, Governor of the State of Colorado, submitted a State Plan for Certification of Pesticide Applicators to the Environmental Protection Agency (EPA) for approval, contingent upon enactment of appropriate legislation and promulgation of implementing regulations. On March 3, 1977, the Regional Administrator, EPA, Region VIII, approved the Plan on a contingency basis. Contingency approval was granted until May 1, 1977. Notice of the approval was published in the FEDERAL REGISTER on March 14, 1977 (42 FR 13861).

Subsequently, on April 27, 1977, the State of Colorado requested an extension of the period of the contingency approval in order to allow additional time for the Colorado Legislature to consider pending legislation. The Agency finds that there is good cause for approving this request and as such has granted an extension until June 18, 1977.

Dated: April 28, 1977.

JOHN A. GREEN,
Regional Administrator,
Region VIII.

SUBMITTAL OF SIP REVISIONS

Notice of Schedules for Submittal of Revisions to Arkansas Implementation Plan for Particulate Matter

On July 16, 1976 (41 FR 29478), the Regional Administrator called for revisions to Arkansas' State Implementation Plan (SIP) for attainment of the 24-hour standard for particulate matter. The revisions are to correct deficiencies in the control strategies for the Air Quality Control Regions (AQCRs) listed below.

Central Arkansas (Little Rock AQMA)
Metropolitan Fort Smith Interstate
Metropolitan Memphis Interstate
Monroe-El Dorado Interstate
Northeast Arkansas

In the notice, the State was requested to submit a SIP revision by July 1, 1977, that would provide for attainment of the 24-hour standard. At the time the call was made, an analysis was being conducted to determine the extent of the problem and the control measures that would be needed. Results from the analysis were to provide the necessary information for the State to develop the SIP revision. The analysis will not be completed until May 1977. Consequently, the majority of the revision development work cannot be accomplished until after that date. However, since the completion date is near, it was possible to negotiate a detailed work schedule for the SIP development and submittal. This schedule is shown below.

PARTICULATE REVISION SCHEDULE

Identification of SIP Revision Requirements, Oct. 15, 1977.
Complete Control Strategy, Feb. 15, 1978.
Public Hearing, Apr. 15, 1978.
Final State Adoption, June 15, 1978.
Submit to EPA, June 30, 1978.

In the call for revision, the SIP was also cited as deficient for maintaining the primary 24-hours standard for particulate matter. However, a request for maintenance of the standard was not made. For the same reasons, a maintenance demonstration is not being requested in this notice. Once the attainment date for the primary 24-hour standard is determined, a work schedule for submitting a maintenance demonstration will be negotiated.

This notice is not subject to rulemaking procedures. The need for the plan revision was based on a technical finding by the Regional Administrator that the control strategy for particulate matter is inadequate and needs to be revised. Authority for such action is provided in Sections 110(a)(2)(H) and 110(c) of the Clean Air Act, 1970. Ample opportunity for public comment on the control strategy revision will be provided during the public hearing that the State is required to hold.

AUTHORITY: Section 110(a)(2)(H) of the Clean Air Act, and section 110(c) of the Clean Air Act, as amended, 42 U.S.C. 1857c-5(c).

Dated: May 5, 1977.

JOHN C. WHITE,
Regional Administrator.

[FRL 730–4]

SUBMITTAL OF SIP REVISIONS

Notice of Schedules for Submittal of Revisions to the New Mexico Implementation Plan for Particulate Matter

On July 16, 1976 (41 FR 29486), the Regional Administrator called for a revision to New Mexico's State Implementation Plan (SIP) to correct deficiencies with respect to the control of particulate matter emissions from existing and projected potash plants in the Pecos-Permian Basin Air Quality Control Region (AQCR) for attainment and maintenance of primary ambient air quality standards.

At the time the call for SIP revision was published, New Mexico was conducting an analysis to make a more accurate determination of the future impact of particulate emissions from potash plants, and to better define control requirements. Consequently, a date for submitting a revision to the control strategy was deferred until the analysis could be completed. The analysis has been completed, which made it possible to negotiate a work schedule with New Mexico for submitting the particulate matter revision. December 1977, is considered the earliest reasonable date by which the revision can be submitted.

PARTICULATE REVISION SCHEDULE

1. Complete emission inventory, Completed.
2. Complete control strategy, June 1977.
3. Select emission limits, July 1977.
4. Public hearing, September 1977.
5. Final State adoption, November 1977.
6. Submit to EPA, December 1977.

This notice is not subject to rulemaking procedures. The need for the plan revision was based on a technical finding by the Regional Administrator that the control strategy for particulate matter is inadequate and needs to be revised. Authority for such action is provided in sections 110(a)(2)(H) and 110(c) of the Clean Air Act, 1970. Ample opportunity for public comment on the control strategy revision will be provided during the public hearing that the State is required to hold.

AUTHORITY: Section 110(a)(2)(H) of the Clean Air Act, as amended, 42 U.S.C. 1857-5(c).

Dated: May 6, 1977.

JOHN C. WHITE,
Regional Administrator.

[FRL 730–1]

SUBMITTAL OF SIP REVISIONS

Notice of Schedules for Submittal of Revisions to the Texas Implementation Plan for Particulate Matter

On July 16, 1976 (41 FR 29488), the Regional Administrator called for revisions to Texas' State Implementation Plan (SIP) to correct deficiencies with respect to attainment and maintenance of the national standards for particulate matter. In the call for revision, a distinction was made with regard to requirements for attainment of the standards and requirements for maintenance of the standards.

ATTAINMENT OF STANDARDS

Attainment deficiencies were cited for the Air Quality Control Regions (AQCRs) listed below:

Amarillo-Lubbock
Brownsville-Laredo
Corpus Christi-Victoria
Houston-Galveston
Dallas-Fort Worth
San Antonio
El Paso-Las Cruces-Alamogordo

For these AQCRs, the Regional Administrator requested that the State submit a SIP revision by July 1, 1977, for attainment of the national primary standards.

At the time the call for revision was made, the state was conducting a study to determine the extent of the problem and the control measures that would be needed. This particulate attainment analysis was submitted to EPA in March 1977. It was possible for the State to accomplish only a limited amount of definitive control strategy development prior to completing the analysis. Consequently, considerable development work concerning initiation of regulation changes, completing the control strategy, adopting the revision, and complying with EPA's revision submittal requirements, could not be done until the analysis was completed.

A detailed work schedule has been negotiated with Texas for accomplishing the above tasks. This schedule is shown below.

PARTICULATE REVISION SCHEDULE

Select Emission Limits, June 24, 1977.
Determine Most Effective Methods of Control, Aug. 1, 1977.
Draft Revision of Regulation 1, Aug. 22, 1977.
Public Hearing on Regulation 1, Nov. 29, 1977.
Final State Adoption, Jan. 27, 1978.
Public Hearing on Control Strategy, Apr. 7, 1978.
Final State Adoption, May 26, 1978.
Submit to EPA, June 16, 1978.

MAINTENANCE OF STANDARDS

In the call for revision the Corpus Christi, Dallas-Fort Worth, Houston, Galveston, and Beaumont Air Quality Maintenance Areas (AQMAs) were identified as needing a control strategy revision for maintenance of standards. However, no date was established for submitting maintenance revisions. Consequently no schedules for submitting these revisions have been negotiated.

This notice is not subject to rulemaking procedures. The need for the plan revisions was based upon a technical finding by the Regional Administrator that the control strategies for particulate matter are inadequate and need to be revised. Authority for such action is provided in sections 110(a)(2)(H) and 110(c) of the Clean Air Act, 1970. Ample opportunity for public comment on the control strategy revisions will be provided during the public hearing that the State is required to hold.

AUTHORITY: Section 110(a)(2)(H) of the Clean Air Act, and section 110(c) of the Clean Air Act, as amended, 42 U.S.C. 1857c-5(c).

Dated: May 5, 1977.

JOHN C. WHITE,
Regional Administrator.

[FRL 729–7]

STATE OF MISSISSIPPI

Determination of Primary Enforcement Responsibility

This public notice is issued pursuant to section 1413 of the Safe Drinking Water Act, Pub. L. 93-523, December 16, 1974, and § 142.10 of the National Interim Primary Drinking Water Regulations, published in the FEDERAL REGISTER on January 20, 1976.

An application, dated April 8, 1977, has been received from the Chief of the Bureau of Health requesting that the Mississippi State Board of Health be granted primary enforcement responsibility for water systems in the State of Mississippi, in accordance with the provisions of this Act.

In response, I have determined that the Mississippi State Board of Health has met all conditions of the Safe Drinking Water Act and subsequent regulations for the assumption of primary enforcement responsibility for water systems in the State of Mississippi. The State—

(1) Has adopted drinking water regulations which are no less stringent than the National Interim Primary Drinking Water Regulations;

(2) Has adopted and will implement adequate procedures for the enforcement of such State regulations, including adequate monitoring and inspections;

(3) Will keep such records and make such reports as required;

(4) If it permits variances or exemptions from the requirements of its regulations, will issue such variances and exemptions in accordance with the provisions of the National Interim Primary Drinking Water Regulations;

(5) Has adopted and can implement an adequate plan for the provision of safe drinking water under emergency circumstances.

All documents relating to this determination are available for public inspection between the hours of 8 a.m. and 5 p.m., Monday through Friday, at the following offices:

Mississippi State Board of Health, 2423 North State Street, Jackson, Miss. 39205.
Regional Administrator, Environmental Protection Agency, Region IV, 345 Courtland Street NE., Atlanta, Ga. 30308.

All interested parties are invited to submit written comments on this determination and may request a public hearing. Written comments and/or a request for a public hearing must be submitted on or before June 20, 1977. A request for a public hearing shall include the following information:

(1) The name, address, and telephone number of the individual, organization or other entity requesting a hearing.

(2) A brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such hearing.

(3) The signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public hearing is made within thirty (30) days after this notice, a public hearing will be held. The Regional Administrator will give further notice in the FEDERAL REGISTER and in a newspaper or newspapers of general circulation in the State of Mississippi of any hearing to be held pursuant to a request submitted by an interested person, or on his own motion. Notice of the hearing shall be given not less than fifteen (15) days prior to the time scheduled for the hearing. In addition to publication as described above, notice will be sent to the person requesting a hearing and to the State. Notice of the hearing will include a statement of the purpose of the hearing, information regarding the time and location for the hearing, and the address and telephone number of an office at which interested persons may obtain further information concerning the hearing.

After receiving the record of the hearing, the Regional Administrator will issue an order affirming or rescinding his determination. If the determination is affirmed, it shall become effective as of the date of this order.

If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on his own motion, this determination shall become effective thirty (30) days after issuance of this initial notice.

Please bring this notice to the attention of any persons known by you to have an interest in this determination.

Dated: May 11, 1977.

JACK E. RAVAN,
Regional Administrator, Environmental Protection Agency, Region IV.

FEDERAL COMMUNICATIONS COMMISSION

AM BROADCAST SERVICE WORKING GROUP, 1979 WORLD ADMINISTRATIVE RADIO CONFERENCE

Meeting

MAY 17, 1977.

Pursuant to Pub. L. 92-463, notice is hereby given of the following meeting for June 1977.

WARC-79 AM BROADCASTING SERVICE GROUP

Thursday, June 9, 1977, 10:30 a.m. to 12:30 p.m.; Room 8210, 2025 "M" Street, NW., Washington, D.C.

Chairman: D. C. Everist
FCC Liaison: Dennis Williams

The Agenda for the meeting is as follows:

1. Call to order by the Chairman.
2. Approval of minutes of the previous meeting.
3. Draft reply to Fifth Notice of Inquiry, Docket No. 20271.
4. Setting next meeting date and adjournment.

The above meeting is open to broadcast industry representatives and interested members of the public.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[Report No. 858]

COMMON CARRIER SERVICES INFORMATION

Applications Accepted for Filing

MAY 16, 1977.

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's Rules and Regulations or its policies.

Final action will not be taken on any of these applications earlier than 31 days following the date of this notice, except for radio applications not requiring a 30 day notice period (See § 309(c) of the Communications Act), applications filed under Part 68, applications filed under Part 63 relative to small projects, or as otherwise noted. Unless specified to the contrary, comments or petitions may be filed concerning radio and Section 214 applications within 30 days of the date of this notice and within 20 days for Part 68 applications.

In order for an application filed under Part 21 of the Commission's Rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein, it must be substantially complete and tendered for filing by whichever date is earlier: (a) the close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cut-off date for filing a mutually exclusive application is the close of business one business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cut-off rule. [See § 1.227(b)(3) and 21.30(b) of the Commission's Rules.]

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

21233–CD–P–77 Tel - Page Corporation (KRH631), C.P. for additional facilities to operate on 158.70 MHz to be located at a new site described as Loc. No. 3: 989 James Street, Syracuse, New York.

21243–CD–MP–(2)–77 California Aircraft Telephone, Co., c/o Intrastate Radiotelephone (KWU516), Mod permit for additional Control facilities to operate on 2164.0 MHz to be located at a new site described as Loc. No. 2: 2301 West Olive, Burbank; and 2114.0 MHz Repeater at Loc. No. 1: Oat Mountain, 4.9 Miles NNE of Chatsworth, California. (Airground)

21255–CD–P–77 General Telephone Company of Florida (KWT890), C.P. for additional facilities to operate on 152.84 MHz to be located at a new site described as Loc. No. 4: Corner of Main St. and S.R. 37, Bradley Junction, Florida.

21290–CD–P–77 William G. Bowles Jr. d.b.a. Mid-Missouri Mobilfone (KWU202), C.P. to change antenna system operating on 152.06 MHz at 2438 Katy Lane, Poplar Bluff, Missouri.

21291–CD–P–(2)–77 Telstar Communications, Inc. (New), C.P. for a new 2-way station to operate on 454.125 and 454.325 MHz to be located 8 miles SSW of Cheyenne, Wyoming.

21292–CD–P–77 Silverado Communications (New), C.P. for a new 2-way station to operate on 454.10 MHz to be located at 1190 Thompson Avenue, Napa, California.

21293–CD–P–(3)–77 Ram Broadcasting of Colorado, Inc. (KUC862), C.P. to replace transmitter operating on 454.250, 454.275 and 454.300 MHz located at Western Federal Saving Building, 17th and California Streets, Denver, Colorado.

21294–CD–P–77 Gulf Telephone Company (KIB528), C.P. to change antenna system operating on 152.54 MHz at Loc. No. 1: 116 North Alston Street, Foley; and 152.63 MHz at Loc. No. 2: Telephone Office, Summerdale, Alabama.

21295–CD–P–77 Airvoice, Inc. (KUC899), C.P. for additional facilities to operate on 454.05 MHz to be located at Murphy Mill Road, 1 mile south of Americus, Ga.

21296–CD–P–(2)–77 David R. Williams d.b.a. Industrial and Communications (KWU212), C.P. for additional facilities to operate on 454.150 and 454.175 MHz to be located at a new site described as Loc. No. 2: Kessler Peak, 6 miles SW of Magna, Utah.

21297–CD P–(2)–77 David R. Williams d.b.a. Industrial Communications (KWU216), C.P. for additional facilities to operate on 454.200 and 454.250 MHz to be located at a new site described as Loc. No. 2: Kessler Peak, 6 miles SW of Magna, Utah.

21298–CD–P–(3)–77 Central Mobile Radio Phone Service (KQD599), C.P. to change antenna system operating on 454.05 and 454.225 MHz (Loc. No. 3; and relocate facilities operating on 454.150 MHz to (Loc. No. 3) 2345 Symmes Street, Cincinnati, Ohio.

21299–CD–MP–(4)–77 Central Mobile Radio Phone Service (KQA770), Mod permit to replace transmitter, change antenna system and relocate facilities operating on 454.05, 454.75, 454.125, and 454.150 MHz to be located 3165 Olentangy River Road, Columbus Ohio.

21300–CD–MP–(2)–77 Central Mobile Radio Phone Service (KQC875), Mod permit to change antenna system and replace transmitter operating on 454.100 and 454.350 MHz. located 0.15 mile West of Springfield south of Wright Bros. Memorial Hwy, Ohio.

21301–CD–P–77 Edward C. Smith Answerite Professional Telephone Service (New), C.P. for a new 1-way station to operate on 158.70 MHz. to be located at Episcopal-Catholic Apartment Ave. L, NW, Winter Haven, Florida.

21302–CD–P–77 Central Radio Dispatch, Inc. (New), C.P. for a new 1-way station to operate on 43.22 MHz. to be located 2 miles south of Highway 271 on Rt. 323, Tyler, Texas.

21303–CD–P–(4)–77 The Bell Telephone Company of Pa., (KGA476), C.P. to change antenna and relocate facilities operating on 454.375, 454.425, and 454.475 MHz at a new site described as Loc. No. 2: KDKA-TV Tower Grizella and Montana Street, Pittsburgh, Pennsylvania.

21304–CD–P–77 Wilson J. Trahan and Ralph E. Antles, d.b.a. Western Electronics & Communications (KWH307), C.P. for additional facilities to operate on 158.70 MHz to be located at Hayden Peak, 11 miles SE of Kingman, Arizona.

21305–CD–P–(11)–77 Michigan Bell Telephone Company (KRS714), C.P. to change antenna system operating on 158.10 MHz. (Loc. No. 1) Located at 1365 Cass Avenue; 158.10 MHz (Loc. No 2) located 882 Oakman Blvd., Detroit; 158.10 MHz (Loc. No. 3) located at Centerline; 158.10 MHz (Loc. No. 4) located at 23850 Wick Road, Taylor; 158.10 MHz (Loc. No. 7) located at 25189 Lahser Road, Southfield; Relocate facilities operating on 158.10 MHz (Loc. No 5) to be located at 11770 Merriman, Livonia; Also for additional facilities to operate on 158.10 MHz to be located at new location No. 10 thru No. 15 as follow: Loc. No. 10: 34100 South Gratiot North of Roseville; Loc. No. 11: 35928 Ann Annapolis, Wayne; Loc. No. 12: 38900 Ten Mile Road, Farmington Hills; Loc. No. 13: 775 West Big Beaver Road, Troy; Loc. No. 14: 54 North Mill Street, Pontiac; Loc. No 15: 8061 Hann, Michigan.

21307–CD–P–(3)–77 Edward C. Smith d.b.a. Answerite Professional Telephone Service, (New) C.P. for a new 2-way station to operate on 454.225 454.325 454.350 MHz to be located at 4015 Bayshore Blvd., Tampa, Florida.

DEVELOPMENTAL RENEWAL OF LICENSE EXPIRING 7–6–77

Terms July 6, 1977 to July 6 1978

New York Telephone Company, within territory of grantee, KC5161.

MAJOR AMENDMENT

Marc Weber Tobias and Michael Charles Tobias d.b.a. MT Systems, Inc., FN: 20634–CD–P–77 Amend to add control facilities on 158.55 MHz at Loc. No. 2, 119 E. 1st Avenue, Mitchell, South Dakota and Loc. No. 3, water Tower, 2 miles SSE of Sioux Falls, South Dakota.

CORRECTION

21232–CD–P–77 Tel-Page Corporation, Syracuse, New York Correct call sign KRH631 to read KHR643. All other particulars are to remain the same as reported on PN No. 857 dated May 19, 1977.

INFORMATIVE

It appears that the following applications may be mutually exclusive and subject to Commission's Rules regarding ex parte presentations, by reasons of potential electrical interference.

Frequency: 158.70 MHz:

Charles R. Crawford, Santa Ynez Peak, California, (New) 20864–CD–P–77.

Mobile Radio Systems of Ventura, Inc., Ventura, California, KSV976, 21151–CD–P–77.

Coast Mobilphone Ser., Santa Ynez Peak, California, KUA301, 20765–CD–P–77.

Frequency: 454.250 MHz:

Salinas Valley Radio Telephone Company, Mt. Toro, California, KMA837, 20257–CD–P–77.

Mobile Radio System of San Jose, Inc., Los Gatos, California, KMA741, 20759–CD–P–77.

RURAL RADIO

60272–CR–P/L–(2)–77 The Pacific Telephone and Telegraph Company (New), C.P. for a new Rural Subscriber-Fixed station to operate on 157.77 and 157.89 MHz to be located 23.5 Miles WNW of Westmoreland, California.

POINT TO POINT MICROWAVE RADIO SERVICE

2438–CF–MP–77 American Telephone and Telegraph Company (WBB294), 200 East Burke Street, Martinsburg, (Berkeley) West Virginia. Mod. of C.P. (4879–CF–P–76) to move antenna on frequency 3750H MHz toward Clear Spring, Maryland on azimuth 358.3°.

2439–CF–MP–77 Same (KGJ68), 2.2 Miles West of Clear Springs, (Washington) Maryland. Mod. of C.P. (4880–CF–P–76) to move antenna on frequency 4110H MHz toward Martinsburg, West Virginia on azimuth 178.3°.

FEDERAL MARITIME COMMISSION

GREECE/U.S. ATLANTIC RATE AGREEMENT

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before June 13, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

John R. Attanasio, Esquire, Billig, Sher & Jones, P.C., 2033 K Street NW., Washington, D.C. 20006.

Agreement No. 9238–8 modifies the above-named rate agreement by (1) extending the scope of the agreement to apply to inland points in Greece, (2) establishing voting requirements, (3) establishing self-policing procedures and cargo inspection services, (4) establishing a financial guarantee in the amount of $10,000 per participant, (5) establishing the sharing of office space, personnel and facilities with other agreements or conferences and (6) making other administrative changes.

By Order of the Federal Maritime Commission.

Dated: May 17, 1977.

JOSEPH C. POLKING,
Acting Secretary.

[FR Doc.77–14424 Filed 5–19–77;8:45 am]

[Fact Finding Investigation No. 9]

POSSIBLE REBATES AND SIMILAR MALPRACTICES IN THE UNITED STATES FOREIGN COMMERCE

Amendment To Order of Investigation

The Commission, by order served May 12, 1977, denied a motion to quash subpoena and also determined to amend the order of investigation in this proceeding.

Accordingly, *it is ordered*, That the first ordering paragraph of the Comsion's July 9, 1976 Order of Investigation in the above-captioned matter is amended to read as follows:

That, pursuant to sections 22 and 27 of the Shipping Act, 1916 (46 U.S.C. 821 and 826) and section 214(a) of the Merchant Marine Act of 1936 (46 U.S.C. 1124(a)), a non-adjudicatory investigation is hereby instituted into the practices of rebates, absorptions, allowances in excess of those set forth in the tariff and any other methods of obtaining or allowing other persons to obtain transportation of property at less than the rates or charges which would otherwise be applicable, in the United States foreign commerce, said investigation to be conducted pursuant to the Commission's Rules of Practice and Procedure. 46 CFR 502.281–291 (Rule 18).

By the Commission.

JOSEPH C. POLKING,
Acting Secretary.

[FR Doc.77–14425 Filed 5–19–77;8:45 am]

TRANS-PACIFIC FREIGHT CONFERENCE OF JAPAN/KOREA AND JAPAN/KOREA-ATLANTIC AND GULF FREIGHT CONFERENCE

Agreements Filed

Notice is hereby given that the following agreements have been filed with the

Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreements at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreements at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before June 13, 1977. Any person desiring a hearing on the proposed agreements shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreements (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreements filed by:

Charles F. Warren, Esq., 1100 Connecticut Avenue NW., Washington, D.C. 20036.

Agreement Nos. 150–65 and 3103–65 amend, respectively, Articles 25(f)(4) of the Trans-Pacific Freight Conference of Japan/Korea Agreement and the Japan/Korea-Atlantic and Gulf Freight Conference Agreement to provide that the Neutral Body shall be authorized to assess liquidated damages in an amount not to exceed $120,000 for each breach of the agreement, tariff rates, or rules and regulations. Presently, each agreement provides for a graduated scale of liquidated damages to be assessed in the following respective maximum amounts for the first, second, third, fourth and subsequent breaches, i.e., $20,000, $60,000, $80,000 and $120,000.

By Order of the Federal Maritime Commmission.

Dated: May 16, 1977.

JOSEPH C. POLKING,
Acting Secretary.

GENERAL SERVICES ADMINISTRATION

(Intervention Notice No. 30)

PUBLIC SERVICE COMPANY OF COLORADO AND COLORADO PUBLIC UTILITY COMMISSION

Proposed Intervention in Utility Rate Application

Correction

In FR Doc. 77-13463, appearing in the issue of Wednesday, May 11, 1977, on page 233879, the intervention notice number in the heading should read as set forth above.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

COMMUNITY ALCOHOLISM SERVICES REVIEW COMMITTEE

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of July 1977:

COMMUNITY ALCOHOLISM SERVICES REVIEW COMMITTEE

Date and time: July 9–11, 7 p.m.

Place: Ramada Inn, State Room, 8400 Wisconsin Avenue, Bethesda, Maryland 20014 (301–654–1000).

Type of meeting: Open.

Contact: Mr. Sidney Leopold, Room 11–14, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857 (301–443–1374).

Purpose: The Committee provides initial review of applications for community services alcoholism demonstration grants for special treatment and rehabilitation programs to the Director of the National Institute on Alcohol Abuse and Alcoholism and to the National Advisory Council on Alcohol Abuse and Alcoholism.

Agenda: The meeting will be open for the entire discussion. The Committee will be developing new criteria for NIAAA consideration for performing initial review of grant applications for Federal assistance.

Substantive information may be obtained from the contact person listed above. The NIAAA Information Officer who will furnish summaries of the meeting and rosters of the Committee members is Mr. Harry Bell, Associate Director for Public Affairs, NIAAA, Room 11A–17, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857 (301–443–3306).

Dated: May 16, 1977.

CAROLYN T. EVANS,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

PSYCHOLOGICAL SCIENCES FELLOWSHIP REVIEW COMMITTEE

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of June 1977:

PSYCHOLOGICAL SCIENCES FELLOWSHIP REVIEW COMMITTEE

Date and time: June 8–10, 1 p.m.

Place: Conference Room B, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Type of meeting: Open—June 8, 1 to 3 p.m.; Closed—Otherwise.

Contact: Mrs. Mary Cope, Parklawn Building, Room 9C–15, 5600 Fishers Lane, Rockville, Maryland 20857 (301–443–3856).

Purpose: The Committee is charged with the initial review of fellowship applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to psychological sciences fellowships and makes recommendations to the National Advisory Mental Health Council for final review.

Agenda: From 1 to 3 p.m., June 8, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of fellowship applications for Federal assistance and will not be open to the public in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552b(c)(6), Title 5 U.S. Code and section 10(d) of Pub. L. 92–463 (5 U.S.C. Appendix I).

Substantive information may be obtained from the contact person listed above. The NIMH Information Officer who will furnish summaries of the meeting and rosters of the Committee members is Mr. Edwin Long, Deputy Director, Division of Scientific and Public Information, NIMH, Room 15–105, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857 (301–443–3600).

Dated: May 16, 1977.

CAROLYN T. EVANS,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

Food and Drug Administration

[Docket No. 77N-0163]

LEMMON PHARMACAL CO.; STATOBEX (PHENDIMETRAZINE TARTRATE 70 MG) DOSAGE FORMS

Opportunity for Hearing on Proposal To Refuse To Approve New Drug Application

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice.

SUMMARY: The Director of the Bureau of Drugs proposes to refuse approval of an abbreviated new drug application for Statobex (phendimetrazine tartrate 70 milligram) tablets and capsules (ANDA 85–095) by Lemmon Pharmacal Company, P.O. Box 30, Sellersville, PA 18960 ("Lemmon"), on the grounds (1) that (a) the application does not contain any reports of investigations or adequate tests, by all methods reasonably applicable, to show whether or not Statobex is safe for use under the conditions of use prescribed, recommended, or suggested in the proposed labeling thereof, and (b) upon the basis of the information submitted as part of the application, FDA has insufficient information to determine whether Statobex is safe for use under such conditions, and (2) that Statobex is a new drug as defined in section 201(p) of the Federal Food, Drug, and Cosmetic Act (the "act") and information relating to its safety and effectiveness must be contained in a new drug application in order to be approved under section 505 of the act (21 U.S.C. 355). This notice does not apply to those portions of ANDA 85–095 regarding Statobex (phendimetrazine tartrate 35 milligram) tablets and capsules; all references to "Statobex" in this notice, unless otherwise indicated, refer to the 70 milligram strength dosage forms only.

DATES: Any request for a hearing must be submitted on or before June 20, 1977. In support of any such request, all data and information relied upon to justify a hearing and any other comments from interested persons must be submitted on or before July 19, 1977.

ADDRESS: Requests, supporting data and information, and other comments shall be submitted, with FDA Docket No. 77N–0163 clearly indicated in the filings, to the FDA Hearing Clerk, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Robert H. Hahn, Bureau of Drugs (HFD–32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301–443–3650).

SUPPLEMENTARY INFORMATION:

BACKGROUND

As required by the Drug Amendments of 1962, FDA is engaged in a Drug Efficacy Study Implementation (DESI) program under which each drug covered by a new drug application (NDA) that was approved by FDA on the basis of safety between 1938 and 1962, is reviewed to determine whether substantial evidence exists to demonstrate that the drug is effective for its labeled indications. As reviews are completed, notices are published in the FEDERAL REGISTER announcing the agency's conclusions on the effectiveness of the drugs reviewed.

In the FEDERAL REGISTER of February 12, 1973 (38 FR 4280) FDA published DESI Notice 11673 stating that Plegine Tablets containing 35 milligrams of phendimetrazine tartrate as a single active ingredient and marketed by Ayerst Laboratories is effective "in the management of exogenous obesity as a short term adjunct (a few weeks) in a regimen of weight-reduction based on caloric restrictions." The Indications section further was to read: "The limited usefulness of agents of this class * * * should be measured against possible risk factors inherent in their use * * *." The DESI notice also stated that Plegine Tablets is regarded as a "new drug" as defined in section 201(p) of the act, and that "a new drug application is required from any person marketing such drug without approval." Furthermore, "all identical, related, or similar drugs, not the subject of an approved new drug application * * * are subject to this notice," citing the current 21 CFR 310.6. Finally, referring to a prior general announcement by FDA published in the FEDERAL REGISTER of July 14, 1970 (35 FR 11273), DESI Notice 11673 advised that "marketing of such drugs may be continued * * * [by] any person who does not hold an approved or effective new drug application, [upon] the submission of an abbreviated new drug application" (ANDA) within 60 days of the notice. The July 14, 1970 announcement also permitted manufacturers to commence marketing upon the filing of an NDA or ANDA. (On September 22, 1975, FDA published in the FEDERAL REGISTER a general notice (40 FR 43531) that in effect revoked those portions of the July 14, 1970 announcement that were inconsistent with the District Court's order in *Hoffmann-LaRoche, Inc.* v. *Weinberger*, 425 F. Supp. 890 (D.D.C., 1975), reprinted in the September 22, 1975 notice. That order, and the September 22, 1975 notice, withdrew any "permission" from FDA for a new supplier of a drug listed in DESI notice 11673 to commence marketing upon submission of an NDA or ANDA but prior to the approval of an NDA or ANDA.)

APPLICATION FOR STATOBEX

On March 23, 1976, Lemmon submitted an ANDA (assigned number ANDA 85–095) for the following products:

Statobex Tablets (phendimetrazine tartrate, 35 mg and 70 mg), Statobex Tablets-D (phendimetrazine tartrate, 35 mg and 70 mg), Statobex-D Capsules (phendimetrazine tartrate, 35 mg and 70 mg).

The ANDA form of a new drug application does not contain preclinical or clinical studies demonstrating the safety or effectiveness of the drug product. 21 CFR 314.1(f). The proposed labeling for Statobex contained a statement of indications identical to that set forth in DESI Notice 11673. On December 14, 1976, after a series of correspondence and meetings with the firm, Lemmon was formally advised by FDA that an ANDA was not an acceptable form of application for a product containing 70 mg of phendimetrazine tartrate.

On December 28, 1976, the firm requested that the application, insofar as it pertains to the 70–mg dosage form, be filed over protest, as provided for in 21 CFR 314.110(d). Under that regulation, FDA is required to reevaluate the application and, within 60 days the agency must either approve the application or give written notice of an opportunity for a hearing on the question of whether the application is approvable. The request to file over protest is regarded by FDA as applicable to both the 70–mg tablet and the 70–mg capsule. (As noted earlier, references to "Statobex" in this notice apply only to the 70–mg dosage forms unless otherwise stated.) In a meeting on February 8, 1977 between officials of the firm and FDA, Lemmon agreed to hold the request to file over protest in abeyance until it had reconsidered its position. By letter dated March 11, 1977, received March 16, 1977, the firm reinstated its request to file over protest, and agreed to permit FDA until May 15, 1977, to complete its reevaluation of ANDA 85–095 and choose one of the courses allowed under 21 CFR 314.110(d). This notice is provided pursuant to that regulation.

SAFETY CONCERNS REGARDING STATOBEX

Phendimetrazine tartrate is related chemically and pharmacologically to

amphetamine and appears to have a similar potential for abuse and risk of causing dependence in the user. Actual abuse of the 35 mg dosage was a significant factor in the decision of the Department of Justice to schedule phendimetrazine under the Controlled Substances Act (see 38 FR 15721; June 15, 1973), as well as in FDA's decision to require a drug dependence warning in the labeling (see DESI Notice 11673). Because higher strength dosage forms would be even more attractive for abuse purposes, this safety problem increases and significantly alters the benefit-risk assesment. Another question raised by the 70–mg dosage is whether it provides any therapeutic benefit to the patient to offset its inherent risks. The approved labeling for Plegine Tablets provides for a usual dose of one 35-mg tablet two or three times daily. It further states that dosage should be individualized to obtain an adequate response with the lowest effective dose; that in some cases one-half tablet (17.5 mg) is adequate; and that dosage should not exceed two tablets (70 mg) three times a day. The labeling makes it very clear that 70 mg three times a day is the exception rather than the rule. The 35-mg dosage form adequately provides the intended flexibility in dosage. A 70-mg capsule would not permit any titration, and a 70-mg tablet would substantially reduce the physician's ability to individualize the dose to, say 17.5 mg. At the same time, amphetamine and amphetamine analogs such as phendimetrazine produce in patients a tolerance to the therapeutic effects. It is not known whether this tolerance develops more quickly at higher dosage levels, but if so, the duration of therapy described in the labeling would be unsupported by evidence of effectiveness. Finally, special safety problems may be presented to the patient from a 70-mg tablet; in addition to the possibly more rapid onset of dependence to the drug, the risks of accidental overdosage are increased by a large dosage. Thus, no medical advantage, but possible serious disadvantages, seem to exist for the 70-mg dosages compared to the 35–mg tablet. Stated differently, there does not appear to be a significant patient population in whom the risks from a 70-mg dosage form are outweighed by the benefits of such a product. This is not to say that clinical evidence that measures the safety and effectiveness could not demonstrate that a 70-mg product meets the standards of the act. Rather, it is that such data are necessary before FDA can conclude that the novel questions posed by this significantly different dosage can be answered. For these reasons, FDA has determined that a new dosage of a drug, even one that at another dosage is generally recognized as safe and effective, is not always and immediately recognizable as safe and effective. See 21 CFR 310.3(h)(5). The agency, therefore, has required a "full" NDA or a supplemental NDA, containing clinical evidence demonstrating the safety and effectiveness of a different dosage of an approved drug..

The Director concludes that the fact that phendimetrazine tartrate (35 mg) was found to be safe and effective for certain indications, as stated in DESI notice 11673, is not a basis for concluding that Statobex is safe for the same indications.

Requirements for Safety Data in ANDA

The history of the new drug provisions of the act and the agency's implementation of them, including introduction of the ANDA, is described in detail in the preamble to a notice of proposed rulemaking published in the Federal Register on June 20, 1975 (40 FR 26142). The Director will not reiterate that history here. He believes, however, that several points bear emphasizing. First, an ANDA is a new drug application; it represents a form of application in which certain information normally part of an NDA is not required because it is not essential to the agency's reaching a decision on the approvability of the drug product under section 505 of the act. This information requirement is waived because the agency already has sufficient publicly available data and information in its files to make appropriate conclusions on those elements of the drug approval decision. (Information contained in other approved NDA's may or may not be public. See 21 CFR 314.14. If not public, it may be relied upon by a second applicant only with the express permission of the first applicant. 21 CFR 314.11.) Generally, the information allowed to be omitted relates to preclinical and clinical studies regarding the safety and effectiveness of the active ingredients. As the Commissioner stated in the June 20, 1975 notice:

> [A]n abbreviated NDA is appropriate only for those drugs which, from a generic standpoint, are generally recognized as safe and effective when they are properly labeled and manufactured. The submission of an abbreviated NDA has thus been required only to assure the quality of drug products and their proper labeling and manufacture, not to show the basic safety and effectiveness of the generic chemical entity involved. (40 FR 28147).

The purpose of an ANDA is to provide a means to eliminate unnecessary animal and human experimentation, to reduce the burdens on manufacturers in attempting to market duplicates of established drugs, and to ease the workload of FDA in reviewing and processing applications.

Second, in order for FDA to waive such requirements, it must affirmatively conclude that it has sufficient public information to make the requisite conclusions. Because the ANDA is an exception to the general rule requiring a complete NDA, the decision to allow use of an ANDA must be consciously and prospectively made by the agency (See 21 CFR 314.1(a): "if the drug * * * is one for which an abbreviated new drug application has been *found* by the Food and Drug Administration to be sufficient * * *." (emphasis added).) These decisions are formal and are officially issued, generally by a notice in the Federal Register but on rare occasions by other public notice. These decision cannot extend to products for which little or no public information is available and which were not considered by FDA in making the ANDA decision. The products covered by this notice illustrate why this is so. They have never been approved for marketing in the United States and their potential for drug abuse problems appears quite substantial. Other examples of unforeseen variations in drugs reviewed in the DESI program have also recently been uncovered in the process of implementing the court order in the "Hoffmann-LaRoche" case (discussed earlier), including sustained release formulations and untested combinations of two or more drugs. Clearly, it is contrary to the public interest, as well as the language of sections 201(p) and 505 of the act and implementing regulations cited above, for FDA to waive any information essential to determine the approvability of such a drug without even being aware that such a drug may potentially be, or actually is being, marketed.

Third, the choice between NDA (including a supplemental NDA) and ANDA is not an "either-or" option. For many years, the agency has imposed on applicants using either application process a variety of requirements depending on the nature of the drug product, the types of information publicly available regarding the drug, and similar factors. Thus, some NDA's require chronic animal toxicology testing, and others do not; some ANDA's require detailed manufacturing data, and others do not; some NDA's and ANDA's require bioavailability data, and others do not. As noted, the most common distinction between the NDA and the ANDA relates to requirements for preclinical and clinical data. But this distinction should not blur the close similarity on most matters. To repeat, both the traditional "full" NDA and the most "abbreviated" ANDA are merely types of applications described in section 505 of the act.

Fourth, the fact that FDA does not waive any of the requirements of an NDA for a particular product does not necessarily mean that an applicant must conduct its own preclinical and clinical studies regarding safety or effectiveness. The applicant may be able to include in its applications published articles and other publicly available data and information that provide an adequate basis for the agency's making the evaluation and approvability decision required under section 505. An NDA can be approved on such a submission.

The Director finds that use of an ANDA for Statobex would be inconsistent with the purposes of the ANDA form of application, has not been authorized by FDA, and would not fulfill the requirements of section 505 of the act regarding the requisite basis of approval for these products. Because of this the Director further finds that Lemmon must submit an application form described in 21 CFR 314.1(c) containing reports of investigations and adequate tests, by all means reasonably applicable, to show whether or not its product is safe for use under the conditions in the proposed labeling.

Lack of Information in Application for Statobex

The Director finds that the ANDA for Statobex lacks any reports of preclinical or clinical investigations on phenidimetrazine tartrate (70 mg). Because the application totally lacks safety data, the information contained therein has not been evaluated to determine whether it satisfies the other requirements of the act and new drug regulations. If, as a result of this notice, a hearing is requested and it is determined that a hearing will be ordered, the Bureau of Drugs will then review the other parts of the application and raise any remaining issues in the notice of hearing.

Notice of Opportunity for Hearing

Therefore, notice is given to Lemmon and all other interested persons that the Director of the Bureau of Drugs proposes to issue an order under section 505(d) of the act refusing to approve ANDA 85–095 on the following grounds: That (1) the application does not contain any reports of investigations or adequate tests, by all methods reasonably applicable, to show whether or not Statobex is safe for use under the conditions prescribed, recommended, or suggested in the proposed labeling thereof, and (2) upon the basis of the information submitted as part of the application, FDA has insufficient information to determine whether the drug is safe for use under such conditions.

This notice does not apply to portions of the abbreviated new drug application (ANDA 85–095) regarding Statobex Tablets and Capsules containing 35 mg of phendimetrazine tartrate.

If Lemmon elects to avail itself of the opportunity for hearing pursuant to section 505(d) of the act and 21 CFR 314.200, it must file with the Hearing Clerk, Food and Drug Administration, (1) written notice of appearance and request for hearing by June 20, 1977, and (2) the data, information, and analyses on which it relies to justify a hearing, as specified in § 314.200, by July 19, 1977. Any other interested person may also submit comments on this notice. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of the applicant to file a timely written appearance and request of hearing as required by 21 CFR 314.200 constitutes an election not to avail himself of the opportunity for a hearing, and the Director of the Bureau of Drugs will summarily enter a final order refusing to approve application.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact that precludes the refusal to approve the appliaction, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner of Food and Drugs will enter summary judgement against the person who requests the hearing, making findings and conclusions, denying a hearing.

All submissions pursuant to this notice shall be field in quintuplicate with the Hearing Clerk, Food and Drug Administration.

All submissions pursuant to this notice, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the Office of the Hearing Clerk (address given above) between the hours of 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–1053, as amended (21 U.S.C. 355)), and under authority delegated to the Director of the Bureau of Drugs (21 CFR 5.82) (recodification published in the Federal Register of March 22, 1977 (42 FR 15553)).

Dated: May 13, 1977.

J. Richard Crout,
Director, Bureau of Drugs.

[Docket No. 76P-0344]

MEDICAL DEVICES

Public Hearing on Proposed Action on California Application for Exemption From Preemption of Requirements

AGENCY: Food and Drug Administration.

ACTION: Notice of Public Hearing.

SUMMARY: This is an announcement that a public hearing before the Commissioner of Food and Drugs will be held on July 19, 1977 to receive comments and views from interested persons on the proposed action by the Food and Drug Administration (FDA) on the State of California application for exemption from Federal preemption of the State's medical device requirements.

DATES: Written notice of appearance by June 20, 1977; the hearing will be held on July 19, 1977.

ADDRESS: Notices of appearance to the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Daniel S. Woloshen, Bureau of Medical Devices and Diagnostic Products (HFK–122), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, Md. 20910 (301–427–7114).

SUPPLEMENTARY INFORMATION: The Medical Device Amendments of 1976 (Pub. L. 94–295), amending the Federal Food, Drug, and Cosmetic Act (hereinafter referred to as "the act"), became law on May 28, 1976. Section 521(a) of the amended act (21 U.S.C. 360k(a)) prohibits any State or its political subdivision from establishing or continuing in effect for a device intended for human use any requirement that is (1) different from, or in addition to, any requirement applicable to a device under the act, and (2) related to the safety or effectiveness of the device or to any other matter included in a requirement applicable to the device under the act. Section 521(b) of the act sets forth specific conditions under which the Commissioner may by regulation permit a State or local government to establish, or continue in effect, device requirements that would otherwise be preempted by section 521(a) of the act.

A proposal to grant, with one exception, the application of the State of California Department of Health for exemption from Federal preemption for certain California State laws and regulations pertaining to medical devices was published in the Federal Register of February 15, 1977 (42 FR 9186). A notice of opportunity for oral hearing on the proposal was published in the same issue of the Federal Register (42 FR 9226), as required by section 521(b) of the act. Under that notice, eight requests for an oral hearing were submitted and are on display in the office of the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857.

This notice advises interested persons that based on the requests received, an oral hearing will be held on the proposal in accordance with the regulations relating to public hearings before the Commissioner at 21 CFR Part 15 formerly Subpart E of Part 2, prior to recodification published in the Federal Register of March 22, 1977 (42 FR 15612)), and that persons who wish to present comments and views at the hearing must file a written notice of appearance. This notice also sets forth specific issues on which the Commissioner seeks comments and views.

The hearing announced in this notice will provide a public forum for interested persons to present comments and views on the proposed action on the California application for exemption from preemption. Although views may be presented on any aspect of the proposed action, the Commissioner specifically invites well-documented comments on the following issues:

1. The burden, if any, imposed by the proposed action on interstate commerce.

2. The effect of the proposed action on the economy under the criteria established by OMB Circular A–107 and agency guidelines.

3. The proposal to exempt from preemption, with one exception, the re-

quirements of standards Z80.1 and Z80.2 of the American National Standards Institute relating to prescription ophthalmic devices, as adopted by statute by the State of California.

The hearing will be held at 9:30 a.m. in Conference Rm. F, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md. 20857. The presiding officer will be Mr. David Link, Director, Bureau of Medical Devices and Diagnostic Products.

Although the regular comment period for the proposed action on the California application ended on April 18, 1977, the record of the hearing will remain open until August 3, 1977, to permit submission of additional written comments and views limited to matters discussed during the hearing. In preparing a final regulation, the Commissioner will consider the administrative record of the hearing, together with all other written comments received during the comment period specified in the proposal.

Persons who wish to present comments and views at the hearing must file by June 20, 1977, a written notice of appearance with the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857, in accordance with 21 CFR 15.21 (formerly 21 CFR 2.402 prior to recodification published in the FEDERAL REGISTER of March 22, 1977 (42 FR 15553)). The notice of appearance shall contain the FDA Hearing Clerk Docket No. (76P–0344), the name, address, telephone number, and any business affiliation of the person desiring to make a statement, a summary of the presentation, and the approximate time requested for the presentation. Individuals and organizations with common interests are urged to consolidate or coordinate their presentations. The Commissioner may require joint presentations by persons with common interests.

The Commissioner will allocate the time available for the hearing among the persons who properly file a notice of appearance and will mail a schedule for the hearing to each such person. Each person may use his allotted time in whatever way he wishes, consistent with the conduct of a reasonable and orderly hearing. Formal written statements on the issues may be presented to the presiding officer on the day of the hearing for inclusion into the record of the hearing.

The hearing will be open to the public. At the discretion of the presiding officer and as time permits, any interested person in attendance may be heard regarding the proposed action on the California application.

Dated: May 16, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

Health Care Financing Administration

ALTERNATE PROFESSIONAL STANDARDS REVIEW ORGANIZATIONS

Public Hearing

Pursuant to the "Regulatory Policies" of the Secretary of the Department of Health, Education, and Welfare (41 FR 34811, August 17, 1976) and in accordance with an approved Regulation Development Plan, it has been determined that public hearings on alternate Professional Standards Review Organizations (PSROs) are appropriate prior to the publication of proposed rules.

Notice is hereby given that an additional public hearing will be held to aid the Department in obtaining a broad level of input for the development of proposed rules on criteria for establishing organizations which may qualify to become PSROs under section 1152(b)(1)(B) of the Social Security Act (42 U.S.C. 1320c–1(b)), where organizations composed of physicians meeting the requirements of section 1152(b)(1)(A) of the Act are not available. Such nonphysician composed organizations have been termed "alternate PSROs" by the Department. Regulations establishing the criteria and other requirements are a prerequisite to the designation of alternate PSROs under section 1152(b)(1)(B). Alternate PSRO Public Hearings have already been held in Baton Rouge, Louisiana; Chicago, Illinois; and in San Francisco and San Diego, California.

The final public hearing will be held:

June 14, 1977, 9:30 a.m. to 5 p.m., Sheraton Olympic Villas off Interstate 4 at Highway 528, Orlando, Florida.

Region IV, DHEW is coordinating hearing arrangements. Public hearings on alternate PSROs have been and continue to be directed at those geographic regions, where to date, there exists little or no formal physician interest to sponsor the preferred type of PSRO as specified under section 1152(b)(1)(A) of the Social Security Act.

PURPOSE OF THE HEARINGS

Public hearings on alternate PSROs will be an integral part of the regulation development process. As did the prior hearings, this additional hearing will assist the Department in reaching as many concerned individuals, organizations, and potentially affected areas as possible, regarding the development of criteria for establishing alternate PSROs.

ALTERNATE PSRO PUBLIC HEARING PROCEDURES

1. These hearings, open to the public, are divided into two segments—a scheduled witness session and an unscheduled witness session.

2. The scheduled witness session will be to hear witnesses who have notified the appropriate Regional Office PSRO Branch Chief in the Division of Quality and Standards, DHEW, of their intent to present testimony at least five days prior to the hearing date.

3. The unscheduled witness session will be conducted under an "open-mike" format, whereby any attendee will be allowed to testify without prior notice to DHEW on a first come basis.

4. Unscheduled witnesses will be asked to sign up on the sheets provided at the witness tables at the hearing room door. These witnesses will be called in the order they signed up, subject only to a time limit and order rulings from the moderator.

5. The exact time limit for unscheduled witnesses will be announced at the beginning of the session and will depend on the number of witnesses who wish to testify.

6. Each witness may be asked questions from the hearing moderator and the members of the Federal resource panel.

7. All witnesses are encouraged to submit written statements or exhibits in addition to oral testimony. Written statements will carry the same weight as oral presentations and will be made part of the hearing record. Written material should be handed to the stenographer; and it should be clearly marked with the name and address of the witness.

8. Witnesses are requested to summarize their written testimony when making an oral presentation. A court stenographer will incorporate written testimony into the record.

9. Scheduled witnesses should generally be prepared to keep their presentations limited to 20 minutes; however, time allotted may be reduced if necessary to accommodate all scheduled witnesses.

BACKGROUND INFORMATION ON ALTERNATE PSROs

Given the possibility that there may be no qualified physician organizations as specified under section 1152(b)(1)(A) of the Act in some of the designated areas by January 1, 1978, the Department must determine eligibility criteria which will be used in designating alternate PSROs. Under section 1152(c) of the Act [42 U.S.C. 1320–1(c)], on January 1, 1978, the Secretary may commence designating qualified organizations other than the statutorily preferred type of physician organizations designated under section 1152(b)(1)(A) of the Act to serve as PSROs.

Beginning on this date, the Secretary is authorized to designate as PSROs, as provided in section 1152(b)(1)(B) of the Act:

> • • • such other public, nonprofit private or other agency or organization, which the Secretary determines, in accordance with criteria prescribed by him in regulations, to be of professional competence and otherwise suitable;

Section 1152(b)(1)(B) of the Social Security Act and the Senate Finance Committee Report (No. 92–1230, 92nd Congress, 2nd Session, 1972) offer some assistance in determining appropriate eligibility criteria for selecting alternate PSROs, as follows:

(1) Each alternate PSRO must be a "• • • public, nonprofit private, or other agency or organization • • •" (Section 1152(b)(1)(B) of the Social Security Act)

(2) The alternate organization must "be of professional competence" (Section 1152(b)(1)(B) of the Social Security Act)

(3) The Secretary may seek alternative applicants from "among other medical organizations, State and local health departments, medical schools, and failing all else, carriers, intermediaries or other health insurers" (Senate Finance Committee Report No. 92–1230 pp. 259–260)

(4) Each alternate organization must possess the willingness and capability to perform "in an effective, timely and objective manner and at a reasonable cost, the duties, functions and activities of a Professional Standards Review Organization • • •" (Section 1152(b)(2) of the Social Security Act)

In response to a request made by the National Professional Standards Review Council, the formation and responsibilities of which are mandated in section 1163 of the Social Security Act, the Department has drafted a preliminary policy paper concerning alternate PSROs. Although this paper suggests possible criteria which could be used to designate alternate PSROs, it should not be interpreted to represent the Department's final position and policies concerning alternate PSROs. Public input may cause substantial revision in the views developed by the Department thus far. Those parties interested in securing a copy of this paper should contact either Michael J. Goran, M.D., Director, Bureau of Quality Assurance, Room 16A–55, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857; or the appropriate Regional Office PSRO Branch Chief, Division of Quality and Standards, DHEW.

The Department has developed the following preliminary criteria which could be used to designate alternate PSROs:

I. Each alternate PSRO must not make a profit (i.e., reimbursement for more than the actual cost) from its PSRO activities.

II. No organized medical society or association or organization "controlled" by such organizations can be designated an alternate PSRO.

III. Each alternate PSRO must have or demonstrate the capability to obtain the services of individuals with medical expertise to competently perform review activities.

IV. Each alternate PSRO must have the capability to adequately service the PSRO area.

V. Each alternate PSRO must not have inherent conflicts of interest that affect its role as a reviewer of health care.

These potential criteria should not be interpreted as definitive Department policy but rather as a preliminary attempt to stimulate discussion and interest in this area of concern. The Department invites public comment on these tentative criteria for establishing alternate PSROs. Moreover, the Department desires to solicit additional or alternative criteria which could supplement, complement and/or replace those suggested above and which will ensure that organizations designated by the Secretary as alternate PSROs could function effectively in this capacity.

Attendance at the June 14 hearing is open to the interested public, but limited to the space available. For further information concerning this hearing contact:

Mr. C. Dexter Kimsey, PSRO Branch Chief, DHEW, Region IV, Peachtree-Seventh Building, Room 860, 50 Seventh Street, NE., Atlanta, Georgia 30323, Telephone 404–881–4472.

Dated: May 13, 1977.

DON WORTMAN,
Administrator, Health Care Financing Administration.

[FR Doc.77–14413 Filed 5–19–77;8:45 am]

Office of Education

INDIAN EDUCATION ACT

Closing Date for Receipt of Applications

Notice is hereby given that pursuant to the authority contained in section 303(b) of the Indian Education Act, Title IV, Part A of Pub. L. 92–318, as amended by Title VI, Part C of Pub. L. 93–380 (20 U.S.C. 241aa–241ff), applications are being accepted from schools located on or near reservations which are nonlocal educational agencies, or local educational agencies which have been local educational agencies for less than three years. A nonlocal educational agency is defined in 45 CFR 186.2. Eligibility factors, found in 45 CFR 186.32(a) are: (1) Whether the governing body of the school or school system was selected by, is representative of, and is solely responsible to the Indian tribe or Indian community which that school or school system serves; and (2) Whether the governing body derives authority from such community to carry out such functions as: (i) Employing, managing, and terminating personnel: (ii) Developing and revising curricula; (iii) Establishing attendance, academic, and other relevant standards: (iv) Developing and approving budgets: (v) Establishing operational policies; and (vi) Raising funds.

Section 303(b) authorizes the Commissioner to provide financial assistance to support applicants for programs designed to meet the special educational needs of Indian students. Assistance may be used for the purposes of planning and developing elementary and secondary school programs and for meeting costs incurred in connection with the establishment, maintenance, and operation of such programs.

Applications must be received by the U.S. Office of Education Application Control Center on or before June 20, 1977.

A. *Applications sent by mail.* An application sent by mail should be addressed as follows: U.S. Office of Education, Grant and Procurement Management Division, Application Control Center, 400 Maryland Avenue, SW., Washington, D.C. 20202. Attention: 13.551. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than June 15. 1977 as evidenced by the U.S. Postal Service postmark on the wrapper or envelope or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C. In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.

B. *Hand delivered applications.* An application to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets, SW., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8 a.m. and 4 p.m. Washington, D.C. time except Saturdays, Sundays, or Federal holidays. Applications will not be accepted after 4 p.m. on the closing date.

C. *Program information and forms.* Information and application forms may be obtained from the Office of Indian Education, Division of Special Projects and Programs, Elementary and Secondary Special Projects Branch, U.S. Office of Education, Room 2153, Federal Office Building Six, 400 Maryland Avenue, SW., Washington, D.C. 20202.

D. *Awards.* Applicants who wish to expand their multi-year programs, applicants who received assistance last fiscal year for a project period of one year, and eligible applicants for new grants, will compete for increased funds appropriated by Congress to supplement the previous reduced level of appropriations. Approximately $1,090,909 is available for new grants. Approximately nine grant awards for an average amount of $125,500 will be made.

E. *Application regulations.* Awards under section 303(b) of the Indian Education Act will be subject to the requirements of the Act and to relevant provisions of 45 CFR Part 186. Assistance under this program is also subject to applicable provisions in 45 CFR Part 100a. Criteria for the selection of applications

are contained in 45 CFR 100a.26(b) and in 45 CFR 186.33.

(20 U.S.C. 241bb(b).)

Dated: May 13, 1977.

(Catalog of Federal Domestic Assistance Number 13.551; Indian Education—Grants to Non-LEA's (Part A).)

ERNEST L. BOYER,
Commissioner of Education.

INFORMATION AND DATA ACQUISITION ACTIVITY

Comments on Collection

Pursuant to section 406(g)(2)(B), General Education Provisions Act, notice is hereby given as follows:

The U.S. Office of Education has proposed collections of information and data acquisition activities which will request information from educational agencies or institutions.

The purpose of publishing this notice in the FEDERAL REGISTER is to comply with paragraph (g)(2)(B) of the "Control of Paperwork" amendment which provides that each educational agency or institution subject to a request under the collection of information and data acquisition activity and their representative organizations shall have an opportunity, during a 30-day period before the transmittal of the request to the Director of the Office of Management and Budget, to comment to the Administrator of the National Center for Education Statistics on the collection of information and data acquisition activity.

These data acquisition activities are subject to review by the HEW Education Data Acquisition Council and the Office of Management and Budget.

Descriptions of the proposed collections of information and data acquisition activities follow below.

Written comments on the proposed activities are invited. Comments should refer to the specific sponsoring agency and form number and must be received on or before June 20, 1977, and should be addressed to Administrator, National Center for Education Statistics, Attn: Manager, Information Acquisition, Planning, and Utilization, Room 3001, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

Further information may be obtained from Elizabeth M. Proctor of the National Center for Education Statistics, 202-245-1022.

Dated: May 17, 1977.

MARIE D. ELDRIDGE,
Administrator, National Center for Education Statistics.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. *Title of Proposed Activity*
Field Test of the Parent Education curriculum including pilot television programs and nonbroadcast materials.
2. *Agency/Bureau/Office*
U.S. Office of Education/Bureau of Elementary and Secondary Education/Office of Libraries and Learning Resources.
3. *Agency Form Number*
OE 577.
4. *Legislative Authority for this Activity*
Sec. 402. (a)(1) Sec. 2. It is the purpose of this Act to authorize the Commissioner of Education (hereinafter referred to as the 'Commissioner') to carry out special projects—
"(1) to experiment with new educational and administrative methods, techniques, and practices; * * *" (P.L. 93-380: 20 USC 1851).
5. *Voluntary/Obligatory Nature of Response*
Voluntary.
6. *How Information Collected Will be Used*
The data will be used for formative evaluation of the parent education curriculum.
7. *Data Acquisition Plan*
a. METHOD OF COLLECTION: Mail and interviews
b. TIME OF COLLECTION: Summer 1977
c. FREQUENCY: On occasion
8. *Respondents*
a. *Type.*—Individuals (to be contacted through local education agencies, Head Start centers, Parent Teacher Associations, and other private organizations).
b. *Number.*—1,300.
c. *Estimated Average Man-Hours Per Respondent.*—0.5.
9. *Information to be Collected*
Each respondent will answer a short questionnaire dealing with basic demographic data on age, sex, parenting status, level of income and education. Then each participant will view the three television pilots either in the home or in a group setting. One-half of the home viewers will respond to a brief telephone call after viewing to ascertain appeal of the program and if the message is understandable. All of the viewers will respond to post-test questions about appeal of the program and whether viewers learned from watching. Certain incidents are described and the parent marks the preferred action that a parent should take. This will test whether learning objectives of the program were attained.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. *Title of Proposed Activity*
Financial Status and Performance Reports for Basic Institutional Development Program.
2. *Agency/Bureau/Office*
Office of Education, Bureau of Postsecondary Education, Division of Institutional Development.
3. *Agency Form Number*
OE 1049-4 and OE 1049-5.
4. *Legislative Authority for This Activity*
"Sec. 304. (c)(1)(D) An application for assistance for the purposes described in subsection (b)(1) shall be approved only if it * * * provides for such fiscal control and fund accounting procedures as may be necessary to insure proper disbursement of and accounting for funds made available under this title to the applicant;* * *" Public Law 89-329.
"Each Federal sponsoring agency shall require recipients to use the standardized Financial Status Report to report the status of funds for all nonconstruction projects or programs. * * * Recipients shall submit a performance report for each agreement. * * * Recipients shall submit the performance reports to Federal sponsoring agencies and the Financial Status Reports covering the same period * * *" Attachment H—OMB Circular A-110.
5. *Voluntary/Obligatory Nature of Response*
Required to obtain or maintain benefits.
6. *How Information Collected Will Be Used*
Information will be used to monitor the performance and merits of funded programs in the Title III Program, Higher Education Act of 1965, as amended. It is used to determine whether goals are achieved and what actual impact the Title III Program has on institutional development. It will also serve as a basis in the evaluation of future applications from the grantee.
7. *Data Acquisition Plan*
a. *Method of Collection.*—Mail.
b. *Time of Collection.*—30 days after the mid-point of grant period and 90 days after the end of grant period.
c. *Frequency.*—Semi-annually.
8. *Respondent*
a. *Type.*—Colleges and Universities.
b. *Number.*—650.
c. *Estimated Average Man-Hours Per Respondent.*—10.
9. *Information To Be Collected*
The grantee will present for each approved program in their application (including National Teaching Fellowships or Professor Emeriti as separate program(s) if funded) the following:
1. Goals and objectives established for grant period.
2. Accomplishments—compared with goals and impact on program. Specific measurable qualitative and quantitative data is to be included.
3. Slippage—(a) Impact on program, and (b) Reason why goals were or were not met.
4. Overall impact on institution realized from all programs in the grant.
5. The standard Financial Status Report form is used.

DESCRIPTION OF PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. *Title of Proposed Activity*
Annual Survey of Children in Institutions, Operated or Supported by a State Agency, for Neglected or Dilinquent Children, or Children in Adult Correctional Institutions, ESEA, Title I.
2. *Agency/Bureau/Office*
Office of Education, Bureau of Elementary and Secondary Education, Division of Education for the Disadvantaged.
3. *Agency Form Number*
OE Form 4376.
4. *Legislative Authority for this Activity*
"A State agency which is directly responsible for providing free public education for children in institutions for neglected or delinquent children or in adult correctional institutions shall be entitled to receive a grant under this section * * *" * * * the grant which such an agency shall be eligible to receive shall be * * * multiplied by the number of such children in average daily attendance, as determined by the Commissioner, at schools for such children * * *" (P.L. 89-10, as amended. 20 U.S.C. 241-(3), 45 CFR 116c).
5. *Voluntary/Obligatory Nature of Response*
Agencies are obligated to respond. Failure to submit this report will result in loss of Title I funds.
6. *How Information Collected Will be Used*
Program Management: The average daily attendance data will be used to compute Title I allocations for State agencies responsible for providing free public education for institutionalized neglected or delinquent children.
7. *Data Acquisition Plan*
a. *Method of Collection.*—Mail.
b. *Time of Collection.*—Fall.
c. *Frequency.*—Annually.
8. *Respondents*
a. *Type.*—State agencies responsible for providing education for institutionalized neglected or delinquent children.
b. *Number.*—150.
c. *Estimated Average Man-Hours Per Respondent.*—5.
9. *Information to be Collected*
State agencies will furnish the names and types of institutions and the average daily attendance data for institutionalized neglected or delinquent children in State-operated or supported schools.

[FR Doc.77-14412 Filed 5-19-77; 8:45 am]

NATIONAL ADVISORY COUNCIL ON EQUALITY OF EDUCATIONAL OPPORTUNITY

Public Meeting

AGENCY: National Advisory Council on Equality of Educational Opportunity.

ACTION: Notice of Meeting.

SUMMARY: This notice sets forth the proposed agenda of the forthcoming meeting of the Nonmajority/Minority Task Force and the Legislative/Administrative Task Force. It also describes the functions of the Council. Notice of this meeting is required under the Federal Advisory Committee Act [5 U.S.C., Appendix 1, 10(a)(21)]. This document is intended to notify the general public of their opportunity to attend.

DATE AND PLACE OF MEETING: June 10, 1977; New York, New York.

ADDRESS: Room 5890, No. 2 Tower of the World Trade Center.

FOR FURTHER INFORMATION CONTACT:

Rosemarie Maynez, Administrative Assistant, NACEEO, 1325 G Street, NW., Suite 710, Washington, D.C. 20005, Phone 202-382-7985.

The National Advisory Council on Equality of Educational Opportunity is established under Section 716 of the Emergency School Aid Act (P.L. 92-318, Title VII, as amended by P.L. 93-380 and P.L. 94-482). The Council is established to: (1) advise the Assistant Secretary for Education with respect to the operation of the program authorized under the Emergency School Aid Act (ESAA), including the preparation of regulations and the development of criteria for the approval of applications; and (2) review the operation of the program with respect to its effectiveness in achieving its purpose as stated in the Act and with respect to the Assistant Secretary's conduct in the administration of the program.

The meeting, which is open to the public, will convene at 9:30 a.m. until 4:30 p.m. Presentations will be made by various ESAA grant recipients concerning the need for such a program. Inquiry will be made with regard to how well the various racial and ethnic groups involved in ESAA projects are having their specific needs addressed. Discussions concerning ESAA eligibility requirements as pertaining to nonmajority/minority districts will be a major focus.

Requests for oral presentations by the public before the Task Forces must be submitted in writing to the Executive Director of NACEEO, Mr. Leo A. Lorenzo, and should include the names of all persons seeking an appearance, the party or parties which they represent, and the purpose for which the presentation is requested. Following the presentation, the statement in writing shall be submitted to the Executive Director. In the event that the tentative agenda is completed prior to the projected time, the Task Forces will adjourn the meeting.

Records of all meetings are kept at NACEEO headquarters, 1325 G Street, NW., Suite 710, Washington, D.C. 20005, and are available for public inspection.

Signed at Washington, D.C., on May 18, 1977.

LEO A. LORENZO,
Executive Director.

NATIONAL ADVISORY COUNCIL FOR CAREER EDUCATION

Meeting

AGENCY: National Advisory Council for Career Education, HEW/OE.

ACTION: Notice.

SUMMARY: This notice sets forth the schedule and proposed agenda of forthcoming meeting of the National Advisory Council for Career Education. It also describes the functions of the Council. Notice of the meeting is required by the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATES: June 16-17, 1977. June 16-9:00 a.m. to 4:00 p.m. June 17-9:00 a.m. to 4:00 p.m.

ADDRESS: Federal Office Building #6 (FOB#6)—Room 3000 400 Maryland Avenue, S.W., Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT:

Dr. Robert D. Bhaerman, Office of Education, Office of Career Education, Room 3100—ROB No. 3, 7th and D Sts., S.W., Washington, D.C. 20202 (202-245-2547).

SUPPLEMENTARY INFORMATION: The National Advisory Council for Career Education is established under Section 406 of the Education Amendments of 1974, P.L. 93-380, (88 Stat. 552, 553.) The Council is directed to:

Advise the Commissioner of Education on the implementation of Section 406 of the Education Amendments of 1974 and carry out such advisory functions as it deems appropriate, including reviewing the operation of this Section and all other programs of the Division of Education pertaining to the development and implementation of career education, evaluating their effectiveness in meeting the needs of career education throughout the United States, and in determining need for further legislative remedy in order that all citizens may benefit from the purposes of career education as described in Section 406.

The Council with the assistance of the Commissioner conducted a survey and assessment of the current status of career education programs, projects, curricula and materials in the United States and submitted to Congress a report on such survey.

The meeting of the Council shall be open to the public. The meeting on June 16 and June 17 will begin at 9:00 a.m. and end at 4:00 p.m. The meeting will be held at the Office of Education, Federal Office Building No. 6 (FOB No. 6), located at 400 Maryland Avenue SW., Room 3000, Washington, D.C. 20202.

The proposed agenda includes:

(1) Research Report: National Institute of Education
(2) Miscellaneous Business
(3) Legislative Report on Prospects of Senate Bill 1328 from the Legislative Subcommittee
(4) Progress Report on Supportive Activities and Public Information
(5) Research Report: National Assessment of Educational Progress—Career and Occupational Development
(6) Discussion of Commissioned Papers
(7) Discussion of NACCE Priorities, Activities and Next Steps

Records shall be kept of all Council proceedings and shall be available 14 days after the meeting for public inspection at the Office of Career Education located at 7th and D Streets SW., Room 3100, ROB No. 3, Washington, D.C. 20202.

Signed at Washington, D.C. on May 12, 1977.

JOHN LINDIA,
Delegate, National Advisory Council for Career Education.

DEPARTMENT OF THE INTERIOR

Bonneville Power Administration

BONNEVILLE DAM INTEGRATING TRANSMISSION

Public Meeting

This notice is published to notify interested citizens of a public meeting to be held by the Bonneville Power Administration on Wednesday, June 22, 1977, at 7:30 p.m. in Stevenson High School, Stevenson, Washington.

The environmental impact of constructing approximately 1.3 miles of new 230-kV line and the addition of 21 miles of conductor to the vacant side of existing BPA double-circuit towers will be described. Comments on these proposed new facilities will be received from the public.

All interested parties are urged to attend. All comments are welcomed in or-

der to assist the administration in fully evaluating the environmental factors pertinent to this particular aspect of BPA's Fiscal Year 1978 Program. Comments received will be considered in the preparation of the Final Environmental Statement.

The purpose of the above project is to integrate the electricity from the second powerhouse at Bonneville Dam into BPA's regional transmission grid.

In addition to building approximately 1.3 miles of new 230-kV line and the addition of 21 miles of conductor to the vacant side of existing double-circuit towers, approximately 1.3 miles of new access road would be constructed. Between one-half and 1 mile of existing access road would need improvement.

Between 6 and 24 acres of new right-of-way would be required. Approximately 100 acres of trees and brush would have to be cleared for construction and conductoring purposes. Some erosion and sedimentation would occur. Minor short-term disturbances to agricultural land would also occur. In addition, there would be some visual impact as well as noise and other minor disturbances during construction.

In addition to the nonconstruction alternative, with its lack of environmental impacts and resultant inability to integrate the output from the second powerhouse at Bonneville Dam, two alternative route locations for the proposed transmission line have been identified. The alternative locations of the transmission line and the environmental impact associated with each are more thoroughly presented in the Draft Facility Location Supplement for Bonneville Dam Integrating Transmission.

Copies of the Draft Facility Location Supplement describing the proposal are available for inspection in the library of the BPA headquarters, 1002 NE. Holladay Street, Portland, Oregon 97232; the BPA Washington, D.C., Office in the Interior Building, Room 5600; and at the Portland Area Office, Lloyd Plaza Building, 919 NE. 19th Avenue, Room 3621, Portland, Oregon 97208.

Dated: May 17, 1977.

WILLIAM H. CLAGETT,
Assistant Administrator.

NEVADA

Airport Lease Application

Notice is hereby given that pursuant to the Act of May 24, 1928, (49 U.S.C. 211-214), Alfred Woodward has applied for an airport lease on the following lands:

MOUNT DIABLO MERIDIAN, NEVADA

T. 43 N., R. 37 E.
Sec. 34, S½NE¼, SE¼NW¼, NE¼SW¼ NE¼SE¼.

The purpose of this notice is to inform the public that the filing of this application segregated the described public lands from all other forms of appropriation under the public land laws. Interested persons desiring their views should promptly send their comments together with their name and address to the Las Vegas District Manager, Bureau of Land Management, 4765 Vegas Drive, Las Vegas, Nevada 89108.

WM. J. MALENCIK,
Chief, Division of Technical Services.

Fish and Wildlife Service

UNIVERSITY OF CALIFORNIA, LOS ANGELES

Issuance of Permits for Marine Mammals

On Monday, January 10, 1977, a notice was published in the FEDERAL REGISTER (Vol. 42, No. 6) that an application had been filed with the Fish and Wildlife Service by University of California, Los Angeles, California, for a permit to capture, tag, and release up to sixteen (16) California sea otters.

Notice is hereby given that on Wednesday, May 11, 1977, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-4107), the Fish and Wildlife Service issued a permit to University of California, subject to certain conditions set forth therein. The permit is available for public inspection during normal business hours at the Fish and Wildlife Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Dated: May 17, 1977.

DONALD G. DONAHOO,
Chief, Permit Branch,
Federal Wildlife Permit Office.

WALRUS

Change in Alaska State Regulations

Notice is hereby given of a change in the Alaska State walrus regulations originally approved by the Director, United States Fish and Wildlife Service, on April 5, 1976 (41 FR 14372), and amended on October 13, 1976 (41 FR 44875).

In order to stabilize the walrus kill significantly below the levels of the annual take during the past few years, the State has proposed, following approval of the Alaska Board of Game on April 5, 1977, that the Alaska Fish and Game Code, 5 AAC 81.350, be changed to include the seasons and bag limits noted below.

I have determined that these changes are more restrictive than the regulations now in force and have no effect on the extent of the waiver of the moratorium on the taking of Pacific walrus. Pursuant to 50 CFR 18.56(d), I have consulted with the Marine Mammal Commission on the proposed changes to determine whether the State regulations (with the proposed changes) continue to comply with the requirements of 50 CFR subpart F; the Commission supports the intent of the changes. I hereby approve the changes, effective May 20, 1977.

A complete set of the State of Alaska walrus hunting regulations is available for inspection from 8 a.m. to 4 p.m., Monday to Friday, at 1612 K Street, NW., Washington, D.C., suite 1200.

This notice was prepared by Rupert R. Bonner, Marine Mammal Coordinator, Office of Wildlife Assistance.

LYNN A. GREENWALT,
Director, U.S. Fish and Wildlife Service.

5 AAC 81.350. Marine mammal hunting. (5) Walrus

Unit	Open season	Bag limits	Areas	Maximum annual quota per regulatory year
Unit 9	No open season			
Unit 17, except for that portion in the Walrus Islands State Game Sanctuary (including all waters within ½ mile of Round Island).	Resident: Oct. 20-Dec. 1 Mar. 1-Apr. 30.	One walrus for food, by permit only. A total of 50 permits will be issued to applicants who appear in person at the villages of Togiak, Manokotak, Twin Hills, and Clarks Point, on a basis of first come, first served.		
	Nonresident: No open season.			
Unit 18	Resident: No closed season.	One adult bull per permit; provided, however, that residents of settlements on the Bering Sea coast of Unit 18 dependent upon and utilizing walrus for food may take up to 5 adult cows or subadults (either sex) and adult bulls without limit; and provided further that orphaned calves may be taken for food without contributing to the bag limit.		
	Nonresident: No closed season.	One adult bull per permit		

Unit	Open season	Bag limits	Areas	Maximum annual quota per regulatory year
Unit 22	Resident: No closed season.	One adult bull per permit; provided, however, that residents of settlements on the Bering and Chukchi Sea coasts of Unit 22 dependent upon and utilizing walrus for food may take up to 10 walrus, not more than 5 of which may be adult cows or subadults (either sex); that orphaned calves may be taken for food without contributing to the bag limit; and that certain specific area quotas apply, as listed in next column.	1. The waters of Bering Sea near the settlement of Gambell within the area bounded by lines connecting the following positions: 64°30' N., 171°22' W.; 64°30' N., 171°00' W.; 63°00' N., 171°00' W.; 63°00' N., 174°59' W.; and the U.S.-Russia convention: Line of 1867 between 63°00' N., 174°59' W. and 64°30' N., 171°22' W.	450
			2. The waters of Bering Sea near the settlement of Savoonga within the area bounded by lines connecting the following positions: 64°30' N., 171°00' W.; 64°30' N., 168°00' W.; 63°00' N., 168°00' W.; 63°00' N., 171°00' W.; 64°30' N., 171°00' W.	450
			3. The waters of Norton Sound and Bering Sea near the settlements of Nome and King Island within the area bounded by lines connecting the following positions: 65°10' N., 165°20' W.; 65°10' N., 166°35' W.; 64°33' N., 167°30' W.; 63°30' N., 167°30' W.; 63°30' N., 168°50' W.; 63°10' N., 168°30' W.	250
			4. The waters of the Bering and Chukchi Seas near the settlement of Wales within the area bounded by lines connecting the following positions: 66°00' N., 167°35' W.; 66°00' N., 167°20' W.; 65°10' N., 167°20' W.; 65°10' N., 167°50' W.; 65°32' N., 168°10' W.; 65°45' N., 168°40' W.; 66°00' N., 167°55' W.	150
			5. Waters of the Bering and Chukchi Seas near the settlement of Diomede within the area bounded by lines connecting the following positions: 66°20' N., 168°50' W.; 66°20' N., 167°20' W.; 66°00' N., 167°20' W.; 66°00' N., 167°55' W.; 65°52' N., 168°20' W.; 65°10' N., 168°20' W.; 65°10' N., 169°15' W.; 65°30' N., 168°59' W.; 66°20' N., 168°59' W.	450
			6. Waters of the Chukchi Sea near the settlements of Shishmaref within the area bounded by lines connecting the following positions: 67°00' N., 167°30' W.; 67°00' N., 164°00' W.; 66°36' N., 164°00' W.; 66°00' N., 167°00' W.; 66°00' N., 167°30' W.; 67°00' N., 167°30' W.	150
Units 23 and 26	Resident: No closed season.	One adult bull per permit; provided however, that residents of settlements on the Chukchi and Beaufort Sea coasts of Units 23 and 26 dependent upon and utilizing walrus for food may take up to 5 walrus; that orphaned calves may be taken for food without contributing to the bag limit; and that certain specific area quotas apply, as listing in next column.	7. Waters of the Chukchi Sea near the settlement of Wainwright within the area bounded by lines connecting the following positions: 71°30'N., 161°30'W.; 71°30'N., 158°30'W.; 70°48'N., 158°30'W.; 70°15'N., 161°30'W.; 71°30'N., 161°30'W.	160
			8. Waters of the Chukchi and Beaufort Seas near the settlement of Barrow within the area bounded by lines connecting the following positions: 72°10'N., 158°30'W.; 72°10'N., 154°00'W.; 70°50'N., 151°00'W.; 70°30'N., 158°30'W.; 72°10'N., 158°30'W.	180
	Nonresident: No closed season.	One adult bull per permit.

SLEEPING BEAR DUNES NATIONAL LAKESHORE ADVISORY COMMISSION

Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Sleeping Bear Dunes National Lakeshore Advisory Commission will be held at 1:00 p.m. (EDT) on Friday, June 17, 1977, at Money's Restaurant, Honor, Michigan.

The Commission was established by Public Law 91-479 to meet and consult with the Secretary of the Interior on general policies and specific matters related to the administration and development of the Sleeping Bear Dunes National Lakeshore.

The members are as follows:

Mr. Noble D. Travis (Chairman)
Mr. William B. Bolton
Mr. John B. Daugherty
Mr. Samuel F. Eberly
Mr. Carl T. Johnson
Mr. John A. Stahlin
Mr. John D. Stanz
Mr. Louis F. Twardzik
Mrs. Charles R. Williams
Mr. Charles H. Yeates

Principal items of discussion will be the status of land acquisition and operating plans for the coming visitor season at the National Lakeshore.

The meeting will be open to the public. Money's Restaurant is located on U.S. 31, the Main Street in Honor, Michigan.

Any member of the public may file with the Commission, a written statement concerning the matters to be discussed. Persons wishing further information concerning the meeting or who wish to submit written statements, may contact the Superintendent, Sleeping Bear Dunes National Lakeshore, Frankfort, Michigan 49635 at area code 616 352-9611. Minutes of the meeting will be available for public inspection four weeks after the meeting, in the office of the Superintendent, 400 Main Street, Frankfort, Michigan.

Dated: May 10, 1977.

MERRILL D. BEAL,
Regional Director,
Midwest Region.

[FR Doc.77-14426 Filed 5-19-77;8:45 am]

WESTERN REGIONAL ADVISORY COMMITTEE

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a combined public meeting and field trip of the Western Regional Advisory Committee will be held in Lake Mead National Recreation Area and Las Vegas, Nevada. The public meeting will begin at 9:00 a.m. on June 11, 1977, in the Las Vegas Convention Center, 3150 Paradise Road, Room 4.

The purpose of the Western Regional Advisory Committee is to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on programs and problems pertinent to the Western Region.

The members of the Advisory Committee are as follows:

Ben Avery, Phoenix, Arizona
David W. Bailie, Jr., Waipahu, Hawaii
Lewis S. Eaton, Fresno, California (Chairman)
Ed Fike, Las Vegas, Nevada
Bernard Fontana, Tucson, Arizona
Jean Ford, Las Vegas, Nevada
Sonya Thompson, Agoura, California
Jack Walston, San Marino, California
Todd Watkins, Bishop, California

Friday morning, June 10, beginning at 8:00 a.m. a field trip will be provided the Committee to see, on-site, those activities involved in a water reservoir recreation area. Due to a lack of space, only those associated with the Advisory Committee and National Park Service personnel will be provided transportation for the field trip portion of the meeting.

Saturday morning the public meeting will be held to discuss the previous day's observations. The meeting will be open to the public but in addition any member of the public will also be able to file, with the Committee, a written statement concerning Lake Mead.

Persons wishing further information concerning this meeting or who wish to submit written statements may contact Ray C. Foust, Executive Assistant to the Regional Director, Western Regional Office, at (415) 556–8227.

Resolutions, as a result of this meeting, will be available for public inspection four weeks after the meeting at the Western Regional Office, National Park Service, 450 Golden Gate Avenue, San Francisco, California 94102.

Dated: May 9, 1977.

JOHN H. DAVIS,
Acting Regional Director,
Western Region.

PROPOSED WATER SYSTEM, DE LUZ HEIGHTS MUNICIPAL WATER DISTRICT, CALIFORNIA

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a final environmental statement for the Proposed Water System, De Luz Heights Municipal Water District, California, to be constructed with a loan under the Small Reclamation Projects Act of 1956.

The Municipal Water District plans to construct a pipe distribution system to convey water from the San Diego Aqueduct to irrigate agricultural lands and to furnish municipal water to scattered rural residences. The project area lies in northern San Diego County, California, about 15 miles inland.

Copies of the final environmental impact statement are available for inspection at the following locations:

Office of the Assistant to the Commissioner—Ecology, Room 7620, Bureau of Reclamation; Department of the Interior, Washington, D.C. 20240. Telephone 202–343–4991.
Division of Engineering Support, Technical Services and Publications Branch, R&R Center, Denver Federal Center, Denver, Colorado 80225. Telephone 303–234–3006.
Office of the Regional Director, Bureau of Reclamation, P.O. Box 427, Boulder City, Nevada 89005. Telephone 702–293–8464.

Single copies of the final statement may be obtained upon request to the Commissioner of Reclamation or the Regional Director. Please refer to the statement number above.

Dated: May 16, 1977.

HEATHER L. ROSS,
Acting Deputy Assistant
Secretary of the Interior.

DEPARTMENT OF LABOR

Bureau of Labor Statistics

[Commissioner's Administrative Order No. 27–1]

PROCUREMENT AND CONTRACTING OFFICER AUTHORITY

Redelegation From the Commissioner to Other Bureau Officials

1. *Purpose.* The purpose of this Order is to redelegate the authority and responsibility for procurement and contract activities.

2. *Effect of this Order.* This Order is effective April 1, 1977. It cancels Commissioner's Administrative Order No. 27.

3. *Authorities Delegated to the Commissioner.* A. DLMS–2, Chapter 800, delegates contracting officer authority to the Commissioner for the procurement of statistical and economic research services and for the sale of special statistics.

B. Assistant Secretary Fred G. Clark's memorandum of March 11, 1977 (effective April 1, 1977), on the subject of "Delegation of Procurement and Contracting Officer Authority," delegates to the Commissioner the following procurement and contracting officer authority:

(1) To use FEDSTRIP for GSA common catalogued and supplied office furnishings, equipment and supplies.

(2) To order from GSA supply schedule contract all items except ADP equipment (software and hardware), office copiers and ADP communication devices.

4. *Redelegation of Statistical and Research Contract Authority.* A. The Commissioner of Labor Statistics has the sole authority and responsibility—with the concurrence of the parties involved—to sign contracts that involve the release of confidential data outside the Bureau.

B. The Associate Commissioner for Administrative Management and the Chief of the Division of Planning and Financial Management (DPFM) are hereby delegated contracting officer authority for the functions in 3.A above, except contracts which involve the release of confidential data outside the Bureau.

C. The Chief of the Branch of Financial Information and Contracting, DPFM, is hereby delegated contracting officer authority for the functions in 3.A above involving less than $10,000, excluding contracts which involve the release of confidential data outside the Bureau.

D. The Regional Commissioners for BLS are hereby granted the authority and responsibility to enter into and execute contracts related to BLS/State cooperative programs with participating State agencies, provided they have the written concurrence of the Chief of the Division of Planning and Financial Management and the appropriate Program Office (e.g., OSHS and ES&T) for each contract. The Regional Commissioners will serve as Contract Officers and have the authority to appoint the Government Authorized Representatives for each contract.

5. *Redelegation of FEDSTRIP and GSA Schedule Procurement Authority.* The Associate Commissioner for Administrative Management and the Chief of the Division of Administrative Services are hereby granted contracting officer authority for the functions in 3.B above.

6. *Further Redelegation.* None of the above officials may redelegate their authority further.

Signed at Washington, D.C., this 12th day of May 1977.

JULIUS SHISKIN,
Commissioner of Labor Statistics.

Employment and Training Administration

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS UNDER THE RURAL DEVELOPMENT ACT

Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 USC 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to: Deputy Assistant Secretary for Employment and Training, 601 D St., NW., Washington, D.C. 20213.

Signed at Washington, D.C. this 16th day of May, 1977.

ROBERT J. MCCONNON,
Deputy Assistant Secretary,
for Employment and Training.

Applications received during the week ending May 13, 1977

INCENTIVE GRANTS TO CONSORTIA UNDER TITLE I OF THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

Allocations for FY 1977

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This notice lists the allocations which have been made for Fiscal Year 1977 as incentives to consortia under Title I of the Comprehensive Employment and Training Act pursuant to the regulation at 29 CFR 95.2(c)(1).

FOR FURTHER INFORMATION CONTACT:

Adolf Wansong, Chief, Division of Financial Management, Rm. 4010, 601 D Street, NW., Washington, D.C. 20213, 202-376-6060.

SUPPLEMENTARY INFORMATION: This notice has been prepared under the direction and control of Albert J. Angebranndt, Administrator for Administration and Management, Employment and Training Administration.

Pension and Welfare Benefit Programs

DEPARTMENT OF TREASURY

Internal Revenue Service

PENSION BENEFIT GUARANTY CORPORATION

ANNUAL INFORMATION RETURNS

Reports

The Department of Labor (DOL), the Internal Revenue Service (IRS), Department of Treasury, and the Pension Benefit Guaranty Corporation (PBGC) have developed annual information returns/reports to be filed by a plan administrator or sponsor of a pension or welfare benefit plan as required by sections 104 and 4065 of the Employee Retirement Income Security Act of 1974 and sections 6057, 6058(a), and 6059(a) of the Internal Revenue Code of 1954.

The three agencies are interested in receiving written comments and suggestions for improving the forms and instructions, certain elements of which are subject to the Federal Reports Act. The forms are as follows:

Form 5500, Annual Return/Report of Employee Benefit Plan (with 100 or more participants)
Form 5500-C, Annual Return/Report of Employee Benefit Plan (with fewer than 100 participants, none of whom is an owner-employee)
Form 5500-K, Annual Return/Report of Employee Pension Benefit Plan for Sole Proprietorships and Partnerships (with fewer than 100 participants and at least one owner-employee)
Schedule A (Form 5500), Insurance Information
Schedule B (Form 5500) Actuarial Information
Schedule SSA (Form 550), Identification of Separated Participants with Deferred Vested Benefits
Schedule A (Form PBGC-1), Annual Report

Comments should be based on the latest (1976) report forms and instructions. Copies of the Form 5500 series are available at Labor-Management Services Administration (LMSA) Area Offices of the DOL and at local offices of the IRS. Copies of Schedule A (Form PBGC-1) are available at LMSA area offices or may be obtained from the PBGC.

Persons who wish to comment should note that the comments period closes on July 5, 1977.

Three copies of any comments or suggestions should be sent to Mr. Paul Weisbord, Room N4647, U.S. Department of Labor, 200 Constitution Avenue N.W., Washington, D.C. 20216.

J. VERNON BALLARD,
Acting Administrator of Pension and Welfare Benefit Programs, U.S. Department of Labor.

ALVIN D. LURIE,
Assistant Commissioner (Employee Plans and Exempt Organizations), Internal Revenue Service.

MATTHEW M. LIND,
Acting Executive Director, Pension Benefit Guaranty Corporation.

Office of the Secretary

[TA-W-1699]

AIRCO SPEER ELECTRONICS

Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on March 3, 1977 in response to a worker petition received on that date which was filed on behalf of workers and former workers producing fixed carbon composition and carbon film resistor components at the Bradford, Pennsylvania plant of Airco Speer Electronics.

Notice of the Investigation was published in the FEDERAL REGISTER on March 11, 1977 (42 FR 13628). No public hearing was requested and none was held.

During the course of the investigation, it was established that all workers of the Bradford, Pennsylvania plant of Airco Speer Electronics were previously certified eligible to apply for adjustment assistance on August 25, 1975 (see TA-W-64).

The existing certification will expire on August 25, 1977 unless terminated by the Secretary of Labor. Since workers newly separated, toally or partially, are covered by the existing certification provided such separations occurred on or after the impact date (October 3, 1974) and before the certification expiration date (August 25, 1977), a new investigation would serve no purpose; consequently the investigation has been terminated.

Signed at Washington, D.C. this 28th day of April 1977.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[FR Doc.77-14452 Filed 5-19-77;8:95 am]

[TA-W-1324]

BABCOCK & WILCOX COMPANY, INC.

Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1324: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on November 30, 1976 in response to a worker petition received on November 30, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing pipe fittings at the Elkhart, Indiana plant of Babcock & Wilcox Company, Inc.

The Notice of Investigation was published in the FEDERAL REGISTER on December 14, 1976 (41 FR 54553). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Babcock & Wilcox, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four criteria have been met.

Significant Total or Partial Separations. Average employment declined 26 percent in 1976 compared to 1975 at the Elkhart, Indiana plant.

Sales or Production, or Both, Have Decreased Absolutely. Annual sales by the Elkhart, Indiana plant decreased 48 percent in quantity in 1976 compared to 1975.

Annual production at the Elkhart plant decreased 47 percent in quantity in 1976 compared to 1975.

Increased Imports. Imports of carbon and stainless steel butt-welding fittings increased to 44.1 million pounds in 1972 from 1971, then decreased to 37.3 million pounds in 1973. Imports of carbon and stainless steel butt-welding fittings increased in 1975 to 48.9 million pounds from 48.8 million pounds in 1974. In the first nine months of 1976 imports decreased to 29.4 million pounds compared to 39.1 million pounds for the like period in 1975.

The ratio of imports to production for carbon and stainless steel butt-welding fittings increased to 34.1 percent in 1972 from 30.2 percent in 1971, then decreased to 29.3 percent in 1973. The ratio of imports to production for carbon and stainless steel butt-welding fittings decreased in 1975 to 26.5 percent from 30.2 percent in 1974. In the first nine months of 1976 the import to production ratio increased to 35.6 percent from 26.7 percent for the like period in 1975.

Imports of carbon and stainless steel forged flanges decreased from 23.9 million pounds in 1971 to 23.1 million pounds in 1972 then decreased to 12.7 million pounds in 1973. Imports increased to 45.0 million pounds in 1974. Imports decreased 51.2 percent in the first 9 months of 1976 compared to 41.4 million pounds.

The ratio of imports to domestic production of carbon and stainless steel forged flanges increased from 14.7 percent in 1971 to 15.0 percent in 1972, then decreased to 9.3 percent in 1973. The ratio increased to 31.4 percent in 1974 and 74.3 percent in 1975. The ratio of imports to domestic production of carbon and stainless steel forged flanges decreased in the first 9 months of 1976 compared to the like period in 1975; from 77.5 percent to 65.5 percent.

The import to production ratio in 1975 and in the first 9 months of 1976 is more than double the ratio of any other year between 1971 and 1974. The import to production ratio in the first 9 months of 1976 is 126.6 percent greater than the average yearly ratio of imports to production for the period 1971 through 1975.

Contributed Importantly. A survey was conducted among customers of the Elkhart plant. Many of these customers stated that imports were a problem for them in their market areas. Many of the distributors for Babcock & Wilcox's fittings indicated that they have been forced to reduce their purchases from the Elkhart plant because their customers are purchasing cheaper imports than are offered by other distributors. Some of the customers contacted stated that they have purchased imported fittings directly and have decreased their purchases of the fittings made at the Elkhart plant. These customers revealed that the lower prices on the imports caused them to switch.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of import articles like or directly competitive with pipe fittings produced at the Elkhart, Indiana plant of Babcock & Wilcox Company, Incorporated contributed importantly to the total or partial separation of workers at the plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Elkhart, Indiana plant of Babcock & Wilcox Co., Inc., who became totally or partially separated from employment on or after November 1, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 12th day of May 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-14453 Filed 5-19-77;8:45 am]

[TA-W-1707]

BOB LEE MANUFACTURING CO.

Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on March 3, 1977 in response to a worker petition dated February 14, 1977 which was filed by the International Ladies' Garment Workers' Union on behalf of workers formerly producing women's coats at Bob Lee Manufacturing Co., Inglewood, California.

The notice of investigation was published in the FEDERAL REGISTER on March 15, 1977 (42 FR 14185). No public hearing was requested and none was held.

During the course of the investigation, it was established that all separations at Bob Lee Manufacturing Company have occurred by December 1975 more than one year prior to the date of the petition, February 14, 1977. Section 223(b)(1) of the Trade Act 1974 states that a certification under this section shall not apply to any worker whose last total or partial separation from the firm or appropriate subdivision of the firm occurred more than twelve months before the date of the filing under Title II, Chapter 2 of the Trade Act of 1974.

The date of the petition in this case is February 14, 1977 and, thus, workers terminated prior to February 14, 1976 are ineligible for program benefits under Title II, Subchapter B of the Trade Act of 1974.

Signed at Washington, D.C. this 2nd day of May 1977.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[FR Doc.77-14454 Filed 5-19-77;8:45 am]

[TA-W-1335]

CHEMETRON CORP. TUBE TURNS DIVISION

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1335: investigation regarding certification of ability to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on November 30, 1976 in response to a worker

petition received on November 30, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing carbon steel butt-welding fittings and customs forgings at the Louisville, Kentucky plant of Tube Turns, a division of Chemetron Corporation.

The Notice of Investigation was published in the FEDERAL REGISTER on December 21, 1976 (41 FR 55601). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Tube Turns, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof, have increased either actual, or relative to domestic production, and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any other criteria have been met for workers engaged in the production of forgings, criterion (2) has not been met.

With respect to workers engaged in the production of butt-welding fittings, the investigation has revealed that the first three criteria have been met, but criterion four (4) has not been met.

Significant Total or Partial Separations. In the first eleven months of 1976, total plant employment declined 10.3 percent and average weekly hours declined 2.7 percent compared to the like period in 1975.

Sales or Production, or Both, Have Decreased Absolutely. Sales of butt-welded fittings declined 63.3 percent in quantity and 59.9 percent in value in the first eleven months of 1976 compared to the like 1975 period.

Production of butt-welded fittings decreased 66.7 percent in quantity and 60.5 percent in value in the first eleven months of 1976 from the like period in 1975.

Sales of forgings increased 17.2 percent in quantity and 14.5 percent in value in the fourth quarter of 1975 compared to the fourth quarter of 1974. Sales of forgings increased 17.0 percent in quantity and 2.1 percent in value in the first eleven months of 1976 compared to the like period in 1975.

Production of forgings increased 4.2 percent in quantity and 17.2 percent in value in the fourth quarter of 1975 compared to the fourth quarter of 1974. Production of forgings increased 17.0 percent in quantity and 5.7 percent in value in the first eleven months of 1976 compared to the like period in 1975.

Increased Imports. Imports of carbon and stainless steel butt-welding fittings increased from 43.0 million pounds in 1971 to 44.1 million pounds in 1972. Imports of fittings declined to 37.3 million pounds in 1973, then increased to 48.8 million pounds in 1974 and to 48.9 million pounds in 1975. In the first nine months of 1976, imports of fittings were 29.4 million pounds, a decline of 24.8 percent from imports in the first nine months of 1975.

The ratio of imports to domestic production of carbon and stainless steel butt-welding fittings increased from 30.2 percent in 1971 to 34.1 percent in 1972. The ratio declined to 29.3 percent in 1973, then increased to 30.2 percent in 1974. In 1975 the ratio declined to 26.5 percent. The import to production ratio increased from 26.7 percent in the first 9 months of 1975 to 35.6 percent in the first 9 months of 1975.

Contributed Importantly. The Office of Trade Adjustment Assistance conducted a survey of Tube Turns' largest customers of fittings. The customers who purchased fittings were primarily distributors. None increased purchases of imported fittings and reduced purchases from Tube Turns.

Customers explained that a scarcity in 1974 caused buyers to stockpile fittings in 1975. Demand for these fittings never met expectations and most customers were still working down inventories in 1976. Consequently, fittings manufacturers like the Tube Turns Division of Chemetron had a great year for sales in 1975 and experienced depressed sales in 1976.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with carbon steel butt-welding fittings produced at the Louisville, Kentucky plant of Tube Turns, a division of Chemetron Corporation, did not contribute importantly to the total or partial separation of workers at that plant as required for certification under Section 222 of the Trade Act of 1974.

I further conclude that neither sales nor production of steel forgings produced at the Louisville, Kentucky plant of Tube Turns, a division of Chemetron Corporation, decreased as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 12th day of May 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-1613]

CONVERSE RUBBER CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1613: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on January 31, 1976 in response to a worker petition received on January 31, 1976 which was filed by the United Rubber, Cork, Linoleum and Plastic Workers of America on behalf of workers and former workers producing canvas and athletic footwear at the Andover, Massachusetts plant of Converse Rubber Company.

The notice of investigation was published in the FEDERAL REGISTER on February 15, 1977 (42 FR 9238). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials and publications of Converse Rubber Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated.

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely,

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

Significant Total or Partial Separations. Employment of production workers at the Andover plant of Converse Rubber Company decreased 25 percent in 1975 compared to 1974 and 8 percent in 1976 compared to 1975. Employment declined 80 percent in the first 2 months of 1977.

Sales or Production, or Both, Have Decreased Absolutely. Sales of canvas and athletic footwear by Converse Rubber Company declined 12 percent in quantity and 8 percent in value in 1975 compared to 1974 and 13 percent in quantity and 7 percent in value in 1976 compared to 1975.

Production of canvas and athletic footwear at the Andover, Massachusetts plant of Converse Rubber Company declined 30 percent in 1975 compared to 1974 and 7 percent in 1976 from 1975. In March 1977 the plant closed.

Increased Imports. Imports of athletic footwear increased in absolute terms and relative to domestic production each year from 1971 through 1975, except for 1973 when imports increased absolutely but decreased relative to domestic production. In 1975, imports increased 102 percent in absolute terms. The ratio of imports to domestic production increased from 84.3 percent in 1974, to 148.0 percent in 1975. In the first 9 months of 1976, imports increased 119 percent in absolute terms. The ratio of imports to domestic production increased from 203.9 percent in the first 9 months of 1975 to 333.3 percent in the first 9 months of 1976.

Imports of rubber/canvas footwear increased in absolute terms and relative to domestic production each year from 1972 through 1974. Imports decreased in absolute terms from 1974 to 1975 and increased 17 percent in the first 9 months of 1976 compared to the first 9 months of 1975. The ratio of imports to domestic production remained stable from 1974 to 1975, then increased from 18.3 percent in the first 9 months of 1975 to 25.4 percent in the first 9 months of 1976.

Contributed Importantly. Imports of canvas and athletic footwear by Converse Rubber Company increased 1,010 percent in quantity and 1,011 percent in value in 1975 compared to 1974 and declined 10 percent in quantity and 12 percent in value in 1976 compared to 1975.

Customers of Converse Rubber Company indicated they have decreased their purchases of canvas and athletic footwear from Converse Rubber Company and have increased their purchases of imported footwear.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with canvas and athletic footwear produced at the Andover, Massachusetts plant of Converse Rubber Company, contributed importantly to the total or partial separations of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Andover, Massachusetts plant of Converse Rubber Company who became totally or partially separted from employment on or after August 22, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 29th day of April 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-1672]

CONVERSE RUBBER CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1672: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 22, 1977 in response to a worker petition received on that date which was filed on behalf of workers and former workers at the Wilmington, Massachusetts corporate offices of Converse Rubber Company.

The notice of investigation was published in the FEDERAL REGISTER on March 8, 1977 (42 FR 13084). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials and publications of Converse Rubber Company, its customers, the U.S. Department of Commerce, the International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat, thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

Significant Total or Partial Separations. Employment of workers at the corporate office of Converse Rubber Company decreased 1 percent in 1975 compared to 1974 and 6 percent in 1976 compared to 1975.

Sales or Production, or Both Have Decreased Absolutely. Sales of canvas and athletic footwear by Converse Rubber Company declined 12 percent in quantity and 8 percent in value in 1975 compared to 1974 and 13 percent in quantity and 7 percent in value in 1976 compared to 1975.

Production of canvas and athletic footwear by Converse Rubber Company declined 29 percent in 1975 compared to 1974 and 13 percent in 1976 from 1975.

Increased Imports. Imports of athletic footwear increased in absolute terms and relative to domestic production each year from 1971 through 1975, except for 1973 when imports increased absolutely but decreased relative to domestic production. In 1975 imports increased 102 percent in absolute terms. The ratio of imports to domestic production increased from 84.3 percent in 1974, to 212.4 percent in 1975. In the first 9 months of 1976, imports increased 119 percent in absolute terms. The ratio of imports to domestic production increased from 203.9 percent in the first 9 months of 1975 to 33.3 percent in the first 9 months of 1976.

Imports of rubber/canvas footwear increased in absolute terms and relative to domestic production each year from 1972 through 1974. Imports decreased in absolute terms from 1974 to 1975 and increased 17 percent in the first 9 months of 1976 compared to the first 9 months of 1975. The ratio of imports to domestic production remained stable from 1974 to 1975, then increased from 18.3 percent in the first 9 months of 1975 to 25.4 percent in the first 9 months of 1976.

Contributed Importantly. Imports of canvas and athletic footwear by Converse Rubber Company increased 1,010 percent in quantity and 1,011 percent in value in 1975 compared to 1974 and declined 10 percent in quantity and 12 percent in value in 1976 compared to 1975.

Customers of Converse Rubber Company indicated they have decreased their purchases of canvas and athletic footwear and have increased their purchases of imported footwear.

Conclusion. After careful review of the facts obtained in the investigation, I concluded that increases of imports like or directly competitive with canvas and athletic footwear produced at the Malden, Massachusetts plant of Converse Rubber Company (certified on December 9, 1976, TA-W-1137) contributed importantly to the total or partial separation of the workers at the corporate and sales offices listed below. In accordance with the provisions of the Act, I make the following certification:

All workers of the Wilmington, Massachusetts corporate office and the Baltimore, Maryland; Elk Grove Village, Illinois; Dallas, Texas; Burlingame, California; Canovanas, Puerto Rico; New York, New York; and Atlanta, Georgia sales offices of Converse Rubber Company who became totally or partially separated from employment on or after February 14, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 29th day of April 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-1345]

HAMMOND VALVE CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1345: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 1, 1976 in response to a worker petition received on December 1, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing valves at the Hammond, Indiana plant of the Hammond Valve Corporation, Hammond, Indiana.

The Notice of Investigation was published in the Federal Register on December 21, 1976 (41 FR 55606). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Hammond Valve Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are beng imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that criteria (2) and (4) have not been met.

Significant Total or Partial Separations. Average annual employment of production workers at the Hammond Valve Corporation declined 17.8 percent in 1975 compared to 1974. Average employment declined 2.6 percent in 1976 compared to 1975. Employment declined 20 percent in the fourth quarter of 1975 compared to the same quarter in 1974. Employment declined 8.7 percent and 7.6 percent, respectively, in the first and second quarters of 1976 compared to the same quarters in 1975.

Sales or Production, or Both, Have Decreased Absolutely. Sales by the Hammond Valve Corporation increased 2.9 percent in the fourth quarter of 1975 compared to the preceding quarter. Sales increased 14.2 percent in 1976 compared to 1975.

Production at the Hammond Valve Corporation plant increased 83.3 percent in the fourth quarter of 1975 compared to the preceding quarter. Production increased 5.0 percent in 1976 compared to 1975.

Increased Imports. Imports of valves and similar devices in terms of value increased each year from $56.5 million in 1971 to $165.1 million in 1975. Imports further increased from $127.6 million in the first nine months of 1975 to $134.2 million in the first nine months of 1976.

The ratio of imports to domestic production of valves and similar devices increased each from 1971 to 1975, from 2.4 percent in 1971 to 4.7 percent in 1975. The ratio of imports to production decreased from 4.9 percent in the first nine months of 1975 to 4.5 percent in the first nine months of 1976.

Contributed Importantly. Most customers of Hammond Valve surveyed did not purchase imported valves.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with valves produced by the Hammond, Indiana plant of the Hammond Valve Corporation did not contribute importantly to the total or partial separation of workers at that plant as required by Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of May 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-14458 Filed 5-19-77;8:45 am]

[TA-W-1366]

HUNTINGDON MACHINES DIVISION OF GULF AND WESTERN INDUSTRIES

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1366: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 1, 1976 in response to a worker petition received on December 1, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing steel pipe fittings and couplings at Huntingdon Machines Division of Gulf and Western Industries, Huntingdon, Pennsylvania.

The Notice of Investigation was published in the FEDERAL REGISTER on January 4, 1977 (42 FR 881). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Huntingdon Machines Division, Bonney Forge, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof, have increased either actual, or relative to domestic production, and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four criteria have been met.

Significant Total or Partial Separations. Employment decreased 25 percent in company fiscal year 1976 compared to company fiscal year 1975 (fiscal year August 1 to July 31). Employees work interchangeably between product lines.

Sales or Production, or Both, Have Decreased Absolutely. Production decreased 69 percent in company fiscal year 1976 compared to company fiscal year 1975.

Sales data was not available.

Increased Imports. Imports of carbon and stainless steel butt-welding fittings increased from 43.0 million pounds in 1971 to 44.1 million pounds in 1972 and then decreased to 37.3 million pounds in 1973. Imports increased to 48.8 million pounds in 1974 and 48.9 million pounds in 1975. Imports decreased from 39.1 million pounds in the first nine months of 1975 to 29.4 million pounds in the first nine months of 1976.

The ratio of imports to domestic production of carbon and stainless steel butt-welding fittings increased from 30.2 percent in 1971 to 34.1 percent in 1972, then decreased to 29.3 percent in 1973. The ratio increased to 30.2 percent in 1974 and then decreased to 26.5 percent in 1975. The ratio of imports to domestic production increased from 26.7 percent in the first nine months in 1975 to 35.6 percent in the first nine months of 1976.

Imports of steel couplings increased each year from 1971 to 1975, from 3.2 million pounds in 1971 to 13.2 million pounds in 1975. Imports decreased from 9.9 million pounds in the first 9 months of 1975 to 7.1 million pounds in the first nine months of 1976.

The ratio of imports to domestic production of steel couplings increased from 25.0 percent in 1971 to 39.8 percent in 1972, then decreased to 35.3 percent in 1973. The import to production ratio declined in 1974 to 24.3 percent, then increased to 51.8 percent in 1975. The ratio of imports to domestic production of couplings increased from 45.4 percent in the first 9 months of 1975 to 57.3 percent in the first 9 months of 1976.

Contributed Importantly. Customers of Huntingdon Machines and Bonney Forge (another division of Gulf and Western Industries which acts as sales outlet for Huntingdon's catalog fittings and couplings) were contacted. Direct customers of Bonney Forge indicated that while they purchased no imports, they have lost many orders because of imported steel pipe fittings and couplings. Companies who bought from Bonney Forge's customers were subsequently contacted and some of these companies indicated that they had switched purchases to steel pipe fittings and couplings of foreign origin.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with steel pipe fittings and couplings made at the Huntingdon Machines Division contributed importantly to the total or partial separation of workers at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Huntingdon Machines Division of Gulf and Western Industries who became totally or partially separated from employment on or after November 1, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of May 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77-14459 Filed 5-19-77;8:45 am]

[TA-W-1741]

MALINE SEWING CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1741: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 3, 1977 in response to a worker petition received on March 1, 1977 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing women's bottoms at the Philadelphia, Pa. plant of the Maline Sewing Corporation.

The Notice of Investigation was published in the FEDERAL REGISTER on March 22, 1977 (42 FR 15477). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Maline Sewing Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that the first three criteria have been met but the fourth criterion has not been met.

Significant Total or Partial Separations. Average annual employment of production workers at the Philadelphia plant declined 7 percent in 1976 compared to 1975.

Sales or Production, or Both, Have Decreased Absolutely. Annual sales by the Philadelphia plant decreased in value 12 percent in 1976 compared to 1975.

Annual production at the Philadelphia plant decreased in quantity 18 percent in 1976 compared to 1975.

Increased Imports. Imports of women's bottoms are included in several import categories. Women's skirts, which may also include culottes, are included in tables for Women's, Misses' and Children's Skirts, Knit, and Women's, Misses' and Children's Skirts, woven. Women's slacks and shorts are included in Women's, Misses' and Children's Slacks and Shorts, Knit, and Women's, Misses' and Children's Slacks and Shorts, woven. Data for most of these categories, except imports, are only available for the period 1972–1975 inclusive.

Imports of womens', misses' and children's skirts, both knit and woven, decreased from 593,000 dozen in 1972 to 308,000 dozen in 1973, decreased further in 1974 to 254,000 dozen, increased to 508,000 dozen in 1975, and to 780,000 in 1976. The import to production ratio for women's skirts, both knit and woven, decreased from 10.0 percent in 1972 to 5.3 percent in 1973, decreased further in 1974 to 4.9 percent, then increased in 1975 to 8.3 percent.

Imports of women's, misses' and children's slacks and shorts, both knit and woven, decreased from 12,094,000 dozen in 1972 to 11,831,000 dozen in 1973, decreased further to 8,923,000 dozen in 1974, then increased to 10,067,000 dozen in 1975, and increased again to 11,040,000 dozen in 1976. The import to production ratio for women's slacks and shorts, both knit and woven, decreased from 40.4 percent in 1972 to 40.3 percent in 1973, decreased again in 1974 to 30.3 percent, then increased to 32.1 percent in 1975.

Contributed Importantly. Customers of Maline Sewing Corporation have not switched purchased of the sewing of women's bottoms from Maline Sewing Corp. to foreign sources. Maline did contract work for 3 manufacturers in 1976. One customer who is their main manufacturer has not decreased purchases from Maline.

This customer does not purchase any imported bottoms and uses only Maline and other demostic contractors to perform sewing operations. Maline's second largest customer of Maline's sales in 1975 but only 12 percent in 1976. This does not purchase imported women's bottoms and has shifted to other domestic producers. The third firm that Maline contracted for indicated that they used Maline on a one-time job in 1976. In addition, this firm does not purchase any imported women's bottoms.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with women's bottoms sewn at the Philadelphia, Pennsylvania plant of the Maline Sewing Corporation did not contribute importantly to the total or partial separation of workers at the plant as required by Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 29th day of April 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-1510]

PACIFIC STATES STEEL CORP.

Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of

TA–W–1510: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 22, 1976 in response to a worker petition received on December 22, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing various steel products at Pacific States Steel Corporation, Union City, California. The petition was expanded to include workers represented by all three unions at Pacific States Steel and its division, American Forge Company.

The notice of investigation was published in the FEDERAL REGISTER on January 11, 1977 (42 FR 2377). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Pacific States Steel Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, the United Steelworkers of America, the American Iron and Steel Institute, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that without regard to whether any of the other criteria have been met, criterion (3) has not been met in regard to the production of merchant bars or grinding media and criterion (4) has not been met in regard to the production of reinforcing bars.

Significant Total or Partial Separations. Production workers are not separately identifiable by product line. The average number of production workers at Pacific States Steel declined 15.8 percent from 1974 to 1975 and declined 3.8 percent from 1975 to 1976.

Sales or Production, or Both, Have Decreased Absolutely. Total sales of all products at Pacific States Steel increased 11.0 percent from 1975 to 1976. Total steel production declined 21.0 percent from 1974 to 1975 and declined 2.4 percent from 1975 to 1976.

Sales of grinding media declined .7 percent from 1975 to 1976. Sales of merchant bars increased 77.2 percent from 1975 to 1976. Sales of reinforcing bars declined 18.0 percent from 1975 to 1976.

Increased Imports. Imports of grinding media increased absolutely in each year from 1972 through 1974 and then declined 14.1 percent from 1974 to 1975 and declined 25.4 percent from 1975 to 1976. The ratios of imports to domestic production and consumption declined from 4.5 percent and 4.6 percent, respectively, in 1975 to 3.4 percent and 3.6 percent, respectively, in 1976.

Imports of carbon steel bar-size light shapes, which includes merchant bars, increased absolutely from 1971 to 1972, declined from 1972 to 1973, increased 14.0 percent from 1973 to 1974 and then declined 67.9 percent from 1974 to 1975. Imports declined 36.9 percent in the first three quarters of 1976 compared to the same period in 1975. The ratios of imports to domestic shipments and consumption declined from 27.3 percent and 21.6 percent, respectively, in the first three quarters of 1975 to 15.2 percent and 13.6 percent, respectively, in the first three quarters of 1976.

Imports of concrete reinforcing bars declined both absolutely and relative to domestic shipments in each year from 1971 through 1973, increased from 1973 to 1974 and then declined 70.3 percent from 1974 to 1975. Imports increased 18.2 percent in the first nine months of 1976 compared to the same period in 1975. The ratio of imports to domestic shipments and consumption increased from 4.4 percent and 4.3 percent, respectively, in the first nine months of 1975, to 4.8 percent and 4.6 percent, respectively, in the first nine months of 1976.

Contributed Importantly. Customers, who purchased reinforcing bars from Pacific States Steel, indicated that they did not reduce purchases from Pacific States Steel in favor of imported reinforcing bars.

Lack of work in the construction industry was cited as the dominant reason for reduced rebar purchases. Consumption and demand for reinforcing bars are closely related to business in the construction industry. Total construction, in constant dollars, from 1974 to 1975 declined 13.0 percent, while nonresidential construction, the primary consumer of reinforcing bars, in the same time period, declined 17.1 percent.

Business declines in the market for reinforcing bars produced at Pacific States Steel can be attributed to general declines in the construction industry.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that imports of grinding media and merchant bars did not increase and that increased imports of reinforcing bars did not contribute importantly to the total or partial separations or to the decline in sales or production at Pacific States Steel Corporation and its division, American Forge Company, Union City, California as required in Section 222 of the Trade Act of 1974. The petition is, therefore, denied.

Signed at Washington, D.C., this 12th day of May 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.77–14462 Filed 5–19–77;8:45 am]

[TA–W–1550]

ROBERT HALL CLOTHES

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA–W–1550: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on January 5, 1977 in response to a worker petition received on January 5, 1977 which was filed on behalf of workers and former workers of the Advertising Department of Robert Hall Clothes, New York, New York.

The notice of investigation was published in the FEDERAL REGISTER on January 28, 1977 (42 FR 5454). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Robert Hall Clothes and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that without regard to whether any of the other criteria have been met, criterion (4) has not been met.

Robert Hall Clothes operates a nationwide chain of retail clothing stores selling men's, women's and children's apparel. It has two manufacturing subsidiaries which closed by October 1976. These facilities had produced some of the men's wear sold in Robert Hall stores.

The advertising department of Robert Hall handles advertising for Robert Hall's retail stores throughout the country. Robert Hall sells imported as well as domestically produced apparel. The advertising staff provided advertising services to the retail stores for all apparel sold, both imported and domestic.

Robert Hall underwent a management reorganization in 1976 which focused on company-wide organization, as well as departmental organization. Some personnel were shifted between job responsibilities, some were laid off and some new personnel were added.

Any layoffs that have occurred in the Advertising Department were a direct result of a management decision to reorganize Robert Hall.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increased imports did not contribute importantly to the total or partial separations of workers of the advertising department of Robert Hall Clothes, New York, New York. The petition is, therefore, denied.

Signed at Washington, D.C. this 2nd day of May 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA–W–1683 and 1995]

UNIROYAL, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA–W–1683 and TA–W–1995: investigations regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigations were initiated on February 23, 1977 and April 20, 1977, respectively, in response to worker petitions received on February 11, 1977 and April 17, 1977 which were filed by the United Rubber Workers on behalf of bargaining unit workers and former workers producing rubber/canvas and waterproofed footwear at the Naugatuck, Connecticut plant of Uniroyal, Incorporated and by Uniroyal, Incorporated on behalf of salaried workers and former workers at the Naugatuck plant.

The Notices of Investigation were published in the FEDERAL REGISTER on March 8, 1977 (42 FR 13094) and May 10, 1977 (42 FR 23657). No public hearing was requested and none was held.

The information upon which the determinations were made was obtained principally from officials of Uniroyal, Incorporated, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

Significant Total or Partial Separations. Employment of production workers at the Naugatuck, Connecticut plant of Uniroyal, Incorporated declined 7.6 percent in 1975 compared to 1974 and declined 3.1 percent in 1976 compared to 1975.

Employment of salaried workers at the Naugatuck, Connecticut plant of Uniroyal, Incorporated increased 0.4 percent in 1975 compared to 1974 and declined 3.8 percent in 1976 compared to 1975.

Uniroyal, Inc. has announced that in July 1977, some of their production lines will close down. This will effect about 40 percent of the plant's workforce.

Sales or Production, or Both, Have Decreased Absolutely. Production of rubber/canvas footwear at the Naugatuck, Connecticut plant of Uniroyal, Incorporated declined 8.7 percent in terms of quantity in 1975 compared to 1974. Production in 1976 declined 34.3 percent compared to 1975.

Increased Imports. Imports of rubber/canvas footwear increased from 20,139 thousand pairs in 1972 to 24,184 thousand pairs in 1973. Imports increased to 26,266 thousand pairs in 1974. Imports declined to 23,607 thousand pairs in 1975. Imports in 1976 rose to 31,941 thousand pairs.

The ratio of imports to domestic production of rubber/canvas footwear increased from 12.6 percent in 1972 to 16.3 percent in 1973. The ratio increased in 1974 to 18.2 percent, then decreased to 17.6 percent in 1975. In 1976, the ratio increased to 29.1 percent.

Contributed Importantly. Customers of Uniroyal, Incorporated increased purchases of imported rubber/canvas footwear while decreasing purchases from Uniroyal. Uniroyal, Incorporated increased company imports of rubber/canvas footwear 86.2 percent in 1976 compared to 1975.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with rubber/canvas footwear produced at the Naugatuck, Connecticut plant of Uniroyal, Incorporated contributed importantly to the total or partial separation of workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Naugatuck, Connecticut plant of Uniroyal, Incorporated who became totally or partially separated from employment on or after February 7, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 11th day of May 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

DOLE CO., INC.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an approprate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligble to apply for adjustment assstance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 30, 1977.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 30, 1977.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 3rd day of May 1977.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[Notice 77-37]

NASA RESEARCH AND TECHNOLOGY ADVISORY COUNCIL COMMITTEE ON GUIDANCE, CONTROL AND INFORMATION SYSTEMS

Meeting

The NASA Research and Technology Advisory Council, Committee on Guidance, Control and Information Systems will meet on June 15-16, 1977 at the George C. Marshall Space Flight Center near Huntsville, Alabama 35812. The meeting will be held in the 10th Floor Conference Room, Building 4200. The meeting is open to the public on a first-come, first-served basis, up to the seating capacity of the room which is about 110 persons. All visitors should enter MSFC via Gate No. 9 (Governors Drive) and follow visitors signs to Building 4312. Appropriate badges and directions for reaching the designated meeting place will be issued there.

The NASA Research and Technology Advisory Council, Committee on Guidance, Control and Information Systems provides technical advice and recommendations on program goals, scope, content and balance in electronics, electromechanical and electro-optical systems development for aeronautics and space. The current Chairman is Dr. Gene Strull. There are 13 members. The following list sets forth the approved agenda and schedule for the June 15-16, 1977 meeting of the Guidance, Control and Information Systems Committee. For further information, please contact Dr. Peter R. Kurzhals, NASA Headquarters (Code RE), Washington, D.C. 20546 (202-755-3260).

JUNE 15, 1977

Time	Topic
8:45 a.m.	Report of the Chairman. (Purpose: To inform Committee members of actions taken at the Council meeting held in February 1977.)
9:15 a.m.	Report of the Executive Secretary (Purpose: To inform the Committee of program highlights and activities, program or organizational changes since the December 1976 meeting, and the fiscal year 1978 program outlook.)

Time	Topic
10 a.m.	Space Technology New Initiatives Briefing. (Purpose: To describe OAST planning activities leading to potential new initiatives in space technology and obtain Committee comments and recommendations.)
1:30 p.m.	Aeronautics New Initiative Briefing. (Purpose: To describe OAST planning activities leading to potential new initiatives in aeronautics technology and obtain Committee comments and recommendations.)

JUNE 16, 1977

8:30 a.m.	OAST Technology Assessment Study. (Purpose: To review status and results of the study and obtain Committee comments and recommendations.)
10 a.m.	Committee Deliberations. (Purpose: To summarize discussions of agenda items and develop official Committee positions and recommendations.)
12:30 p.m.	Adjourn.

KENNETH R. CHAPMAN,
Assistant Administrator for DOD and Interagency Affairs, National Aeronautics and Space Administration.

MAY 17, 1977.

[77-38]

NASA RESEARCH AND TECHNOLOGY ADVISORY COUNCIL PANEL ON AVIATION SAFETY AND OPERATING SYSTEMS, SUBCOMMITEE ON AVIATION SAFETY REPORTING SYSTEM

Meeting

The NASA Research and Technology Advisory Council (RTAC), Subcommittee on Aviation Safety Reporting System will meet on June 14-15, 1977, in Washington, DC. The meeting will be held in the Conference Room, National Business Aircraft Association, One Farragut Square. The meeting is being held at this time to complete the report on the one year evaluation of the Aviation Safety Reporting System in accordance with the FAA/NASA Memorandum of Agreement. The meeting is open to the public on a first come, first served basis up to the seating capacity of the room which is about 25 persons. Any member of the public who wishes to comment about the operation or procedures of the Aviation Safety Reporting System is requested to submit them in writing prior to the meeting for consideration at the meeting. Comments should be submitted to Mr. E. Gene Lyman, Executive Secretary, NASA Headquarters, Code RB, Washington, DC 20546. All visitors must report to the receptionist, 11th floor conference room, National Business Aircraft Association.

The RTAC Subcommittee on Aviation Safety Reporting System serves in an advisory capacity only. This Subcommittee reviews and evaluates the NASA Aviation Safety Reporting System design and implementation plan in terms of its responsiveness to current and future aviation safety needs, provides advice and recommendations on the overall objectives, approach, content and structure of this program relative to aviation safety needs, and reports its recommendations to the RTAC Panel on Aviation Safety and Operating Systems. The Chairman is Mr. John H. Winant. There are 12 members. The following list sets forth the approved agenda and schedule for the June 14-15, 1977, meeting of the Aviation Safety Reporting System Subcommittee. For further information please contact Mr. E. Gene Lyman, NASA Headquarters, Code RB, Washington, D.C. 20546 (202-755-2380).

JUNE 14, 1977

Time	Topic
9:00 a.m.	Report of the Chairman. (Purposes: To summarize activities relating to the Aviation Safety Reporting System (ASRS) since the last subcommittee meeting.)
9:30 a.m.	Report on the Aviation Safety Reporting System. (Purpose: To describe status of activities pertaining to ASRS operations. Members will comment on these activities and identify items requiring additional attention.)
10:30 a.m.	Report on 1 year evaluation of the Aviation Safety Reporting System. (Purpose: To evaluate the operation and procedures of the ASRS in response to the FAA/NASA Memorandum of Agreement.)

JUNE 15, 1977

9 a.m.	Report on comments from the general public. (Purpose: To allow members an opportunity to consider comments from the general public.)
10 a.m.	Continuation of the report on the 1 year evaluation of the Aviation Safety Reporting System.
11:30 a.m.	Adjourn.

KENNETH R. CHAPMAN,
Assistant Administrator for DOD and Interagency Affairs, National Aeronautics and Space Administration.

MAY 16, 1977.

NATIONAL SCIENCE FOUNDATION

ADVISORY PANEL FOR REGULATORY BIOLOGY

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting.

NAME: Advisory Panel for Regulatory Biology.

DATE AND TIME: June 6 and 7, 1977, 9 a.m. to 6 p.m. each day.

PLACE: Room 338, National Science Foundation, 1800 G Street NW., Washington, D.C.

TYPE OF MEETING: Closed.

CONTACT PERSON:

Dr. Nancy B. Clark, Program Director, Regulatory Biology Program, Room 333, National Science Foundation, Washington, D.C. 20550, telephone 202-632-4298.

PURPOSE OF PANEL: To provide advice and recommendations concerning support for research in Regulatory Biology.

AGENDA: To review and evaluate research proposals and projects as part of the selection process for awards.

REASON FOR CLOSING: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

AUTHORITY TO CLOSE MEETING: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of P.L. 92-463. The Committee Management Officer was delegated the authority to make determination by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Acting Committee Management Officer.

MAY 17, 1977.

ADVISORY PANEL FOR SOCIAL AND DEVELOPMENTAL PSYCHOLOGY

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting.

NAME: Advisory Panel for Social and Developmental Psychology.

DATE AND TIME: June 6 and 7, 1977, 9 a.m. to 5 p.m. each day.

PLACE: Room 511, National Science Foundation, 1800 G Street, N.W., Washington, D.C. 20550.

TYPE OF MEETING: Closed.

CONTACT PERSON:

Dr. Allan I. Teger, Program Director, Social and Developmental Psychology, Room 511, National Science Foundation, Washington, D.C. 20550 (202-632-5714).

PURPOSE OF PANEL: To provide advice and recommendations concerning support for research in social and developmental psychology.

AGENDA: To review and evaluate research proposals and projects as part of the selection process for awards.

REASON FOR CLOSING: The proposals and projects being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals and projects. These matters are within exemptions (4) and (6) of 5

U.S.C. 552b(c), Government in The Sunshine Act.

AUTHORITY TO CLOSE MEETING: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of P.L. 92-463. The Committee Management Officer was delegated the authority to make determinations by the Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Acting Committee Management Officer.

MAY 17, 1977.

NATIONAL TRANSPORTATION POLICY STUDY COMMISSION

CHANGE OF AGENDA IN OPEN MEETING

In accordance with subsection 10(a) of the Federal Advisory Committee Act, Pub. L. 92-463, the National Transportation Policy Study Commission announces a change of starting time for its meeting scheduled to be held May 26, 1977. Notice of the meeting was originally published in the May 11, 1977 FEDERAL REGISTER, 42 FR 23887.

The starting time for the meeting has been changed from 9:30 a.m. to 9:00 a.m., in Room 2167 of the Rayburn House Office Building.

Dated: May 17, 1977.

EDWARD R. HAMBERGER,
General Counsel.

[FR Doc.77-14406 Filed 5-17-77;12:11 pm]

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

WORKING GROUP ON BASIC RESEARCH IN THE DEPARTMENT OF DEFENSE

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the Office of Science and Technology Policy announces the following meeting:

NAME: Working Group on Basic Research in the Department of Defense.

DATE: June 6 and 7, 1977.

TIME: 9:00 a.m. to 4:00 p.m.

PLACE: Room 3014, New Executive Office Building, 17th and Pennsylvania Avenue NW., Washington, D.C. 20500.

TYPE OF MEETING: Open.

CONTACT PERSON: Mr. William Montgomery, Executive Office of the President, Office of Science and Technology Policy, Washington, D.C. 20500, telephone 202-395-4692.

PURPOSE OF ADVISORY COMMITTEE: The Office of Science and Technology Policy is conducting a study which will lead to the formulation of policy governing the performance of basic research by or for the mission agencies. Under the guidance of the Steering Committee on Basic Research in Mission Agencies, the Group on Basic Research in the DOD is to examine the policies and procedures and research programs of that agency for adequacy and balance between near-term and long-term technical objectives.

AGENDA: 9:00 a.m. to 4:00 p.m. Planning meeting to discuss detailed objectives of the study, methods of approach, and work schedule and assignments.

WILLIAM MONTGOMERY,
Executive Officer.

FEDERAL COMMUNICATIONS COMMISSION

RADIO TECHNICAL COMMISSION FOR MARINE SERVICES

Meetings

In accordance with Public Law 92-463, "Federal Advisory Committee Act," the schedule of future Radio Technical Commission for Marine Services (RTCM) meetings is as follows:

Special Committee No. 70. "Minimum Performance Standards (MPS)—Marine Loran-C Receiving Equipment." Notice of 3rd Meeting, Monday, June 6, 1977, 10 a.m. (All-day meeting.) U.S. Coast Guard Base, Governors Island, New York, New York.

AGENDA

1. Call to Order; Chairman's Report.
2. Confirmation of Secretary; Adoption of Agenda.
3. Acceptance of SC-70 Summary Record.
4. Reports on Work Assignments.
5. Progress Reports on incompleted Work Assignments.
6. Discussion of problem areas.
7. Solicitation of additional Work Assignments.
8. Other business.
9. Establishment of next meeting date.

The thirteenth meeting of SC-69, FCC WARC-79 Advisory Committee for Maritime Mobile Service, previously scheduled for Tuesday, May 24, has been cancelled. The new meeting date is Tuesday, June 7. The agenda for the June 7 meeting will be the same as that previously published for the now-cancelled May 24 meeting.

RTCM SC 69/FCC WARC-79 Advisory Committee for Maritime Mobile Service, Thirteenth Meeting, 1919 M Street, NW., Washington, D.C., Room 847, 9:30 a.m. to 12:30 p.m., Tuesday, June 7, 1977.

AGENDA

1. Call of the Agenda.
2. Chairman's Opening Remarks.
3. Reports of the Task Forces.
4. Review work to be accomplished.
5. Further.
6. Set date for next meeting.
7. Adjournment.

Charles Dorain, Chairman SC 69, COMSAT, General, 950 L'Enfant Plaza, SW., Washington, D.C. 20024.

To comply with the advance notice requirements of Public Law 92-463, a comparatively long interval of time occurs between publication of this notice and the actual meeting. Consequently, there is no absolute certainly that the listed meeting room will be available on the day of the meeting. Those planning to attend the meeting should report to the room listed in the notice. If a room substitution has been made, the new meeting room location will be posted at the room listed in this notice.

Agendas, working papers, and other appropriate documentation for the meeting is available at that meeting. Those desiring more specific information may contact either the designated Chairman or the RTCM Secretariat. (Phone (202) 632-6490.)

The RTCM has acted as a coordinator for maritime telecommunications since its establishment in 1947. Problems are studied by Special Committees and the final report is approved by the RTCM Executive Committee. All RTCM meetings are open to the public. Written statements are preferred but by previous arrangement, oral presentations will be permitted within time and space limitations.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[Delegation Order No. 156, Amend. 1]

ASSISTANT COMMISSIONER (COMPLIANCE)

Delegation of Authority

MAY 18, 1977.

AGENCY: Internal Revenue Service, Treasury.

ACTION: Delegation of authority.

SUMMARY: This Amendment permits the Assistant Commissioner (Compliance) to act upon certain requests regarding the tax status of individuals who are designated as being under consideration for appointment to a position in the executive or judicial branch of the Federal Government pursuant to Internal Revenue Code section 6103(g)(2). Authority is also delegated to the Assistant Commissioner (Compliance), Deputy Assistant Commissioner (Compliance) and Director, Disclosure Operations Division to disclose returns and return information to Federal officers or employees for administration of Federal laws not relating to tax administration pursuant to Internal Revenue Code 6103(i). The text of the Amendment appears below.

EFFECTIVE DATE: May 18, 1977.

FOR FURTHER INFORMATION CONTACT:

Howard T. Martin, CP:D, 1111 Constitution Avenue NW., Room 1603, Washington, D.C. 20224. Telephone number 202-566-3908 (not toll-free).

HOWARD T. MARTIN,
Director, Disclosure Operations Division.

Subject: Authority to Permit Disclosure of Certain Returns and Return Information Under Internal Revenue Code 6103(g)(2) and (i).

Pursuant to the authority vested in the Commissioner of Internal Revenue by Treasury Department Order No. 150-37, dated March 17, 1955, authority is hereby delegated as follows:

(1) The Assistant Commissioner (Compliance) is authorized to disclose to the authorized representatives of the Executive Office of the President or to the Federal Bureau of Investigation on behalf of the President, return information described in IRC 6103(g)(2) (other than return information that is adverse to the taxpayer) with respect to an individual who is designated as being under consideration for appointment to a position in the executive or judicial branch of the Federal Government. Authority is also delegated to act on all requests by the heads of Federal agencies, or the Federal Bureau of Investigation on behalf of such heads, for return information described in IRC 6103(g)(2) with respect to categories of individuals discussed above. Upon receipt of any request under IRC 6103(g)(2), authority to notify the individuals with respect to whom the request has been made is also delegated. The authority delegated in this paragraph may be redelegated but not lower than:

(a) Deputy Assistant Commissioner (Compliance), in the case of requests by or on behalf of the President where the return information to be disclosed is not adverse to the taxpayer,

(b) Assistant Director, Disclosure Operations Division, in the case of requests by or on behalf of the heads of Federal agencies where the return information to be disclosed is adverse to the taxpayer,

(c) Chief, Tax Disclosure Branch, Disclosure Operations Division, in the case of requests by or on behalf of the heads of Federal agencies where the return information to be disclosed is not adverse to the taxpayer, and

(d) Chief, State and Federal Section, Tax Disclosure Branch, Disclosure Operations Division, concerning the notification of individuals with respect to whom a request has been made.

(2) The Assistant Commissioner (Compliance), Deputy Assistant Commissioner (Compliance), and Director, Disclosure Operations Division are authorized:

(a) To act on requests for returns and taxpayer return information by officers and employees of a Federal agency pursuant to, and upon the grant of, an ex parte order by a Federal District Court judge, when needed for use in, or preparation for, any proceeding (or investigation which may result in such proceeding) pertaining to the enforcement of a specifically designated Federal criminal statute (not involving tax administration), and to withhold such returns and taxpayer return information, subject to the conditions prescribed in IRC 6103(i)(1). The authority delegated in this paragraph (other than the authority to withhold returns and taxpayer return information) may be redelegated to the Assistant Director, Disclosure Operations Division, Branch Chiefs, Disclosure Operations Division, and Section Chiefs, Disclosure Operations Division.

(b) To act on requests for return information (other than taxpayer return information) by, and to withhold such return information (other than taxpayer return information) from, the head of a Federal agency, the Attorney General, the Deputy Attorney General, or an Assistant Attorney General when needed for use in, or preparation for, any proceeding (or investigation which may result in such proceeding) pertaining to the enforcement of a specifically designated Federal criminal statute (not involving tax administration), subject to the conditions prescribed in IRC 6103(i)(2). The authority delegated in this paragraph (other than the authority to withhold return information (other than taxpayer return information)) may be redelegated to the Assistant Director, Disclosure Operations Division, Branch Chiefs, Disclosure Operations Division, and Section Chiefs, Disclosure Operations Division.

(c) To disclose in writing return information (other than taxpayer return information) which may constitute evidence of a violation of Federal criminal laws to the head of the appropriate Federal agency charged with the responsibility for enforcing such laws, subject to the conditions prescribed in IRC 6103(i)(3). The authority delegated in this paragraph may be redelegated to Assistant Director, Disclosure Operations Division, Branch Chiefs, Disclosure Operations Division, and Section Chiefs, Disclosure Operations Division.

(d) To make determinations with regard to the entering into evidence of returns and return information in any proceeding prescribed in IRC 6103(i)(4). The authority delegated in this paragraph may not be redelegated.

(e) To disclose returns and return information with respect to the tax imposed by IRC Chapter 1 upon a taxpayer subject to the provisions of the Renegotiation Act of 1951 to officers or employees of the Renegotiation Board, subject to the conditions prescribed in IRC 6103(i)(5). The authority delegated in this paragraph may be redelegated to the Assistant Director, Disclosure Operations Division, Branch Chiefs, Disclosure Operations Division, and Section Chiefs, Disclosure Operations Division.

(3) Paragraph 1 of this Amendment supplements Delegation Order No. 156. Paragraph 2 of this Amendment supersedes paragraph 5 and amends paragraph 9(c) of Delegation Order No. 156. Delegation Order No. 156, issued May 19, 1976, is printed in the FEDERAL REGISTER dated May 21, 1976, Vol. 41, Number 100, Page 20898.

Dated: May 13, 1977.

JEROME KURTZ,
Commissioner.

FOURTH SECTION APPLICATION FOR RELIEF

MAY 17, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 43364—*Beet or Cane Sugar from Points in Montana, Trans-Continental and WTL Territories.* Filed by Western Trunk Line Committee, Agent, (No. A-2736), for interested rail carriers. Rates on sugar, beet or cane, dry, in bulk, in carloads, as described in the application, from points in Montana, trans-continental and western trunk-line territories, to Kansas City, Mo.-Kan., Skokie, Ill., Denver, Colorado, and Coldspur, Kansas.

Grounds for relief—Rate relationship and returned shipments.

Tariffs—Supplement 190 to Western Trunk Line Committee, Agent, tariff 159-O, I.C.C. No. A-4481, and 4 other schedules named in the application.

Rates are published to become effective on June 15, 1977.

By the Commission.

ROBERT L. OSWALD,
Secretary.

5

AGENCY HOLDING THE MEETING: Federal Deposit Insurance Corporation.

TIME AND DATE: 11:00 a.m., May 23, 1977.

PLACE: Board Room, 6th Floor, FDIC Building, 550, 17th Street NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Disposition of minutes of previous meetings.

Recommendations regarding liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 43,053-L—Berea Bank and Trust Company, Berea, Kentucky
Case No. 43,058-NR—United States National Bank, San Diego, California
Memorandum and resolution re: The Hamilton Bank and Trust Company, Atlanta, Georgia.

Recommendations with respect to payment for legal services rendered and expenses incurred in connection with receivership and liquidation activities:

Schall, Boudreau & Gore, Inc., San Diego, California, in connection with the receivership of United States National Bank, San Diego, California.

Bronson, Bronson & McKinnon, San Francisco, California, in connection with the receivership of United States National Bank, San Diego, California.

Branson, Bronson & McKinnon, San Francisco, California, in connection with the liquidation of First State Bank of Northern California, San Leandro, California.

Patterson & Patterson, Whitfield, Manikoff and Write, Bloomfield Hills, Michigan, in connection with the receivership of Birmingham Bloomfield Bank, Birmingham, Michigan.

Kaye, Scholer, Fierman, Hays & Handler, New York, New York, in connection with the liquidation of Franklin National Bank, New York, New York.

Recommendation with respect to the amendment of Corporation regulations:

Memorandum and resolution proposing the publication for comment of a new Part 340 of the Corporation's rules and regulations, to be entitled, "Minimum Offering Circular Requirements for Public Distribution of Bank Securities."

Memorandum recommending the payment of a first dividend of 40%, subject to court approval, on proven claims of the Mt. Zion Deposit Bank, Mount Zion, Kentucky—in Receivership.

Memorandum with reference to the relocation of the Columbus Regional Office.

Reports of Committees and Officers:

Minutes of the actions approved by the Committee on Liquidations, Loans and Purchases of Assets pursuant to authority delegated by the Board of Directors.

Reports of the Director of the Division of Bank Supervision with respect to applications or requests approved by him and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Report of the Division of Liquidation with respect to the status of the Deposit Insurance National Bank of the Virgin Islands, Charlotte Amalie, St. Thomas, Virgin Islands, as of January 31, 1977.

Final statement, as of March 31, 1977, of assets acquired from First State Bank of Bonne Terre, Bonne Terre, Missouri, under a purchase and assumption agreement dated August 28, 1970, submitted by the Chief, Accounting and Budget Branch, Office of the Controller.

Reports of security transactions authorized by the Chairman.

AGENCY HOLDING THE MEETING: Federal Reserve System.

On Wednesday, May 25, 1977, at 12 noon a meeting of the Board of Governors of the Federal Reserve System will be held at the Board's offices at 20th Street and Constitution Avenue NW., Washington, D.C., to consider the following item(s) of official Board business:

1. A possible amendment to the Board's Rules Regarding Delegation of Authority that would authorize (1) the Federal Reserve Banks to enter into written agreements with bank holding companies or their nonbank subsidiaries or with State member banks concerning the correction of unsafe or unsound practices, and (2) the Director of the Division of Banking Supervision and Regulation to deny an application to stay, modify, terminate or set aside any cease and desist order previously issued by the Board or any written agreement between the Board or the Reserve Bank and a bank holding company or any nonbanking subsidiary thereof or a State member bank.
2. Possible authorization for staff to begin processing certain foreign "shell" branch applications under existing delegation of authority rules.
3. Report to the Federal Deposit Insurance Corporation regarding the competitive factors involved in the proposed merger of The Marblehead Bank and Trust Company, Marblehead, Massachusetts, with Essex County Bank and Trust Company, Lynn, Massachusetts.

---

[1] This matter is related to MC-F-12781 et al. and MC-F-12647 et al., which will be treated at the same conference.
[2] These matters are related to MC-F-12692 which will be treated at the same conference.

4. Report to the Federal Deposit Insurance Corporation regarding the competitive factors involved in the proposed merger of Sullivan County National Bank, LaPorte, Pennsylvania, with Citizens & Northern Bank, Ralston, Pennsylvania.

5. Proposed communication to the Department of Defense concerning the applicability of reserve requirements and interest rate limitations to deposits at overseas military banking facilities operated by member banks.

This meeting will be open to public observation. Information with regard to this meeting may be obtained from Mr. Joseph R. Coyne, Assistant to the Board, at 202–452–3204.

Board of Governors of the Federal Reserve System, May 17, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

11

AGENCY HOLDING THE MEETING: Overseas Private Investment Corporation.

TIME AND DATE: Meeting of the OPIC Board of Directors: Tuesday, May 24, 1977 at 9 a.m. (Closed Portion) and 11 a.m. (Open Portion).

PLACE: Offices of the Corporation, 7th Floor Board Room, 1129 20th Street NW., Washington, D.C.

STATUS: The first part of the meeting from 9 a.m. to 11 a.m. will be closed to the public. The open portion of the meeting will start at 11 a.m.

MATTERS TO BE CONSIDERED:

(Closed to the Public: 9 a.m. to 11 a.m.)

1. Personnel Matters.
2. Policy and Legislative Recommendations to President Carter.
3. Financing of African Project.
4. Insurance of African Project.
5. Claims.
6. Information Reports on (a) Status of a Finance Project (b) Applications Rejected and (c) Insurance Applications for Large Projects.

FURTHER MATTERS TO BE CONSIDERED:

(Open to the Public: 11 a.m.)

1. Approval of Minutes of Previous Board Meeting.
2. Confirmation of Scheduled Board Meetings.
3. OPIC Finance Program.
4. OPIC Organization Industry Functional Teams.
5. Financial Statement for Nine Months as of March 31, 1977.
6. Seabed Mining: Risk Coverage.
7. Information Reports on (a) U.S. Benefits and LDC Developmental Efforts and (b) Political Risk Investment Insurance Issued as of March 31, 1977.

CONTACT PERSON FOR INFORMATION:

Information with regard to this meeting may be obtained from the Secretary of the Corporation at 202–632–1839.

ELIZABETH A. BURTON,
Corporate Secretary.

FRIDAY, MAY 20, 1977

PART II

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service

NATIONAL HEALTH SERVICE CORPS AND RELATED PROVISIONS

Notice of Proposed Rulemaking

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service

[42 CFR Part 23]

NATIONAL HEALTH SERVICE CORPS AND RELATED PROVISIONS

AGENCY: Public Health Service, HEW.

ACTION: Notice of intent.

SUMMARY: This Notice of Intent informs the public of the intent to propose regulations which will implement modifications to the National Health Service Corps Program made by a recent amendment to the Public Health Service Act. The National Health Service Corps Program assigns physicians, dentists, nurses, and other health professionals to health manpower shortage areas in order to improve the delivery of health services to these areas. Issues identified in the Notice of Intent concern implementation and interpretation of the law. The public is invited to comment on the issues of concern to them.

DATES: Comments must be received in writing by July 5, 1977 in order to ensure that the Secretary will be able to consider such comments while preparing the proposed regulations.

ADDRESSES: Comments must be addressed to the Director, Division of Policy Development, Bureau of Community Health Services, HSA, PHS, Department of Health, Education, and Welfare, Room 6–17, 5600 Fishers Lane, Rockville, Maryland 20857.

FOR FURTHER INFORMATION CONTACT:

George P. Tolbert, M.D., Director, National Health Service Corps, Bureau of Community Health Services, HSA, PHS, Department of Health, Education, and Welfare, Room 6–05, 5600 Fishers Lane, Rockville, Maryland 20857, 301–443–4434.

SUPPLEMENTARY INFORMATION: Section 407(b)(3) of Public Law 94–484, the "Health Professions Educational Assistance Act of 1976," amends, effective October 1, 1977, the National Health Service Corps portion of the Public Health Service Act, by repealing the present authority and adding a new Subpart II—National Health Service Corps Program to Part C, Title III, of the Public Health Service Act.

The National Health Service Corps program, begun in 1972, is designed to improve the delivery of health services in health manpower shortage areas through the assignment to such areas of members of the Corps (physicians, dentists, nurses, and other health professionals).

The Notice of Intent identifies the major issues raised by the new statutory provisions. Alternative criteria and procedures for implementing the program are presented for the public's comments. The major issues identified in this Notice include the criteria to be used by the Secretary in assigning a Corps member to a health manpower shortage area; the standards for determining whether to allow a waiver to an entity for repayment to the Federal Government of both (1) the costs of assigning Corps members to the shortage area, and (2) any loan; the criteria and procedures for withholding eligibility for a hospital to receive Federal funds under the Public Health Service Act and under Titles XVIII and XIX of the Social Security Act if the hospital denies admitting privileges to a qualified physician or dentist of the Corps; the criteria and procedures for determining whether to sell equipment purchased with Federal funds to an entity when Corps members have completed their assignment in a health manpower shortage area; and the criteria for making a grant to assist a former Corps member to establish a private practice in a shortage area.

Following are the major issues identified by the Secretary.

Assignment of Corps Personnel

1. Section 333 of the Act states that the Secretary may assign members of the Corps to provide health services in or to a health manpower shortage area (which can include a population group or facility designated as a shortage area). Assignment may be made only after receipt and approval of an application submitted by a public or private nonprofit entity located in the shortage area or having a demonstrated interest in the area.

Assignments are to be made in accordance with a number of stipulations in the statute which cover priority for areas with the greatest health manpower shortage; special consideration for entities using physician assistants, nurse practitioners, and expanded function dental auxiliaries; consideration for community assistance and cooperation; and consideration of comments from appropriate health professional societies. Thus, the statute requires that a "priority," a "special consideration," and two "considerations" come into play when making assignments of Corps personnel. In carrying out this provision, assignments could be made by using several different methods. One method of implementation would be to proceed successively to utilize the "priority" for areas with the greatest shortage of health manpower as the first determinative for making assignments. Only when two or more areas, competing for assignment of a Corps member, have an equivalent shortage of health manpower would determinations be made on the basis of the "special consideration" regarding the use of physician assistants, nurse practitioners, and expanded function dental auxiliaries. Then, only if competing areas have equivalent shortages of health manpower and all the areas utilized physician assistants, nurse practitioners, or dental auxiliaries would determination be made on the basis of the first "consideration"—and so on until the second "consideration" (i.e., regarding comments from professional societies) influenced the assignment of personnel.

Another method would be to assign weights to the "priority," the "special consideration," and the "considerations." All factors would be involved in making determinations about assignments but would be afforded various weights; for example, the "priority" could be given a weight of 60, the "special consideration" could be given a weight of 20, and the two "considerations" could each be given a weight of 10.

The preceding are merely for the purpose of illustration and should not be regarded as showing any preference or predisposition on the part of the Department. Many other means could be devised for determining the assignment of Corps members to particular areas according to the "priority," "special consideration," and "considerations" specified in the statute. Recommendations on how assignments should be made in accordance with the statute are welcome.

After taking into account the statutory priority and considerations, the Secretary may have to decide among entities competing to serve an area. The Secretary may have to determine whether an entity actually located in the shortage area should receive consideration over one that is not located in the shortage area but has a demonstrated interest in the area; whether first consideration should be given to an entity that has actually shown (by viable projects, for example) an active interest in the area; or whether the two entities should be on a par for consideration. Recommendations on this matter would be welcome.

2. Section 333 of the Act provides that where an entity has previously had a Corps member assigned to it the Secretary may reassign Corps members only after he has made an evaluation and determined that:

(I) There is continued need for health manpower for the area;

(II) There has been appropriate and efficient use of Corps members previously assigned to the entity for the area;

(III) There is general community support for the assignment of Corps members to the entity;

(IV) The area has made continued efforts to secure health manpower for the area; and

(V) There has been sound fiscal management, including efficient collection of fee-for-service, third-party, and other appropriate funds, by the entity with respect to Corps members previously assigned to such entity.

Suggestions are solicited on the criteria to be utilized by the Secretary in making these required determinations. Regarding point (I), it appears that determination of "continued need" should be based on the same criteria that apply to designating health manpower shortage areas under Pub. L. 94–484. Point (II), the "appropriate and efficient use of Corps personnel," is very difficult to measure, and suggestions for evaluation measures, such as number of patient visits and encounters, would be helpful. With respect to point (III) on "community support," there appear to be many approaches for determining if such support exists, e.g., has the community made available a suitable building for use as a health care facility, or is there housing available for Corps personnel. On point (IV), whether "the area has made continued efforts to secure health manpower" as a replacement for previously assigned personnel, an assessment could be made of a community's efforts, such as: advertising in appropriate publications, recruiting at medical schools and other training facilities, and retaining the services of health manpower search agencies. On point (V), "sound fiscal management," should the proposed means of assessing sound fiscal management as stated in the "CPA Audit Guidelines of the DHEW Audit Agency" and in "Standards for Audits of Governmental Organizations, Program Activities and Functions" be used, or should other means be developed? These publications are available through the Regional Administrators of the Regional Offices of the Department of Health, Education, and Welfare at the addresses set forth at 45 CFR 5.31(b).

Matching of Corps Assignees to Areas

Under section 333(e), the Secretary is directed to assign to an area a Corps member and spouse, if any, who have characteristics which increase the probability of their remaining in the area upon completion of the assignment. The process of matching professionals to areas presently used by the NHSC involves (1) gathering information about the characteristics of areas in need, (2) having Corps members and spouses complete questionnaires about their backgrounds and personal preferences regarding the characteristics desired of an area in which they prefer to work and reside, and (3) matching as closely as possible the Corps members and spouses to areas which meet their preferences. Information given to a prospective assignee about an area could include the number and specialties of physicians and medical facilities in that area; size of the medical practice and community where an assignee would be working; climate of the region; and the cultural, social, and sport activities available. A Corps member and spouse usually will have several potentially acceptable areas from which to make a selection, and a visit to one area at Government expense is permitted by law.

Recommendations are solicited on the other methods of matching Corps members and spouses to areas, and on ways to improve the currently used method.

Technical Assistance to Shortage Areas

Section 333(f)(3) requires that the Secretary provide to health manpower shortage areas to which Corps members have not been assigned (1) technical assistance to assist in their recruitment of health manpower, and (2) current information on public and private programs which offer assistance in the securing of health manpower. Recommendations are solicited from the public regarding technical assistance and information which would be the most helpful and effective for areas wishing to recruit and secure health manpower.

Cost Sharing

1. Section 334 requires an entity to which a member of the NHSC has been assigned to repay to the United States each quarter (or other period specified by the Secretary) the portion of the salary and allowances received by such assignee during such period. Where an assignee has received a scholarship under the scholarship program, the entity is required by the statute to also repay the amount of the scholarship in proportion to the length of obligated service and actual service at such site by the assignee during such period. Finally, the entity is required by statute to repay the amount of any loan received by the entity under section 335(c).

It appears that the statute requires a site to repay on the basis of exact calculations with regard to the assignee's salary, allowances, and any scholarship aid received. (Under existing procedures repayment is based on average costs of assignees.) The public's views are requested on how the Department should carry out the requirement in a practical and equitable manner. If sites are to pay for assignees on the basis of actual costs, rather than average costs, some sites will be required to repay a greater amount than others depending, for example, on whether the assignees received scholarship aid.

2. Under section 334(b)(1) the Secretary may waive, in whole or in part, application of the requirement for reimbursement of the costs of a Corps assignee's salary and allowances, medical scholarship cost, and loan made to an entity if it is determined the entity is financially unable to meet the reimbursement requirement or that the reimbursement provisions would unreasonably limit the ability of the entity to provide adequate support for the provision of health services by Corps members.

Following are examples of possible factors which the Secretary will consider using to determine the entity's ability to reimburse:

The present and projected costs necessay to maintain the quality and level of health services by assigned personnel, and the present and projected income and other financial resources (such as contributions) available to meet such costs;

The extent of efforts to collect payments and third-party reimbursements;

The degree to which the established fees are designed to cover the reasonable costs of operation; and

The efficiency of management and the use of cost-saving mechanisms.

3. Under section 334(b)(2) the Secretary may also waive reimbursement in whole or in part for entities located in health manpower shortage areas that have a significant percentage of the population living in poverty, or who are elderly; or that have other characteristics which indicate to the Secretary the inability to meet in whole or in part the reimbursement provisions. This may permit a waiver on the basis of population served prior to determining that the entity is not, in fact, able to repay all or part of the required reimbursement. It is proposed to use the Community Services Administration (CSA) Income Poverty Guidelines (45 CFR 1060.2) for determining if persons are living in poverty (e.g., $5,500 per annum for a nonfarm family of four) and to consider as elderly those 65 years and older. What constitutes a "significant percentage" of the population is difficult to determine. One way would be to rank all counties by the above factors and establish the lower boundary of the top quartile of those counties having the greatest number of persons living in poverty, and persons who are elderly, as the significant percentage cutoff in judging whether to grant a waiver. Service areas meeting any cut-off established will not automatically be entitled to a waiver; the granting of a waiver will remain optional and be made only after a review of any site's resources and potential ability to reimbursement the Government. Waivers will be time limited and will be monitored to insure that the need for the waiver continues. Suggestions are needed for procedures to use in determining whether an entity is unable to fully reimburse the Government because of the significant percentage of elederly and persons in poverty living in the area served by the entity.

Suggestions are also invited regarding identification of other characteristics having impact on the ability of an entity to meet reimbursement requirements, such as the unique working conditions of migratory agricultural workers.

4. Under section 334(c) of the Act, if there are any funds collected in excess of the amount paid to the United States, such funds must be used by the entity to expand and improve the provision of health services to the shortage area or to recruit or retain health manpower for such area. Also, if reimbursement is fully or partially waived, all the funds collected for the provision of health services by Corps members assigned to the entity shall be used to improve the capability of the entity to deliver health services. Standards or criteria must be developed to determine what is meant by expansion or improvement in this context, and what limitations should be imposed. Comments on the matter are so solicited.

5. Under section 334(d) of the Act, any persons receiving health services given by Corps members shall be charged on the basis of a fee-for-service or other basis, at a rate approved by the Secretary, pursuant to regulations. No persons, however, may be denied services because of inability to pay, and the Secretary must provide for the furnishing of services at a reduced rate or without charge. It does not appear appropriate to set out approvable rates in regulations as they may vary from area to area and change from time to time. On the other hand, it seems appropriate that the regulations require entities to

establish fee schedules and discounts and have them approved by the Secretary.

Entities can establish fee schedules in several ways. Under other programs, it has been determined that persons with incomes below the CSA Income Poverty Guidelines are unable to pay other than nominal fees, and it has also been determined that those persons with incomes twice as great as the poverty level income should be required to pay full cost for services received. One way of establishing fee schedules would be to have the entities use the Medicare prevailing charges as a guide. Suggestions and recommendations concerning the development of regulations to implement the fee schedule provisions are solicited.

Admitting Privileges

In section 335 there is a unique provision regarding admitting privileges for authorized physician or dentist members of the Corps. The provision states:

(e)(1)(A) It shall be unlawful for any hospital to deny an authorized physician or dentist member of the Corps admitting privileges when such Corps member otherwise meets the professional qualifications establish by the hospital for granting such privileges and agrees to abide by the published bylaws of the hospital and the published bylaws, rules, and regulations of its medical staff.

(B) Any hospital which is found by the Secretary, after notice and an opportunity for a hearing on the record, to have violated this subsection shall upon such finding cease, for a period to be determined by the Secretary, to receive and to be eligible to receive any Federal funds under this Act or under Titles XVIII or XIX of the Social Security Act.

(2) For purposes of this subsection, the term "hospital" includes a State or local public hospital, a private profit hospital, a private nonprofit hospital, a general or special hospital, and any other type of hospital (excluding a hospital owned or operated by an agency of the Federal Government), and any related facilities.

Public comment is solicited on the questions of the timing of the notice of violation and the opportunity for a hearing. These items are not specified in the statute nor are there any standards for determining the length of suspension for violations. In addition, public comment is solicited concerning the definition of the term "any related facility" as used in the definition of "hospital" quoted above.

Right To Practice

Section 333(h) states that, notwithstanding any other law, any Corps member licensed to practice medicine, osteopathy, or dentistry in any State shall, while serving in the Corps, be allowed to practice such profession in any State. Comments on the manner in which the provision should be utilized, or recommended restrictions on its use, will be appreciated.

Sale of Equipment

Upon the expiration of the assignment of all Corps members to a shortage area, section 335(d) provides that the Secretary may (notwithstanding any other provision of law) sell, to any appropriate local entity, equipment and other property of the United States utilized by such members in providing health services. Sales must be made at the fair market value (as determined by the Secretary); except that the Secretary may make such sales for a lesser value to an appropriate local entity if he determines that the entity is financially unable to pay the full market value.

In determining whether to make such sale, it is proposed that the Secretary consider the extent of the need of the Department for such equipment and other property in another shortage area, and the proposed use by the entity of the equipment and other property. In addition, the Secretary is considering adding a requirement that an entity which received equipment or other property at less than fair market value must provide reasonable assurance satisfactory to him that the equipment or other property will be used by the designated entity for its estimated useful life in providing health care and services to individuals in the health manpower shortage area served by the entity.

It is also proposed that the Secretary will determine whether an entity is financially unable to purchase equipment or other property at fair market value based upon consideration of the entity's present financial resources available to purchase the equipment or other property in light of its current assets and liabilities, and the entity's ability to obtain the funds necessary to purchase the equipment or other property as evidenced by documentation provided by the designated entity of the steps it has taken to obtain such funds. Such steps might include community fund-raising activities, seeking of loans from both lending entities and private individuals, study of the possibility of increasing the fee schedule, and increasing efficiency and reducing operating costs.

Comments will be appreciated on the appropriateness of these criteria for determining whether an entity is unable to purchase such property at fair market value.

Loans to Entities

Section 335(c) provides that the Secretary may make one loan of up to $50,000 to an entity with an approved application to assist in meeting the costs of the following:

(1) Establishing medical, dental, or other health professional practices, including the development of medical practice management systems;

(2) Acquiring equipment for use in providing health services;

(3) Renovating buildings to establish health facilities; and

(4) Establishing appropriate continuing education programs.

The Department is studying the question of whether or not interest should be charged on loans and what the interest rate should be, if any. Suggestions are requested on this matter.

The new loan authority replaces the somewhat broader authority under subsection 329(d)(2) of the previous legislation to make one grant to an entity for up to $25,000 for development of medical practice management systems, acquiring supplies and equipment, and for other expenses related to the provision of health services.

It is suggested to establish the following as permissible costs for which such loans may be utilized:

(1) The costs of establishing medical, dental, and other health professional practice management systems for Corps personnel, including the cost of ancillary personnel such as receptionists and bookkeepers, the cost of obtaining assistance on the methods of preparing and using medical and fiscal records, and the costs of billing and collection;

(2) The cost of acquiring equipment for use in providing health services;

(3) Renovating buildings in which to establish health facilities;

(4) Payment for primary and support staff during developmental and initial stages of operation; and

(5) The continuing professional education of Corps personnel.

This list of permissible costs is based upon the permissible costs under the grant program and is revised to account for the statutory changes made in the program under the new legislation.

Recommendations are solicited on the conditions under which the provision for loans should be implemented.

Competitive Pay For Corps Assignees

Under section 331(d) the Secretary has the option to increase the monthly pay and allowances of a Corps assignee engaged in the delivery of health services up to a maximum of $1,000 per month for the first 36 months of the Corpsman's assignment. The provision is designed to provide monthly income to assignees which is competitive with the income of professionals with equivalent training and experience. If additional compensation is given, the sites will be required to reimburse the Government on the basis of such increased salary. The Department solicits recommendations with regard to the preparation of regulations to cover this subject.

Grants To Establish Private Practice

To aid in the establishment of a private practice in a shortage area, the Secretary may, under section 755, make one grant to an individual who has completed the period of obligated service in the Corps and who has agreed in writing to observe the conditions set forth in section 753. The amount of the grant shall be $12,500 for practicing at least 1 year, but less than 2, or $25,000 if the individual agrees to practice for a period of at least 2 years. If the grant is accepted but the agreement is breached, the United States shall be entitled to recover from the individual, in accordance with the formula stated in section 754, triple repayment in relation to time served and the obligated services.

Public comment is invited on implementation of the above.

Private Practice

Section 753 of the statute provides that an individual may be released from all or part of a Corps service obligation if he applies for a release and subsequently enters into a written agreement with the Secretary that he will engage in full-time private clinical practice, for a period equal to the remaining period of his service obligation, in the health manpower shortage area where he has been assigned or in a shortage area which has a priority for the assignment of Corps members. This provision applies only to recipients of scholarships under the new scholarship program established under Pub. L. 94-484. The shortage area must have a sufficient financial base to sustain such private practice and to provide the individual with an income equal to the income received as a member of the Corps.

During the period of private practice, the physician providing health services in connection with his practice must charge for such services at the usual and customary rate prevailing in the area. If, however, the patient is unable to pay the charges, such patient shall be charged at a reduced rate or not charged any fee. Further, there must be no discrimination against any person on the basis of ability to pay or because payment for the health services will be made under Title XVIII of the Social Security Act or under a State plan covered by Title XIX of the Act. Recommendations are solicited with respect to developing standards to judge whether an area has sufficient financial base to support a private practice.

Dated: March 10, 1977.

James F. Dickson,
Acting Assistant Secretary for Health.

Approved: May 11, 1977.

Joseph A. Califano, Jr.,
Secretary.

EMPLOYEE BENEFIT PLANS

Notice of Pendency of Exemption Relating to a Transaction Involving the Retirement Plan for Employees of Dallas North Lumber Company and Affiliates (Application No. D–345)

Notice is hereby given of the pendency before the Department of Labor (the Department) and the Internal Revenue Service (the Service) of a proposed exemption from the restrictions of section 406(a) and 406(b)(2) of the Employee Retirement Income Security Act of 1974 (the Act) and from the taxes imposed by section 4975 (a) and (b) of the Internal Revenue Code of 1954 (the Code), by reason of section 4975(c)(1)(A) through (D) of the Code. The pending exemption was requested in an application filed by Harold R. Clark, Trustee for the Retirement Plan for Employees of Dallas North Lumber Company and Affiliates (Plan) and by Texteel Manufacturing Company, Inc. (Texteel), an employer of employees covered by the Plan, to exempt the sale of a note by the Plan to Texteel and assumption by Texteel of a first lien note held by the Plan. Mr. Clark and his wife own 100 per cent of the outstanding common stock of Texteel. The application was filed pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975) and Rev. Proc. 75–26, 1975–1 C.B. 722.

Summary of Representations. The application contains facts and representations with regard to the pending exemption, which are summarized below. Interested persons are referred to the application on file with the Department and the Service for a complete statement of representations.

In early 1972, the Plan purchased 100 acres of unimproved land approximately two miles Northwest of the City of Allen, Collin County, Texas. This land was purchased for $150,039. The Plan acquired the property subject to a note in the amount of $85,022 secured by a first lien on the property, and executed a note for $27,507 secured by a second lien. The balance of the purchase price was paid in cash.

Less than one year after the purchase, the land was sold by the Plan for $323,976. A promissory note for the full purchase price was accepted by the Plan, and the Plan agreed to continue to pay the principal and interest on the aforementioned first lien note. The $323,976 promissory note provided for interest only to be paid for the first ten years of the note (through 1982) with equal principal payments over the note's remaining years. Under the terms of the note, in the event of default, the Plan could look only to the property for satisfaction of the note and not to the maker of the note.

In early 1975, the administrators of the Plan decided to terminate the Plan due to the termination or change in ownership of the corporations participating in the Plan. Rather than attempt to distribute beneficial share interests in the assets of the Plan to the participants, or, alternatively, defer payment of benefits until normal retirement, the Plan administrators decided to sell the note to provide sufficient funds for distribution of benefits to the beneficiaries.

Attempts were made to sell the note through advertisements in the Wall Street Journal and through direct negotiations with local banks and financial institutions. As a result of these efforts, one tentative offer was received which would not have produced sufficient assets with which to pay the actuarially determined post-termination accrued benefits when combined with the other assets of the Plan.

To provide the Plan with sufficient funds to pay benefits, Texteel agreed to purchase the note from the Plan. The terms of the transaction provided for an assumption by Texteel of the unpaid balance on the first lien note, credits for prepaid interest and accrued interest on the first lien, and a cash payment to the Plan of $134,311. The sale of the note to Texteel, which occurred on April 30, 1975, produced sufficient funds for the Plan to pay all post-termination accrued benefits plus additional benefits equivalent to approximately 10 per cent of the post-termination accrued benefits. Under the terms of the Plan, subsequent to termination, all assets remaining after distribution of post-termination accrued benefits to participants and beneficiaries shall be returned to the employer. However, the assets in excess of that necessary to pay post-termination accrued benefits will be paid to the participants and beneficiaries and will not be returned to the employer.

In early December, 1975, subsequent to the sale of the note, the maker of the note suggested to Texteel that the maker and Texteel agree to reduce the principal amount of the note from $323,976 to $199,370; otherwise, there would be a default on the note. Texteel agreed as a compromise to accept 75 per cent of the interest then due.

An appraisal of the property was made on June 1, 1976, which valued the property at $175,000 as of May 1, 1975.

Notice of the Plan's decision to terminate was filed with the Pension Benefit Guaranty Corporation (PBGC). The PBGC examined the information provided and informed the applicant that it appears that the assets of the Plan may be sufficient to satisfy all vested benefits payable under the Plan. In addition, the PBGC informed the Department and the Service that Plan assets are sufficient to satisfy the guaranteed nonforfeitable benefits of the participants in the Plan.

On or before May 25, 1977, a copy of the notice will be provided to each participant and beneficiary by first class mail. Copies of all such notifications will be forwarded to the Department and Service at the time they are available or distributed.

General Information. The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act which, among other things, require a fiduciary to discharge his duties respecting the plan solely in the interest of the plan participants and beneficiaries and in a prudent fashion in accordance with subsection 404(a)(1)(B) of the Act, nor does it affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) The pending exemption does not extend to transactions prohibited under section 406(b)(1) and (3) of the Act and section 4975(c)(1)(E) and (F) of the Code.

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department and the Service must find that the exemption is administratively feasible, in the interest of the plan and of its participants and beneficiaries, and protective of the rights of such participants and beneficiaries.

(4) The pending exemption, if granted, will be supplemental to, and not in derogation of, any other provision of the Act and the Code, including statutory exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is in fact a prohibited transaction.

All interested persons are invited to submit written comments on the pending exemption. In order to receive consideration, such comments must be received by the Department on or before June 20, 1977. In addition, any interested person may submit a written request that a hearing be held relating to the pending exemption. Such written request must be received by the Department on or before June 20, 1977, and should state the reasons for the request and the nature of the person's interest in the pending exemption. All written comments and requests for a hearing (preferably six copies) should be addressed to the Pension and Welfare Benefit Programs, Office of Regulatory Standards and Exceptions, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216, Attention: Application No. D–345.

The application for exemption, requests for a hearing and comments will be available for public inspection at the

Public Document Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, NW., Washington, D.C. 20216, and at the Internal Revenue Service National Office Reading Room, 1111 Constitution Avenue, NW., Washington, D.C. 20224.

Pending Exemption. Based upon the application, hereinabove described, the Department and the Service have under consideration the granting of the requested exemption, under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975) and Rev. Proc. 75–26, 1975–1 C.B. 722, so that, effective April 30, 1975, the restrictions of sections 406 (a) and 406(b)(2) of the Act and the taxes imposed under section 4975 (a) and (b) of the Code by reason of section 4975(c)(1)(A) through (D) of the Code, shall not apply to a transaction involving the sale of a note by the Plan to Texteel and assumption by Texteel of a first lien note held by the Plan pursuant to the terms, conditions and representations set forth in the application.

The pending exemption, if granted, will be subject to the express conditions that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction consummated pursuant to the exemption.

Signed at Washington, D.C., this 11th day of May 1977.

J. VERNON BALLARD,
Acting Administrator of Pension and Welfare Benefit Programs, Department of Labor.

JEROME KURTZ,
Commissioner of Internal Revenue.

FOOD STAMP PROGRAM

Maximum Monthly Allowable Income Standards and Basis of Coupon Issuance: Alaska, Hawaii, Puerto Rico, Virgin Islands, and Guam

Title 7—Agriculture

CHAPTER II—FOOD AND NUTRITION SERVICE, DEPARTMENT OF AGRICULTURE

[FSP No. 1977-2.2, Amdt. 107]

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS, FOOD STAMP PROGRAM

MAXIMUM MONTHLY ALLOWABLE INCOME STANDARDS AND BASIS OF COUPON ISSUANCE: ALASKA

Appendix B—Alaska

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment revises the maximum allowable income standards and basis of coupon issuance for Alaska appearing in Appendix B to Part 271 which were effective January 1, 1977. Semi-annual adjustments in coupon allotments, to reflect food price changes published by the Bureau of Labor Statistics, are required by the Food Stamp Act. These adjustments will continue to provide households with coupon allotments sufficient to purchase nutritionally adequate diets.

EFFECTIVE DATE: July 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Grant Tolley, Chief, Program Development Branch, Food Stamp Division, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-8325.

SUPPLEMENTARY INFORMATION:

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semi-annually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics. Under this provision, and adjustment based on the cost of the Thrifty Food Plan in February 1977 has been made in the coupon allotment for all except the one- and two-person households. The cost of food did not increase enough for a change in the coupon allotment for the one- and two-person households, since section 7(a) specifies that no such adjustment shall be made unless the increase in the coupon allotment is a minimum of $2.

Prior to the amendment to the Act requiring semi-annual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year; i.e., in July based on the cost of the food plan in the preceding December. With the enactment of the semi-annual adjustments, the law specified that the first adjustment be made in January 1974 to reflect changes in the food prices through August 1973. Similar procedures have been used for subsequent semi-annual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the January adjustment based on the cost of the food plan in the preceding August, as required by the Act. The income standards and coupon allotments set forth below are based on the allotment table adopted for the continental United States, adjusted for the cost of food in Alaska in February 1977.

Households in which all members are included in the federally-aided public assistance grant, general assistance grant, or supplemental security income benefit shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally-aided public assistance, general assistance, or supplemental security income benefit, in Alaska, shall be as follows:

Monthly coupon allotments and purchase requirements—Alaska

Monthly net income	For a household of— 1 Person	2 Persons	3 Persons	4 Persons	5 Persons	6 Persons	7 Persons	8 Persons
	The monthly coupon allotment is—							
	$70	$128	$184	$234	$278	$334	$368	$422

$1,320 to $1,349.99								378
$1,350 to $1,379.99								378
$1,380 to $1,409.99								378

"Income" as the term is used in the notice is as defined in paragraph (c) of § 271.3 of the Food Stamp Program Regulations.

Pursuant to sections 7 (a) and (b) of the Food Stamp Act, as amended, (7 U.S.C. 2016, Public Law 91-671), the face value of the monthly coupon allotment which the State agency is authorized to issue to any household certified as eligible to participate in the Program and the amount charged for the monthly coupon allotment in Alaska shall be as follows:

Household size:	*Maximum allowable monthly income standards—Alaska*
One	[1] $307
Two	427
Three	614
Four	780
Five	927
Six	1,113
Seven	1,227
Eight	1,407
Each additional member	+173

[1] 1976 USDA Poverty Guideline.

For issuance to households of more than eight persons use the following formula:

A. *Value of the total allotment.* For each person in excess of eight, add $52 to the monthly coupon allotment for an eight-person household.

B. *Purchase requirement.* 1. Use the purchase requirement shown for the eight-person household for households with incomes of $1,289.99 or less per month.

2. For households with monthly incomes of $1,290 or more, use the following formula: For each $30 worth of monthly income (or portion thereof) over $1,289.99, add $9 to the monthly purchase requirement shown for the eight-person household with an income of $1,289.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add $48 for each person over eight to the maximum purchase requirement shown for an eight-person household.

The total monthly coupon allotments for some households are not divisible by four. This results in total coupon allotments of uneven dollar amounts for those households which choose to purchase one-fourth or three-fourths of their coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotment up to the next higher whole dollar amount and shall not change the purchase requirement for such allotment.

NOTE.—The Food and Nutrition Service has determined that this document contains a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107 and certifies that an Economic Impact Statement has been prepared.

In view of the need for placing this notice into effect on July 1, 1977, and the lead-time needed by the State agency for implementation, it is hereby determined that it is impracticable and contrary to the public interest to give notice of proposed rulemaking with respect to this notice.

(Catalog of Federal Domestic Assistance Programs, No. 10.551, Food Stamps.)

Dated: May 11, 1977.

CAROL TUCKER FOREMAN,
Assistant Secretary.

[FSP No. 1977-3.2, Amdt. 108]

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS FOOD STAMP PROGRAM

MAXIMUM MONTHLY ALLOWABLE INCOME STANDARDS AND BASIS OF COUPON ISSUANCE: HAWAII

Appendix C—Hawaii

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment revises the maximum allowable income standards and basis of coupon issuance for Hawaii appearing in Appendix C to Part 271 which were effective January 1, 1977. Semi-annual adjustments in coupon allotments, to reflect food price changes published by the Bureau of Labor Statistics, are required by the Food Stamp Act. These adjustments will continue to provide households with coupon allotments sufficient to purchase nutritionally adequate diets.

EFFECTIVE DATE: July 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Grant Tolley, Chief, Program Development Branch, Food Stamp Division, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202-447-8325).

SUPPLEMENTARY INFORMATION:

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semi-annually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics. Under this provision, an adjustment based on the cost of the Thrifty Food Plan in February 1977 has been made in the coupon allotment for all households.

Prior to the amendment to the Act requiring semi-annual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year; i.e., in July based on the cost of the food plan in the preceding December. With the enactment of the semi-annual adjustments, the law specified that the first adjustment be made in January 1974 to reflect changes in the food prices through August 1973. Similar procedures have been used for subsequent semi-annual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the January adjustment based on the cost of food plan in the preceding August, as required by the Act. The income standards and coupon allotments set forth below are based on the allotment table adopted for the continental United States, adjusted for the cost of food in Hawaii in February 1977.

Households in which all members are included in the federally-aided public assistance grant, general assistance grant, or supplemental security income benefit shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable income standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally-aided public assistance, general assistance, or supplemental security income benefit, in Hawaii, shall be as follows:

Household size	*Maximum allowable monthly income standards—Hawaii*
One	[1] $273
Two	413
Three	593
Four	753
Five	893
Six	1,073
Seven	1,187
Eight	1,354
Each additional member	+166

[1] 1976 USDA Poverty Guideline.

"Income" as the term is used in the notice is as defined in paragraph (c) of § 271.3 of the Food Stamp Program Regulations.

Pursuant to sections 7 (a) and (b) of the Food Stamp Act, as amended (7 U.S.C. 2016, Pub. L. 91-671), the face value of the monthly coupon allotment which the State agency is authorized to issue to any household certified as eligible to participate in the Program and the amount charged for the monthly coupon allotment in Hawaii shall be as follows:

Monthly coupon allotments and purchase requirements—Hawaii

Monthly net income	For a household of— 1 Person	2 Persons	3 Persons	4 Persons	5 Persons	6 Persons	7 Persons	8 Persons

$960 to $989.99						286	287	288
$990 to $1,019.99						286	296	297
$1,020 to $1,049.99						286	305	306
$1,050 to $1,079.99						286	314	315
$1,080 to $1,109.99							316	324
$1,110 to $1,139.99							316	333
$1,140 to $1,169.99							316	342
$1,170 to $1,199.99							316	351
$1,200 to $1,229.99								360
$1,230 to $1,259.99								362
$1,260 to $1,289.99								362
$1,290 to $1,319.99								362
$1,320 to $1,349.99								362
$1,350 to $1,379.99								362

For issuance to households of more than eight persons use the following formula:

A. *Value of the total allotment.* For each person in excess of eight, add $50 to the monthly coupon allotment for an eight-person household.

B. *Purchase requirement.* 1. Use the purchase requirement shown for the eight-person household for households with incomes of $1,229.99 or less per month.

2. For households with monthly incomes of $1,230 or more, use the following formula: For each $30 worth of monthly income (or portion thereof) over $1,229.99, add $9 to the monthly purchase requirement shown for the eight-person household with an income of $1,229.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add $46 for each person over eight to the maximum purchase requirement shown for an eight-person household.

The total monthly coupon allotments for some households are not divisible by four. This results in total coupon allotments of uneven dollar amounst for those households which choose to purchase one-fourth or three-fourths of their coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotment up to the next higher whole dollar amount and shall not change the purchase requirement for such allotment.

NOTE.—The Food and Nutrition Service has determined that this document contains a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107 and certifies that an Economic Impact Statement has been prepared.

In view of the need for placing this notice into effect on July 1, 1977, and the lead-time needed by the State agency for implementation, it is hereby determined that it is impracticable and contrary to the public interest to give notice of proposed rulemaking with respect to this notice.

Appendix D—Puerto Rico

[FSP No. 1977-4.2, Amendment 109]

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS FOOD STAMP PROGRAM

MAXIMUM MONTHLY ALLOWABLE INCOME STANDARDS AND BASIS OF COUPON ISSUANCE: PUERTO RICO

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment revises the maximum allowable income standards and basis of coupon issuance for Puerto Rico appearing in Appendix D to Part 271 which were effective January 1, 1977. Semi-annual adjustments in coupon allotments, to reflect food price changes published by the Bureau of Labor Statistics, are required by the Food Stamp Act. These adjustments will continue to provide households with coupon allotments sufficient to purchase nutritionally adequate diets.

EFFECTIVE DATE: July 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Grant Tolley, Chief, Program Development Branch, Food Stamp Division, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-8352.

SUPPLEMENTARY INFORMATION:

Section 5(b) of the Food Stamp Act requires the establishment of special standards of eligibility and coupon allotment schedules, not to exceed those in the fifty States, which reflect the average per capita income and cost of obtaining a nutritionally adequate diet in Puerto Rico.

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semi-annually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics. Under this provision, an adjustment based on the cost of the Thrifty Food Plan in February 1977 has been made in the coupon allotment for all households.

Prior to the amendment to the Act requiring semi-annual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year; i.e., in July based on the cost of the economy food plan in the preceding December. With the enactment of the semi-annual adjustment, the law specified that the first adjustment be made in January 1974 to reflect changes in the food prices through August 1973. Similar procedures have been used for subsequent semi-annual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the January adjustment based on the cost of the food plan in the preceding August, as required by the Act. The income standards and coupon allotments set forth below are based on the allotment table adopted for the continental United States, adjusted for the cost of food in Puerto Rico in February 1977.

Households in which all members are included in the federally-aided public assistance or general assistance grant shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable income standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally-aided public assistance or general assistance, in Puerto Rico, shall be as follows:

$450 to $479.99			118	131	132	133	134	135
$480 to $509.99				140	141	142	143	144
$510 to $539.99				148	150	151	152	153
$540 to $569.99				148	159	160	161	162
$570 to $599.99				148	168	169	170	171
$600 to $629.99					176	178	179	180
$630 to $659.99					176	187	188	189
$660 to $689.99					178	196	197	198
$690 to $719.99						205	206	207
$720 to $749.99						214	215	216
$750 to $779.99						214	224	225
$780 to $809.99						214	233	234
$810 to $839.99						214	234	243
$840 to $869.99							234	252
$870 to $899.99							234	261
$900 to $929.99							234	270
$930 to $959.99								270
$960 to $989.99								270
$990 to $1,019.99								270
$1,020 to $1,049.99								270

For issuance to households of more than eight persons use the following formula:

A. *Value of the total allotment.* For each person in excess of eight, add $38 to the monthly coupon allotment for an eight-person household.

B. *Purchase requirement.* 1. Use the purchase requirement shown for the eight-person household for households with incomes of $929.99 or less per month.

2. For households with monthly incomes of $930 or more, use the following formula: For each $30 worth of monthly income (or portion thereof) over $929.99, add $9 to the monthly purchase requirement for an eight-person household with an income of $929.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add $34 for each person over eight to the maximum purchase requirement shown for an eight-person household.

The total monthly coupon allotments for some households are not divisible by four. This results in total coupon allotments of uneven dollar amounts for those households which choose to purchase one-fourth or three-fourths of their coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotment up to the next higher whole dollar amount and shall not change the purchase requirement for such allotment.

NOTE.—The Food and Nutrition Service has determined that this document contains a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107 and certifies that an Economic Impact Statement has been prepared.

In view of the need for placing this notice into effect on July 1, 1977, and the lead-time needed by the State agency for implementation, it is hereby determined that it is impracticable and contrary to the public interest to give notice of proposed rulemaking with respect to this notice.

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS FOOD STAMP PROGRAM

MAXIMUM MONTHLY ALLOWABLE INCOME STANDARDS AND BASIS OF COUPON ISSUANCE: VIRGIN ISLANDS

Appendix E—Virgin Islands

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment revises the maximum allowable income standards and basis of coupon issuance for the Virgin Islands appearing in Appendix E to Part 271 which were effective January 1, 1977. Semi-annual adjustments in coupon allotments, to reflect food price changes published by the Bureau of Labor Statistics, are required by the Food Stamp Act. These adjustments will continue to provide households with coupon allotments sufficient to purchase nutritionally adequate diets.

EFFECTIVE DATE: July 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Grant Tolley, Chief, Program Development Branch, Food Stamp Division, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-8352.

SUPPLEMENTARY INFORMATION:

Section 5(b) of the Food Stamp Act requires the establishment of special standards of eligibility and coupon allotment schedules, not to exceed those in the fifty States, which reflect the average per capita income and cost of obtaining a nutritionally adequate diet in the Virgin Islands.

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semi-annually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics. Under this provision, an adjustment based on the cost of the Thrifty Food Plan in February 1977 has been made in the coupon allotment for all except the one-person household. The cost of food did not increase enough for a change in the coupon allotment for the one-person household, since section 7(a) specifies that no such adjustment shall be made unless the increase in the coupon allotment is a minimum of $2.

Prior to the amendment to the Act requiring semi-annual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year; i.e., in July based on the cost of the food plan in the preceding December. With the enactment of the semi-annual adjustment, the law specified that the first adjust-

ment be made in January 1974 to reflect changes in food prices through August 1973. Similar procedures have been used for subsequent semi-annual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the January allotment based on the cost of the food plan in the preceding August, as required by the Act. The income standards and coupon allotments set forth below are based on the allotment table adopted for the continental United States adjusted for the cost of food in the Virgin Islands in February 1977.

Households in which all members are included in the federally-aided public assistance grant or general assistance grant shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable income standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally-aided public assistance or general assistance, in the Virgin Islands, shall be as follows:

Household size:	*Maximum allowable monthly income standards—Virgin Islands*
One	[1] $245
Two	393
Three	560
Four	713
Five	847
Six	1,013
Seven	1,127
Eight	1,287
Each additional member	+160

[1] 1976 USDA Poverty Guideline.

"Income" as the term is used in the notice is as defined in paragraph (c) of § 271.3 of the Food Stamp Program Regulations.

Pursuant to sections 7 (a) and (b) of the Food Stamp Act, as amended, (7 U.S.C. 2016, Public Law 91–671), the face value of the monthly coupon allotment which the State agency is authorized to issue to any household certified as eligible to participate in the Program and the amount charged for the monthly coupon allotment in the Virgin Islands shall be as follows:

Monthly coupon allotments and purchase requirements—Virgin Islands

Monthly net income	For a household of— 1 Person	2 Persons	3 Persons	4 Persons	5 Persons	6 Persons	7 Persons	8 Persons
	The monthly coupon allotment is—	$64	$118	$168	$214	$254	$304	$338	$386
	And the monthly purchase requirement is—

$1,230 to $1,259.99									343
$1,260 to $1,289.99									312

For issuance to households of more than eight persons use the following formula:

A. *Value of the total allotment.* For each person in excess of eight, add $48 to the monthly coupon allotment for an eight-person household.

B. *Purchase requirement.* 1. Use the purchase requirement shown for the eight-person household for households with incomes of $1,169.99 or less per month.

2. For households with monthly incomes of $1,170 or more, use the following formula: for each $30 worth of monthly income (or portion thereof) over $1,169.99, add $9 to the monthly purchase requirement shown for the eight-person household with an income of $1,169.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add $44 for each person over eight to the maximum purchase requirement shown for an eight-person household.

The total monthly coupon allotments for some households are not divisible by four. This results in total coupon allotments of uneven dollar amounts for those households which choose to purchase one-fourth or three-fourths of their coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotment up to the next higher whole dollar amount and shall not change the purchase requirement for such allotment.

NOTE.—The Food and Nutrition Service has determined that this document contains a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A–107 and certifies that an Economic Impact Statement has been prepared.

In view of the need for placing this notice into effect July 1, 1977, and the lead-time needed by the State agency for implementation, it is hereby determined that it is impracticable and contrary to the public interest to give notice of proposed rulemaking with respect to this notice.

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS FOOD STAMP PROGRAM

MAXIMUM MONTHLY ALLOWABLE INCOME STANDARDS AND BASIS OF COUPON ISSUANCE: GUAM

Appendix F—Guam

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment revises the maximum allowable income standards and basis of coupon issuance for Guam appearing in Appendix F to Part 271 which were effective January 1, 1977. Semi-annual adjustments in coupon allotments, to reflect food price changes published by the Bureau of Labor Statistics, are required by the Food Stamp Act. These adjustments will continue to provide households with coupon allotments sufficient to purchase nutritionally adequate diets.

EFFECTIVE DATE: July 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Grant Tolley, Chief, Program Development Branch, Food Stamp Division, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–8325).

SUPPLEMENTARY INFORMATION:

Section 5(b) of the Food Stamp Act requires the establishment of special standards of eligibility and coupon allotment schedules, not to exceed those in the fifty States, which reflect the average per capita income and cost of obtaining a nutritionally adequate diet in Guam.

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semi-annually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics. Under this provision, an adjustment based on the cost of the Thrifty Food Plan in February 1977 has been made in the coupon allotment for all except the one- and two-person households. The cost of food did not increase enough for a change in the coupon allotment for the one- and two-person households, since Section 7(a) specifies that no such adjustment shall be made unless the increase in the coupon allotment is a minimum of $2.00.

Prior to the amendment to the Act requiring semi-annual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year; i.e., in July based on the cost of the food plan in the preceding December. With the enactment of the semi-annual adjustment, the law specified that the first adjustment be made in January 1974 to reflect changes in food prices through August 1973. Similar procedures have been used for subsequent semi-annual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the July adjustment based on the cost of the food plan in the preceding August, as required by the Act. Based on prices provided for Guam, the Agricultural Research Service estimated that the allotment table adopted for the continental United States, adjusted for the cost of food in Guam would be higher than in the fifty States. Thus, the income standards (except for the one-person household which is the same as Hawaii), and the coupon allotments set forth for Guam are the same as those which will become effective in Alaska on July 1, 1977.

Households in which all members are included in the federally-aided public assistance grant or general assistance grant shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable income standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally-aided public assistance, general assistance, or supplemental security income benefit, in Guam shall be as follows:

Household size:	*Maximum allowable monthly income standards—Guam*
One	[1] $273
Two	427
Three	614
Four	780
Five	927
Six	1,113
Seven	1,227
Eight	1,407
Each additional member	+173

[1] 1976 USDA Poverty Guideline.

"Income" as the term is used in the notice is as defined in paragraph (c) of § 271.3 of the Food Stamp Program Regulations.

Pursuant to sections 7 (a) and (b) of the Food Stamp Act, as amended, (7 U.S.C. 2016, Pub. L. 91–671), the face value of the monthly coupon allotment which the State agency is authorized to issue to any household certified as eligible to participate in the Program and the amount charged for the monthly coupon allotment in Guam shall be as follows:

Monthly coupon allotments and purchase requirements—Guam

Monthly net income	For a household of— 1 Person	2 Persons	3 Persons	4 Persons	5 Persons	6 Persons	7 Persons	8 Persons

$720 to $749.99				206	213	214	215	216
$750 to $779.99				206	222	223	224	225
$780 to $809.99				206	231	232	233	234
$810 to $839.99					240	241	242	243
$840 to $869.99					246	250	251	252
$870 to $899.99					246	259	260	261
$900 to $929.99					246	268	269	270
$930 to $959.99						277	278	279
$960 to $989.99						286	287	288
$990 to $1,019.99						295	296	297
$1,020 to $1,049.99						298	305	306
$1,050 to $1,079.99						298	314	315
$1,080 to $1,109.99						298	322	324
$1,110 to $1,139.99						298	328	333
$1,140 to $1,169.99							328	342
$1,170 to $1,199.99							328	351
$1,200 to $1,229.99							328	360
$1,230 to $1,259.99								369
$1,260 to $1,289.99								378
$1,290 to $1,319.99								378
$1,320 to $1,349.99								378
$1,350 to $1,379.99								378
$1,380 to $1,409.99								378

For issuance to households of more than eight persons use the following formula:

A. *Value of the total allotment.* For each person in excess of eight, add $52 to the monthly coupon allotment for an eight-person household.

B. *Purchase requirement.* 1. Use the purchase requirement shown for the eight-person household for households with incomes of $1,289.99 or less per month.

2. For households with monthly incomes of $1,290 or more, use the following formula: For each $30 worth of monthly income (or portion thereof) over $1,289.99, add $9 to the monthly purchase requirement shown for the eight-person household with an income of $1,289.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add $48 for each person over eight to the maximum purchase requirement shown for an eight-person household.

The total monthly coupon allotments for some households are not divisible by four. This results in total coupon allotments of uneven dollar amounts for those households which choose to purchase one-fourth or three-fourths of their coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotment up to the next higher whole dollar amount and shall not change the purchase requirement for such allotment.

NOTE.—The Food and Nutrition Service has determined that this document contains a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107 and certifies that an Economic Impact Statement has been prepared.

In view of the need for placing this notice into effect on July 1, 1977, and the lead-time needed by the State agency for implementation, it is hereby determined that it is impracticable and contrary to the public interest to give notice of proposed rulemaking with respect to this notice.

INDUSTRY AND HOMOGENEOUS GEOGRAPHIC SEGMENT REPORTING

Disclosure Forms and Rules; Amendment

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Parts 239, 240, 249]

[Release Nos. 33-5826, 34-13525, 35-20023, IC-9761]

INDUSTRY AND HOMOGENEOUS GEOGRAPHIC SEGMENT REPORTING

Proposed Amendments of Disclosure Forms and Rules

AGENCY: Securities and Exchange Commission.

ACTION: Proposed Rule.

SUMMARY: The Commission proposes to revise certain disclosure forms and rules, in part to coordinate the Commission's line of business information with the industry segment information required by a recent statement issued by the Financial Accounting Standards Board and to avoid any duplication resulting from compliance with such statement. Certain of these proposals would require presentation of detailed descriptions of industry segments in which a registrant engages in business. Other amendments would require five-year financial information relating to industry segments and foreign and domestic operations. As a part of the latter proposal, the amendments would codify the position of the staff of the Commission's Division of Corporation Finance that segment financial information must be included in certain proxy and information statements and in annual reports to shareholders. In conjunction with these specific proposals, the Commission proposes the development of a new, integrated disclosure form. In addition, comments are sought on whether or not segment financial information should be required on a quarterly basis in the interim reports.

DATE: Comments should be submitted on or before August 10, 1977.

ADDRESS: Comments should refer to File S7-695 and should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. All comments will be available for public inspection.

FOR FURTHER INFORMATION CONTACT:

Linda L. Griggs, Office of Disclosure Policy and Proceedings, Division of Corporation Finance (202-75-1750) or Edward R. Cheramy, Office of the Chief Accountant (202-376-8020), Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: In December 1976, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 14, "Financial Reporting for Segments of a Business Enterprise" ("SFAS No. 14"). SFAS No. 14 requires corporations to disclose certain financial information by industry and homogeneous geographic segments as defined in the statement. In part of this release, the Commission is proposing the revision of certain of its disclosure requirements in order to integrate the information to be furnished pursuant to SFAS No. 14 with the textual disclosures required by the Commission forms. Registrants may include any of the information specified in these proposed amendments within the Commission registration and reporting forms prior to the adoption of any revisions in order to provide more meaningful disclosure.

General Statement

The Securities and Exchange Commission today published for comment proposed amendments to certain of its reporting forms under the Securities Act of 1933 ("Securities Act") (15 U.S.C. 77a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)) and the Securities Exchange Act of 1934 ("Exchange Act") (15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)). If adopted, these proposals would require registrants to discuss separately, within the business and property discussions contained in documents on Form S-1 (17 CFR 239.11) under the Securities Act and Forms 10 (17 CFR 249.210) and 10-K (17 CFR 249.310) under the Exchange Act, each industry segment into which their business operations are classified and to present a five-year tabular presentation of certain financial information concerning these industry segments and foreign and domestic operations in documents filed on Forms S-1, S-7 (17 CFR 239.26) and S-8 (17 CFR 239.16b) under the Securities Act and Forms 10 and 10-K under the Exchange Act. Concomitant with the latter proposal, the Commission proposes amendments which would codify the position of the staff of the Division of Corporation Finance (the "Staff") with respect to the disclosure of financial information relating to industry segments within the business description required by Item 14 of Schedule 14A of Regulation 14A (17 CFR 240.14a-101) under the Exchange Act and in annual reports to shareholders and which would require disclosure of financial information relating to foreign and domestic operations in these documents. Forms S-1 and S-7 are forms for the registration of securities under the Securities Act. Form S-8 is the form for the registration of securities under the Securities Act to be offered to employees pursuant to certain plans. Form 10 is the general form for the registration of securities under the Exchange Act. Form 10-K is the form for annual reports filed pursuant to section 13 or 15(d) of the Exchange Act and Schedule 14A specifies the information required to be set forth in proxy and information statements filed pursuant to Section 14 of the Exchange Act. Schedule 14A under the Exchange Act is also applicable to the solicitation of proxies under the Public Utility Holding Company Act of 1935 (15 U.S.C. 79a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)) and the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)).

In view of the extensive nature of the revisions necessitated by these proposals, the Commission is taking this opportunity to propose the development of Form S-K which would be an integrated disclosure form whose first two items would be the items affected by the proposed amendments discussed above. Items 9 and 10 of Form S-1, Item 5 of Form S-7, Item 18 of Form S-8, Items 1 and 3 of Forms 10 and 10-K, Rules 14a-3 (17 CFR 240.14a-3) and 14c-3 (17 CFR 240.14c-3) and Item 14 of Schedule 14A would be revised to refer specifically to the appropriate disclosure requirements contained in this integrated disclosure form.

In addition, the Commission requests comments as to whether it is necessary or appropriate in the public interest or for the protection of investors to amend Form 10-Q for quarterly reports (17 CFR 249.308) under the Exchange Act to require the inclusion of quarterly financial information relating to the industry segments into which a registrant's business is classified. Specific amendments to form 10-Q are not proposed at this time.

This release contains a general discussion of the background, purpose and effect of the proposals and requests comments on certain additional areas for disclosure.

A. BACKGROUND

In proposing these amendments at this time, the Commission has considered the impact on reporting obligations of corporations of the Statement of Financial Accounting Standards No. 14 ("SFAS No. 14") and has taken note of certain tentative recommendations made by the Advisory Committee on Corporate Disclosure (the "Advisory Committee"). A discussion of SFAS No. 14 and the Advisory Committee's recommendations follows.

SFAS No. 14. SFAS No. 14 requires the reporting of financial information relating to industry segments and foreign and domestic operations when a company issues annual financial statements or a complete set of interim period financial statements (i.e., balance sheet, income statement, statement of source and application of funds and notes to the financial statements).[1] The requisite information must be presented within the financial statements or the notes thereto or must be referenced in the financial statements if not clearly a part thereof.[2]

Companies are required to report the amounts of revenues, with intersegment sales or transfer shown separately, operating profit or loss (revenue less operating expenses) and identifiable assets for each significant industry segment.[3] In addition, the information about revenue, profitability and identifiable assets must be reconciled to the related amounts in the consolidated financial statements of the enterprise.[4] Certain other related disclosures are also required. A segment is regarded as significant and therefore reportable if its revenues, operating profits (or losses) or identifiable assets are ten percent or more of the related combined amounts for all of a company's industry segments.[5] To ensure that the reportable segments represent a substantial portion of the company's overall operations, SFAS No. 14 stipulates that the combined revenues of the reported segments must equal or exceed 75 percent of the company's total revenues.[6]

SFAS No. 14 requires companies to furnish financial information for their operations in different geographic areas of the world which is similar to that required for industry segments.[7] The financial information is to be presented for the company's domestic operations and for its foreign operations, either in the aggregate, or, if appropriate, by geographic area, if the revenue generated by the company's foreign operations from sales to unaffiliated customers contributed ten percent or more to consolidated revenue or if the identifiable assets of the company's foreign operations are ten percent or more of consolidated assets.[8] SFAS No. 14 also requires disclosure of the amount of export sales from an enterprise's home country to unaffiliated customers in foreign countries when this amount is ten percent or more of total revenue from sales to unaffiliated customers.[9]

Finally, if a company derives ten percent or more of its revenue from sales to any single customer, SFAS No. 14 requires disclosure of that fact and of the amount of revenue received from each such customer.[10]

SFAS No. 14 is effective for fiscal years beginning after December 15, 1976 and for interim periods within those fiscal years for which complete financial statements are provided. When financial statements are presented for more than one fiscal year, the segmental information must be presented for each such year.[11]

Recommendation of the Advisory Committee on Corporate Disclosure. At its February, 1977 meeting the Advisory Committee agreed to recommend that the Commission take action to (1) integrate the textural disclosures required in Commission forms with the segmental financial statement disclosures required by SFAS No. 14 and (2) require the inclusion of segmental financial statement disclosure in interim reports on Form 10-Q.[12] In furtherance of the integration of disclosures, the Advisory Committee also recommended that segment information be discussed in the Management's Discussion and Analysis of the Summary of Operations pursuant to Guides 22 and 1 (Accounting Series Release No. 159 (August 14, 1974), 39 FR 31894) of the Guides for the Preparation and Filing of Registration Statements under the Securities Act (17 CFR Part 231) and of the Guides for the Preparation and Filing of Reports and Proxy and Registration Statements under the Exchange Act (17 CFR Part 241).

B. PURPOSE AND EFFECT OF PROPOSED REVISIONS

These proposals represent the continuing efforts of the Commission to provide necessary information to investors and to minimize any consequent burden to registrants by making the various disclosure requirements more uniform. The specific proposals set forth herein should accomplish these goals by (1) taking the first step in providing an integrated disclosure form; (2) coordinating certain Commission line of business disclosure requirements with the segment disclosure requirements of SFAS No. 14; (3) improving segment disclosure for the benefit of investors; and (4) codifying a Staff position with respect to business related disclosure.

The proposal to begin the development of a new integrated disclosure form, Form S-K, should improve and simplify significantly the disclosure process by eliminating immaterial differences among the disclosure requirements in the various registration and reporting forms. If the proposed Form S-K is adopted, future amendments affecting many disclosure forms would be reflected in the new form with appropriate revisions and cross-references added to the disclosure forms.

Certain of the Commission forms now require disclosure of sales and income information for lines of business and income information for classes of similar products or services. The identification of the various lines of business has primarily been left to registrants by the Commission, although the Commission forms present general guidelines for such a determination.[13]

As a result of the issuance of SFAS No. 14 by the FASB, registrants will be required to include within their financial statements more detailed financial information relating to the reportable industry segments in which they do business. In addition, the Commission anticipates that companies complying with SFAS No. 14 may classify their business into industry segments which differ from the lines of business previously reported in the Commission forms. In order to avoid duplicative reporting of similar information as a result of SFAS No. 14, the Commission is proposing to amend its disclosure requirements to require the presentation of financial information relating to industry segments in lieu of lines of business in registration statements on Forms S-1, S-7, S-8 and 10, and in annual reports on Form 10-K.[14] In conjunction with these amendments the Commission is proposing revisions which would codify the Staff's policy that segment information should be included in certain proxy and information statements and in annual reports to shareholders.

The Commission also believes that the financial disclosure relating to domestic and foreign operations required by SFAS No. 14 will provide meaningful information to investors as to the volume of operations abroad and the importance to the company of both foreign operations and export sales. Therefore, amendments are proposed which would require inclusion of financial information relating to domestic and foreign operations in documents on Forms S-1, S-7, S-8, 10 and 10-K, in certain proxy and information statements and in annual reports to shareholders.

It is the opinion of the Commission that meaningful segment information is crucial to reasoned investment decision-making in multi-segment companies. Therefore, the Commission proposes certain amendments which would require the textual business discussion in Forms S-1, 10 and 10-K to be presented by industry segment.

The proposed amendment to require detailed descriptions of the industry segments as well as the amendments to require disclosure of financial information relating to industry segments and foreign and domestic operations should provide more specificity in the business information and should achieve more uniformity in the type of information in the documents and in the methods of presentation of this data. In addition, these proposed amendments would partially implement the aforementioned recommendations made by the Advisory Committee. The Commission is not proposing specific amendments to Guides 22 and 1 at this time, however, because additional amendments to these guides are contemplated. Nevertheless, registrants are urged to include within the management's discussion and analysis of the five-year summary of operations analyses of the performance of the industry segments.

C. COMMENTS INVITED ON DISCLOSURE BY FOREIGN ISSUERS AND ON QUARTERLY SEGMENTAL REPORTING

Comments are specifically requested on the resulting applicability of the proposed amendments to foreign issuers

[3] Id. Paragraph 22.
[4] Id. Paragraph 30.
[5] Id. Paragraph 15.
[6] Id. Paragraph 17.
[7] Id. Paragraph 35.
[8] Id. Paragraph 32.
[9] Id. Paragraph 36.
[10] Id. Paragraph 39.
[11] Id. Paragraphs 3, 41.
[12] See Minutes of the Sixth Meeting of the Securities and Exchange Commission Advisory Committee on Corporate Disclosure on February 7 and 8, 1977.
[13] The Commission determined that it was not feasible or desirable to be very specific in defining a line of business because of the numerous ways in which companies are organized to do business. See Securities Act Release 4988 (July 14, 1969), 34 FR 12176.
[14] In general, the proposed amendments require the type of financial information required by SFAS No. 14. The Commission now is considering a petition submitted under Rule 4 of the rules of practice (17 CFR 201.4) by Tax Analysts and Advocates. The petition requests that disclosure be required of net income by geographic area in order that information may be obtained concerning, among other things, a corporation's effective tax rate on United States and foreign activities. The Commission will announce its action on the petition at a later time.

which file registration statements under the Securities Act. Interested persons are invited to discuss the proposed requirements that industry segments be described and that five-year financial information be furnished as to industry segments and foreign and domestic operations as they relate to foreign issuers.

Another recommendation of the Advisory Committee to the Commission is that quarterly reports contain segmental financial statement disclosure because of the importance of the information required by SFAS No. 14. Since SFAS No. 14 is applicable only to a complete set of financial statements, the statement would have no impact upon Form 10–Q financial statement requirements absent further Commission action. The Commission specifically invites comments on the need for this additional disclosure and on the burdens of maintaining accounting systems which would enable this information to be made available.

D. COMPLIANCE WITH THE PROPOSED AMENDMENTS PRIOR TO THEIR ADOPTION

In order to encourage the inclusion of more detailed segmental information in documents filed pursuant to the securities acts, the Commission has determined to permit registrants to include any of the information called for by these proposals upon their publication so long as the existing disclosure requirements are satisfied.

SPECIFIC PROPOSALS

A. FINANCIAL INFORMATION FOR INDUSTRY SEGMENTS

As noted above, the Commission proposes to amend certain disclosure forms to require the presentation of financial information relating to the industry segments into which the registrant's business is classified in lieu of the disclosure required now as to lines of business. These revisions would coordinate the disclosure required by the securities regulations with that required by SFAS No. 14 [15] and would result in more complete disclosure about registrants' businesses since the Commission forms only require disclosure of revenue and income information for individual lines of business.

Financial information relating to lines of business is required by specific instruction in the textual business descriptions contained in registration statements on Forms S–1, S–7, S–8, and 10 and in annual reports on Form 10–K. In addition, it has been the policy of the Staff to obtain, through the comment procedures, income, and revenue information for individual lines of business in certain proxy and information statements.[16] Line of business information has also been required in annual reports to shareholders by the statement in Rules 14a–3 and 14c–3 of Regulation 14A under the Exchange Act that the report should contain information as comprehensive as that required by paragraphs (c)(1) and (c)(2) of Item 1 of Form 10–K regarding lines of business and classes of similar products and services respectively. The Commission proposes to revise the type of disclosure in these documents and, at the same time, codify the Staffs position on segment disclosure in proxy and information statements and in annual reports to shareholders.

Proposed Item 1(c) (1) and (2) of the new integrated disclosure form, Form S–K, set forth the provisions relating to industry segment [17] and classes of product or service disclosure. Item 9 of Form S–1, Item 5 of Form S–7, and Item 1 of Forms 10 and 10–K would be amended to refer to the disclosure provisions in Item 1 of the integrated disclosure form. The requirement in Item 18 of Form S–8 to include information as comprehensive as that required in the Form 10–K regarding lines of business would be similarly amended. In addition, Rules 14a–3 and 14c–3 and Item 14(b) of Schedule 14A would be amended to specifically require the presentation of the information required by Item 1 paragraph (c) of the Form S–K.

Proposed Item 1(c)(1) requires disclosure of the following financial information relating to the industry segments into which a registrant's business is classified: (1) The amount of total sales and revenues with sales/transfers to unaffiliated customers and to other industry segments shown separately; (2) the amount of operating profit or loss (i.e., revenue less all operating expenses); (3) the aggregate amount of identifiable assets exclusively used by and those allocated to each segment; and (4) certain related disclosures. In addition, registrants would be required to reconcile the amounts of revenue, operating profit or loss and identifiable assets to the related amounts in the consolidated financial statements. Appendix A to the proposed item of Form S–K sets forth definitions appropriate to the disclosures required by this subparagraph and guidelines relevant to the determination of reportable industry segments. The disclosures which would be required as to industry segments in the Commission forms are generally the same as those required by SFAS No. 14.

Paragraph 20 of SFAS No. 14 provides an exception from the requirement to provide industry segment financial information. Whenever an enterprise operates exclusively in a single industry or a dominant portion of its operations are in a single industry segment, the financial information as to industry segments need not be given. SFAS No. 14 defines a dominant industry segment as a segment whose revenue, operating profit or loss, and identifiable assets each constitute more than 90 percent of related totals for all industry segments, when no other industry segment is deemed significant. Notwithstanding the provisions of SFAS No. 14, the Commission believes that financial information relating to a dominant industry segment should be presented where the segment is or was experiencing a material change in the trend of revenues or market share and/or profitability during either of registrant's two most recent fiscal years. Proposed Item 1(c)(1) requires such a presentation.

In addition, the Commission believes that the disclosure forms should contain more information concerning intersegment sales or transfers. Paragraphs 23 and 10(c) of SFAS No. 14 require separate disclosure of intersegment sales and an explanation of the basis of accounting for such sales.[18] Proposed Item 1(c)(1) would extend the requirements of SFAS No. 14 and require registrants to indicate the following by footnote to the amounts of intersegment sales: (1) The identity or identities of the industry segment(s) to which such intersegment sales by product or service were made and the amount(s) made to each; (2) the relationship between the per unit dollar amounts at which intersegment sales or transfers are reflected and the per unit dollar amounts of sales to unaffiliated third parties of identical products or services; and (3) the percentage of aggregate revenues of such identical products or services accounted for by the intersegment sales or transfers. This information should aid investors in determining the importance of intersegment transfers to a particular segment and in assessing the extent to which the profitability of one segment is dependent upon intersegment transfers.

The Commission forms presently require the presentation of financial information relating to lines of business for five years. SFAS No. 14, however, only requires industry segment information for each fiscal year beginning after December 15, 1976, and for each interim period for which complete financial statements (i.e., balance sheet, income statement, statement of source, and application of funds and notes to the financial statements) are included. Registration statements and certain proxy and information statements usually contain a complete set of financial statements for one fiscal year and possibly one interim period [19] and annual reports to shareholders and reports on Form 10–K set forth complete financial statements for two fiscal years.[20] Therefore, SFAS No. 14 would require the presentation of financial information relating to industry segments for at most two fiscal years.

The Commission believes that the business description in Forms S–1, S–7, S–8, 10, and 10–K, in proxy and information statements and in annual reports to shareholders should include the financial information required by SFAS No. 14 relating to industry segments for five years since the disclosure forms have required the presentation of line of business and income statement [21] information for this period of time for purpose of year to year comparison. Therefore, amendments are proposed which would require segmental information for the registrant's last five fiscal years or for each fiscal year during which the registrant has been engaged in business.

The Commission has not determined, however, whether the information relating to segments should be required for fiscal years which are not or have not been subject to SFAS No. 14. Therefore, comments are requested specifically on whether five-year financial information should be required for those fiscal years beginning on or prior to December 15, 1976. Since the Commission believes that historical information is essential for a complete understanding of a corporation's business, persons are requested to recommend the type of information which should be required in order to present comparative financial information if the adopted amendments were to apply prospectively only. Persons may wish to comment on the following possible alternative methods of presentation of five-year data: (1) The presentation of five-year line of business information together with industry segment information for fiscal years beginning after December 15, 1976, until five-year industry segment information is required; (2) the presentation of industry segment information for fiscal years beginning after December 15, 1976, with line of business data for earlier periods arrayed alongside the segment information to the extent they are comparable and with explanations of the reasons for any lack of comparability with earlier periods as a result of the change in reporting requirements; or (3) the presentation of industry segment information for fiscal years beginning after December 15, 1976, and line of business information for the balance of the five-year period together with a reconciliation with the segment information.

Information may be needed for a period of time in excess of five years. The proposed amendments note that the five-year period is merely a guide to disclosure and that information regarding operations occurring outside this period may be material under certain circumstances and should be disclosed. In addition, when registrants include a complete set of financial statements for an interim period in a report or registration statement, the required financial information should be provided for that interim period together with the five-year date.

B. TEXTILE DISCUSSION OF BUSINESS AND PROPERTY

The Commission proposes to amend Items 9 and 10 of Form S–1 and Items 1 and 3 of Forms 10 and 10–K to refer to the more detailed information relating to industry segments [22] which would be required by Items 1 and 2 of the new integrated disclosure document, Form S–K.

The Form S–K would require registrants to describe within the description of their business each industry segment into which their business is classified. The description would include matters such as the following: Competition; dependence upon a few customers; principal products and services; backlog; sources and availability of raw materials; the importance to the business and duration and effect of material patents and the like; research and development; number of employees; and the seasonality of the business. In order to obtain meaningful information about the industry segment, the Commission proposes to require registrants to discuss these matters to the extent they are material to each segment.

In addition to detailed disclosure relating to the industry segments, the proposed amendments would require registrants to discuss any of the aforementioned matters, if appropriate, within the general discussion of their business. As a result, research and development matters which do not affect any one existing industry segment and principal customers which purchase products from various industry segments, for instance, would be described in this general discussion of the business.

The proposal to require more detailed information about industry segments necessitates the revision of the instructions relating to the exhibits to be filed with Forms S–1, 10 and 10–K. The proposed amendments would require registrants to file contracts as exhibits to those documents if the contracts are material either to a particular industry segment or to the registrant as a whole. Existing provisions require the filing of only those contracts which are material to the registrant.

In conjunction with the drafting of the business description item for the new integrated disclosure form, the Commission has re-examined certain existing provisions of the business items included in Forms S–1, 10, and 10–K, to evaluate differences and reconsider the specific requirements. As noted above, certain differences between the items in the three forms have been eliminated through the proposed item of Form S–K. This re-examination has also resulted in the proposal to delete existing instructions 5 and 2 of paragraphs (b)(1) and (b)(2) respectively of Item 9 of Form S–1 and Instructions 5 and 2 of paragraphs (c)(1) and (c)(2) respectively of Item 1 of Forms 10 and 10–K. These instructions provide that financial information regarding classes of products or services in operations regulated by Federal, State, or municipal authorities may be limited to those classes of products or services required by any uniform system of accounts prescribed by such authorities. Comments are invited on whether the deletion of these instructions would have any adverse effects on the reporting obligations of any corporations regulated by State or municipal authorities.

The Commission proposes to add a sentence to the subparagraph in the business item of the Form S–K, Item 1 relating to research and development costs. Item 1(b)(7)(i) would require expenditures for company-sponsored research activities to be stated in accordance with generally accepted accounting principles. The Commission believes that it is appropriate to use the definition of research and development costs adopted by the FASB in making this disclosure.

The Commission also proposes to amend Item 10 of Form S–1 and Item 3 of Forms 10 and 10–K to implement the recommendation of the Advisory Committee that the property used by registrants be described by industry segment. Properties of a registrant would be discussed if they were material to the particular segment for which they were used or to the general operations of the registrant.

C. FOREIGN AND DOMESTIC OPERATIONS

The Commission believes that the information concerning a corporation's foreign and domestic operations required by SFAS No. 14 is meaningful to the analysis of a corporation's business. Therefore, amendments are proposed which would require the inclusion of this data within the business discussions set forth in registration statements on Forms S–1, S–7, S–8, and 10, in annual reports on Form 10–K, in annual reports to shareholders and in certain proxy and information statements. The Commission forms generally have not elicited very specific information about foreign operations; they merely require registrants to discuss the importance of material foreign operations or sales to the company and the risks attendant thereto and to present information with respect to volume and relative profitability of such operations "insofar as practicable." Existing Item 18 of Form S–8, Rules 14a–3 and 14c–3 of Regulation 14A and Item 14(b) of Schedule 14A are silent as to the appropriate disclosure concerning foreign operations in the Form S–8, in annual reports to shareholders and in certain proxy and information statements.

[15] This approach is consistent with the Commission's efforts to look to the private sector for leadership in establishing and improving accounting principles and standards through the FASB. See Accounting Series Release No. 150 (December 20, 1973), 39 FR 1260.

[16] Paragraph (b)(1) of Item 14 (Mergers, consolidations, acquisitions, and similar matters) of Schedule 14A requires corporations to describe the business of the issuer and of each person which is to be merged into the issuer or into or with which the issuer is to be merged or consolidated or the business or assets of which are to be acquired or which is the issuer of securities to be acquired by the issuer in exchange for all or a substantial part of its assets or to be acquired by security holders of the issuer and action is to be taken with respect to such transaction.

[17] To the extent that this information is responsive to the requirements of SFAS No. 14, a cross reference to the appropriate financial data in the business description could be included in the notes to the financial statements by registrants wishing to comply with SFAS No. 14 in this manner.

[18] The Commission expects that registrants will establish reasonable bases for accounting for such sales.

[19] See Form S–1, Instructions as to Financial Statements; Form S–7, Item 11(a); Form 10, Instructions as to Financial Statements.

[20] See Form 10–K, Instructions as to Financial Statements.

[21] See Item 6, Summary of Earnings, Form S–1; Item 6, Statements of Income, Form S–7; Item 18, The Issuer's Business and Management, Form S–8; Item 2, Summary of Operations, Form 10; Item 2, Summary of Operations, Form 10–K.

[22] Amendments to Form S–7 to require detailed descriptions of the industry segments are not proposed because the information will be available to the investing public in the annual report on Form 10–K which is filed with the Commission.

Proposed paragraph (d) of Item 1 of the new integrated disclosure form (Form S–K) would continue to require a narrative discussion of the importance of a registrant's operations in foreign countries and any accompanying risks if the registrant and its subsidiaries engage in material operations in foreign countries, or if a material portion of sales or revenues is derived from customers in foreign countries. Subparagraph (1) would require the presentation of financial information relating to the registrant's foreign operations, either in the aggregate or by appropriate geographic area, and as to its domestic operations if the revenue generated by the registrant's foreign operations from sales to unaffiliated customers is 10 percent or more of total consolidated revenue or if the identifiable assets of the registrant's foreign operations are 10 percent or more of consolidated total assets as reported in the registrant's financial statements for either of the last two fiscal years or for the most recent interim period for which complete financial statements are furnished. The financial information to be furnished would be the amounts of revenue, with sales or transfers between geographic areas shown separately, and operating profit or loss and the aggregate carrying amount of identifiable assets. Registrants would also be required to reconcile the information about revenue, profitability and identifiable assets to the related amounts in the consolidated financial statements. In addition, the proposals would require registrants to present additional information about intraenterprise sales or transfers similar to that required as to intersegment sales or transfers so as to improve profitability analysis.

Subparagraph (2) would require registrants to state the amount of export sales from their home country to unaffiliated customers in foreign countries in the aggregate or by any appropriate geographic areas if the total amount of export sales contributed 10 percent or more to total sales to unaffiliated customers during either of the last two fiscal years.

Appendix A to proposed Item 1 of Form S–K sets forth definitions appropriate to the disclosures required by these subparagraphs and guidelines relevant to the determination of reportable foreign geographical areas.

In order to provide investors with truly useful historic information adequate to assess any recent trends in this aspect of the issuer's business, the Commission propose to require the presentation of information about foreign and domestic operations and about export sales for five fiscal years or such shorter times as the registrant may have engaged in business. No disclosure would be required for fiscal years beginning on or prior to December 15, 1976 because the Commission forms do not require such detailed disclosure now. Registrants are specifically requested to comment on the availability of this information to them for fiscal years prior to the effective date of SFAS No. 14; any interested persons are invited to comment on the usefulness of the historic information for fiscal years beginning on or prior to December 15, 1976.

Any interim information about foreign operations required by SFAS No. 14 to be included in the financial statements should be presented together with the information about foreign and domestic operations for five years (or any appropriate shorter period of time) in the business discussion, instead of or in addition to its placement in the notes to or schedules of the financial statements.

D. DISCLOSURE TABLES

In order to alleviate the burden on registrants as a result of these amendments, the Commission proposes the adoption of appendices to Item 1 of new Form S–K which contain tables that may be used for the presentation within the business discussion of the additional information regarding industry segments and foreign and domestic operations. Comments are specifically requested as to the usefulness of the tables.

Schedule of recommendations—Type of form to which amendments apply

	Form—						Annual report to shareholders	Certain proxy and information statements
	S–K	S–1	S–7	S–8	10	10–K		
1. Form amendments to items of disclosure;[1] Disclosure of:								
(a) 5 year historical financial information relating to industry segments to be applied either retroactively or prospectively.	X	X	X	X	X	X	X	X
(b) 5 year historical financial information relating to foreign and domestic operations to be applied prospectively.	X	X	X	X	X	X	X	X
(c) Amount of export sales for each of the last five years to be applied prospectively.	X	X	X	X	X	X	X	X
(d) Detailed business related descriptions of matters which are material to industry segments.	X	X	.....		X	X	.....	
(e) Discussion of property by industry segment.	X	X	.....		X	X	.....	
2. Form amendments to exhibits: Filing of contracts material to industry segments as exhibits.	X	X	.....		X	X	.....	

[1] An integrated disclosure form, form S–K, is proposed which would contain the proposed requirements. The disclosure forms affected by the proposed amendments would be amended to require the information required by the appropriate form S–K items.

PROPOSED AMENDMENTS

The text of the proposed amendments is set forth below:

1. Form S–K is proposed to read as follows:

§ 239.1 Form S–K, integrated disclosure form for the registration of securities under the Securities Act of 1933.

§ 249.300 Form S–K, integrated disclosure form for use under the Securities Exchange Act of 1934.

This integrated disclosure form shall be used to the extent provided in forms promulgated under the Securities Act of 1933 and under the Securities Exchange Act of 1934.

ITEM 1. DESCRIPTION OF BUSINESS

(a) *General.* Describe the business done and intended to be done by the registrant and its subsidiaries and the general development of such business during the past five years, or such shorter period as the registrant may have been engaged in business. Information shall be disclosed for earlier periods of time if necessary for a complete understanding of the general development of the business. To the extent appropriate, the general discussion of the business shall include the information specified in paragraphs (b)(1) through (b)(9) below.

(b) *Narrative disclosures by segment.* Each industry segment into which the registrant's business is classified shall be described separately. The description of each such segment shall include the information specified in paragraphs (b)(1) through (b)(9) below to the extent material to the segment.

(1) Competitive conditions in the industry segment involved and the competitive position of the registrant, if known or reasonably available to the registrant. If several products or services are involved, separate consideration shall be given to the principal products or services or classes of products or services. The principal methods of competition (e.g., price, service, warranty or product performance) should be identified and positive and negative factors pertaining to the competitive position of the registrant, to the extent that they exist, should be explained if known or reasonably available to the registrant. An estimate of the number of competitors and registrant's competitive position in the industry should be included; where material, the particular markets in which the registrant competes should be identified. In connection with these disclosures the names of either customers or competitors are not required in the usual case; however, where one or a small number of competitors are dominant, they should be identified. If the registrant voluntarily includes such names, no objection is ordinarily raised unless in the particular case the effect of including such names is misleading.

(2) If a material part of the business of the industry segment involved is dependent upon a single customer or a few customers, the loss of any one or more of whom would have a materially adverse effect on the business of the registrant, the name of the customer or customers, their relationship, if any, to the registrant and material facts regarding their importance to the business of the registrant.

(3) The principal products produced and services rendered by the registrant in the industry segment, the principal markets for, and methods of distribution of, such products and services, including any significant changes in the kinds of products produced or services rendered, or in the markets or methods of distribution, during the past

three fiscal years (See Paragraph (c)(2) below).

(4) To the extent that information concerning backlog is material to an understanding of the business of the industry segment, the dollar amount of backlog orders believed to be firm, as of a recent date and as of a comparable date in the preceding fiscal year, together with an indication of the portion thereof not reasonably expected to be filled within the current fiscal year, and seasonal or other material aspects of the backlog.

(5) The sources and availability of raw materials essential to the business of the industry segment.

(6) The importance to the industry segment and the duration and effect of all material patents, trade marks, licenses, franchises and concessions held.

(7)(i) The estimated dollar amount spent during each of the last two fiscal years on material research activities relating to the development of new products or services or the improvement of existing products or services, indicating separately those activities which were company-sponsored and/or those which were customer-sponsored and disclosure of financial information relating to research and development activities. The disclosure of expenditures for company-sponsored research activities shall be stated in accordance with generally accepted accounting principles.

(ii) If there has been a public announcement of, or if information otherwise has become public about, a new product or industry segment requiring the investment of a material amount of total assets, a description of the status of such product or segment (e.g., whether in the planning stage, whether prototypes exist, the degree to which product design has progressed or whether further engineering is necessary). This subparagraph requires a description of the status of product development in addition to the description of the business otherwise required by the item. The subparagraph is not intended to require disclosure of otherwise non-public corporate information the disclosure of which would adversely affect the registrant's competitive position. It is intended to elicit additional specific information only where there has been a public announcement or where information has otherwise become public concerning a new product or industry segment requiring the investment of a material amount of total assets.

(iii) Where material, state the appropriate number of employees engaged fulltime in each of the activities described in 7(i) above during each fiscal year and in 7(ii) above.

(8) The extent to which the business of the industry segment or a material portion thereof is or may be seasonal.

(9) The number of persons employed by the registrant.

Instructions. 1. In identifying the appropriate reportable industry segments, the registrant shall consider the relevant provisions of Appendix A to this item.

2. If the registrant proposes to introduce or has recently introduced a new product or proposes to do business or has recently begun to do business in a new industry segment requiring the investment of a material amount of its total assets, provide as supplemental information at the time of filing of the document, but not as part thereof, a copy of any studies conducted or performed by or for the registrant relating to such business or product and a statement as to the actual or proposed use of such study. If any such study is not available at the time of filing, it should be provided as soon thereafter as practicable. Where material, disclosure of the absence of such study is required.

3. Where material to understanding the business, the practices and conditions of the registrant and the industry as they relate to working capital items should be explained (e.g., where the registrant's business is highly seasonal, where the registrant is required to carry significant amounts of inventory to meet rapid delivery requirements of customers or to assure itself of a continuous allotment of goods from suppliers; or where the registrant has provided extended payment terms to customers).

4. The description shall not relate to the powers and objects specified in the charter, but to the actual business done and intended to be done. Include the business of subsidiaries and affiliates of the registrant insofar as is necessary to understand the character and development of the business conducted by the total enterprise.

5. Appropriate disclosure shall also be made as to the material effects that compliance with Federal, State and local provisions which have been enacted or adopted regulating the discharge of materials into the environment, or otherwise relating to the protection of the environment, may have upon the capital expenditures, earnings and competitive position of the registrant and its subsidiaries. Registrant shall disclose any material estimated capital expenditures for environmental control facilities for the remainder of its current fiscal year and its succeeding fiscal year and for such further periods as the registrant may deem material.

6. In describing developments, information shall be given as to matters such as the following: The nature and results of any bankruptcy, receivership or similar proceedings with respect to the registrant or any of its significant subsidiaries; the nature and results of any other material reorganization, readjustment or succession of the registrant or any of its significant subsidiaries; the acquisition or disposition of any material amount of assets otherwise than in the ordinary course of business; and any material changes in the mode of conducting the business.

7. The business of a predecessor or predecessors shall be deemed to be the business of the registrant for the purpose of this item.

8. Appropriate disclosure shall be made with respect to any material portion of the business which may be subject to renegotiation of profits or termination of contracts or subcontracts at the election of the Government.

(c) *Financial Information about Industry Segments and Classes of Similar Products or Services.* (1) State for each of the registrant's last five fiscal years (or for each fiscal year beginning after December 15, 1976,)[2] or for each fiscal year the registrant has been engaged in business, whichever period is shorter, and for each interim period in a fiscal year beginning after December 15, 1976 for which the registrant includes in the document a complete set of financial statements (i.e., balance sheet, income statement, statement of source and application of funds and notes to the financial statements) the information set forth in (i)–(vii) below. The information shall be presented as to each of the reportable industry segments into which the business of the registrant and its subsidiaries is classified for the purpose of responding to paragraph (b) above and in the aggregate for the remainder of the enterprise's industry segments not deemed reportable segments. Registrants should note, however, that the five-year period is merely a guide to disclosure and that disclosure of information regarding operations occurring outside this five-year period may be material under certain circumstances. The financial information required by this subparagraph need not be furnished if all of the registrant's business is in a single industry segment or if a single industry segment contributes amounts of revenue and operating profit or loss each of which equals more than 90 percent of registrant's total revenue and operating profit or loss respectively and utilizes more than 90 percent of the registrant's identifiable assets during each of its two most recent fiscal years. If, however, such dominant segment is experiencing during either of those years a material change in the trend of revenues, market share or profitability, the financial data required by the subparagraph shall be provided. Appendix A to this item contains definitions and guidelines for compliance with the subparagraph and the required information may be presented in the form of the table set forth in Appendix B.

(i) The amount of total sales and revenues with intersegment sales/transfers shown separately. By footnote to the amount of total intersegment sales/transfers, state: (A) The identity of the industry segment(s) to which such intersegment sales/transfers by product or service were made and the amount(s) made to each; (B) the relationship between the per unit dollar amounts at which intersegment sales/transfers are reflected and the per unit dollar amount of sales to unaffiliated third parties of identical products or services; and (C) the percentage of aggregate revenues of such identical products or services accounted for by the intersegment sales/transfers.

(ii) The amount of operating profit or loss (revenue less operating expense).

(iii) The aggregate carrying amount of identifiable assets.

(iv) Reconciliations of the information about revenue, profitability and identifiable assets to the related amounts in the registrant's consolidated financial statements.

(v) The aggregate amount of depreciation, depletion, and amortization expense.

(vi) The amount of capital expenditures, i.e., additions to its property, plant, and equipment.

(vii) The equity in the net income from and investment in the net assets of unconsolidated subsidiaries and other equity method investees whose operations are vertically integrated with the operations of that segment. Disclosure shall also be made of the geographic areas in which those vertically integrated equity method investees operate.

(2) State for each fiscal year specified in (1) above the amount or percentage of total sales and revenues contributed by each class of similar products or services which accounted for 10 percent or more of total sales and revenues in either of the last two fiscal years, or 15 percent or more of total sales and revenues if total sales and revenues did not exceed $50,000,000 during either of the last two fiscal years. This paragraph calls for information with respect to classes of similar products or services regardless of whether the registrant's business activities are classified into more than one industry segment and reported pursuant to paragraph (c)(1) above. However, this information may be combined, where appropriate, with the response to paragraph (c)(1).

[2] The language in brackets would be included in the subparagraph if the Commission determines that segment reporting should be required only prospectively. In this event, an instruction would be added to the subparagraph which would require the presentation of information which would make possible an analysis of the performance of the registrant's business during a period of five years. See text of release for alternative methods of presentation of the historical financial information relating to the various segments of a registrant's business.

(d) *Financial information about foreign and domestic operations and export sales.* If the registrant and its subsidiaries engage in material operations in foreign countries, or if a material portion of sales or revenues is derived from customers in foreign countries, appropriate disclosure shall be made with respect to the importance of that part of the business to the registrant and the risks attendant thereto.

(1) State for each of the registrant's last five fiscal years, or for each fiscal year beginning after December 15, 1976, or for each fiscal year the registrant has been engaged in business, whichever period is less, and for each interim period in a fiscal year beginning after December 15, 1976 for which the registrant includes in the document a complete set of financial statements (i.e. balance sheet, income statement, statement of source and application of funds and notes to the financial statements) the information set forth in (i)–(iv) below. The information shall be presented as to the registrant's domestic operations in the aggregate and as to its foreign operations, either in the aggregate or by appropriate homogeneous geographic segment, if the revenue generated by the registrant's foreign operations from sales to unaffiliated customers is 10 percent or more of consolidated revenue or if the identifiable assets of the registrant's foreign operations are 10 percent or more of consolidated total assets as reported in the registrant's financial statements during either of the last two fiscal years or during the most recent interim period for which complete financial statements are furnished. Separate information about domestic operations need not be presented if the revenue from sales to unaffiliated customers and the identifiable assets of the domestic operations are less than 10 percent of related consolidated amounts.

(i) The amount of total sales and revenues with sales or transfers between geographic areas (i.e., intraenterprise transfers) shown separately. By footnote to the amount of intraenterprise sales or transfers, state: (A) The identity of the geographic area(s) (foreign and domestic) to which such sales/transfers by product or service were made and the amount(s) made to each; (B) the relationship between the per unit dollar amounts at which the intraenterprise sales/transfers were reflected and the per unit dollar amount of sales to unaffiliated third parties of identical products or services; and (C) the percentage of aggregate revenues of such identical products or services accounted for by the intraenterprise sales/transfers between the geographic areas.

(ii) The amount of operating profit or loss, net income or some other measure of profitability between operating profit or loss and net income as long as a common level of profitability is reported for all geographic areas.

(iii) The aggregate carrying amount of identifiable assets.

(iv) Reconciliations of the information about revenue, profitability, and identifiable assets to related amounts in the registrant's consolidated financial statements.

(2) State for each fiscal year and interim period specified in (d)(1) above, the amount of export sales from the registrant's home country to unaffiliated customers in foreign countries in the aggregate or by any appropriate geographic areas if the total amount of export sales contributed 10 percent or more to total sales to unaffiliated customers during either of the last two fiscal years or during the most recent interim period for which complete financial statements are provided.

Instruction. Registrants should note that the five-year period is merely a guide to disclosure and that disclosure of information regarding operations occurring outside this five-year period may be material under certain circumstances. Appendix A to this item contains definitions and guidelines for compliance with this paragraph and the required information may be presented in the form of the table set forth in Appendix C.

(e) The Commission may, upon written request of the registrant, and where consistent with the protection of investors, permit the omission of any of the information herein required or the furnishing in substitution therefor of appropriate information of comparable character. In addition to the information expressly required to be included in a registration statement, there shall be added such further material information, if any, as may be necessary to make the required statements, in the light of the circumstances under which they are made, not misleading.

APPENDIX A—DEFINITIONS AND GUIDELINES FOR COMPLIANCE WITH INDUSTRY AND HOMOGENEOUS GEOGRAPHIC SEGMENT REPORTING REQUIREMENTS

The definitions and guidelines set forth below are relevant to the segment reporting requirements of the business item of this form:

DEFINITIONS

Certain terms are defined as follows:

1. *Segment.* An industry segment or a homogeneous geographic segment.

2. *Industry segment.* A component of the business of a registrant and its subsidiaries (hereinafter registrant) engaged in providing a product or service or a group of related products or services primarily to unaffiliated customers (i.e., customers outside the registrant) for a profit.[24] Disaggregation of the vertically integrated operations of a registrant is not required.

3. *Foreign operations.* Those revenue-producing operations (except for unconsolidated subsidiaries and other unconsolidated investees) that (a) are located outside of the registrant's home country (the United States for U.S. enterprises) [25] and (b) are generating revenue either from sales to unaffiliated customers or from intraenterprise sales or transfers between geographic areas.[26]

4. *Homogeneous geographic segments.* Domestic operations, in the aggregate, and foreign operations, either in the aggregate or, if appropriate, by geographic areas.

5. *Domestic operations.* Those revenue-producing operations of the registrant located in its home country that generate revenue either from sales to unaffiliated customers or from intraenterprise sales or transfers between geographic areas. Sales to unaffiliated customers include both (a) sales to customers within the registrant's home country and (b) sales to customers in foreign countries.

6. *Export sales.* Sales to customers in foreign countries.

7. *Reportable segment.* An industry or a homogeneous geographic segment (or, in certain cases, a group of two or more closely related segments—see paragraph 19) for which information is required to be reported by Item 1 of this form.

8. *Revenue.* The revenue of an industry or homogeneous geographic segment includes revenue both from sales and transfers to unaffiliated customers (i.e., revenue from customers outside the business as reported in the registrant's income statement) and from intersegment or intraenterprise sales or transfers, if any, of products and services similar to those sold to unaffiliated customers.[27] Interest from sources outside the business and interest earned on intersegment or intraenterprise trade receivables is included in revenue if the asset on which the interest is earned is included among the segment's identifiable assets (see paragraph 10), but interest earned on advances or loans to other segments is not included.[28] For purposes of this Item, revenue from intersegment or intraenterprise sales or transfers shall be accounted for on the basis used by the registrant to price the intersegment or intraenterprise sales or transfers. If the basis is changed, disclosure shall be made of the nature of the change and its effect on the reportable segment's operating profit or loss in the period of change.

9. *Operating profit or loss.* The operating profit or loss of an industry segment is its revenue as defined in paragraph 8 minus all operating expenses. As used herein, operating expenses include expenses that relate to both revenue from sales to unaffiliated customers and revenue from intersegment sales or transfers; those operating expenses incurred by registrant shall be allocated on a reasonable basis among the industry segments for whose benefit the expenses were incurred. Methods used to allocate operating expenses among segments in computing operating profit or loss should be reasonable and consistently applied from period to period (but, if changed, disclosure shall be made of the nature of the change and its effect on the reportable segment's operating profit or loss

[24] In some industries, it is normal practice for a company to purchase and sell substantially identical commodities to minimize transporting or other costs. In those situations, sales and purchases of substantially identical commodities shall be netted for the purpose of determining whether a product or service or a group of related products or services is sold primarily to unaffiliated customers. Although those sales and purchases are netted for the purpose of identifying an industry segment, it is not intended that this rule change a registrant's accounting practice with respect to determining its revenue or that of any of its industry segments.

[25] A registrant whose home country is other than the United States but that prepares financial statements in conformity with U.S. generally accepted accounting principles shall classify operations outside of its home country as foreign operations.

[26] Difficulties may arise in classifying the activities of certain types of registrants. The following examples may provide useful guidelines: (1) Determination of whether the employment of a registrant's mobile assets, such as offshore drilling rigs or oceangoing vessels, constitutes foreign operations should depend on whether such assets are normally identified with operations located and generating revenue from outside the home country. If they are normally identified with the registrant's foreign operations, revenue generated from abroad would be considered foreign revenue. If they are normally identified with domestic operations, revenue generated from abroad would be considered export sales; (2) Services rendered by the foreign offices of a service company such as a consulting firm, having offices or facilities located both in the home country and in foreign countries, would be considered foreign operations, and the revenue should be considered foreign revenue. Revenue generated abroad from services, provided by domestic offices should be considered export sales.

[27] Intersegment billings for the cost of shared facilities or other jointly incurred costs do not represent intersegment sales or transfers as that term is used in this item.

[28] Interest earned on advances or loans to other segments is included in computing the operating profit or loss of a segment whose operations are principally of a financial nature (e.g., banking, insurance, leasing, or financing).

in the period of change). For purposes of this Item, intersegment purchases shall be accounted for on the same basis as intersegment sales or transfers (i.e., on the basis used by the registrant to price the intersegment sales or transfers). None of the following shall be added or deducted, as the case may be, in computing the operating profit or loss of an industry segment: Revenue earned at the corporate level and not derived from the operations of any industry segment; general corporate expenses; [29] interest expenses,[30] domestic and foreign income taxes; equity in income or loss from unconsolidated subsidiaries and other unconsolidated investees; gain or loss on discontinued operations; extraordinary items; minority interest; and the cumulative effect of a change in accounting principles.

10. *Identifiable assets.* The identifiable assets of a segment are those tangible and intangible enterprise assets that are used by the segment, including (i) assets that are used exclusively by that segment, and (ii) an allocated portion of assets used jointly by two or more segments. Assets used jointly by two or more segments shall be allocated among the segments on a reasonable basis. Because the assets of a segment that transfers products or services to another segment are not used in the operations of the receiving segment, no amount of those assets shall be allocated to the receiving segment. Assets that represent part of a registrant's investment in a segment, such as goodwill, shall be included in the segment's identifiable assets.[31] The identifiable assets of a segment shall not include advances or loans to or investments in another segment, except that advances or loans to other segments shall be included in the identifiable assets of a financial industry segment because the income therefrom is included in computing the financial segment's operating profit or loss (see footnote 5). Asset valuation allowances such as the following shall be taken into account in computing the amount of a segment's identifiabe assets: Allowance for doubtful accounts, accumulated depreciation, and marketable securities valuation allowance. With respect to industry segments, assets maintained for general corporate purposes (i.e., those not used in the operations of any industry segment) shall not be allocated to industry segments.

DETERMINATION OF REPORTABLE INDUSTRY SEGMENTS

11. The reportable segments of a registrant shall be determined by (a) identifying the individual products and services from which the registrant derives its revenue, (b) grouping those products and services by industry lines into industry segments (see paragraphs 12–14), and (c) selecting those industry segments that are significant with respect to registrant as a whole (see paragraphs 16–19).

[29] Some of the expenses incurred in a registrant's central administrative office may not be general corporate expenses, but rather may be operating expenses of segments that should therefore be allocated to those segments. The nature of an expense rather than the location of its incurrence shall determine whether it is an operating expense. Only those expenses identified by their nature as operating expenses shall be allocated as operating expenses in computing segment's operating profit of loss.

[30] Interest expense is deducted in computing the operating profit or loss of a segment whose operations are principally of a financial nature (e.g., banking, insurance, leasing, or financing).

[31] Any related depreciation or amortization expense is deducted in determining the operating profit or loss of the segment.

12. The determination of a registrant's industry segments must depend to a considerable extent on the judgment of the registrant's management. Nevertheless, a registrant's existing profit centers represent a logical starting point for determining the industry segments. The term "profit center" is used to refer to a registrant's individual products and services or groups of related products and services, particularly with respect to its domestic operations, that are sold primarily to outside markets and for which information about revenue and profitability is accumulated. If a registrant's existing profit centers cross industry lines, it will be necessary to disaggregate the existing profit centers into smaller groups of related products and services (except as provided in paragraph 15). If a registrant operates in more than one industry but does not presently accumulate any information on a less-than-total-enterprise basis (i.e., its only profit center is the enterprise as a whole), it shall disaggregate its operations along industry lines (except as provided in paragraph 15).

13. Among the factors that should be considered in determining whether products and services are related (and, therefore, should be grouped into a single industry segment) or unrelated (and, therefore, should be separated into two or more industry segments) are the following:

(a) *The nature of the product.* Related products or services have similar purposes or end uses. Thus, they may be expected to have similar rates of profitability, similar degrees of risk, and similar opportunities for growth.

(b) *The nature of the production process.* Sharing of common or interchangeable production or sales facilities, equipment, labor force, or service group or use of the same or similar basic raw materials may suggest that products or services are related. Likewise, similar degrees of labor intensiveness or similar degrees of capital intensiveness may indicate a relationship among products or services.

(c) *Markets and marketing methods.* Similarity of geographic marketing areas, types of customers, or marketing methods may indicate a relationship among products or services. For instance, the use of a common or interchangeable sales force may suggest a relationship among products or services. The sensitivity of the market to price changes and to changes in general economic conditions may also indicate whether products or services are related or unrelated.

14. Broad categories such as manufacturing, wholesaling, retailing, and consumer products are not per se indicative of the industries in which a registrant operates, and those terms should not be used without identification of a product or service to describe the industry segments.

15. Industry segmentation on a worldwide basis is a desirable objective but it may be impracticable for some registrants. To the extent that revenue and profitability information is accumulated along industry lines for a registrant's foreign operations, as defined in paragraph 3, or that it would be practicable to do so, industry segments shall be determined on a worldwide basis. To the extent that it is impracticable to disaggregate part or all of its foreign operations along industry lines, the registrant shall disaggregate along industry lines its domestic operations and its foreign operations for which disaggregation is practicable and shall treat the aggregate of its foreign operations for which disaggregation is not practicable as a single industry segment. When that segment qualifies as a reportable industry segment (see paragraphs 16–19), disclosure shall be made of the types of industry operations included in the foreign operations that have not been disaggregated.

16. An industry segment is identified as a reportable segment for which financial information must be presented (see paragraph 17)—if it satisfies one or more of the following tests in either of the last two fiscal years.

(a) Its revenue (including both sales to unaffiliated customers and intersegment sales or transfers) is 10 percent or more of the combined revenue (sales to unaffiliated customers and intersegment sales or transfers) of all of the registrant's industry segments.

(b) The absolute amount of its operating profit or operating loss is 10 percent or more of the greater, in absolute amount, of:

(i) The combined operating profit of all industry segments that did not incur an operating loss; or

(ii) The combined operating loss of all industry segments that did incur an operating loss.

(c) Its identifiable assets are 10 percent or more of the combined identifiable assets of all industry segments.

Revenue, operating profit or loss, and identifiable assets relating to those foreign operations that have not been disaggregated along industry lines on grounds of impracticability (see paragraph 15) shall be included in computing the combined revenue, combined operating profit or operating loss, and combined identifiable assets of the registrant's industry segments.

17. The results of applying the percentage tests in paragraph 16 shall be evaluated from the standpoint of interperiod comparability before final determination of a registrant's reportable segments is made. For instance, interperiod comparability would most likely require that an industry segment that has been significant in the past and is expected to be significant in the future be regarded as a reportable segment even though it fails to satisfy the tests in paragraph 16 in either fiscal year.

18. The combined revenue from sales to unaffiliated customers of all reportable segments (that is, revenue not including intersegment sales or transfers) shall constitute at least 75 percent of the combined revenue from sales to unaffiliated customers of all industry segments. The test shall be applied separately for each of the last two fiscal years. Revenue relating to those foreign operations that have not been disaggregated along industry lines on grounds of impracticability shall be included in the denominator of the computation required by this paragraph and will be included in the numerator if those operations have bene identified (in accordance with paragraphs 15 and 16) as a reportable segment. If the industry segments identified as reportable in accordance with paragraphs 16 and 17 do not satisfy the 75 percent test in this paragraph, additional industry segments shall be identified as reportable segments (subject to the provisions of this paragraph) until the 75 percent test is met.

19. As the number of industry segments tha would be identified as reportable segments in accordance with paragraphs 16–18 increases above 10, the question of whether a practical limit has been reached comes increasingly into consideration, and combining the most closely related industry segments into broader reportable segments may be appropriate. Combinations shall be made, however, only to the extent necessary to contain the number of reportable segments within practical limits while still meeting the 75 percent test.

DETERMINATION OF REPORTABLE FOREIGN HOMOGENEOUS GEOGRAPHIC SEGMENTS

20. If a registrant's foreign operations are conducted in two or more geographic areas as defined in paragraph 21 the financial information required by this item shall be

presented separately for each significant foreign geographic area, and in the aggregate for all other foreign geographic areas not deemed significant. A geographic area shall be regarded as significant, for the purpose of applying this paragraph, if its revenue from sales to unaffiliated customers or its identifiable assets are 10 percent or more of related consolidated amounts.

21. Foreign geographic areas are individual countries or groups of countries as may be determined to be appropriate in registrant's particular circumstances. No single method of grouping the countries in which a registrant operates into the geographic areas can reflect all of the differences among international business environments. Each registrant shall group its foreign operations on the basis of the differences that are most important in this particular circumstances. Factors to be considered include proximity, economic affinity, similarities in business environments, and the nature, scale, and degree of interrelationship of the registrant's operations in the various countries.

APPENDIX B—INDUSTRY SEGMENT REPORTING

The table set forth below is an illustration of the presentation in tabular form of the information required by paragraph (c)(1) of the business item regarding industry segments.

Financial information relating to industry segments

	Industry segment A	Industry segment B	Other industry segments	Adjustments and eliminations	Consolidations
Sales to unaffiliated customers (year):					
1					
2					
3					
4					
5					
Intersegment sales (year):					
1					
2					
3					
4

4					
5					

[1] Or appropriate area of domestic operations.
[2] Or some other reasonable measure of profitability.

ITEM 2. DESCRIPTION OF PROPERTY

(a) State briefly as to each of registrant's industry segments discussed in Item 1 the location and general character of the principal plants, mines and other materially important physical properties of the registrant and its subsidiaries. If any such property is not held in fee or is held subject to any major encumbrance, so state and briefly describe how held. (The remainder of this item would be the same as existing Item 10 of Form S–1 except for changes in cross references and the inclusion of information relevant to filings under the Exchange Act.)

2. Item 1 of Form 10 is proposed to be revised to read as follows:

§ 249.210 Form 10, general form for registration of securities pursuant to section 12 (b) or (g) of the Securities Exchange Act of 1934.

* * * * *

ITEM 1. BUSINESS

(a) State the year in which the registrant was organized and its form of organization (such as "a corporation," or "unincorporated association" or other appropriate statement).

(b) The description of the business shall include the information required by Item 1 of Form S–K.

(c) (This paragraph is the same as Instruction 9 to Item 1 of Form 10 and the Note thereto.)

* * * * *

3. Item 1 of Form 10–K is proposed to be revised to read as follows:

§ 249.310 Form 10–K, annual report pursuant to section 13 or 15(d) of the Securities Exchange Act of 1934.

* * * * *

ITEM 1. BUSINESS

The description of the business shall include the information required by Item 1 of Form S–K.

4. Item 9 of Form S–1 is proposed to read as follows:

§ 239.11 Form S–1, registration statement under the Securities Act of 1933.

* * * * *

ITEM 9. DESCRIPTION OF BUSINESS

(a) The description of the business shall include the information required by Item 1 of Form S–K.

(b) (This paragraph is the same as Instruction 9 to Item 9 of Form S–1 and the Note thereto.)

* * * * *

5. Paragraphs (b) and (d) of Item 5 of Form S–7 are proposed to be amended to read as follows:

§ 239.26 Form S–7, for registration under the Securities Act of 1933 of securities of certain issuers.

* * * * *

ITEM 5. BUSINESS

(a) * * *

(b) Information relating to industry segments and classes of similar products and services shall be furnished in accordance with the provisions of paragraph (c) of Item 1 of Form S–K.

(c) * * *

(d) Information relating to foreign operations and export sales shall be furnished in accordance with the provisions of paragraph (d) of Item 1 of Form S–K.

* * * * *

6. Item 18 of Form S–8 is proposed to be amended to read as follows:

§ 239.16b Form S–8, for registration under the Securities Act of 1933 of securities to be offered to employees pursuant to certain plans.

* * * * *

(a) Include a description of the business done by the issuer and its subsidiaries during the fiscal year which will, in the opinion of management, indicate the general nature and scope of the business of the issuer and its subsidiaries. Information relating to the issuer's industry segments; classes of similar products and services, foreign operations and export sales shall be furnished in accordance with paragraphs (c) and (d) of Item 1 of Form S–K.

* * * * *

7. Paragraph (b)(8) of Item 14 of Securities Exchange Act Schedule 14A is proposed to be amended to read as follows:

§ 240.14a–101 Schedule 14A. Information required in proxy statements.

Item 14. * * *

(b) * * *

(8) Information relating to the issuer's industry segments, classes of similar products and services, foreign operations and export sales shall be furnished in accordance with the provisions of paragraphs (c) and (d) of Item 1 of Form S–K.

8. Paragraph (b)(6) of Rule 14a–3 and Paragraph (a)(6) of Rule 14c–3 are proposed to be amended to read as follows:

§ 240.14a–3 Information to be furnished to security holders.

§ 240.14c–3 Annual report to be furnished security holders.

* * * * *

(6) The report shall contain information relating to the issuer's industry segments, classes of similar products and services, foreign operations and export sales furnished in accordance with the provisions of paragraphs (c) and (d) of Item 1 of Form S–K.

* * * * *

9. Item 10 of Form S–1, Item 3 of Form 10 and Item 3 of Form 10–K are proposed to be amended to read as follows:

§ 239.11 Form S–1, registration statement under the Securities Act of 1933.

§ 249.210 Form 10, general form for registration of securities pursuant to section 12 (b) or (g) of the Securities Exchange Act of 1934.

§ 249.310 Form 10–K, annual report pursuant to section 13 or 15(d) of the Securities Exchange Act of 1934.

* * * * *

PROPERTIES

Information relating to properties shall be furnished in accordance with the provisions of Item 2 of Form S–K.

10. Paragraph (a) of Instruction 13 of the Instructions as to Exhibits of Form S–1 and Paragraph (a) of Instruction 9 of the Instructions as to Exhibits of Form 10 are proposed to read as follows:

§ 239.11 Form S–1, registration statement under the Securities Act of 1933.

§ 249.210 Form 10, general form for registration of securities pursuant to section 12 (b) or (g) of the Securities Exchange Act of 1934.

* * * * *

(a) Copies of every contract material to an industry segment and not made in the ordinary course of business which is to be performed in whole or in part at or after the filing of the registration statement or which was made not more than two years before filing, except contracts called for, or the omission of which is expressly authorized by the foregoing instructions. Only contracts need be filed as to which the registrant or a subsidiary of the registrant is a party or has succeeded to a party by assumption or assign-

ment. or in which the registrant or such subsidiary has a beneficial interest.

* * * * *

STATUTORY AUTHORITY FOR PROPOSED AMENDMENTS

The foregoing amendments to Forms S–1, S–7 and S–8 are proposed pursuant to section 6, 7, 8, 10 and 19(a) of the Securities Act and the revisions submitted as to Forms 10 and 10–K and to Regulation 14A are proposed pursuant to sections 6, 7, 8, 10 and 19(a) of the the Exchange Act, sections 12(e) and 20(a) of the Public Utility Holding Company Act of 1935, and sections 20(a) and 38(a) of the Investment Company Act of 1940.

Pursuant to section 23(a)(2) of the Exchange Act, the Commission has considered the impact that these proposals would have on competition and is not aware, at this time, of any burden that such rules, if adopted, would impose on competition not necessary or appropriate in furtherance of the purposes of that Act. However, the Commission specifically invites comments as to the competitive impact of these proposals, if adopted.

In addition, the Commission is mindful of the cost to registrants and others of its proposals and recognizes its responsibilities to weigh with care the costs and benefits which result from its rules. Accordingly, the Commission specifically invites comments on the costs to registrants and others of the adoption of the proposals published herein.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

Office of the Secretary

■

WALSH-HEALEY PUBLIC CONTRACTS ACT

Procedures and Interpretation

DEPARTMENT OF LABOR

Office of the Secretary

[41 CFR Part 50–201 and 50–206]

WALSH-HEALEY PUBLIC CONTRACTS ACT

Procedures and Interpretation

AGENCY: Department of Labor.

ACTION: Proposed rule.

SUMMARY: It is proposed to amend our regulations and codify our interpretations issued under the Walsh-Healey Public Contracts Act. Experience has demonstrated a need for these clarifying and interpretative amendments.

DATE: Comments on this proposal will be received until June 20, 1977.

ADDRESSES: Comments should be sent to the Administrator, Wage and Hour Division, Room S3502, New Department of Labor Building, 200 Constitution Avenue, NW., Washington, D.C., 20210. The comments may be examined during regular working hours. After expiration of the time for submitting comments the comments will be evaluated and appropriate action taken.

FOR FURTHER INFORMATION CONTACT:

Alvin Bramow, Deputy Associate Solicitor, Division of General Legal Services, Office of the Solicitor, Room N2464, New Department of Labor Building, 200 Constitution Ave., NW., Washington, D.C. 20210, phone 202–523–8293.

SUPPLEMENTARY INFORMATION: It is proposed to codify in 41 CFR Part 50–201 the fact that Walsh-Healey Public Contracts Act determinations of eligibility of a bidder as a manufacturer or regular dealer are usualy made by the contracting officer and reviewed by the Department of Labor. It is further proposed to codify our position that bad faith misrepresentations concerning a bidder's being a regular dealer or manufacturer are a basis for the contracting officer's voiding the contract *ad initio*. Also new Walsh-Healey Act regulations issued by agencies other than the Department of Labor would require approval of the Administrator prior to becoming effective. Current regulations would not require such approval and would remain in effect except for those at variance with Department of Labor Regulations. Interpretation of the terms manufacturer, assembler and regular dealer are proposed to be included in a new part, 41 CFR Part 50–206.

This document was prepared under the direction and control of Warren D. Landis, Acting Administrator, Wage and Hour Division, Room S3502, New Department of Labor Building, 200 Constitution Ave., N.W., Washington, D.C. 20210, phone 202–523–8305.

Accordingly, it is proposed to amend Part 50 of Title 41 as follows:

1. It is proposed to amend Part 50–201 by adding a new paragraph (b) to § 50–201.101, making the present section into paragraph (a) with appropriate redesignation of the subparagraphs therein, as follows:

PART 50–201—GENERAL REGULATIONS

§ 50–201.101 Manufacturer or regular dealer.

(a) *Definitions.* A bidder or contractor shall be deemed to be a "manufacturer" or "regular dealer" within the meaning of the stipulation required by section 1(a) of the act and § 50–201.1(a) if he falls within one of the following categories:

(1) A manufacturer is a person who owns, operates, or maintains a factory or establishment that produces on the premises the materials, supplies, articles, or equipment required under the contract and of the general character described by the specifications.

(2) A regular dealer is a person who owns, operates, or maintains a store, warehouse, or other establishment in which the materials, supplies, articles, or equipment of the general character described by the specifications and required under the contract are bought, kept in stock, and sold to the public in the usual course of business.

(i) A regular dealer in lumber and timber products, if a wholesale lumber dealer, may be a person who owns, operates, or maintains a place of business in which the materials, supplies, articles, or equipment of the general character described by the specifications and required under the contract are bought for the account of such person and sold to the public in the usual course of business: *Provided,* That at least more than 50 percent of his business is such purchase and sale of such materials, supplies, articles, or equipment; *And provided further,* That upon all orders to manufacturers for direct shipment to the United States he agrees to insert a notice to the manufacturer to the effect that the supplies are purchased for the United States and that the manufacturer is within the terms of § 50–201.104 requiring compliance with the provisions of the Public Contracts Act.

(ii) A machine tool dealer may be a person possessing, through contract or agreement with a manufacturer, the responsibility for selling that manufacturer's products, with respect to a specific territory and who is authorized by such manufacturer to offer its products and to negotiate and conclude contracts for the furnishing thereof: *Provided,* That upon all orders to manufacturers for direct shipment to the United States he agrees to insert a notice to the manufacturer to the effect that the supplies are purchased for the United States and that the manufacturer is within the terms of § 50–201.104 requiring compliance with the provisions of the Public Contracts Act.

(iii) A regular dealer in hay, grain, feed, or straw may be a person who owns, operates, or maintains a store, warehouse, or other place of business in which the materials, supplies, articles, or equipment of the general character described by the specifications and required under the contract are bought for the account of such person and sold to the public in the usual course of business, and whose principal business is such purchase and sale of such materials, supplies, articles, or equipment.

(iv) A regular dealer in raw cotton may be a person who owns, operates or maintains a store, warehouse, or other place of business in which materials, supplies, articles or equipment of the general character described by the specifications and required under the contract are bought for the account of such person and sold to the public in the usual course of business, and whose principal business is such purchase and sale of such materials, supplies, articles, or equipment.

(v) A regular dealer in green coffee may be a person who owns, operates or maintains a store, warehouse, or other place of business in which materials, supplies, articles or equipment of the general character described by the specifications and required under the contract are bought for the account of such person and sold to the public in the usual course of business, and whose principal business is such purchase and sale of such materials, supplies, articles or equipment.

(vi) A regular dealer in petroleum may be a person who owns, operates, or maintains petroleum distribution equipment and a store, warehouse, or other place of business in which petroleum products of the general character described by the specifications and required under the contract are bought for the account of such person and sold to the public in the usual course of business, and whose principal business is such purchase and sale of such petroleum products.

(vii) A regular dealer in agricultural liming materials may be a person who owns or controls the necessary equipment customarily required for delivering agricultural liming materials to farms or for spreading such materials on fields, who has made arrangements to purchase liming materials of the general character described by the specifications and required under the contract from a manufacturer, and who offers such material for sale to the public in the usual course of business.

(viii) A regular dealer in tea may be an importer who owns, operates, or maintains a store, warehouse, or other place of business in which materials, supplies, articles or equipment of the general character described by the specifications and required under the contract are bought for the account of such person and sold to the public in the usual course of business.

(ix) A regular dealer in raw or unmanufactured cotton linters may be a person who owns, operates or maintains a store, warehouse, or other place of business in which materials, supplies, articles, or equipment of the general character described in the specifications and required under the contract are bought for the account of such person and sold to the public in the usual course of business, and whose principal business is such purchase and sale of such materials, supplies, articles, or equipment.

(x) A regular dealer in used automatic data processing equipment may be a person who owns or controls previously owned or used items, materials, supplies, articles, or equipment of the general character described in the specifications and required under the contract and who offers such items for sale to the public in the usual course of business and whose principal business is the purchase and sale of such items, materials, supplies, articles, or equipment.

(3) (i) (A) Except as hereinafter provided, every bid received from any bidder who does not fall within one of the foregoing categories shall be rejected by the contracting officer.

(B) If it is discovered after an award that the bidder did not act in good faith in representing that it was a manufacturer or regular dealer within the meaning of the stipulations as interpreted in this Chapter 50, such contract shall, immediately upon such discovery, be voided *ab initio* by the contracting officer. Lack of good faith may be inferred from the facts in the case.

(ii) Whenever justice and the public interest will be served, bids for a contract or class of contracts will be exempted from the foregoing requirement by the Secretary of Labor upon the request of the head of the contracting agency or department when accompanied by his finding of fact that it will be so difficult to obtain satisfactory bids for the contract or class of contracts under the stipulated restrictions, that the conduct of the Government business will be seriously impaired.

(b) *Determination of eligibility.* (1) The responsibility for applying the stated eligibility requirements in order to determine whether or not a bidder is qualified as a manufacturer or regular dealer before award rests in the first instance with the contracting agency pursuant to authority delegated by the Secretary of Labor in accordance with section 4 of the Act. (Circular Letter 8–61.) Contracting agencies shall obtain and consider all available factual evidence essential to eligibility determinations for all bidders on contracts subject to the Act.

(2) Any decision of the contracting agency is subject to review by the Department of Labor according to the procedures outlined below. The decision of the Department of Labor shall be final with respect to the procurement or procurements at issue.

(3) The Department of Labor shall give great weight to the technical knowledge and expertise of the contracting agencies and the Department of Labor shall uphold the contracting agencies' initial determinations unless the determinations are found to be arbitrary, capricious or otherwise not in accordance with the evidence presented or with the law.

(4) The Department of Labor may determine the qualifications of a bidder in the first instance in the absence of any decision by the contracting agency.

(5) The contracting agency shall investigate and determine the Walsh-Healey eligibility status of a bidder in at least the following circumstances and shall not merely rely on the representation or affirmation of a bidder:

(i) In all cases where a bidder has not previously been awarded a contract subject to the Act by the individual procuring office;

(ii) In all cases where a pre-award investigation or survey of a bidder's operations is otherwise made;

(iii) In all cases where there is a protest of a bidder's eligibility; and

(iv) In all cases where a contracting officer may have reason to question a bidder's eligibility, such as where the proposed place of contract performance and shipment is other than the location of the bidder's place of business.

(6) The following procedures shall be utilized by the contracting officer in processing an eligibility case:

(i) When the contracting officer has determined that an apparently successful bidder or offeror is ineligible, the contracting officer shall promptly notify the bidder or offeror in writing that:

(A) It does not meet the eligibility requirements, and the specific reason therefor;

(B) If it wishes to protest such determination, it may submit any evidence concerning its eligibility to the contracting officer within a reasonable time as set by the contracting officer; and

(C) If, after review of the evidence submitted by the bidder or offeror, the contracting officer does not reverse the decision, the bidder's or offeror's protest, together with all pertinent evidence, will be forwarded to the Administrator of the Wage and Hour Division of the Department of Labor for a final determination, and the bidder or offeror will be so notified.

(ii) When another bidder or offeror challenges the eligibility of the apparently successful bidder or offeror prior to award:

(A) The contracting officer shall promptly notify the protestor and the apparently successful bidder or offeror in writing:

(*1*) That they may submit evidence concerning the matter to the contracting officer within a reasonable time as set by the contracting officer; and

(*2*) That after review of such evidence, the contracting officer will direct a preaward survey, if necessary, and reach a decision on all the evidence. The contracting officer shall then forward the decision and entire record to the Administrator of the Wage and Hour Division for a final determination.

(iii) (A) If the contracting officer forwards the case to the Department of Labor for review of eligibility under the Act, award will be held in abeyance until the contracting officer receives a final determination from the Department of Labor, unless the contracting officer finds that award should be made immediately because:

(*1*) The items to be procured are urgently required; or

(*2*) Delay of delivery or performance by failure to make the award promptly will result in substantial hardship to the Government.

(B) If the contracting officer decides to proceed with the award, the contracting officer shall give written notice of the decision to proceed to the protester, the Department of Labor and to other concerned parties.

(iv) If an award is made under paragraph (b) (6) (iii) of this section, the contracting officer shall submit to the Department of Labor documentation explaining the need for making an award prior to the receipt of a final determination from the Administrator of the Wage and Hour Division.

(v) A protest received after award, but before final completion of the contract, shall be investigated and processed under the provisions outlined in paragraph (b) (6) (ii) of this section and forwarded to the Department of Labor, and the protestor shall be so notified.

(vi) If the contract has been completed before receipt of the protest, the protester shall be notified that no action will be taken on the protest.

2. It is proposed to add to Part 50–201 a new § 50–201.301 reading as follows:

§ 50–201.301 Agency regulations.

The head of each agency shall prescribe regulations for the administration of the Walsh-Healey Public Contracts Act and the regulations in this part. Agency regulations, directives and orders for such purpose shall be submitted to the Administrator of the Wage and Hour Division prior to issuance and may not be enforced prior to approval by the Administrator or prior to 60 days after submission if not disapproved by the Administrator. Currently existing regulations are not affected by this section, except where such regulations are not in conformity with the Walsh-Healey Public Contracts Act and the Department of Labor regulations. In such cases, agency regulations shall be appropriately revised.

3. It is proposed to add a new Part 50–206 to Chapter 50, Title 41, as follows:

PART 50–206—THE WALSH-HEALEY PUBLIC CONTRACTS ACT INTERPRETATIONS

Subpart A—General

Sec.	
50–206.1	The Walsh-Healey Public Contracts Act.
50–206.2	Administration of the Act.
50–206.3	Purpose and scope of this part.

Subpart B—[Reserved]

Subpart C—Contractors

QUALIFICATION OF CONTRACTOR

50–206.50	To whom covered contracts may be awarded—eligibility.
50–206.51	Manufacturer.
50–206.52	Assembler.
50–206.53	Regular dealer.
50–206.54	Regular dealer in particular products.
50–206.55	Agents.
50–206.56	Administrative exemptions.

AUTHORITY: Sec. 4, 49 Stat. 2038, 41 U.S.C. 38, Secretary of Labor's Order No. 16–75, 40 FR 55913, and Employment Standards Order 2–76, 41 FR 9016.

Subpart A—General

§ 50–206.1 The Walsh-Healey Public Contracts Act.

The Walsh-Healey Public Contracts Act, as amended (41 U.S.C. 35–45), hereinafter referred to as the Act, was enacted "to provide conditions for the purchase of supplies and the making of contracts by the United States." It is not an act of general applicability to industry. The Supreme Court has described it as an instruction by the Government to its agents who were selected and granted final authority to fix the terms and conditions under which the Government will permit goods to be sold to it. Its purpose, according to the Supreme Court, "was to impose obligations upon those favored with Government business and to obviate the possibility that any part of our tremendous national expenditures would go to forces tending to depress wages and purchasing power and offending fair social standards of employment." ("Perkins v. Lukens Steel Co.," 310 U.S. 113, 128 (1940); "Endicott Johnson Corp. v. Perkins," 317 U.S. 501 (1943).) To this end, the Act requires those who enter into contracts to perform Government work subject to its terms to adhere to specifically prescribed representations and stipulations as set forth in 41 CFR 50–201.1 pertaining to qualifications of contractors, minimum wages, overtime pay, safe and sanitary working conditions of workers employed on the contract, the use of child labor or convict labor on the contract work, and the enforcement of such provisions. Except as otherwise specifically provided, these representations and stipulations are required to be included in every contract "for the manufacture or furnishing of materials, supplies, articles, and equipment in any amount exceeding $10,000" which is made and entered into by an agency of the United States or other entity as designated in section 1 of the Act, hereinafter referred to as "contracting agency." Contractors performing work subject to the Act thus "enter into competition to obtain government business on terms of which they are fairly forewarned by inclusion in the contract." ("Endicott Johnson Corp. v. Perkins, supra," 317 U.S. at 507.) The Act also provides for enforcement of the required representations and stipulations by various methods. Certain exemptions from the application of the Act are provided in section 9 of the statute. Other exemptions, variations, and tolerances may be provided under section 6 of the statute by the Secretary of Labor or the President.

§ 50–206.2 Administration of the Act.

(a) The Secretary of Labor is authorized and directed to administer the provisions of the Act, to make investigations, findings, and decisions thereunder, and to make, amend, and rescind rules and regulations with respect to its application (see sections 4 and 5). The Supreme Court has recognized that the Secretary may issue rulings defining the coverage of the Act. ("Endicott Johnson Corp. v. Perkins, supra".) According to the Court (ibid.), in the statute as originally enacted "Congress submitted the administration of the Act to the judgment of the Secretary of Labor, not to the judgment of the courts." An amendment to the Act in 1952 added specific provisions for judicial review (see section 10). The Secretary has promulgated regulations to carry out provisions of the Act, which are set forth elsewhere in this chapter (Part 50–201 (general regulations); Part 50–202 (minimum wage determinations); Part 50–203 (rules of practice); and Part 50–204 (Safety and Health Standards)). The Secretary of Labor has delegated to the Administrator of the Wage and Hour Division through the Assistant Secretary for Employment Standards the authority to promulgate regulations and to issue official rulings and interpretations. So long as such regulations, rulings, and interpretations are not modified, amended, rescinded, or determined by judicial authority to be incorrect, they may be relied upon as provided in section 10 of the Portal-to-Portal Act of 1947 (61 Stat. 84, 29 U.S.C. 251, et seq., discussed in 29 CFR Part 790). Furthermore, these interpretations are intended to indicate the construction of the law which the Department of Labor believes to be correct and which will be followed in the administration of the Act unless and until directed otherwise by Act of Congress or by authoritative rulings of the courts. ("Skidmore v. Swift & Co.", 323 U.S. 134 (1944), "Roland Co. v. Walling", 326 U.S. 657 (1946); "Endicott Johnson Corp. v. Perkins, supra", and "Perkins v. Lukens Steel Co., supra".)

(b) The courts have held that the "interpretations of the Walsh-Healey Act and the regulations adopted thereunder, as made by the Secretary of Labor acting through his Administrator, are both correct and reasonable." ("Jno. McCall Coal Company v. United States," 374 F. 2d 689, 692 (C.A. 4, 1967); see also "United States v. Davison Fuel and Dock Company," 371 F. 2d 705, 711–714 (C.A. 4, 1967).) These policies are designed to protect not only employees but also the competitive interest of all firms qualified to compete for covered contracts.

§ 50–206.3 Purpose and scope of this part.

It is the purpose of this Part 50–206 to make available, in codified form for the guidance of agencies of the United States or other entities designated in section 1 of the Act and persons or firms contracting therewith, official rulings and interpretations with respect to the Walsh-Healey Public Contracts Act. This part constitutes the official statement of the position of the Department of Labor in matters relating to this Act. The interpretative rules herein stated supersede, to the extent of any inconsistency, Rulings and Interpretations No. 3 and all other rulings, interpretations, and enforcement policies not set forth in this chapter. This Part 50–206 illustrates the principles stated herein by showing their application to situations which frequently arise. Since it cannot include every possible situation, no inference should be drawn from the fact that a subject or illustration is omitted. If doubt arises, inquiries should be directed to the Administrator of the Wage and Hour Division, United States Department of Labor, Washington, D.C. 20210, or to any Regional Office of the Wage and Hour Division.

Subpart B—[Reserved]

Subpart C—Contractors

Qualifications of Contractors

§ 50–206.50 To whom covered contracts may be awarded—eligibility.

(a)(1) Section 1(a) of the Act requires that every contract subject to the Act shall contain a representation and stipulation by the contractor that it is either "the manufacturer of or a regular dealer in" the commodities to be manufactured or used in the performance of the contract. As noted in the following sections, these terms are defined by regulation. The legislative history makes it clear that this statutory requirement is intended, among other things, to eliminate the award of contracts to "bid brokers," and to provide labor standards protection for employees who actually engage in the manufacture or furnishing of the goods to the Government, by requiring, among other things, that the Government award contracts only to bona fide manufacturers or regular dealers. A breach of this required stipulation is a violation of the Act; however, a contractor who has been awarded a contract in spite of its failure to qualify as a manufacturer or regular dealer is not relieved of its obligation to comply with the other requirements of the Act and regulations, which are also contract stipulations.

(2) In implementing Section 1(a) of the Act, the Secretary of Labor has defined in 41 CFR 50–201.101 the terms "manufacturer" and "regular dealer" by stating the affirmative requirements that must be met by potential contractors before they may receive Government contracts subject to he Act. Every bid from any bidder who is not a manufacturer or regular dealer, as defined therein and in accordance with this subpart, must be rejected by the contracting officer. See 41 CFR 50–201.101 (a)(3)(i).

(3) The provisions of 41 CFR 50–201.1 require that the representations and stipulations prescribed in section 1 of the Act must be included in invitations to bid and in contracts subject to the Act, either in full or by incorporation by reference. Since no qualifications may be placed on the required representations and stipulations, any bid which seeks to avoid full compliance with the Act by any qualification or reservation must be rejected. (See 16 Comp. Gen. 593.)

(b) The responsibility for applying the stated eligibility requirements in order to determine whether or not a bidder is qualified as a manufacturer or regular dealer before award rests in the first instance with the contracting agency pursuant to authority delegated by the Secretary of Labor in accordance with section 4 of the Act (Circular Letter 8–61), as detailed in § 50–201.101(b) of Part 50–201 of this chapter. It is the obligation of the contracting agencies to obtain and consider all factual evidence essential to eligibility determinations for all bidders on contracts subject to the Act.

§ 50–206.51 Manufacturer.

(a)(1) Section 50–201.101(a)(1) of Regulations 41 CFR Part 50–201, defines a manufacturer as a "person who owns, operates, or maintains a factory or establishment that produces on the premises the materials, supplies, articles, or equipment required under the contract and of the general character described by the specifications."

(2) Generally, there should be no question as to a bidder's eligibility. The bidder either has, or has not, the requisite plant, equipment and personnel to produce on its own premises the goods called for under the Government contract.

(b) A bidder who desires to qualify for an award as a manufacturer must show before the award that it is (1) an established manufacturer of the particular good or goods of the general character sought by the Government (i.e., that the bidder has a plant, equipment and personnel to manufacture on its own premises the goods called for under the contract) or (2) if the bidder is "newly entering" into such manufacturing activity that the bidder has made all necessary prior arrangements and definite commitments for (i) manufacturing space, (ii) equipment, and (iii) personnel to perform on its own premises the manufacturing operations required for the fulfillment of the contract. A new firm which, prior to the award of a contract, has made such definite prior arrangements and commitments in order to enter a manufacturing business which will qualify it should not be barred from receiving the award because it has not yet done any manufacturing, even if such arrangement and commitments are contingent upon the award of a Government contract. However, in order to meet the "definite commitment" test for "newly entering" firms, the bidder must have entered into written, legally binding arrangements and commitments prior to, even though contingent upon, award, under which the bidder would acquire for itself plant, equipment and personnel if awarded the Government contract. This would be evidence of a bona fide intent to establish a continuing manufacturing entity and, as such, to become an eligible manufacturer. This requirement is intended to exclude from eligibility bidders who make unsubstantiated assertions that they are eligible and then totally subcontract or broker the contract after award.

(c)(1) In general, such "newly entering" firm must show that the manufacturing activity in question is not one which has been set up solely to produce on a Government contract and whose operations will be terminated upon completion of that contract. In effect, the firm must have established arrangements on a continuing basis for production of the goods desired by the Government.

(2) The documentation required to evidence prior arrangements and definite commitments will vary depending upon the facts and circumstances of the particular case. The contents and bona fides of all documentation and arrangements must be examined to determine if the spirit and intent of the Act and the regulations have been met. The following are examples of what the Department of Labor considers as sufficient evidence of all necessary prior arrangements and definite commitments:

(i) Manufacturing space can be either owned or leased by and in the name of the bidder. A recorded deed to the bidder's property in which the manufacturing is to take place, or a copy of a properly executed bona fide lease agreement clearly identifying the manufacturing space and setting forth the terms and conditions of the lease, would generally be considered evidence of prior arrangements and definite commitments for space. In addition, as noted above, any such lease agreement must be legally binding on the part of both parties to the agreement, the space must be for the exclusive and unrestricted use of the lessee, and the term of the lease must be of sufficient duration so that the bidder will be able to clearly fulfill the contract before the lease expires.

(ii)(A) The bidder must own or have made written, legally binding definite commitments to purchase or lease sufficient equipment to manufacture the goods, materials, or articles required for contract fulfillment. A bidder must have full, complete and unrestricted control of the necessary equipment. A bill of sale or a purchase order may evidence definite commitments for equipment. The general requirements with respect to a bill of sale or purchase order are that it be dated and signed by the bidder, specifically identifying and describing the equipment and the terms of payment for the equipment purchased or to be purchased, and containing the date by which the vendor delivered or is required to deliver the equipment.

(B) The vendor must provide written evidence of acceptance, such as a bill or invoice, acknowledging receipt of the purchase order, as written, and setting forth the terms of payment in accordance with prevailing business practice. Such documentation is normally associated with the consummation of a sale in the usual conduct of business transactions.

(C) Letters of intent for space and equipment or vendor quotations or offers to sell or lease space or equipment, or affidavit that a sale or conveyance has occurred, do not constitute legally binding contractual agreements or definite commitments.

(iii) The best evidence of available personnel is the presence on the payroll of the manufacturing employees necessary to fulfill the contract. However, affirmative evidence which the bidder submits showing what prior arrangements and definite commitments it has made to hire its own manufacturing personnel will be considered.

(d) A bidder's mere representation or affirmation that he is a qualified manufacturer or has fulfilled the above applicable conditions is insufficient. Evidence must be presented to the contracting agency which shows that these conditions are, in fact, met prior to any award of a contract subject to the Act. If it is discovered after an award that the bidder did not act in good faith by actually fulfilling these acquisition requirements, such contract award shall, in accordance with § 50–201.101(a)(3)(i)(A) immediately upon such discovery, be voided *ab initio* by the contracting officer.

(e) The plain language of the Act and regulations makes it clear that covered contracts are to be awarded only to contractors who are currently capable of manufacturing on their premises the goods called for under the contract or who, if newly entering into manufacturing, have made binding commitments before award to enable them to produce such goods as discussed above. Thus, a bidder's arrangements to use, rent, or share the equipment, personnel, or space of another legal entity on a time and material or "as needed" basis do not constitute the making of all necessary prior arrangements or definite commitments. (See "In re Metalcraft Mfg. Sale Corp.", 15 WH Cases 557, 566 (1962).) The Department has consistently held that the availability of the manufacturing and producing establishments of others does not qualify the contractor as a manufacturer as the term is defined herein. See, for example, "In re Electric Ventilating Corp.", 13 WH Cases 220, "In re Dimensional Displays", 12 WH Cases 847, and "In re Paramount Industries, Inc.", 11 WH Cases 721.

(f) Every bidder must qualify in its own right as a manufacturer under the Act. Therefore, all evidence documenting a bidder's eligibility must be in the name of the bidder. Arrangements or proposals for subcontracting, or a bidder's affiliation or relation with another firm, even one having the same officers or ownership, are not definite commitments nor are they evidence of the bidder's own eligibility as a manufacturer, even though such affiliate or subcontractor might be a qualified manufacturer. The fact that one legal entity may qualify as a manufacturer does not confer such status upon another legal entity. (See Decision of the Hearing Examiner, "In re Alden Industries, Inc.," PC–551, March 16, 1954; "In re Alsco Commercial Furniture Co., Inc.," PC–469, July 16, 1952.)

(g) A bidder's eligibility status on a previous Walsh-Healy contract or its performance as a subcontractor on Walsh-Healy contracts are not determinative evidence of the bidder's present eligibility as a manufacturer.

(h) Activities such as engineering, planning, design, inspection, quality control, testing, marking, packaging, and repackaging and shipping may be incidental, ancillary or necessary to manu-

facturing. Nevertheless, such operations are not, standing alone, or in combination, considered "manufacturing," i.e. fabrication or production. The proposed performance solely of such activities does not qualify a firm as a manufacturer.

(i) A certificate of competency issued by the Small Business Administration is not material to Walsh-Healey eligibility status or determinations. As stated by the Comptroller General in Decision B–135444 (37 Comp. Gen 676, 678):

"Since by its terms section 213 of the Small Business Act, 15 U.S.C. 642, makes conclusive the Administration's certification of a small business concern as competent with respect to 'capacity and credit,' we think such provision must be construed as controlling only insofar as it conflicts with a determination by a procurement officer as to the 'capacity or credit' of a bidder. However, if a bidder is found not to be qualified for other reasons, as for example • • • if he is found not to be a 'manufacturer' or 'regular dealer' • • • under the • • • (Walsh-Healey Public Contracts Act) in our view the certificate of competency, being limited by statute to 'capacity and credit,' would not be determinative of the award to be made."

(See also Decision of the Comptroller General, B–152716, dated January 27, 1964 (not officially published); B–176738, dated August 30, 1972 (not officially published); B–180384, dated January 21, 1974 (not officially published); and "GSE Dynamics, Inc. v. Doe," 381 F. Supp. 1088 (E.D. N.Y., 1974).)

§ 50–206.52 Assembler.

(a) As a result of changing technology in the area of manufacturing, the Department has concluded that it is now necessary to provide a fuller discussion of the standards that an assembler must meet to qualify as a manufacturer.

(b)(1) "Assembly" means piecing or bringing together various interdependent or interrelated parts or components so as to make an operable whole or unit. (Decision of the Comptroller General, B–164770, September 3, 1968 (not officially published).) A firm which produces final items on its premises by assembling component parts, all or some of which have been purchased from others, will generally be considered to be a "manufacturer" where it performs a series of assembly operations utilizing machines, tools and workers which constitute substantial and significant fabrication or production of the desired product. The qualifications of a bidder as a manufacturer who proposes to "assemble" must be decided on the basis of all the facts and circumstances surrounding a particular procurement.

(2) Thus, the determination of whether a bidder proposing to assemble a final product from component parts is an eligible manufacturer must rest on whether the bidder has demonstrated an independent ability, with its plant, equipment and personnel, to perform a significant or substantial portion of the manufacturing operations and efforts required in producing the final product for which the government contracted.

(3) In the alternative, a bidder may also qualify as a manufacturer if it has the facilities to produce on its premises a significant portion of the required component parts needed for the final product even if the bidder will only perform assembly operations under a particular procurement.

(c) Firms which only perform minimal operations upon the item being procured cannot qualify as manufacturers. To allow any such bidder to do so would obviously frustrate the purposes of the Act. As stated in the Decision of the Hearing Examiner "In re Brentwood Radios, Inc.," 12 WH Cases 158, 162 (1954):

Confident that the Act and Regulations defining a manufacturer contemplate something more than the occasional and isolated performance of such a simple assembly operation on but two Government contract items of a sundry nature, as disclosed by the record in this case, I have concluded that the corporation cannot justifiedly be regarded as bona fide manufacturer, even of such items, qualified to do business with the Government. Except for the negligible amount of time expended by the two officers of the corporation on such assembly operation over seven years of corporate existence, the corporation has at no time engaged in any other assembly or manufacturing operations for the Government and in no civilian production at all.

(See also "Tyco, Inc. v. Hodgson," 67 CCH Labor Cases ¶ 32,652 (E.D. Va., 1971 (not officially published)); and "In re John F. Noble Company," Decision of the Trial Examiner, PC–184, March 29, 1945.) As the court stated in "George v. Mitchell," 262 F.2d 486, 493 (C.A. D.C., 1960), while Congress in enacting the Walsh-Healey Public Contracts Act "may have been concerned for the small businessman capable of sustaining the administrative burdens of bidding for and processing Government contracts, we do not think it intended to protect producers who could not independently perform those minimal contracting functions."

(d) Packaging by itself does not constitute "assembly." For example, a bidder who proposes to supply bottles of aspirin in units of 100 and whose only operations would be the purchase in bulk of the aspirin and the bottles, the transferring of the aspirin from the bulk container to the bottles, and the labeling, wrapping, and shipping of the bottled aspirin, would not qualify as a manufacturer. Furthermore, a bidder proposing to purchase a hose and a clamp and place the clamp on the hose to make a "hose assembly," and then package and ship the item, is not a manufacturer within the intent of the Act. (See also Decision of the Comptroller General, B–164770, September 3, 1968 (not officially published).)

§ 50–206.53 Regular dealer.

(a) A bidder may qualify as a regular dealer under 41 CFR 50–201.101(b) if it owns, operates, or maintains a store, warehouse, or other establishment in which the commodities or goods of the general character described by the specifications and required under the contract are bought, kept in stock, and sold to the public in the usual course of business. The storage of goods in a public warehouse will not in itself satisfy the place of business requirements of this definition unless there is a continuing right (i.e. bona fide written lease agreement) to a specified, identified amount of space in the warehouse. A bidder who desires to qualify for award as a regular dealer must show to the satisfaction of the contracting agency prior to any award that it is engaged in an established, regular business meeting all the criteria of 41 CFR 50–201.101(a)(2). It is not enough in the case of a regular dealer to show only that arrangements have been made to set up such a business; before an award can be made, it is essential that it shows an already established business regularly dealing in the particular goods or goods of the general character offered to the Government.

(b) A bidder must be able to show before award:

(1) That the bidder has an establishment or leased or assigned space in which it regularly maintains a stock of goods in which it claims to be a dealer; if the space is in a public warehouse, it must be maintained on a continuing, and not on a demand, basis;

(2) That the stock maintained is a true inventory from which sales are made; the requirement is not satisfied by a stock of sample or display goods, or by a stock consisting of surplus goods remaining from prior orders, or by stock unrelated to the supplies which are the subject of the bid, or by a stock maintained primarily for the purpose of token compliance with the Act from which few, if any, sales are made;

(3) That the goods stocked are of the same general character as the goods to be supplied under the contract; to be of the same general character, the items to be supplied must be either identical with those in stock or goods for which dealers in the same line of business would be an obvious source;

(4) That sales are made regularly from stock on a recurring basis; they cannot be only occasional and constitute an exception to the usual operations of the business; the proportion of sales from stock that will satisfy the requirements will depend upon the character of the business;

(5) That sales are made regularly in the usual course of business to the public, i.e., to purchasers other than Federal, State, or local Government agencies; this requirement is not satisfied if the contractor merely seeks to sell to the public but has not yet made such sales; if Government agencies are the sole purchasers, the bidder will not qualify as a regular dealer; the number and amount of sales which must be made to the public will necessarily vary with the amount of total sales and the nature of the business; and

(6) That the business is an established and going concern; it is not sufficient to show that arrangements have been made to set up such a business.

(c) With regard to the test in paragraphs (b)(5) and (6) of this section, as stated in the Decision of the Administrator, "In re Herbert Co." (9 WH Cases 561, 562 (1950)): "It is plain that the Act and Regulations intended to bar from receipt of Government contracts those persons whose regular method of operation is to secure contracts and thereafter buy elsewhere the goods necessary to fill the contract. While it was not contemplated by the regulations that every Government contract awarded to a dealer be filled from stock on hand, it was the intention to require that Government contracts should be awarded only to those dealers who maintain a stock of goods of the general character required under the Government contract in question, and who, as a regular course of business dealings, make sales from such stocks. It is not sufficient for a dealer to show that some sales are made from stock, or that sales from stock are not unusual in his business; rather he must show that in the usual course of his business a very substantial amount of his sales are made from stocks on hand" (emphasis added).

(d) Coal dealers are exempted from the regular dealer requirements of the Act on certain express terms and conditions which are set forth in 41 CFR 50–201.604(a). The exemption will be applicable only if these conditions are complied with. If they are not, the general definition of regular dealers contained in 41 CFR 50–201.101(a)(2) of the regulations would be applicable.

§ 50–206.54 Regular dealer in particular products.

In addition to the exemptions from the requirements of section 1(a) of the Act which have been granted for certain types of contracts as set forth in 41 CFR 50–201.604, special alternate qualifications have been prescribed for hay, grain, feed, or straw; raw cotton; lumber and timber products; machine tools; green coffee, petroleum; agricultural liming materials; tea; raw or unmanufactured cotton linters; certain uranium products and used automated data processing (ADP) equipment in recognition of existing industrial and commercial practices in those industries. These special qualifications may be found in 41 CFR 50–201.101(a)(2) and 41 CFR 50–201.604. Characteristic of these alternative qualifications is the absence of a requirement that the dealer physically maintain a stock.

§ 50–206.55 Agents.

A "manufacturer" or "regular dealer" within the meaning of the Act and regulations may bid, negotiate, and contract through an authorized agent if the agency is disclosed and the agent bids and contracts in the name of the principal. Brokers from whom foreign-made goods consigned directly to the Government are purchased need not qualify as regular dealers under 41 CFR 50–201.101(a)(2) since the contract itself is not subject to the Act.

§ 50–206.56 Administrative exemptions.

Sections 50–201.101(a)(3)(ii) and 50–201.601 of Regulations 41 CFR Part 50–201, provide for the granting of exceptions and exemptions from the application of section 1(a) of the Act upon request by the head of a contracting agency to the Administrator, Wage and Hour Division. Such request should contain all pertinent information enabling the Administrator to determine if such exemption is necessary to avoid the serious impairment of the conduct of Government business. Any such request will be published in the FEDERAL REGISTER as a proposal with time for public comment.

Signed at Washington, D.C., on this 13 day of 1977.

WARREN D. LANDIS,
Acting Administrator,
Wage and Hour Division.

FEDERAL COMMUNICATIONS COMMISSION

■

LAND MOBILE SERVICES

Inquiry Into Practices and Procedures for Spectrum Management

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR 89, 91, 93]

[Docket No. 21229; FCC 77-267]

LAND MOBILE SERVICES

Practices and Procedures for Spectrum Management Governed by Parts 89, 91, 93 of the Commission's Rules; Notice of Inquiry

AGENCY: Federal Communications Commission.

ACTION: Notice of Inquiry, Request for Comments.

SUMMARY: The Commission is seeking public response to its plan for developing a new program of spectrum management for the land mobile radio services. These services include most private uses of two way radio and radio paging by police, fire, business, and other industrial users. The Commission invites comments on a new aplication form that will be used to build a computerized data base. The Commission also announces its intention to develop new rules and standards for the selection of requencies for land mobile systems. Also included is a report on spectrum monitoring that the Commission has been conducting in Chicago on a trial basis. Public response to any of the material presented will be considered in the development of the new program.

DATES: Comments must be received on or before July 15, 1977, and Reply Comments must be received on or before August 15, 1977.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Morgan O'Brien, Safety and Special Radio Services Bureau, Federal Communications Commission, Washington, D.C. 20554 (202-254-3301).

SUPPLEMENTARY INFORMATION:

Adopted: April 27, 1977

Released: May 17, 1977

1. The Federal Communications Commission hereby gives notice of an inquiry into practices and procedures for more comprehensive management of the land mobile services. The Commission has developed a new program of spectrum management of the land mobile services with the following immediate objectives:

a. A nationwide data base of all land mobile systems, computerized to permit access by the Commission, the land mobile community, and the general public. The Commission has set forth herein the data elements of the proposed data base. It requests comments on these and on several alternate data base designs.

b. Rules and standards for private frequency coordinators, to be formulated in a proceeding that will be initiated within the next several months. In conjunction with the development of rules and standards, the Commission will establish a program to audit the performance of the coordinators.

c. Monitoring to collect channel utilization statistics for areas of severe congestion. Comments are invited on formats for presenting utilization information to the land mobile users, coordinators and vendors. Representative formats have been included and comments are invited.

d. Relaxation of radio service block allocations to permit wider sharing of frequencies in Chicago on a trial basis.

2. These objectives are the result of extensive staff study, and are based on several years of experience with the Chicago pilot. The declaration of specific objectives is not intended to foreclose comments suggesting modifications to the new program. It is intended to present a clear picture of the Commission's present intentions. Interested parties are encouraged to take issue with all or any part of the program. The resources presently available to the Commission for the land mobile services, and those that become available over the next several years, will be committed to achieving the objectives that are finally resolved by the Commission after careful consideration of the comments received in this proceeding.

INTRODUCTION

3. This Notice begins the second stage of the Commission's program for improved management of the land mobile spectrum. The first stage was initiated formally in 1971 with the issuance of a proposed rulemaking in Docket 19150. (Notice of Proposed Rule Making, Docket (No. 19150, 27 FCC2D 400 (1971)). First Report and Order, Docket No. 19150, 32 FCC2D 347 (1971). Second Report and Order, Docket No. 19150, 38 FCC2D 625 (1972). There were numerous antecedents to that proceeding, particularly the work of the Advisory Committee for the Land Mobile Radio Services (ACLMRS) and the Joint Technical Advisory Committee (JTAC). (See Report of the ACLMRS, Vol. I, Vol. II, Parts 1 and 2, July, 1968. See Spectrum Engineering, The Key to Progress, New York, 1968.) Under contract to the FCC, Stanford Research Institute designed the basic elements of a spectrum management pilot program in the late 1960's. In 1972 the Commission established an office in Chicago to test the spectrum management techniques that had been proposed. The elements of the experiment were a computerized data base of all land mobile equipment operating in the Chicago region; a staff of experts located regionally to handle frequency selection and licensing of new systems; a mobile monitoring program to collect channel utilization statistics; and proposed changes to the block allocation system to increase the sharing of frequencies between radio services. The Chicago experience has been detailed extensively in published reports. (See Report on Restructuring The Spectrum Management Task Force, (1975), W. Sutter. Analysis and Recommendations Concerning Regional Spectrum Management, D. Hatfield, FCC Report No. 76-606. Chronology of the National Spectrum Management Program (1976), FCC Report No. SMTF 76-01.)

4. Major revisions to the program of regionalization envisioned in Docket 19150 were approved by the Commission in June of 1976. (See Analysis and Recommendations Concerning Regional Spectrum Management, D. Hatfield.) The Commission based these changes not only on the experience in Chicago, but also on a reconsideration of the nationwide requirements of the land mobile services. A vital element of this reconsideration was the finding that the total cost of a fully regionalized system, as originally proposed in Docket 19150, does not appear to be justified by the benefits to be anticipated. All FCC programs are being subjected to this scrutiny in light of the current budget situation. This finding, of course, cannot overshadow the fact that congestion in the land mobile services, aggravated by manual systems for frequency selection and licensing, continues to plague the users of these frequencies and continues to require innovative responses from the Commission.

5. The Commission therefore has decided to develop a revised program of spectrum management, based on those elements of the Chicago experiment that have demonstrated their utility. This is to be a program that maintains a favorable balance between the costs incurred and the beneficial effects that can reasonably be expected. Immediate steps have been taken to reduce the costs involved in the program, including a significant reduction in staffing level and relocation of the Chicago computer to Washington where it will be shared ultimately by other Commission offices. Substantial reductions in the scope of the monitoring program have been made and further changes in the Chicago monitoring program are contemplated, as described more fully in Section III.

6. All plans for additional regional facilities have been deferred. The costs now being incurred have been reduced to those covering personnel sufficient to design a nationwide system and a small staff remaining in Chicago to continue monitoring operations and public interface. In the design of the new system each cost element of the proposed program will be analyzed and alternatives will be considered based on the ratio of cost to benefits. The major components in this regard are the nationwide data base and the monitoring program. A cost analysis of the alternatives developed after consideration of the comments filed in this proceeding will be made a part of the record of this proceeding.

7. The text of the Notice conforms to the objectives stated in paragraph one. Section I deals with the elements we propose to include in the Nationwide data base raises questions that must be considered in the design of the computerized system. Section II covers the issue of frequency recommendations by the private frequency coordinators; it lists the engineering models developed in Chicago that will be available for analysis of congestion problems and for auditing the performance of the coordinators. Section III reports briefly on the current plans for monitoring in Chicago. It also serves as an introduction to Appendix B which reports the current status of analysis of monitoring data. Section IV summarizes the Commission's findings with regard to the possibility of wider sharing of frequencies and proposes several definitions that will lay the groundwork for later sharing proposals.

I. THE LICENSE DATA BASE

8. On a centralized, nationwide basis, the Commission's present manual processing system and the current method of computer input, storage and retrieval of land mobile information is seriously information is seriously inadequate for effective frequency managing, rulemaking, research, reporting and providing public assistance. These inadequacies are due primarily to the inability to readily access the information. The ability to retrieve information from the data base and a means for the staff to easily make changes in the records of the data base are two of the key features of the automated licensing system which has been in operation in Chicago for the past three years.

9. There are a number of ways to access information in a data base. We have experimented with many methods (software and hardware) to access the Chicago data base. The types of information and its retrieval required by parties outside the Commission is important in the final design of an automated national data base system. There are questions which need to be answered as soon as possible, such as, how will the data be furnished to these outside parties, and what information will be required? Before asking for specific comments, we would like to apprise the public of the various possibilities.

10. Much of our presentation and many of the solicited comments will be directed to the information contained in Appendix A. This Appendix lists the proposed elements of the new national data base and examples of the computer checks and verifications of application information in the Chicago processing system as well as examples of the different ways to retrieve information from the data base. It consists of the following sections:

a. List of Proposed Data Elements for a New Land Mobile Application Form.
b. Examples of computerized Application Processing Checks.
c. Notice of Expired License; and Notice of Impending Expiration and Renewal Application.
d. Data Base Queries.
e. Example of Data Base Extract.

ACCURACY OF THE DATA BASE

11. Two of the most important concerns in the design of a license data base for the land mobile radio services are completeness and accuracy. These concerns follow from the functional role of the data base in the frequency selection process. To make the best frequency recommendation for an applicant, the coordinator must have a reasonably complete, accurate, and current knowledge of the radio environment with which the proposed system will interact. This can be provided most reliably by the Commission's data base. In the next several paragraphs, a number of factors which degrade the quality of a license data base are examined together with steps that the Commission has taken in Chicago to overcome them.

12. It must first be recognized that the elements of each license record in the data base are only as accurate as the data submitted to the Commission by an applicant on his application form. Because of the numerous verification checks designed into the Chicago automated system (See Appendix A, Section 2), the information in the data base is identical to that of the application (or corrected application) and the authorized license parameters. The accuracy of the data base thus depends largely on the extent to which each application contains data which accurately describes the actual system to be placed in operation. Major discrepancies between licensed and actual system parameters pose serious potential problems inasmuch as the quality of frequency assignments and efficiency of spectrum utilization can be affected. Our experience in Chicago over the past three years has led us to believe that, for the most part, such discrepancies are not so substantial as to require major attention. However, there is one notable exception.

13. We have compelling evidence to conclude that discrepancies exist between the actual number of mobile units in a fully operating system and the number specified on the application. This is a particularly serious problem above 470 MHz where, unlike the lower bands, the licensed number of mobile units on a channel is the criterion for determining when that channel can no longer be assigned in a particular area. A study of the 470-512 MHz band presented in Appendix B, Part 2, indicates that no correlation exists between the licensed number of mobiles on a channel and the measured level of channel utilization. Similar studies in other bands have also shown that there is no correlation between measured utilization and the "actual" number of units specified on Section III of Form 425. An underlying reason, we suspect, is that many applications overstate the number of mobile units in an attempt to reduce channel sharing.

14. Other factors affecting the accuracy of the land mobile data base are licenses that have expired and unlicensed radio station operation. Since June, 1976, the Chicago Office has been conducting programs which identify expired licenses and those which are about to expire. A computer program identifies those licenses which have expired 90 days or more and creates a mailing list. A license examiner reviews the list for errors and compares it with the application status listing to determine if an application is pending for an expired license. Notice of Expired License, copy of which is included in Appendix A, is then mailed. The licensee has 30 days in which to file a new application or send in a copy of any valid license he may have for the particular station. If there is no response, or if we are advised that the station is no longer in use, the license record is then deleted from the data base.

15. Likewise, the computer generates a notice of expiration/renewal form 45 days prior to the expiration of a license in the data base. This notice and instructions (See Appendix A) are mailed to the licensee listing some of the key license parameters. The licensee desiring renewal and indicating no change in the terms of his existing license, confirms the information, signs and returns the form and subsequently a renewal license is issued. These programs ensure that the data base is kept up-to-date; licensees will be notified of impending expiration; and the need for Notice of Expired License will gradually be eliminated.

16. At this point, we would ask for comments on:

a. The extent and seriousness of discrepancies between licensed and actual system parameters, and what measures the Commission should take to verify the information on application forms.

b. Methods to reduce the impact of the above factors on the data base to be constructed nationwide.

c. Methods by which coordinators, equipment vendors and individuals can supply feedback to the Commission on unlicensed operation, stations never constructed, and those which cease to operate.

ACCESSIBILITY OF DATA BASE INFORMATION

17. The Commission is considering two different techniques for access to the data base. One is direct "on-line" access where the user interfaces directly with the computer to obtain the desired information. Using the other method, "indirect" access, the user makes a request to the Commission's staff who then interface with the computer and supply the information or printout to the requestor.

18. In the past, we have made the Chicago data base available on a direct on-line basis to parties outside the Commission (See Appendix A, Section 4 for examples of this access). Because of the cost and time considerations of such access to the nationwide data base, it may not be feasible to make this type of access available on a routine basis. We invite comments on the need for such access particularly by frequency coordinators and equipment venders. Comments are also directed to a "third party" option, where a contractor supplies information to all users on a cost-reimbursable basis; under such an arrangement, access could be provided in ways that vary depending on the user's requirements.

19. In addition to the previously covered options, the data base could be furnished, in its entirety or sorted by certain

parameters, such as service, frequency or geographic area. It could be made available periodically via microfiche or printout. This type of access could be employed by someone not requiring totally up-to-date data. The immediate access could be used to supplement the periodically supplied information. This combination would reduce the volume of immediate access with the intent to reduce cost and maintain practicability.

20. The information that the Commission stores in its data base has many potential applications. Some of these are:

a. Resolution of Interference cases.

b. Computation of growth statistics for market projections and, along with monitoring data, support for new spectrum allocations.

c. Day-to-day use by coordinators for frequency recommendations and by the users where there is no provision for coordination.

d. Resolution of a difficult frequency selection situation where no adequate frequencies appear to be available for a given need.

REQUEST FOR COMMENTS

As the Commission proceeds to design its national land mobile data base, it would like to have comments on these specific questions:

a. Appendix A includes a list of proposed data elements. Are these adequate, or are there items which should be added to this list? Are there items which can be dropped with little or no impact on the data base viability?

b. The Commission is concerned about the possible discrepancies between licensed and actual system parameters with particular emphasis on the number of mobile units. What is the extent and seriousness of this and what measures should be taken to verify the information and reduce the impact on the national data base?

c. In making the data base information available, what is the most desirable or beneficial method with which to provide it? The Commission is looking for the differing requirements; i.e., a coordinator may have different needs than a vender or the general public. What are the minimum data elements needed in the frequency selection process?

d. Is it practicable to develop methods by which coordinators, equipment venders and individuals can supply feedback to the Commission on unlicensed operation, stations that were never constructed and those which cease to operate? If so, what form should this feedback process take?

II. FREQUENCY SELECTION

21. The Commission designed, developed and implemented a computerized frequency selection program (hereinafter AFAM) that has been operating in Chicago for the last several years. A brief description of the component elements of the program has been set out below, and an extensive report has been published. (Tremper, P., Automatic Frequency Assignment Model (AFAM)); FCC Report No. SMTF–75–01 (1975). The Chicago experience has persuaded us that it is not presently feasible or desirable for the Commission to undertake the function of frequency selection nationwide, as was originally proposed in Docket 19150. The rationale for this conclusion is complex, but essentially it derives from the unwieldy number of variables involved in making good frequency selections. We have determined that a system of private frequency coordinators, representing the various service groups, offers a more realistic way of coping with these variables in a nationwide setting than does a set of computer programs, even programs as ambitious as AFAM. Consequently, AFAM will not continue as a production program. It will be revised and simplified and be made available as a tool for use in situations where the coordinator is not able to suggest a frequency that is acceptable for an applicant's use. The Commission will use component elements of AFAM in performing its audit function.

22. The Commission will initiate a separate proceeding dealing solely with the frequency coordination function. The purpose will be to develop rules and standards by which the coordinator will operate. Presently there is very little standardization in the coordination function. Even within some radio services, there are variations in the way in which frequencies are recommended. The frequency coordinators are not at fault in this regard because the Commission has not provided them with standard procedures or with general rules for operating. While a number of land mobile associations have developed guidelines for use by coordinators, no standardized program has been undertaken by the Commission. This deficiency must be corrected. Comments are invited on how the Commission can most effectively set about the task of developing proposals for these rules and standards.

23. The Commission recognizes that the various coordinating committees are structured differently and employ methods that vary widely in their degree of sophistication. For instance, some coordinators base their recommendations only on co-channel station separation and are guided by minimum separation standards. Others perform more detailed interference analysis, take into account the number of mobile units on a channel, and may even be concerned with limiting antenna heights and effective radiated powers of proposed stations. We realize that the different methods are influenced to a certain extent by transmitter density and the operational needs of the given radio services. However, we also believe that certain "rules of thumb" such as minimum geographic station separation for a given service afford that service a luxury not attainable to other services with equal or perhaps even higher priority needs.

24. We plan to provide coordinators with channel occupancy data in the form of "low", "medium" and "heavily used" channels. This will be limited to major urbanized areas and areas where a compelling need is manifested and will become available gradually over the next several years. In our audit procedures, the license data base and monitoring data will be used to insure that all channels are loaded in an equitable manner. This information will also guide the Commission in evaluating or initiating recommendations for geographical interservice sharing and/or frequency re-allocation. The Commission will apply its automated frequency selection model on selected applications as a check on the frequency recommendation of the coordinator and/or vender. The frequency selection model will also aid the Commission in resolving coordinator/applicant disputes and in other difficult frequency selection cases. The Commission also will retain the provision for an "engineering field survey" as an alternative to frequency coordination. We anticipate that the license data base and monitoring data (where available) will substantially assist those applicants pursuing this option.

25. In view of our intended use of the automated frequency selection model (AFAM) and its potential usefulness to the coordinators and/or venders, we will give a brief description of its operation here. We would point out that AFAM is an integrated assembly of engineering models and routines which can be used independently as needed. Furthermore, each of these models could be adapted to a form that would not require channel monitoring data as an input. Present inputs to AFAM, in addition to the monitoring data, are the license data base and the technical parameters of a proposed system. (The license data base and monitoring data are described in section I and III and the Appendices.) The engineering routines sequentially: (1) recommend a combination of antenna height and effective radiated power appropriate for the service area specified in the application, (2) determine a listing of frequencies available for the instant application, and (3) rank the frequencies on the combined basis of estimated level of usage to the applicant and adverse impact on existing co-channel and adjacent-channel stations. Since the routines are modular, we would ask the coordinator/vender to comment on those most useful to their purposes.

26. The automated frequency assignment model is comprised, in part, of the following routines:

a. *Frequency Eligibility:* This routine generates a list of eligible frequencies for the applicant's proposed radio service, frequency band, and mode of operation (for example, the Business Radio Service, 150 MHz band, and one-way paging). Next, frequencies with limitation not in conformance with system parameters are eliminated (for example, the proposed antenna height exceeds the maximum allowable).

b. *Occupancy Retrieval:* For each eligible frequency, occupancy and waiting time parameters are retrieved from data taken at the nearest monitoring site to the proposed base station location (See Appendix C). The frequencies are then ranked according to calculated waiting time.

c. *Co-Channel Interference Model:* A group of the frequencies having the lowest waiting times is analyzed with respect to intereference potentials to and from existing stations. The current model considers all stations within 100 miles of the proposed station. For each station in this environment, a propagation analysis is made to determine the extent of interference to and from the proposed station. This depends on the distance to the stations, antenna heights and effective radiated power, the frequency band and other factors.

In the co-channel and other engineering models to follow, the projected interference levels are weighted by the probability that an interfering station will be transmitting. This probability is derived from channel occupancy data taken at the monitoring site nearest the interfering station. The weighted interference levels are thus a measure of channel degradation to and from existing stations.

d. *Adjacent Channel Model:* A smaller group of those frequencies having the lowest co-channel interference potentials are further analyzed to determine the effects of interference to and from nearby stations operating on frequencies close to, but different, from that of the proposed station. This analysis is somewhat similar to that described above, with the exception that an adjacent channel correction figure, representing the level of transmitter noise at the given frequency separation, is applied. These correction figures are based on information supplied by radio equipment manufacturers.

e. *Intermodulation Model:* A further reduced number of frequencies which have passed the co-channel and adjacent channel models is analyzed with respect to intermodulation interference; i.e., interference caused by the mixing of two or three off-channel signals to produce a composite signal falling on the proposed frequency. Transmitter and receiver intermodulation interference, both to and from existing stations, are calculated.

f. The combined effects of the three interference models are calculated separately for interference to and from the environment. The final figures are weighted so that interference to the environment is given twice the importance as that from the environment. The net frequency ranking parameter is the "level of service"; expressed as a percentage on a scale from 0–100 percent; 100 percent being the best possible level.

27. The output of the automated frequency selection model consists of computer generated "frequency recommendation" printouts containing the following information for each recommended frequency: level of service, occupancy, waiting time, suggested antenna height and effective radiated power, and a listing of all co-channel licensees operating within a 20 mile radius of the proposed base station location. A copy of the frequency recommendation printout is included in Appendix C.

FREQUENCY COORDINATION IN THE CHICAGO REGION

28. While the Commission is developing procedures for the coordinators, it intends to return to frequency coordination in the Chicago Region by deleting those portions of the Rules that permit the filing of applications without evidence of frequency coordination. Effective September 1, 1977, the Commission will no longer accept applications that are not accompanied either by evidence of frequency coordination or by a field survey as now permitted in areas outside Chicago. A brief order will be issued within the next ninety (90) days making this Rule change, effective September 1, 1977. To prepare for this return of responsibility, each coordinating group should address itself to the need for information from the Chicago data base. The staff will assign a high priority to providing the information requested. Each coordinating group is invited to comment on any aspect of the burden that a return to coordination will entail.

REQUEST FOR COMMENTS

The Commission has requested comments on the makeup and use of the nationwide data base in preceding paragraphs. Response to those questions should similarly be directed, where applicable, to the frequency selection process:

a. The Commission has decided to return to the frequency coordinating committees in the Chicago Region where the Regional Office has performed this function since October, 1974. With respect to this decision, what information (license data base, monitoring information, etc.) and assistance from the Commission will the coordinating committees need to effectively resume their role in providing frequency recommendations?

(1) Does the proposed date of the resumption of the frequency coordination in Chicago (September 1, 1977) allow adequate lead time to prepare for the takeover.

(2) The Commission will be refining its review and evaluation of the coordinator's recommendations in the Chicago Region as it prepares the design of the nationwide system. We invite suggestions, especially from coordinators in that area, as to what are the best methods of interface between the Commission and the coordinators so that each may be aware of the other party's actions.

b. The Commission seeks the viewpoints of the land mobile community on which types of applications should require frequency coordination (or an engineering field survey) and how this coordination can best be accomplished.

(1) Should, for example, coordination be required in all frequency bands; including the 800 MHz band? Should other than initial users of shared mobile relay systems be required to obtain coordination? Should participants of "approved" frequency assignment plans be exempted from frequency coordination requirements? Should the Commission develop standards and criteria from which to evaluate and approve statewide or area-wide plans or should these plans be administered through the applicable coordinating committee?

(2) Can radio services having similar spectrum requirements better be served by a single coordination committee? Could this facilitate implementation of any future interservice or geographical sharing between these services?

c. The Commission intends to develop rules and standards to govern the frequency coordination process. We will also develop methods by which the performance of the coordinators and adherence to our standards can be evaluated. In this regard, we raise the following possibilities:

(1) Should the coordinating committees be given the authority to suggest standards relating to system coverage; i.e., insuring minimum necessary antenna height and/or effective radiated power? Should a frequency recommendation be contingent upon meeting such standards?

(2) In those areas where the Commission has conducted channel monitoring, should occupancy levels be established for determining when a channel could no longer be assigned in that area?

(3) In the interests of spectrum conservation should standards be developed to insure that licensees of a shared transmitter facility have similar coverage area requirements?

(4) What procedural interface with the Commission should be established to handle disputes between the coordinators and applicants? Should the Commission then recommend a frequency to the applicant directly or work through the coordinator?

III. SPECTRUM MONITORING

29. The Commission has conducted an extensive spectrum monitoring program in Chicago over the last four years. The program is described briefly in a report contained in Appendix B to this Notice entitled "Interim Progress Report on Spectrum Monitoring". The Report presents some significant results of a number of analyses completed to date and illustrates the various types of channel utilization data that can be made available. As a result of experience with the Chicago monitoring program, the Commission has substntially reduced the scope of spectrum monitoring in Chicago; but it intends to develop plans for monitoring in other congested areas in the country.

FUTURE PLANS FOR SPECTRUM MONITORING

30. Two decisions affect the course of spectrum monitoring in the future—the Commission's decision to transfer the Chicago licensing functions to Washington and centralize the spectrum management efforts there, and the return of the frequency coordinating committees to the frequency selection process for Chicago Region applicants.

31. Once coordinators re-enter the frequency selection process, we will further reduce the amount of spectrum monitoring in the Chicago Region. Production monitoring to support the automated frequency selection program (AFAM) will be discontinued. Until the coordinating committees resume the coordination role in July, the Chicago monitoring operations must continue to collect data to support current licensing functions. The number of production monitoring sites has been reduced from the original 56 to 30 sites. We are currently looking to concentrate monitoring activities in or near the larger urbanized areas close to Chicago. Eleven sites are now contemplated to cover the metropolitan areas of Chicago and Milwaukee by employing a receiving antenna height of 50 feet.

32. Future spectrum monitoring will be concentrated in the larger urban areas and in locations identified or suspected as being congested areas. Such monitoring will include areas other than the Chicago Region but will not be as intensive as the monitoring previously conducted in Chicago. Our plans are to collect data for the purpose of providing spectrum utilization statistics and analyses to (1) aid in frequency selection by users and coordinators, (2) serve as a tool for the Commission to review and evaluate the coordinator's performance, and (3) as input to our spectrum management program and allocation/reallocation proceedings. We plan to develop usage characteristics peculiar to each radio service or group of users that will supplement other methods of frequency selection. These characteristics will enable us to accurately monitor the growth and dynamics of land mobile usage. As these plans develop, we expect to provide spectrum monitoring capabilities in other urban areas of the country outside the Chicago Region as the need is defined by the Commission's staff and the land mobile community.

33. Appendix B to this Notice contains an "Interim Progress Report on Spectrum Monitoring." Part 1 of this Report defines the occupancy parameters we use to describe channel utilization and illustrates the various types of information retrievable from the special Long-Term Monitoring Project data and from the production monitoring data base. Part 2 examines the relationship between mobile loading standards of the Rules and actual on-the-air usage measured by our monitoring equipment.

34. With respect to the future plans for monitoring set forth above and the information presented in Appendix B, we are requesting specific comments on the following issues:

a. In what congested areas and in what parts of the spectrum should the Commission concentrate its monitoring efforts?

b. How should monitoring data be made available? On a periodic basis? By Public Notice? Commission Reports? Upon specific request? On a regular basis only to those involved in frequency selection/coordination?

c. What monitoring information would be useful? In what format is it most useful?

d. How should frequency coordinating committees use spectrum usage information in their process of recommending frequencies to individuals? What formats would be of interest to the general public, venders, coordinators, etc?

e. In areas where monitoring information has been gathered, can the channel usage data be used as a method of determining channel loading in lieu of the mobile loading standards now in the Rules? Should the cutoff level be made a hard and fast Rule or should it be a tool to use as a guideline?

f. Given accurate channel usage data, what parameter(s) (occupancy, waiting time, etc.) are of value in determining whether individual channels have high or saturated use, medium or low use? Should it be usage in a peak period or an average over a day, week, month or year?

g. How should the monitoring program and procedures for making available the usage data be structured to be of maximum benefit to land mobile users?

h. What standards should be developed to insure that, when additional users are added to low and medium use channels, saturation does not result, thereby reducing the level of service for all?

IV. Frequency Sharing

35. As indicated, the Commission has reduced the level of its financial commitment to the spectrum management program. There is no lessening of the Commission's commitment to improving the utilization of frequencies in areas of significant congestion. For the present, we have determined that it is neither technically nor financially feasible to implement channel sharing as extensive as that proposed in Docket 19150. There is sufficient capability in Chicago, however, to extend the sharing of channels without damaging the systems now operating and without incurring heavy administrative costs. The staff will develop proposals for increasing the sharing of frequencies in the Chicago Region, and these proposals will be issued within the next several months in further reports in this proceeding. Active involvement of land mobile users, coordinators and vendors in the development, consideration and implementation of these proposals is vital. Comments are invited on the best means of accomplishing this involvement.

36. The Commission has sufficient data base information in the Chicago Region to make possible the wider sharing of frequencies between services. No specific sharing proposal is being made at this time, but the staff is currently developing the definitions that will be essential to any workable sharing proposal. These definitions have been set out below for comment.

Saturation and Loading

37. The pressing need for more spectrum, expressed so often by the various associations of land mobile users, has forced the Commission to deal with congestion and channel loading in terms that have accepted meaning and with procedures that are relatively simple, straightforward and readily available without relating these criteria to any quantum measurements. Definitions of saturation and channel loading criteria are not easily derived. In order to provide a more objective evaluation of congestion, an improved measure of channel capacity and overall radio system performance is needed. We must develop a comprehensive, accepted method of measuring spectrum need of land mobile users. To this end, we would direct comments to the following discussions relative to saturation and loading.

38. When speaking of congestion in urban environments, both the Commission and the radio users have used the term "saturated channel". The Commission should be asking, "Saturated, in what respect? What is saturation, and how is it measured?" and attempting to answer these questions. Before developing the criteria of measurement, the Commission and the land mobile community should agree on some generic definitions. Other criteria may be developed within the context of these definitions:

A. *Saturation Level.*—In an absolute sense, the level of channel usage on a heavily used channel at which the addition of one or more users would seriously disrupt the use of that channel.

B. *Optimum Loading Level.*—The preferred level of channel usage at which the Commission would recommend not authorizing additional licensees to use a given channel on a time-sharing basis in the same geographic area.

39. Such definitions would be our basic starting point, and other criteria for measurement of usage, channel capacity and spectrum needs would follow. From use of the monitoring and license data base from Chicago, we hope to quantify these definitions or, at least, have a much better feel for them than we now have. There are, of course, other factors such as whether waiting time or response time is of primary consideration. Further discussion of these matters is contained in Appendix B.

Channel Utilization Information

40. For the purpose of supplying channel utilization information to those persons in the frequency selection process for the Chicago Region, the Commission proposes grouping frequencies into four broad categories of level of usage. These levels are based on measurements conducted over normal business working days and are further explained in Appendix B.

A. *Low Occupancy Channels.*—Those frequencies having either daily average occupancies of 0–10% or peak hour occupancies of 0–15%.

B. *Medium Occupancy Channels.*—Those frequencies having either daily average occupancies of 10–25% or peak hour occupancies of 15–40%.

C. *Medium High Occupancy Channels.*—Those frequencies having either daily average occupancies of 25–40% or peak hour occupancies of 40–60%.

D. *Very High Occupancy Channels.*—Those frequencies having either daily average occupancies greater than 40% or peak hour occupancies greater than 60%.

41. The above categorization is based on measured transmission occupancy as observed by the Commission's Regional Staff over the past few years. Measured transmission occupancy is the percentage of the montioring period in which a carrier frequency is detected as present on the channel being sampled by the monitor receiver. Those persons unfamiliar with the nature of mobile radio might think the above figures too low to indicate a high level of usage. Thus, we must distinguish transmission occupancy from message occupancy. The latter value will generally be greater since pauses, or gaps, exist between the series of transmissions in a message. Studies also show that "message throughput" on a channel may actually decline when transmission occupancy exceeds sixty percent (60%). This is because each user must compete with other users to complete a message that requires more than one transmission.

42. The Commission has established a limited objective for sharing in the Chicago Region. That is to determine the feasibility of working with the coordinators and venders to implement sharing in the Chicago Region, where the license data base provides a means of detecting possible channel availability. At this time, the Commission is interested in studying the feasibility of voluntary sharing arrangements, based on the Chicago data. No sharing will be authorized without the advance notice and consent of the frequency coordinating committees involved. Interested parties are encouraged to comment on the best way of effecting voluntary arrangements. If our experience over the next several months is positive, further proposals of a more specific nature will be forthcoming in this proceeding.

Conclusion

43. The essential distinction between the spectrum management program now being developed and the earlier program contemplated in Docket No. 19150 is the substantial reliance we are placing on the private sector. Initial selection of frequencies will be the responsibility of the applicant on the recommendation of the frequency coordinator. Decisions regarding system engineering will be left to the user and his equipment supplier. The Commission cannot perform either function under present restraints of money and personnel. We are convinced, in fact, that it is better not to have Commission involvement in these details. This is not an abrogation of our responsibility to license systems in the public interest. We intend to propose standards and establish rules; to enforce their fair application; and to assist the users, coordinators, and venders to achieve maximum utilization of the spectrum. The establishment of an effective working relationship between these interests and the Commission is a principal goal of this proceeding.

44. This action is taken pursuant to Sections 4(i), 303 and 403 of the Communications Act of 1934, as amended. Interested parties responding to this Inquiry shall furnish comments on or before July 15, 1977, and reply comments on or before August 15, 1977. All relevant and timely comments and reply comments will be considered by the Commission before reaching its decision in this proceeding; other relevant information, in addition to the specific comments invited by this Notice, may also be taken into account by the Commission. Because of the complex nature of this Inquiry, answers to the more detailed issues, if received after the specific date, will be considered. The Commission will issue a "Further Notice of Inquiry" subsequently, if it determines a need to delete, substantially modify, or clarify any of the announced objectives.

45. In accordance with provisions of § 1.419 of the Commission's rules, an original and six (6) copies of all comments, suggestions, pleadings, briefs, or other documents shall be furnished the Commission. Responses will be available for public inspection during regular business hours in the Commission's Information and Docket Reference Room at its headquarters in Washington, D.C.

Federal Communications Commission,
Vincent J. Mullins,
Secretary.

Appendix A

The License Database

1. Questions on new form

Item Number and Element Title or Description

1. Applicant's Legal Name and Mailing address:
   A. Name
   B. Address
2. Name of Radio Service
3. Purpose of Application:
   A. License for new station
   B. License renewal
   C. License modification (complete Item 5)
   D. Add station to system
   E. Assignment of license (see instructions)
   F. Other (specify below)
4. If station is presently licensed, give: Call sign
5. Nature of Proposed Modifications:
   A. Increase power
   B. Relocate station/antenna site
   C. Change Area of operation
   D. Change Radio frequency
   E. Increase Antenna Height
   F. Other (specify below)
6. Class of Station:

I. *Fixed location*

   A. Base
   B. Control (for mobile relay)
   C. Mobile relay
   D. Other (specify below)

II. *Mobile* (Enter actual No. of Units)

   A. Land Vehicle
   B. Aircraft
   C. Watercraft
   D. Hand-held Portable
   E. Paging receivers
   F. Other (specify below)

7. Details of Station at Fixed Location:
   A. Transmitter Site No. (if more than one)
   B. Total Height of antenna structure (AG)
   C. Height to tip of your antenna element (AG)
   D. AAT, if required
   E. Ground elevation (AMSL)
   F. Latitude
   G. Longitude
   H. Location of transmitter
   I. City
   J. County
   K. State
   L. If antenna will be mounted on an existing antenna structure, give name of a licensee using this structure, his call sign, and radio service.

8. Technical data: The following elements would be in matrix form for each of pair of transmit/receive frequencies:
   A. Frequency (Transmit and receive)
   B. Type of Unit Codes (from Item 6)
   C. Number of Units
   D. Frequency Usage Codes (Particulars of Operation)
   E. Output Power
   F. Power Losses between transmitter (or receiver) and antenna
   G. Antenna Gain
   H. ERP
   I. Antenna Height
   J. Emission Designators
9. Written description of mobile operating area.
10. Area of operation/coverage area:
   A. Latitude of center
   B. Longitude of center
   C. Radius
11. Other stations in system: Call Signs
12. Control points:
   A. Indicate control point locations by street address (or other narrative description if street address is not appropriate)
   B. Telephone No. of principal control point.
13. Eligibility
14. will any of the radio facilities (equipment) proposed or covered by this application be utilized in a shared mobile relay system? If yes, give name of owner:
15. Air Hazard Information:
   A. 20 feet above ground question
   B. 20 feet above supporting structure question
   C. Height of supporting structure
   D. Type of supporting structure
   E. Has notice of construction been filed with the FAA? (On FAA Form 7460–1) If yes, give: a. Date filed b. FAA office where filed
16. EPA Question
17. Government Land Question
18. Communication Service Question
19. The applicant hereby authorize the Commission to contact the below listed person with regard to clarifying technical information submitted on this application:
   A. Typed name
   B. Address
   C. Telephone Number
20. Certification (Privacy Act Notification to be included)

Remote Receiver Data

It is envisioned that remote received data would be filed on a separate form. A question would be added to the above elements which would indicate the filing of this separate form.

Supply the following information for all receiver sites not located at the transmitting site(s) specified in Item 7 of Form -------- and associated with a particular station:

   A. Call sign
   B. Remote receiver data
   1. Site number
   2. Receive frequency
   3. Latitude
   4. Longitude
   5. Ground elevation
   6. Antenna height
   7. Antenna gain

It would be possible to enter many combinations of location and frequency on one page.

2. EXAMPLES OF APPLICATION PROCESSING CHECKS BY THE COMPUTER IN THE CURRENT CHICAGO SYSTEM

The following are examples of approximately 70 checks performed by the computer on each application filed with the Chicago Regional Office:

(6) "CALL SIGN INVALID"
Not a valid Call Sign.

(12) "NOT IN SPECIFIED STATE/COUNTY"
Latitude and Longitude are not in the specified state/county.

(17) "SITES NOT COLLOCATED"
Applicant indicated collocation with another site, but they are more than one second apart.

(20) "MOBILE UNITS IN SECTION III MORE THAN SECTION II"
Number of actual mobile units exceeds number applied for.

(27) "CANADIAN COORDINATION REQUIRED"
For the specified location, Canadian coordination is required.

(31) "INVALID COMBINATION OF LETTERS"
The entry for Paticulars of Radio Operations is invalid.

(40) "EQUIPMENT TYPE NOT RECOGNIZED"
Equipment type entered is not on file. Spelling may be incorrect. Correct entry or enter new type via DBM.

(52) "COULD NOT CHECK TX FREQUENCY VS. SERVICE"
One or more of the following items is invalid: frequency, or output power.

(64) "SLOPE FROM TOWER TO RUNWAY EXCEEDS LIMIT"
FAA coordination is required.

(65) "IRAC COORDINATION REQUIRED"
Frequency is in a government band.

(68) "POWER EXCEEDS LIMIT"
Effective Radiated Power exceeds the calculated limit.
Check input and output power and antenna gain for validity.
Check with engineering section.

FCC FORM 1040-C DATE OF THIS NOTICE

NOTICE NOV 4 76

ACCORDING TO OUR RECORDS, THE LICENSES FOR THE REFERENCED CALL SIGN HAVE EXPIRED. APPLICATIONS FOR LICENSE RENEWALS SHOULD BE RECEIVED BY THE COMMISSION WITHIN 90 DAYS, BUT NOT LESS THAN 30 DAYS PRIOR TO EXPIRATION. AS OF THE DATE OF THIS NOTICE, WE HAVE NOT RECEIVED ANY APPLICATIONS AT THIS OFFICE RELATING TO THE LISTED FACILITIES AND THIS NOTICE SERVES TO INFORM YOU THAT ALL PERTINENT RECORDS WILL BE REMOVED FROM OUR FILES. IF OUR RECORDS ARE INCORRECT BECAUSE YOU INADVERTENTLY FILED FOR RENEWAL OR MODIFICATION THROUGH OUR WASHINGTON OFFICE, PLEASE SEND US A REPRODUCED COPY OF YOUR CURRENT LICENSE SO THAT WE CAN UPDATE THE RECORDS PERTAINING TO THIS STATION.

OPERATION OF RADIO FACILITIES WITHOUT A VALID RADIO STATION LICENSE IS IN VIOLATION OF THE COMMUNICATIONS ACT OF 1934, AS AMENDED. IF YOU HAVE A NEED TO OPERATE RADIO FACILITIES IN THE LAND MOBILE SERVICES, COMPLETE THE NECESSARY APPLICATIONS, REQUESTING A NEW LICENSE, AND FORWARD TO THIS OFFICE WITH THE CORRECT FILING FEE FOR EACH APPLICATION (SEE RULES SUBPART G, PART 1 FOR REQUIRED FILING FEES). BLANK APPLICATION FORMS ARE AVAILABLE AT THIS OFFICE, THE FIELD OPERATIONS OFFICES AT CHICAGO, DETROIT, OR ST. PAUL, OR FROM YOUR EQUIPMENT VENDOR, UPON REQUEST.

A COPY OF THIS NOTICE INFORMATION IS BEING PROVIDED TO THE FIELD OPERATIONS OFFICE IN YOUR DISTRICT.

INSTRUCTIONS FOR FCC FORM 405–C (TEST)

NOTICE TO INDIVIDUALS REQUIRED BY PRIVACY ACT OF 1974

Sections 301, 303, and 308 of the Communications Act of 1934, as amended, (license powers) authorize the FCC to request the information on this application. The purpose of the information is to determine your eligibility for a license. The information will be used by FCC staff to evaluate the application, to determine station location, to provide information for enforcement and rule-making proceedings, and to maintain a current inventory of licensees. No license can be granted unless all information requested is provided.

1. The FCC Form 405–C (Test) may be used in applying only for the renewal of licenses for the station listed on the face of it.

2. The form may not be used if there has been any change in the information contained in the most recent full application on file with the Commission, except the following changes:

Mailing name and address.
Licensee legal name (if no change in ownership, control, or corporate structure).
Equipment data (if technical parameters do not exceed those stated on the most recent full application).[1]
Reduction in the number of mobiles, antenna height, antenna gain, or effective radiated power (ERP).[1]
Tone squelch (PL) frequencies.[1]

3. A separate Form 425 application for modification must be filed for any of the following station changes (a modified license must be obtained from the Commission prior to making such changes):

Relocation of station (including antenna location).
Area of operation.
Increase number of mobiles (including hand-held units), antenna height, antenna gain, or power.
Add or change frequencies.
Add or change Control Points.
Change emission.
Note.—Frequency coordination must accompany application as applicable.

4. If a license contains an "overpowered" Special Condition, submit one of the following with this form:

Explanatory information as required under Item 2 to reduce the power to the minimum level necessary for satisfactory operation.

Engineering justification to substantiate the requested power (this justification will be determined prior to granting renewal).

5. If a renewal is not desired, line through the call sign and return the form with the license for cancellation. (Merely line through the frequencies to be deleted, if any of the frequencies are no longer required.)

6. The expiration dates for all licenses granted under one Call Sign will be conformed under this renewal process.

7. Enclose correct fee with this application (see Rules Subpart G, Part 1). Do not send cash. Make check or money order payable to the Federal Communications Commission. This is a filing fee and will not be refunded even though the application is not granted.

8. Mail to Federal Communications Commission, Chicago Regional Office, Park Ridge, Illinois 60068. Phone: (312) 298–0290.

9. The form should reach the Commission's Chicago Office prior to the license expiration date so that the licensee may continue to operate until notified by the Commission of action on the application. If the application is not returned by the licensee within the prescribed time, the station will be considered no longer in operation, and all associated license records will be removed from the Commission's files.

4. Data Base Queries

License records in the data base are retrievable by input of the following primary search key parameters, among others:

1. Call Sign
2. Licensee ID Number
3. Licensee Name
4. Frequency
5. Service
6. Rectangular Geographic area
7. County and/or State
8. Expiration Date
9. License Number

The following pages contain examples of various types of retrievals available for obtaining information from the license data base:

1. Pages 4.2 through 4.5—Data Base Queries from a remote terminal.

2. Pages 4.6 through 4.8—Geographic/Frequency Search run by the Chicago Regional Office on request.

3. Pages 4.9 and 4.10—Geographic/Frequency Search accomplished by the Environment Data Retrieval (EDR) program (used internally by the Regional Office staff and an integral part of AFAM). Page 4.10 is a plot of the data exemplified by the printout on page 4.9.

4. Page 4.11—Special retrieval program similar to the geographic/frequency searches but which selects only co-channel and adjacent channel stations in the environment producing a calculated signal above threshold at a given location.

[1] Please note and explain on an attachment to this application any changes in the last three items (this is necessary to update license records). If the licensee's legal name has been changed, a letter of explanation must be submitted with this application.

@FIN

THIS IS THE GEOGRAPHIC-FREQUENCY SEARCH RUN FOR YOU BY THIS OFFICE OF THE F.C.C.

THE FOLLOWING INPUT PARAMETERS WERE USED:
CENTER POINT OF THE SEARCH WAS AT
LATITUDE 41/42/56
LONGITUDE 88/21/ 8
THE RANGE WAS 50 MILES
THE FREQUENCY BAND SEARCHED WAS 158805000 TO 158805000 HZ

THE TRANSMITTER RECORDS LIST THE FOLLOWING INFORMATION:
(1)OPERATING FREQUENCY
(2)NAME SORT FIELD WHICH IS THE COMPUTER NAME FOR THE LICENSEE
(3)CALL SIGN
(4)LATITUDE AND LONGITUDE OF THE TRANSMITTER
(5)TSF OR TONE SQUELCH FREQUENCY (IF USED)
(6)THE HEIGHT OF THE ANTENNA ABOVE GROUND
(7)THE ERP OR EFFECTIVE RADIATED POWER OF THE TRANSMITTER
(8)THE SERVICE THE LICENSE WAS ISSUED FOR
(9)AND THE LEGAL NAME, ADDRESS, AND TELEPHONE OF THE LICENSEE

THE RECEIVER RECORDS LIST THE FOLLOWING INFORMATION:
(1)OPERATING FREQUENCY
(2)LATITUDE AND LONGITUDE OF THE RECEIVER
(3)THE TONE SQUELCH FREQUENCY USED (IF ANY)

THE MOBILE RECORDS LIST THE FOLLOWING INFORMATION:
(1)CALL SIGN
(2)NUMBER OF UNITS AUTHORIZED
(3)THE OUTPUT POWER OF THE MOBILES
(4)OPERATING FREQUENCY

IN SOME CASES A CALL SIGN WILL BE LISTED AS "KNEW". THIS INDICATES THERE IS AN APPLICATION PENDING WHICH MAY BE ISSUED ON THAT FREQUENCY. WHEN THE CALL SIGN IS KNEW SOME OF THE INFORMATION MAY NOT BE AVAILABLE SO THAT THE RECORDS WILL BE FILLED WITH @@@@@.

TONE SQUELCH FREQUENCY IS NOT LICENSED BY THE COMMISSION THEREFORE THE TONE SQUELCH RECORDS IN THIS SEARCH SHOULD NOT BE CONSIDERED AS COMPLETELY ACCURATE. THEY ARE ONLY WHAT THE LICENSE APPLICANTS HAVE FURNISHED TO THIS OFFICE.

IF THIS OFFICE CAN BE OF ANY FURTHER ASSISTANCE TO YOU DO NOT HESITATE TO CALL ON US.
YOURS TRULY

THE FOLLOWING TRANSMITTER RECORDS WERE FOUND IN THE SEARCH AREA

FREQUENCY	NAME SORT FIELD	CALL SIGN	LATITUDE	LONGITUDE	TSF	ANTENNA HEIGHT	ERP	SERVICE
158805000	PERUPLILL	KJY703	41/19/41	89/ 7/35	151.4	68	84	PL

LEGAL NAME OF LICENSEE

5. DATA BASE EXTRACT

APPENDIX B

INTERIM PROGRESS REPORT ON SPECTRUM MONITORING

PART 1

The Commission has found that good information on channel utilization is essential to prudent management of the spectrum. The complex nature of this utilization in the land mobile services, and its magnitude, require extensive analysis of the raw data that the monitoring program collects. While the Commission continues its analysis, however, there are many useful things about channel utilization that we now know. It is the purpose of this appendix to illustrate a very small part of this useful information. Our reason for doing this to begin a process of familiarization with monitoring data and its many useful aspects. We anticipate that interested parties will address their comments to the utility of monitoring data as an important adjunct to traditional methods of frequency engineering.

The Chicago Office has conducted two principal monitoring programs. First has been the "production" monitoring program. This program results in spectrum occupancy data which is used by the automatic frequency assignment program (APAM). Second, and perhaps more important, the Chicago staff has been monitoring for the past year a group of selected channels in a special "Long-Term Monitoring Project".

Production Monitoring

Production monitoring to support the frequency selection program has been conducted at 56 sites (urban and rural) within a 100 mile radius of Chicago. Monitoring sites were selected to fit a grid pattern designed to provide comprehensive data over areas where monitoring was to be conducted. A site spacing of five miles enables the monitoring system to record any use of a channel by typical base stations and their associated mobiles. This five mile grid size was adopted for use in urban areas where it was thought desirable to have the most detailed information. Outside of these urban areas, where there is less density of users, the grid size was set at 25 miles. Actual site selection was affected by availability of parking space for the monitoring vans. Much use has been made of governmental lands and buildings such as state parks and post offices.

Each of the 56 monitoring sites is revisited periodically to update utilization information. The Regional staff believed it was necessary to have more timely information in areas heavily populated by existing users and potential users. Accordingly, visits to urban sites were scheduled for at least four times per year while sites in non-urban areas were visited on a yearly basis. The production data collection was performed at antenna heights of 12 to 25 feet.

The scanning procedure used in the production sampling scheme has been to divide the land mobile spectrum into blocks of contiguous channels and to scan each for five minutes. The entire land mobile spectrum is examined by sequencing through the scan blocks then repeating the process. The Commission has used two similar monitoring vans to collect the usage data. One van, fabricated by Fairchild Electrometrics Corporation of Amsterdam, New York, is able to sample the entire land mobile spectrum in 126 minutes utilizing 21 scan blocks with a maximum of 146 frequencies in a given block. The other two vans, put together by Stanford Research Institute (SRI) of Palo Alto, California, have a greater sampling speed than the Fairchild van so that they can sample the same spectrum in about 78 minutes with a maximum of 250 frequencies in the scan blocks.

The output of the monitoring equipment is a computer tape containing administrative information (such as location, date and times of day) and, for each frequency, recording of the signal level each time the frequency is sampled during the scan (normally more than 600 times per five-minute scan period). This raw data tape is then processed by the computer at the Regional office. The tape reduction process is accomplished in several steps. First, the raw tape is run through a pre-reduction analysis to determine the validity of the raw data, the amount of monitoring accomplished, and to obtain information about the monitor site characteristics such as the ambient noise level. The raw data tape is then read, the tape reduction program applied, channel utilization information is derived and then stored on a disc medium for more convenient access. The tape reduction produces an unsorted utilization data file which is then sorted into a file ordered by frequency. Each frequency record in this file contains the following information for each five-minute scan period:

1. Frequency
2. Year
3. Month
4. Day
5. Hour
6. Minute
7. Site ID
8. Ground Elevation
9. Antenna Support TYPE
10. Antenna Height
11. Structure Height
12. Noise Level
13. Equipment Status
14. No. of Impulse Noise Samples
15. No. of Intermodulation Samples
16. No. of Adjacent Channel Samples
17. No. of Valid Samples
18. Maximum Signal Level
19. Minimum Signal Level
20. Average Signal Level
21. Occupancy due to samples greater than —140 DBW
22. Greater than —134 DBW
23. Greater than —128 DBW
24. Greater than —122 DBW
25. Greater than —116 DBW
26. Greater than —110 DBW
27. Greater than —104 DBW
28. Average Message Length
29. Standard Deviation of Message Length
30. Average Message Gap Length
31. Standard Deviation of Gap Length
32. Number of Messages
33. Number of Transmissions
34. Standard Deviation of Transmissions per Message
35. Number of Intra-Message Gaps
36. Average Transmission Length
37. Standard Deviation of Transmission Length
38. Average Intra-Message Gap Length
39. Standard Deviation of Intra-Message Gap Length

The frequency ordered utilization data is then run through a program to produce a summary file which is used as the on-line production monitoring data base file consisting of the following information for each frequency (See Appendix C for printouts of this information.):

1. Latitude
2. Longitude
3. Receiver Antenna Height Designator
4. Frequency
5. Quarter (of the year)
6. 90th Percentile Occupancy
7. 50th Percentile Occupancy
8. 10th Percentile Occupancy
9. Mean Occupancy
10. Peak Five-Minute Occupancy
11. Waiting Time (Using 90th Percentile Occupancy)
12. Waiting Time (Using 50th Percentile Occupancy)
13. Number of Five-Minute Samples taken in Quarter
14. Waiting Time (Using Mean Occupancy)
15. Waiting Time (Using Peak Five-Minute Occupancy)
16. Average Occupancy due to each station in the environment assigned this frequency
17. Year

Long-Term Monitoring Project

A special "Long-Term Monitoring Project" was initiated for the purpose of establishing confidence bounds on the production sampling scheme. Statistical knowledge gained on hourly, daily and monthly variations in channel utilization obtained from the project will be useful in determining the number of days needed to spend at a monitoring site and the frequency of visits.

For this special project, equipment was removed from one of the SRI vans and installed in the Regional Office connected to a roof-top antenna with a height of 56 feet. A group of 246 channels from each of the three major land mobile bands was selected as channels to be monitored. Special usage channels, low-power and mobile only frequencies were eliminated so that for each radio service the normal two-way channels would be scanned. Each block of 246 frequencies was scanned almost continuously over each day for one week. The equipment recorded 10 to 11 five-minute samples in each hour of the monitoring day compared to one five-minute sample per hour for production monitoring. This special monitoring was conducted from late May, 1976, through August, 1976, alternating weekly between the 25, 150, and 450 MHz bands. A voluminous amount of data has been recorded in this project. We have initiated a number of analysis projects. These analyses will yield considerable knowledge about spectrum usage by licensees in the Chicago area. We will publish periodic reports on the results of these analyses as they are concluded. Some significant preliminary results and examples of the types of data available are presented hereafter.

All of the data included in the figures of this Report have been calculated from raw data tapes recorded in the "Long-Term Monitoring Project". In essence, the project consisted of special monitoring of 246 channels from each of the bands 25–50 MHz, 150–160 MHz and 450–470 MHz. The selected frequencies in each band were monitored continuously each day for one week alternating the bands monitored from week to week. In this project, each frequency was monitored continuously yielding 50–55 minutes out of each hour whereas in the production monitoring scheme, each channel is normally monitored for five minutes out of each hour. Although data was obtained for all three of the major land mobile bands, we have included, for illustrative purposes, only data from the 150 MHz band.

TABLE 1.—*Summaries of 150–160 MHz Frequencies Monitored*

Police	34
Special emergency	7

Care should be taken when interpreting the following graphs. The data was taken from only one monitoring site; it is presented for illustrative purposes only; the comparisons made are relative not absolute; and questions remain as to the statistical variations of the measured parameters. In addition, the following should be taken into consideration:

(1) Unless indicated otherwise, all data shown was taken from tapes recorded during the week of May 24–28, 1976.

(2) The data was collected at the Park Ridge, Illinois, site of the Chicago Regional Office, in the northwest suburbs 15 miles from the center of downtown Chicago.

(3) At a receiving antenna height of 56 feet, the practical radius of coverage ranges from 10 to 50 miles depending on the antenna heights of transmitting stations—10 miles for low-power mobiles and 50 miles for base stations having antennas 1,000 feet above ground. The median radius of coverage is about 22 miles for typical base stations. This means we could receive stations in most of the Chicago metropolitan area plus the northern and western suburbs.

For the purpose of this paper, the following definitions apply:

(1) *Five-Minute Occupancy.*—Percentage of time is a five minute period a signal is found on a channel by the monitor receiver.

(2) *Peak Five-Minute Occupancy.*—The maximum five-minute occupancy for any given day (or other monitoring period).

(3) *Hourly Occupancy.*—The average of all five-minute occupancies measured in a given hour.

(4) *Peak Hour Occupancy.*—The maximum hourly occupancy for a particular day.

(5) *Daily Average Occupancy.*—The average of all five-minute occupancies measured over the monitoring day.

THE FIGURES

Figure 1.—This figure shows the relationship between five-minute occupancies and the hourly occupancy and indicates that the maximum (or peak) five-minute occupancy does not have to occur in the peak hour.

Figure 2.—This figure compares the weekly mean value of Peak Hour Occupancy and Average five-minute occupancy for the week with the maximum five-minute occupancy occurring in the week for 13 Business frequencies.

Figure 3.—For three frequencies in the Power Radio Service, this figure indicates the manner in which the weekly mean of the Peak Hour Occupancy varies over the year.

The dates of the relative weeks are:
1—June 30–July 3, 1975
3—July 14–18, 1975
6—August 4–8, 1975
15—October 8–10, 1975
35—February 23–27, 1976
37—March 10–12, 1976
39—March 23–26, 1976
45—May 3–5, 1976
48—May 24–28, 1976
52—June 24–25, 1976

Figure 4.—This figure is a graphical representation of the relationship between measured occupancy and calculated waiting time. Waiting time is the time a user has to wait on a channel before he can transmit a message. It is calculated as an average waiting time in the peak period of channel usage. The curve is plotted for average message lengths of 30, 20 and 10 seconds. At the 40% occupancy point, the waiting time to use the channel would be 54 seconds, 36 seconds and 18 seconds for channels having average message lengths of 30, 20 and 10 seconds, respectively.

Figures 5 through 15.—These graphs show the weekly mean value of Peak Hour Occupancy for each of the 150 MHz frequencies monitored in this project. The graphs may be used to make a relative comparison between frequencies available to a particular radio service and between frequencies available to different services. Only data for the week of May 24–28, 1976, is presented.

Figures 16 through 19.—These figures are copies of actual printouts obtained from the DAYTAB (Daily Tabulation) computer routine that calculates the occupancy parameters we have plotted in the preceding figures. Two frequencies from the Business Radio Service are used as examples. For each frequency, the first page of the two-page printout contains the following information.

(1) First column—The month/day/year of the monitoring day.

(2) Next 24 columns—The heading of each column is the hour of day using 24-hour clock. For each day, the first row in these columns contains the hourly occupancy for the hour beginning with the time heading for the column. The second row contains the number of five-minute scan blocks monitored within the particular hours. The last two rows under these columns are (1) the average hourly occupancy for the week and (2) the total number of five-minute samples used to calculate the average hourly occupancy. (Only those hours with six or more five-minute samples were included in the calculation.)

(3) 26th column—The first figure in this column, labelled PK, is the maximum hourly occupancy or "peak hour occupancy" (for each day). The second figure is the maximum five-minute occupancy or "peak five-minute occupancy" for the day.

(4) 27th column—The first figure in this column labelled MP, is the hour of the day in which the peak hour occupancy occurs. The second figure is the hour of the day in which the peak five-minute occupancy occurs.

(5) 28th column—The first figure in this column, labelled AV, is the average of all the hourly occupancies for the day. The second figure is the average of all the five-minute occupancies measured in the day. Either figure can be referred to as the "daily average occupancy".

(6) 29th column—The column, labelled 90, contains the 90th percentile occupancy for the day. 90th percentile occupancy means that 10% of the five-minute occupancies recorded in the day are greater than the specified value while 90% of the five-minute occupancies are equal to or less than the specified value.

(7) 30th column—The first figure in this column, labelled A/P, is the ratio of daily average occupancy to the peak hour occupancy. The second figure is the ratio of daily average occupancy to the peak five-minute occupancy.

(8) Weekly Summary—This summary, printed underneath the foregoing, should be self explanatory. It lists the minimum, maximum and average values of the specified parameters.

The second page of the two-page printout is a plot of the hourly occupancies listed in columns headed 00 to 23 on the first page. The symbol "1" represents the hourly occupancy levels for the first day of the monitoring week. The symbol "2" represents the hourly occupancy levels for the second day, and so forth. The asterisk represents the average hourly occupancy levels for the week. If data points for two or more days coincide, the symbol for the latest day is shown.

Results of Analyses to Date

The following are the results and conclusions of analyses of spectrum usage data derived from the long-term and production monitoring programs. They summarize a number of different staff studies which have yet to be publicly released.

With respect to the monitoring system and measurement methods, we find that:

1. In measuring Average Occupancy from production data, the maximum measurement error is within ±8 Percent Occupancy and slightly higher for 90th Percentile Occupancy (within ±14 Percent Occupancy).

2. The relative measurement error is larger for low occupancy channels than for high occupancy channels.

3. Measurement error decreases with increased sampling during a given time period.

4. The optimum scanning/sampling method is a compromise between the production sampling scheme and the long-term type of continuous monitoring:

a. Allowing an increased number of channels to be scanned in a given period.

b. Maintaining the confidence level at 95% ±3 Percent Occupancy.

5. To accurately describe the usage on a channel within a given hour, at least three five-minute samples per hour are required.

From the analyses conducted to date on the utilization of frequencies in the Chicago area, we have found that:

1. There is no reasonable correlation between spectrum utilization data and the number of base stations, mobiles and licensees authorized in the area. (See Part 2 for details of a specific study.)

2. Below 450 MHz, there is an increase in measured utilization with an increase in monitor receiver antenna height.

3. Most frequencies exhibit a standard deviation within ±10 Percent Occupancy in Peak and Average usage from day-to-day.

4. 90th Percentile Occupancy and Average Occupancy tend to be normally distributed.

5. For low occupancy channels, the distribution of five-minute occupancy samples taken consecutively on a land mobile channel for a 12 hour period (about 144 samples) usually is not similar to any common statistical distributions. For high occupancy channels, the distribution of these samples tend toward a normal distribution.

6. The distribution of 90% occupancy samples taken by the monitor is usually asymmetric with respect to the 90% occupancy value determined by use of all of the five-minute samples for a day. Usually about ⅔ of the 90% occupancy distribution falls below the full day value giving a like probability that the 90% occupancy value determined by the monitor will be lower than the true 90% occupancy value.

7. The monitor average sampling distribution is usually symmetric about the average

value determined from all of the days samples. There is an equal probability that the measured average monitor occupancy will be either high or low.

Optimum Loading Level

The Commission is faced with the question of how to determine whether a channel is loaded to saturation, to an optimum level, or to a level which permits additional users. One apporach taken by the Commission has been to adopt mobile loading standards in the 470–512 MHz band and 800 MHz band.

Part 2 of this report deals with the relationship between mobile loading standards and actual on-the-air usage measured by our monitoring equipment.

After further analysis, we expect to be able to determine the optimum loading level and the level of usage at which saturation occurs. For the purpose of discussion, the saturation level is defined as the level of channel usage at which the addition of another user cannot be tolerated by existing users on a channel; and the optimum loading level is defined as the preferred level of channel usage at which additional licensees should not be authorized to use a given channel on a time-sharing basis in the same geographic area.

From the plot of Waiting Time vs. Transmission Occupancy (Figure 4) and the graphs showing channel usage by the Business and Taxicab Radio Services (Figures 13 and 15–19), it appears that an occupancy figure in the 40%–60% range could be considered as an optimum loading level for those two services. The further development of this concept will depend on a variety of factors involving the ways in which channels are used by various kinds of users. Obviously there are different levels of acceptability for different priorities of use. These are subjects for comment in the current proceeding, but will be considered extensively in the future proceedings before loading levels are established.

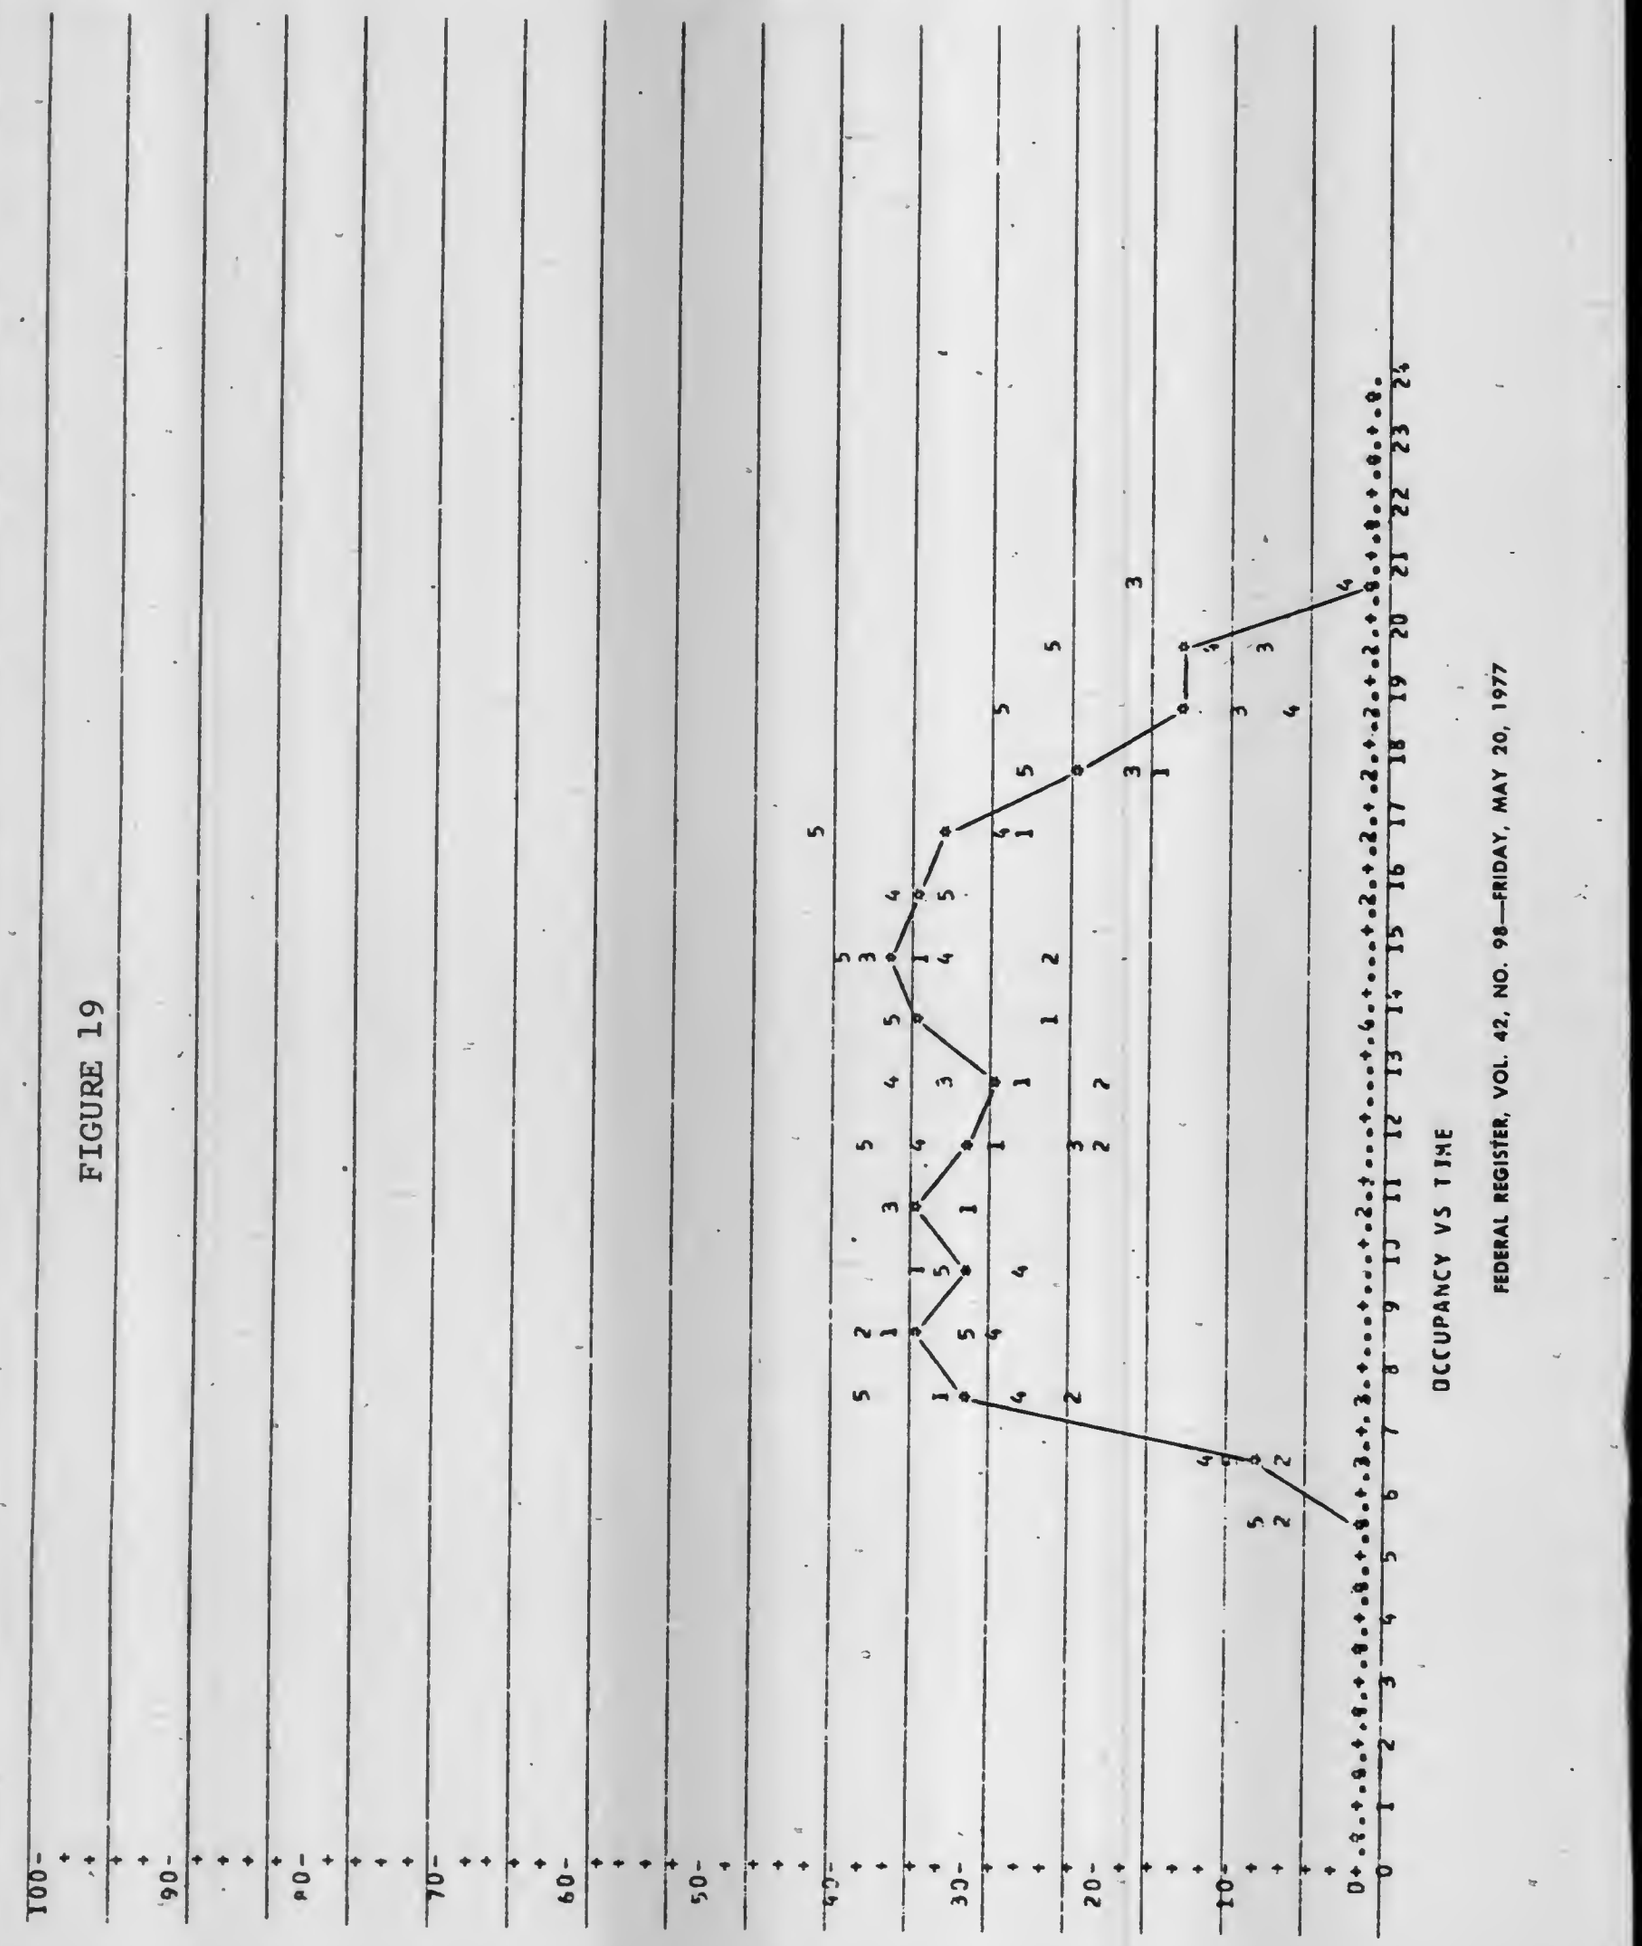
FIGURE 18



PART 2.—STUDY OF THE RELATIONSHIP BETWEEN SPECTRUM UTILIZATION AND MOBILE LOADING FOR THE 470 MHZ BUSINESS SERVICE IN CHICAGO

Abstract

A group of 470 MHz Business Radio Service frequencies in Chicago has been studied to determine the degree of statistical correlation between the number of mobile units licensed to a channel and the level of channel utilization. Linear correlation-regression analysis has been applied to spectrum occupancy and mobile loading data gathered at the Commission's Chicago Regional Office. Extremely low coefficients of dependence, on the order of 2%, indicate the occupancy and the number of licensed mobile units are not linearly related. Moreover, no mathematical relationship could be found from which to predict channel occupancy levels from the Commission's mobile loading records. Independent investigations conducted by the Office of Chief Engineer have corroborated the findings of this study.

Introduction and Background

In Dockets 18261 and 18262, the Federal Communications Commission adopted mobile loading standards as the basis for determining channel loading for land mobile operations in the 470–512 MHz and 800 MHz bands. For each radio service or group of services governed by Parts 89, 91, and 93 of the Commission's Rules, specific standards for the number of mobile units on a channel were established to determine when that channel could no longer be assigned in a given area. These standards were viewed with considerable uncertainty by the land mobile community. In the Docket 18261 proceeding, a number of parties commented that these standards, as the sole means of determining channel loading, would prove overly rigid. They felt that the operational and technical requirements of land mobile users should also have a role in determining when a channel was fully loaded or when more channels were needed in a communication system.

The loading standards were intended to foster efficient use of the spectrum by preventing the intolerable congestion that had been reported in other land mobile frequency bands. A major concern, however, was the degree to which the number of authorized mobile units would accurately reflect the amount of channel utilization. The Commission's mobile loading records are based upon the information supplied by an applicant in his license application. The loading standards, by nature, might serve to encourage applicants to overstate the number of units in their systems in order to justify additional channels or to minimize channel sharing with other users. (The extent to which this practice has undermined the accuracy of the Commission's records is unknown, but believed sizeable.) Moreover, it is unlikely that all mobile units in a system would be in an operational status at any given time.

These concerns led some parties in the Docket 18261 proceedings to suggest spectrum monitoring as a more objective basis for determining channel loading. At that time, however, the Commission's spectrum monitoring program was in an early stage of development, and mobile loading was the only manageable loading technique available. Moreover, in the absence of documentation to the contrary, a direct relationship between channel utilization and the number of contributing mobile units could logically be assumed.

When the Spectrum Management Task Force initiated the "long-term monitoring project", adequate data for a study of this relationship became available. This type of monitoring provided the best possible depiction of channel utilization for much of the Chicago Metropolitan area. A complete description of the "long-term monitoring project" is given on page 1–3 of Appendix B.

Study Formulation

A group of 22 Business Radio Service channels in Chicago were selected for the study for the following reasons:

(1) The channels are governed by mobile loading standards.

(2) Of all 470 MHz pools, only the Business Service pool provided a sufficient number of "on-the-air" channels to permit statistical analysis. In the Public Safety pools, for example, only five of the 26 assignd channels registered occupancy at the Chicago Regional Office during the week of special monitoring for this study.

(3) All users of these business channels operated through mobile relay stations located on downtown Chicago skyscrapers. Since these stations are within "line-of-sight" of the regional office (at Park Ridge, Illinois, 15 miles northwest of the Chicago loop), reception of practically all base and mobile messages could be achieved.

(4) The mobile units on these channels had been licensed at least eight months prior to the week of the monitoring period (January 26–31, 1976). This is significant since the Commission's Rules allow a licensee a period of eight months following the issuance of his license in which to place his system in complete operation.

The 22 channels were monitored at the Chicago Regional Office throughout the week of January 26–30, 1976. This monitoring was done on a nearly continuous basis over the following time periods:

January 26 and 27—6 a.m. to 8 p.m.
January 28 and 29—6 a.m. to 6 p.m.
January 30—1 p.m. to 6 p.m.

Analysis of Occupancy and Mobile Loading Data

Table 1, on page 2–7, contains the channel occupancy and mobile loading data analyzed in the study. The occupancy parameters of interest are weekly averages of "daily peak hour", "daily average hour", and "daily 90th percentile" occupancies. These parameters are defined in Appendix B, page 1–5. As an illustration, the weekly "peak hour" occupancy is the arithmetic mean of the daily "peak hour" occupancies for the five days of monitoring.

The mobile loading data in Table 1 consists of the "Total" and "Effective" numbers of mobile units licensed on a channel, the number of licensees sharing the channel, and the number of transmitter sites in operation. The "Total" number of units is the combined number of vehicular and portable radios stated by an applicant on his application form. This is converted to an "Effective" number (for loading determination) by counting each handheld portable as a fraction of a loading unit (one-third of a unit for the Business Service) and then dividing by the number of channels serving the mobile units. Table 1 shows that for the selected frequencies, the "Total" and "Effective" numbers of mobile units were essentially the same.

Presented below is a statistical summary of the data given in Table 1.

Appendix B

Parameter	Mean	Standard deviation	Coefficient of variation [1]	Minimum	Maximum
Peak hour occupancy	[2] 36	11.4	.317	[2] 15	[2] 61
Average hour occupancy	[2] 21	7.6	.362	[2] 8	[2] 37
90th percentile	[2] 46	12.6	.274	[2] 21	[2] 66
Total number of mobile units	80	17.9	.224	43	115
Effective number of mobiles	79	17.6	.223	42	112
Number of users	6	3.5	.583	1	15

[1] The coefficient of variation is defined as the standard deviation divided by the mean value. It is used to compare the relative variability of parameters having different means.
[2] In percent.

Several observations can be made from the above summary. First, it can be seen that the occupancy levels of the 22 frequencies were not uniformally distributed (see also Figure 1 on page 2–8). The coefficients of the variations (27%–36%) indicate a fairly wide range of variation among the channels. The number of mobile units also varied from channel to channel, but was relatively more stable than the occupancy parameters.

As shown below, more than half of the channels were either above or close to the 90 unit loading limit of the Business Service.

Effective number of mobiles:	*Number of channels*
More than 85	11
75–84	4
65–74	3
Less than 65	4

Although the mobile loading of these channels is generally high, there appears to be space available for prospective users with relatively few mobile units. In terms of channel utilization, however, the loading situation is somewhat different. For instance, the least loaded channel, 472.6625/475.6625 MHz, was licensed 42 mobile units (Table 1). Another 48 units could be licensed before this channel would be at the loading limit. However, the 90th percentile occupancy for this channel was 56%; making it one of the most heavily utilized during the week of the monitoring. In contrast, 472.3375/475.3375 MHz had the lowest 90th percentile occupancy for the week (21%). Yet, this channel was loaded to 89 mobile units, and thus was not assignable. Inspection of Table 1 will reveal similar disparities between utilization and mobile loading.

The line chart in Figure 1 (page 2–8) shows that channel occupancy and the number of mobile units per channel do not generally move in the same direction. This indicates a lack of correlation between these parameters.

Results of Correlation-Regression Analysis

"Simple linear correlation-regression analysis" was applied to the occupancy and mobile loading data to determine the degree of linear correspondence between them. The analysis entailed the calculation of correlation and dependence coefficients and the preparation of graphs to aid in visualizing mathematical trends.

Independent analyses were made for six combinations of occupancy and mobile loading parameters. The number of mobile units per channel was taken to be the known variable (independent variable), while the measured level of channel utilization served as

the variable to be predicted (dependent variable). The hypothesis to be tested was that the occupancy and loading variables were mathematically related by a linear equation; i.e., a straight line relationship. A high coefficient of correlation would indicate a strong linear relationship, where as a correlation coefficient of zero would suggest that the variables are statistically independent.

The results of the analysis are given below.

Predicted variable	Known variable	Correlation coefficient	Dependence [1] coefficient (in percent)
Peak hour occupancy	Total number mobiles	+.144	2.1
	Effective number mobiles	+.106	1.1
Average hour occupancy	Total number mobiles	+.132	1.7
	Effective number mobiles	+.098	1.0
90th percentile occupancy	Total number mobiles	+.076	.6
	Effective number mobiles	+.038	.1

[1] The coefficient of linear dependence is a statistical measure of the extent to which variations in the predicted variable can be attributed to corresponding variations in the known variable. It is found by squaring the value of the coefficient of correlation and multiplying by 100 to express as a percentage.

The extremely low values of these coefficients indicate that a linear equation cannot be used to relate the occupancy and mobile loading variables. This point is further illustrated for the case of the "Peak Hour Occupancy" versus the "Total Number of Mobile Units". Here, a dependence coefficient of 2% implies that 98% of the variations in occupancy cannot be explained by corresponding variations in the number of mobile units.

The relationship between variables is shown graphically in Figure 2 on page 2-9. Each point on the graph represents one of the 22 Business Service channels. The channel points are located by peak hour occupancy on the vertical axis and the total number of licensed mobile units on the horizontal axis. The points are widely scattered and do not appear to cluster around any known mathematical relationship. Linear regression analysis has been used to fit a straight line through the points in such a manner that differences between the observed and predicted values of occupancy will be minimized. If there had been a high coefficient of correlation in a linear sense, the points on the graph would have clustered closely around this line.

The amount of dispersion of the points about the line of best fit is measured by the "standard error of estimate". Expressed in units of the predicted variable (occupancy), the standard error of estimate for the points in Figure 2 is 11.6%. Fifteen of the twenty-two channels had measured occupancy values falling within 11.6% of the predicted values. This dispersion is quite large and again illustrates the lack of a definitive linear relationship between occupancy and mobile loading data.

Multiple Correlation Analysis

A "multiple" correlation coefficient was calculated to determine whether improved occupancy predictions could be made when the number of licensees per channel was added as a second independent variable. The calculated value of +.122 indicated no improvement would result.

Conclusions

In a strict statistical sense, the following conclusions are applicable only to the 22 Business channels investigated in the study. They cannot be used to make nationwide projections but may provide a clue to the relationship between mobile loading and spectrum utilization in other cities.

(1) The extent of channel utilization cannot be predicted from the Commission's mobile loading records; i.e., from the number of licensed mobile units and/or users. This is not to say that channel occupancy and the actual number of mobiles in operation at a given time are unrelated. The lack of a definitive relationship may more likely be attributed to disparities between the Commission's loading records (as supplied by applicants) and the number of mobile units in actual operation. A second factor which may work contrary to a definitive relation is the highly diverse nature of communications within the Business Radio Service. Further studies need to be made for other radio services and geographic areas before any general conclusions can be stated.

(2) In the metropolitan Chicago area, it appears that additional users could be accommodated on channels which are "fully loaded" according to the present loading standards. Conversely, relatively lightly loaded channels are among the most heavily utilized. The study thus suggests that a frequency assignment system based solely on mobile loading can yield misleading recommendations.

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

LABORERS

Group 1: Building Laborers; Carpenters Tenders; Material Handerlers and Hook Tenders; Form Strippers; Signalmen; Riggers; Sandblast Pot Tender; Saw Tenders; General Labor; Dump Man; Pit Man; Brush Cutters, Ditch Diggers; ; Monolithic Workers; Dryer Man; Window Cleaner; Utiliwalk and Utilidor

Group 2: Base and Floor Machine Man

Group 3: Choke Setters

Group 4: Concrete Labor including Vibratorman; Power Butty and Concrete Power Saw; Curb and Gutterman; General Crew (including Plant Crew) Asphalt

Group 5: Pneumatic or Power Tools

Group 6: Stake Hopper; Grademan; Steampoint or Water Jet Operator

Group 7: Tank Cleaner

Group 8: Jackhammer Operator and Pavement Breaker; Chuck Tender (Wagon and Air Track Drills)

Group 9: Mason Tender and Mud Mixers

Group 10: Gunnite Operator; Pipelayers; Culvert and Multiplate; High Scaler; Sloper (over 20 feet); Chain and Power Saws; Sack or bulk; Sewer Pipelayer; Sewer Caulkers; Timberman; All Monolithic Crews; Pipe Builders; Sandblasters

Group 11: Asphalt Rakers

Group 12: Tenders; Plasterers; Bricklayers; Cement Finisher; Burning and Cutting Torch (except intermittent torch work)

Group 13: Wagon Driller

Group 14: Timber Faller; Air Track Wagon Driller

Group 15: Chain Saw Filer

Group 16: High Riggers and Tree Topper, Powderman

Group 17: TUNNEL OR SHAFT
Class A: Topman and Bull Gang; Brakeman
Class B: Muckers, Laborers; Nippers
Class C: Chuck Tender
Class D: Retimberman
Class E: Miners, Shafts and Raises
Class F: Powderman

POWER EQUIPMENT OPERATORS

Group 1: Batch Plant Oporator; Batch and Mixer, 200 yards per hour and under; Loaders; Elevating - Athey, Barber Greene and similar types; Overhead and front-end, under 2½ yards; Mixers; Concrete Mixers and Batch, 200 yards per hour and under; Pumps; Fuller Kenyon, Pumpcrete and Concrete, Rollers, Tampers and Vibrators: on Plant or Road Mix materials; Tractor, Farmall types, 50 h.p. and over; Trenching Machines, under 16 inches

Group 2: Batch Plant Operator: Batch and Mixers, over 200 yards; Derricks, all; Drilling Machines, Core, Cable Rotary and Exploration; Mixers: Mobile type with hoist combination; Mucking Machines, Mole, Tunnel Drill and/or Shield

Group 3: Brooms, Power Wayne, Saginaw and similar types; Bulldozers, under D6 or similar; Post Hole Diggers, mechanical; Saws, Concrete; Scrapers; Carryall type, single; Nodwell Sno-cat

Group 4: Bulldozers: D6 through D9 or similar; Bump Cutter (Concut Christenson or similar types); Conveyors

Group 5: Bulldozers: TC 12, Quad 9, Pay Dozers, Linked Pusher, H.D. 41 and/or similar; Bulldozers engaged in Yo Yo Operation; Cableways and Highlines, 3 yards and under; Cranes: "A" Frame Trucks, Deck Winches, single power drum; "A" Frame Trucks; Helicopter; Deck Winches (double power drum); Crawler, truck type, Floating Locomotive, Whirley, either 3 yards and under or 150 boom including jibs and under 45 tons and under; Hydralifts or Transporter, Hyster Cat Cranes and attachments, Sidebooms 45 tons and under; Fork Lifts with power broom and swing attachment; Loaders: Overhead and Front-end, 2½ yards and under 4 yards; Motor Patrol Graders: Over Model 14 or similar types; Piledriver Engineers, L. B. Foster Puller or similar paving breaker; Power Plant Turbine Operators; 300 K.W. on highway or airfield construction projects or Quarry operators); Sauerman-Bagley; Shovels: Crawler and truck type, all attachments, 3 yards and under; Sub Grader (Gurries, C.M.I. and similar types); Tractors, Farmall type, used as Vackhoes, Rubber-tired (Ford, Ferguson, Case and similar types); Tournapulls; Caterpillar, Euclid Scrapers and similar type equipment, over 25 yards through 40 yards; Hover Crafts, Flex Craft, Helicopter; Transporter; Cableways; Rollagon, Dredge Barge Cable; Highline or Cable Car, Boat Coxswain

POWER EQUIPMENT OPERATORS (Cont'd)

Group 6: Cableways and Highways, over 3 yards; Cranes: Crawler, truck type, Floating, Locomotive, Whirley, either over 3 yards and under 6 yards, over 150' boom, including jibs or over 45 tons; Tower Cranes, Pecco, Lorraine, Bucyrus and similar types; Hyster Cat Cranes and attachments, Sidebooms over 45 tons through 100 tons; Loaders: Overhead and Front-end, 4 yards up to and including 10 yards; Shovels: Crawler and truck type, all attachments, 3 yards and under 6 yards; Tournapulls, Caterpillar, Euclid Scrapers and similar type equipment over 40 yards through 55 yards; Slip Form Paver, C.M.I. and similar types

Group 7: Cement Hogs; Locomotives: Rod and Greared Engines

Group 8: Compressors: Excavating; Locomotives: Dinkey (air, steam, gas, and electric) Speeders

Group 9: Compressors: Steel Erection including Sandblasting, Painting or same, Pile Driving, Hoists on Steel Erection (Towermobiles and Air Tuggers); Loaders: Fork Lifts with tower; Scrapers: Carryall, Tandem

Group 10: Conveyors, Beltcrete with power pack and similar; Loader: Elevating Belt type, Euclid and similar types

Group 11: Cranes: "A" Frame Trucks, Deck Winches, single power drum; Crushers, rock, washing and screening plants; Hoist Air Tuggers, Elevators; Motor Patrol Graders: Model 14 or similar types and under; Power Plant Turbine Operators: under 300 K.W.; Shovels; Tournapulls, Caterpillar, Euclid, Scrapers and similar type equipment 25 yards and under

Group 12: Cranes: Crawler, truck type, Floating, Locomotive, Whirley, either 6 yards or over, or over 200' of boom including jibs or over 150 tons; Hyster Cat Cranes and attachments, Sidebooms over 100 tons; Loaders: Overhead and Front-end, over 10 yards; Shovels: Crawler and truck type, all attachments, 6 yards and over; Tournapulls, Caterpillar, Euclid, Scrapers and similar type equipment over 55 yards through 70 yards

Group 13: Finishing Machine Operator, Concrete Paving, Sidewalk Curb and Gutter Machine; Screen Man or Slurry Operator; Spreaders - Blaw Knox, Cedarapids, Barber Greene, Railroad Wing Spreader or similar types

Group 14: Loaders: Elevating Grader type, Dumor and similar types

Group 15: Loaders: Fork Lifts or Lumber Carrier (on construction job site)

POWER EQUIPMENT OPERATORS (Cont'd)

Group 16: Mechanics, Welders, Machinists, heavy duty

Group 17: Mechanic; Leadman

Group 18: Mechanics' Helpers, heavy duty (shop)

Group 19: Mechanic, light duty; Rollers, Tampers and Vibrators: Other than plants or road mix (where towed, to pay rate or equipment used to pull); Tractors, Farmall type less than 50 h.p.

Group 20: Mixers, Asphalt Mixer

Group 21: Oil, Blower Distributors

Group 22: Grade Checkers - Oiler combination); Safety Observer or Oiler Rigger

Group 23: Journeyman Equipment Service Oilers and Fireman; Oiler, either over 3 yards to over 150' boom or over 45 tons

Group 24: Pumps: Waters

Group 25: Tournapulls, Caterpillar, Euclid Scrapers and similar types equipment over 70 yards through 85 yards

Group 26: Tournapulls, Caterpillar, Euclid Scrapers and similar type equipment, over 85 yards through 100 yards

Group 27: Trenching Machines: 16 inches and over or Remote controlled underwater Trenching

POWER EQUIPMENT OPERATORS - DREDGING

Group 1: Assistant Mate (Deckhand)

Group 2: Fireman; Oiler

Group 3: Assistant Engineer (electric, diesel, steam of booster pumps); Mates and Boatmen

Group 4: Engineer Welder; Craneman

Group 5: Assistant Engineer (electric generator operator for primary pump, power barge, or dredge)

Group 6: Leverman, Hydraulic

Group 7: Leverman, Dipper

Group 11: Dump Trucks over 80 yards up to and including 90 yards

TRUCK DRIVERS (Cont'd)

Group 12: Dump Trucks over 90 yards up to and including 100 yards

Group 13: Dump Trucks over 100 yards (above scales to be paid on actual water level measurements)

Group 14: Turn-O-Wagoner DW-10 when not self-loading

Group 15: Gravel Spreader Box Operator on Truck; Pickup (pilot Cats all light-duty vehicles); Warehouseman Class 2: Farm Type rubber-tired tractor (material hauling); Swampers and Riggers

Group 16: Ready Mix: Up to and including 3 yards

Group 17: Ready Mix: Over 5 yards up to and including 7 yards

Group 18: Ready Mix: Over 7 yards up to and including 9 yards

Group 19: Ready Mix: Over 9 yards up to and including 12 yards

Group 20: Ready Mix: 13 yards and over

Group 21: Ready Mix, semi with double bowl mixer

Group 22: Water Wagon, when pulled by Euclid or similar type equipment

Group 23: Warehouseman - Class 1

SUPERSEDEAS DECISION

STATE: California COUNTY: San Diego

DECISION NUMBER: CA77-5043 DATE : Date of Publication

Supersedes Decision No. CA76-5116 dated December 10, 1976, in 41 FR 54115.

DESCRIPTION OF WORK: Building Construction (does not include single family homes and garden type apartments up to and including 4 stories), heavy and highway construction and dredging.

POWER EQUIPMENT OPERATORS

Group 1: Brakeman; Compressor (less than 600 C.F.M.); Engineer Oiler; Generator; Heavy Duty Repairman Helper; Pump; Signalman; Switchman

Group 2: Compressor (600 C.F.M. or larger); Concrete Mixer, skip type; Conveyor; Fireman; Hydrostatic Pump; Oiler Crusher (asphalt or concrete plant); Plant Operator, generator, pump or compressor; Rotary Drill Helper (oilfield); Skiploader - wheel type up to 3/4 yd. w/o attachments; Soils Field Technician; Tar Pot Fireman; Temporary Heating Plant; Trenching Machine Oiler; Truck Crane Oiler

Group 3: A-Frame or Winch Truck; Elevator Operator (inside); Equipment Greaser (rack); Fork Ferguson (with dragtype attachments); Helicopter Radioman (ground); Power Concrete Curing Machine; Power Concrete Saw; Power Driven Jumbo Form Setter; Ross Carrier (job site); Stationary Pipe Wrapping and Cleaning Machine; Chainman

Group 4: Asphalt Plant Fireman; Boring Machine; Boxman or Mixerman (asphalt or concrete); Chip Spreading Machine; Concrete Pump (small portable); Bridge type Unloader and turntable; Dinkey Locomotive or Motorman (up to and including 10 tons); Equipment Greaser (greaser truck); Helicopter Hoist; Highline Cableway Signalman; Hydra-hammer-aero Stomper; Power Sweeper; Roller (compacting); Screed (asphalt or concrete); Trenching Machine (up to 6 ft.); Rodman

Group 5: Asphalt Plant Engineer; Backhoe (up to and including 3/4 yd.); Batch Plant; Bit Sharpener; Concrete Joint Machine (canal and similar type); Concrete Planer; Deck Engine; Derrickman (oil-field type); Drilling Machine Operator (including water wells); Forklift (under 5-ton capacity); Hydrographic Seeder Machine (straw, pulp or seed); Instrumentman; Machine Tool Operator; Maginnis Internal Full Slab Vibrator; Mechanical Berm, Curb or Gutter (concrete or asphalt); Mechanical Finisher (concrete-Clary, Johnso, Bidwell or similar); Pavement Breaker (truck mounted); Road Oil Mixing Machine; Roller (asphalt or finish); Rubber-tired Earth Moving Equipment (single engine, up to and including 25 yards struck); Self-propelled Tar Pipelining Machine; Slip form Pump (power - driven hydraulic lifting device for concrete forms); Skiploader (crawler and wheel type over 3/4 yard and up to and including 1½ yards); Stinger Crane (Austin-Western or similar type); Tractor-bulldozer, tamper scraper (single engine, up to 100 h.p., flywheel and similar types, up to and including D-5 and similar types); Tugger Hoist 1 drum; Tunnel Locomotive (over 10 and up to including 30 tons); Welder-general

POWER EQUIPMENT OPERATORS (Cont'd)

Group 6: Asphalt or Concrete Spreading (tamping or finishing); Asphalt Paving Machine (Barber Greene or similar type); Bridge Crane Operator; Cast-in-place Pipe Laying Machine; Combination Mixer and Compressor (gunite work); Compactor, self-propelled; Concrete Mixer - paving; Concrete Pump (truck mounted); Crane Operator (up to and including 25 ton capacity)(Long-boom pay applicable); Crushing Plant; Drill Doctor; Elevating Grader; Forklift (over 5 tons); Grade Checker; Grade-all; Grouting Machine; Heading Shield; Heavy Duty Repairman; Hoist Operator (Chicago Boom and similar type); Kolman Belt Loader and similar type; LeTourneau Blob Compactor or similar type; Lift Mobile; Lift Slab Machine (Vagtbord and similar types); Loader (Athey, Euclid, Sierra and similar type); Material Hoist; Mucking Machine (¼ yard, rubber tired, rail or track type); Pneumatic Concrete Placing Machine (Hackley-Presswell or similar type); Material Hoist; Mucking Machine (¼ yard, rubber tired, rail or track type); Pneumatic Concrete Placing Machine (Hackley-Preeswell or similar type); Pneumatic Heading Shield (tunnel), Pumpcrete Gun; Rotary Drill (excluding caisson type); Rubber-tired Earth Moving Equipment (single engine-Caterpiller, Euclid, Athey Wagon, and similar types with any and all attachments over 25 yards and up to and including 50 cu. yds. struck); Rubber-tired Scraper (self-loading-paddle wheel type - John Deere, 1040 and similar single unit); Skiploader (crawler and wheel type - over 1¼ yards, up to and including 6½ yards); Surface Heaters and Planer; Trenching Machine (over 6 feet depth capacity); Tower Crane; Tractor Compressor Drill Combination; Tractor (any type larger than D-5-100 flywheel h.p. and over, or similar) Bulldozer, Tamper, Scraper and Push Tractor single engine); Tractor (boom attachments); Traveling Pipe Wrapping, Cleaning and Bending Machine; Tunnel Locomotive (over 30 tons); Shovel Backhoe, Dragline, Clamshell (over 3/4 yard and up to 5 cu. yds. m.r.c.)(Long boom pay applicable); Self-propelled Curb and Gutter Machine

POWER EQUIPMENT OPERATORS (Cont'd)

Group 7: Crane, over 25 ton up to and including 100 tons m.r.c. (Long boom pay applicable); Derrick Barge (long boom pay applicable); Dual Drum Mixer; Heavy Duty Repairman-welder Combination; Hoist, Stiff-legs, Guy Derrick or similar type, up to and including 100 tons (long boom pay applicable); Monorail Locomotive (diesel, gas or electric); Motor Patrol-blade Operator (single engine); Multiple Engine Tractor (Euclid and similar type, except Quad 9 Cat); Rubber-tired Earth Moving Equipment (single engine, over 50 yards, struck); Rubber-tired Earth Moving Equipment (multiple engine, Euclid, Caterpiller and similar) (over 25 yards and up to 50 cu. yds. struck); Shovel, Backhoe, Dragline, Clamshell (over 5 cu. yds. m.r.c.) (Long boom pay applicable); Tower Crane Repairman; Mixer and similar pugmill equipment; Party Chief

Group 8: Auto Grader; Automatic Slip Form; Crane-over 100 tons (Long boom pay applicable); Hoist - Stiff Legs, Guy Derricks or similar types (capable of hoisting 100 tons or more) (Long boom pay applicable); Mass Excavator - less than 750 cu. yds.; Mechanical Finishing Machine; Mobile Form Traveler; Motor Patrol (multi-engine); Pipe Mobile Machine; Rubber-tired Earth Moving Equipment (multiple engine, Euclid, Caterpiller and similar type over 50 cu. yds. struck); Rubber-tired self-loading Scraper (paddle wheel - auger type self-loading - 2 or more units); Rubber-tired Scraper - pushing one another w/o push cat. Push-pull (50¢ per hour additional to base rate); Tandem Equipment (2 units only); Tandem Tractor (Quad 9 or similar type); Tunnel Mole Boring Machine

Group 9: Canal Liner; Canal Trimmer; Helicopter Pilot; Highline Cableway; Remote controlled Earth Moving Equipment ($1.00 per hour additional to base rate); Wheel Excavator (over 750 cu. yds.)

Group 4: Asphalt Plant Fireman; Boring Machine; Boxman or Mixerman (asphalt or concrete); Chip Spreading Machine; Concrete Pump (small portable); Bridge type Unloader and turntable; Dinkey Locomotive or Motorman (up to and including 10 tons); Equipment Greaser (greaser truck); Helicopter Hoist; Highline Cableway Signalman; Hydra-hammer-aero Stomper; Power Sweeper; Roller (compacting); Screed (asphalt or concrete); Trenching Machine (up to 6 ft.); Rodman

Group 5: Asphalt Plant Engineer; Backhoe (up to and including 3/4 yd.); Batch Plant; Bit Sharpener; Concrete Joint Machine (canal and similar type); Concrete Planer; Deck Engine; Derrickman (oil-field type); Drilling Machine Operator (including water wells); Forklift (under 5-ton capacity); Hydrographic Seeder Machine (straw, pulp or seed); Instrumentman; Machine Tool Operator; Maginnis Internal Full Slab Vibrator; Mechanical Berm, Curb or Gutter (concrete or asphalt); Mechanical Finisher (concrete-Clary, Johnso, Bidwell or similar); Pavement Breaker (truck mounted); Road Oil Mixing Machine; Roller (asphalt or finish); Rubber-tired Earth Moving Equipment (single engine, up to and including 25 yards struck); Self-propelled Tar Pipelining Machine; Slip form Pump (power - driven hydraulic lifting device for concrete forms); Skiploader (crawler and wheel type over 3/4 yard and up to and including 1½ yards); Stinger Crane (Austin-Western or similar type); Tractor-bulldozer, tamper scraper (single engine, up to 100 h.p., flywheel and similar types, up to and including D-5 and similar types); Tugger Hoist 1 drum; Tunnel Locomotive (over 10 and up to including 30 tons); Welder-general

POWER EQUIPMENT OPERATORS (Cont'd)

Group 6: Asphalt or Concrete Spreading (tamping or finishing); Asphalt Paving Machine (Barber Greene or similar type); Bridge Crane Operator; Cast-in-place Pipe Laying Machine; Combination Mixer and Compressor (gunite work); Compactor, self-propelled; Concrete Mixer - paving; Concrete Pump (truck mounted); Crane Operator (up to and including 25 ton capacity)(Long-boom pay applicable); Crushing Plant; Drill Doctor; Elevating Grader; Forklift (over 5 tons); Grade Checker; Grade-all; Grouting Machine; Heading Shield; Heavy Duty Repairman; Hoist Operator (Chicago Boom and similar type); Kolman Belt Loader and similar type; LeTourneau Blob Compactor or similar type; Lift Mobile; Lift Slab Machine (Vagtbord and similar types); Loader (Athey, Euclid, Sierra and similar type); Material Hoist; Mucking Machine (¼ yard, rubber tired, rail or track type); Pneumatic Concrete Placing Machine (Hackley-Presswell or similar type); Material Hoist; Mucking Machine (¼ yard, rubber tired, rail or track type); Pneumatic Concrete Placing Machine (Hackley-Presswell or similar type); Pneumatic Heading Shield (tunnel), Pumpcrete Gun; Rotary Drill (excluding caisson type); Rubber-tired Earth Moving Equipment (single engine-Caterpiller, Euclid, Athey Wagon, and similar types with any and all attachments over 25 yards and up to and including 50 cu. yds. struck); Rubber-tired Scraper (self-loading-paddle wheel type - John Deere, 1040 and similar single unit); Skiploader (crawler and wheel type - over 1¼ yards, up to and including 6½ yards); Surface Heaters and Planer; Trenching Machine (over 6 feet depth capacity); Tower Crane; Tractor Compressor Drill Combination; Tractor (any type larger than D-5-100 flywheel h.p. and over, or similar) Bulldozer, Tamper, Scraper and Push Tractor single engine); Tractor (boom attachments); Traveling Pipe Wrapping, Cleaning and Bending Machine; Tunnel Locomotive (over 30 tons); Shovel Backhoe, Dragline, Clamshell (over 3/4 yard and up to 5 cu. yds. m.r.c.)(Long boom pay applicable); Self-propelled Curb and Gutter Machine

POWER EQUIPMENT OPERATORS (Cont'd)

Group 7: Crane, over 25 ton up to and including 100 tons m.r.c. (Long boom pay applicable); Derrick Barge (long boom pay applicable); Dual Drum Mixer; Heavy Duty Repairman-welder Combination; Hoist, Stiff-legs, Guy Derrick or similar type, up to and including 100 tons (long boom pay applicable); Monorail Locomotive (diesel, gas or electric); Motor Patrol-blade Operator (single engine); Multiple Engine Tractor (Euclid and similar type, except Quad 9 Cat); Rubber-tired Earth Moving Equipment (single engine, over 50 yards, struck); Rubber-tired Earth Moving Equipment (multiple engine, Euclid, Caterpiller and similar) (over 25 yards and up to 50 cu. yds. struck); Shovel, Backhoe, Dragline, Clamshell (over 5 cu. yds. m.r.c.) (Long boom pay applicable); Tower Crane Repairman; Mixer and similar pugmill equipment; Party Chief

Group 8: Auto Grader; Automatic Slip Form; Crane-over 100 tons (Long boom pay applicable); Hoist - Stiff Legs, Guy Derricks or similar types (capable of hoisting 100 tons or more) (Long boom pay applicable); Mass Excavator - less than 750 cu. yds.; Mechanical Finishing Machine; Mobile Form Traveler; Motor Patrol (multi-engine); Pipe Mobile Machine; Rubber-tired Earth Moving Equipment (multiple engine, Euclid, Caterpiller and similar type over 50 cu. yds. struck); Rubber-tired self-loading Scraper (paddle wheel - auger type self-loading - 2 or more units); Rubber-tired Scraper - pushing one another w/o push cat. Push-pull (50¢ per hour additional to base rate); Tandem Equipment (2 units only); Tandem Tractor (Quad 9 or similar type); Tunnel Mole Boring Machine

Group 9: Canal Liner; Canal Trimmer; Helicopter Pilot; Highline Cableway; Remote controlled Earth Moving Equipment ($1.00 per hour additional to base rate); Wheel Excavator (over 750 cu. yds.)

TRUCK DRIVERS	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
PICKUPS (3/4 ton and under), Swampers and helpers; Traffic control pilot car (excluding moving heavy equipment)	$ 7.87	.90	.85	$ 1.00	.10

SUPERSEDEAS DECISION

STATE: GEORGIA COUNTY: HALL
DECISION NO.: GA77-1068 DATE: Date of Publication
Supersedes Decision No. GA75-1025, dated February 28, 1975, in 40 FR 8691.
DESCRIPTION OF WORK: Building Construction (does not include single family homes and garden type apartments up to and including 4-stories).

	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
Air Conditioning Mechanics	$ 4.95				
Bricklayers	6.00				
Carpenters	5.49				
Cement Masons	4.00				
Electricians	6.36				
Glaziers	3.94				
Ironworkers - Structural & Ornamental	5.00				
Laborers:					
Air tool operators (jackhammers & vibrators)	4.50				
Laborers, unskilled	3.16				
Mason tenders	3.25				
Mortar mixers	4.15				
Painters - Brush	4.00				
Plasterers	6.50				
Plumbers & Steamfitters	5.45				
Roofers	3.16				
Sheet Metal Workers	4.50				
Terrazzo Workers	4.50				
Tile Setters	4.50				
Truck Drivers	3.16				
Welders - rate for craft					
Power Equipment Operators:					
Air compressor	4.63				
Bulldozer	4.00				
Finishing machine	5.00				
Front end loader	5.83				
Tractor	4.90				

SUPERSEDEAS DECISION

STATE: Louisiana PARISH: Statewide
DECISION NO.: LA77-4104 DATE: Date of Publication
Supersedes Decision No. LA77-4052, dated March 4, 1977, in 42 FR 12593.
DESCRIPTION OF WORK: Building Construction in all Parishes, Residential Construction in Bossier, Caddo & Calcasieu Parishes and Construction of Highways, Roads, Streets (does not include building structures in rest area projects) and Parking Areas in all Parishes (except those let with a building contract)

	Basic Hourly Rates	Fringe Benefits Payments

CLASSIFICATION DEFINITIONS

LABORERS - ZONE 1

GROUP 1 - Building and labor construction

GROUP 2 - Stone mason helpers; mechanical tool operators; sewerman (bottom man, caulkers, tenders, joint wipers, hot pot, grade carriers, layers and ditchers 4 feet or over); tender of all crafts; sandblaster (nozzleman); Sandblaster (pot tender); laying non-metallic pipe over 4 feet deep, including sewer pipe, drain pipe and underground tile; septic tank diggers and installers, over 4 feet deep; gas & oil pipeline laborers and wrappers

GROUP 3 - Gunite tool operators

DECISION NO. LA77-4104

LABORERS - ZONE 2

GROUP 1 - Building laborer; rotary drill laborers; foundation drill crewmen
GROUP 2 - Mason mixer; plaster mixer; mechanical tool operator; sandblaster; laying concrete pipe, clay pipe, plastic pipe, ashestos cement pipe, casing pipe and corrugated metal pipe, as sewer pipe, drain pipe, and underground tile (caulkers, joint wrappers, hot pot and pipe layers); gas and oil pipeline laborers, wrappers and dopers

LABORERS - ZONE 3

GROUP 1 - Building and general laborer; tenders (carpenter, plaster, cement finisher, mason); tank and vessel cleaners
GROUP 2 - Air tool operator (except jackhammer); interior of closed tanks and vessels power equipment
GROUP 3 - Mortar mixers and jackhammer operators
GROUP 4 - Blasterers
GROUP 5 - Blaster helpers; concrete cutters behind paving machine and puddlers; form setters and lines asphalt worker
GROUP 6 - Wiping joints, laying pipe and tile from pumpcrete
GROUP 7 - Interior of closed tanks and vessels manually

LABORERS - ZONES 4 & 5

GROUP 1 - Building and general laborers, carpenter tenders
GROUP 2 - Power tool operators (hammer men, tamper, vibrators, power buggies, concrete chippers or cutters, chain saw operators, etc.); pipelayers (non-metallic)
GROUP 3 - Mason tenders, plaster tenders, cement mix (wet or dry) tenders, hod carrier tender; mortar mixers & cement mixers (wet or dry)

LABORERS - ZONE 6

GROUP 1 - Building laborers
GROUP 2 - Laborers handling steel pans, stone masons helpers, mechanical tool operators, sewermen (bottom men, caulkers, tenders, joint wipers, hot pot, grade carriers, layers and ditchers 4 feet and over), sand blaster (nozzlemen and pot tender); laying non-metallic pipe over 4 feet deep, septic diggers and installers over 4 feet deep, gas and oil pipeline laborers and wrappers
GROUP 3 - Gunite tool operators
GROUP 4 - Bricklayers tenders and mason tenders
GROUP 5 - Hod carriers using prime mover to serve a bricklayer; mortar mixers

LABORERS - ZONE 7

GROUP 1 - Common laborers
GROUP 2 - Jackhammermen, sewermen, mason tenders, plasterer tenders, stone masons helpers, vibratormen
GROUP 3 - Mortar mixers

LABORERS - ZONE 8

GROUP 1 - Common laborers; carpenter helpers; mason tenders (other than cement); Plasterers' tenders; stone mason helpers; concrete workers; scaffold builders
GROUP 2 - Air tool operators (jackhammer, vibrator, and tamper), sewer pipe joiners and setters; concrete cutters; hod carriers; creosote materials handler; acid worker; mason tenders (cement); Mortar mixer (wet or dry); motorized buggy operator; water proofers (mastic); form setters (steel paving forms)
GROUP 3 - Chain saw operator
GROUP 4 - Asphalt raker, tamper, smoother and shovelers; sewer pipe layers; blaster helpers
GROUP 5 - Powdermen

LABORERS - ZONE 9

GROUP 1 - Building laborers
GROUP 2 - Mason tenders, plasterer tenders; Asphalt rakers, asphalt smoothers
GROUP 3 - Mortar mixers
GROUP 4 - Air jack operators, vibrator operators; Sewer pipe layers, sewer pipe wipers

LABORERS - ZONE 10

GROUP 1 - Laborers, tenders (brickmasons, stonemasons, cement masons, carpenters, plasterers); Stripping & dismantling; concrete form work; loading, unloading, carrying & handling steel & steel mesh; assisting to the setting of cut stone, granite or artifical stone; building scaffolds; shoring
GROUP 2 - Mechanical tool operator (air, electric, motor, engine, etc.); Sewer pipe layers; mortar mixers (hand or machine); gunite operator; tile, terrazzo & marble setters helpers
GROUP 3 - Pipe dopers & burners

AREA COVERED BY LABORERS (BUILDING CONSTRUCTION) ZONES

ZONE 1 - St. Tammany (as far south as Bayou Lacombe and east to the Mississippi State Line at Pearlington), Tangipahoa (except that portion south of a line running due east from the western boundary of Tangipahoa Parish which follows the northern city limits of Independence, Louisiana to 20 miles east of U.S. Highway 51, than running south paralleling Highway 51 at a 20 mile distance to Lake Pontchartrain) & Washington Parishes
ZONE 2 - Acadia, Iberia, Lafayette, St. Landry, St. Martin, St. Mary & Vermilion Parishes
ZONE 3 - Allen, Beauregard, Calcasieu, Cameron, Jefferson Davis & Vernon Parishes
ZONE 4 - All of Ascension, East Baton Rouge, East Feliciana, Iberville, Pointe Coupee, West Baton Rouge & West Feliciana Parishes; Parts of Assumption, St. James, St. John the Baptist Parishes (north of a line drawn from the southern limits of the town of St. James in St. James Parish to the northern limits of the town of Napoleonville, in Assumption Parish & then directly west to the Parish line, all of St. James Parish except that part which is east of a line drawn from Lutcher, Louisiana to U.S. Highway 61 (Airline Highway) then west on U.S. 61 to Blind River and on a direct line to Manchac, Louisiana)
ZONE 5 - Livingston, St. Helena & Tangipahoa (south & west of a line running from the western parish line to a point directly east which touches the northern limits of the town of Independence, then directly south to Lake Pontchartrain) Parishes
ZONE 6 - Jefferson (except Grand Isle), Orleans, Plaquemines, St. Bernard, St. Charles, St. John the Baptist (on the west bank of the Mississippi River and the portion of St. John the Baptist on the east bank of the Mississippi River as far as the Sycamore Inn at Lutcher and north to Blind River and Manchac) & St. Tammany (north as far as Bayou Lacombe, east to the Mississippi State Line at Pearlington) Parishes
ZONE 7 - Assumption (north of Napoleonville), Jefferson (Grand Isle), Lafourche, St. James (on the west bank and including the town of Vacherie) & Terrebonne Parishes
ZONE 8 - Avoyelles, Evangeline, Grant, LaSalle, Natchitoches, Rapides & Winn Parishes
ZONE 9 - Bienville, Bossier, Caddo, Claiborne, DeSoto, Red River, Sabine & Webster Parishes
ZONE 10 - Caldwell, Catahoula, Concordia, East Carroll, Franklin, Jackson, Lincoln, Madison, Morehouse, Ouachita, Richland, Tensas, Union & West Carroll Parishes

CLASSIFICATION DEFINITIONS

POWER EQUIPMENT OPERATORS - ZONES 1, 2, 3 & 4

GROUP 1 - Oiler

GROUP 2 - Mechanic helper

GROUP 3 - Oiler-Driver

GROUP 4 - Scaleman

GROUP 5 - Air compressor; Asphalt Plant Operator; Bulldozers, D-4 and equivalent & under; Bullfloats; Concrete Spreader; Finishing Machines; Concrete Mixer (16-s or less); Concrete Saw; Distributors (Bitum Surface); Dowell Bar Machine; Farm-Type Tractor (with all attachments except backhoe); Fireman; Fork Lifts (other than setting steel, machinery or pipe); Hoist, 1 drum less than 4 stories; Kolum Buff Machine; Pull Cats; Pump (3" and over); Pump, concrete (under 6"); Rollers, except on asphalt or brick; Straddle Buggies; Sweepers on streets & roads (Motorized); Winch Truck, A-Frame (other than handling steel or pipe)

GROUP 6 - Asphalt Spreader; Backhoe; Bulldozer, over D-4 and equivalent; Cableways; Concrete Mixer, over 16-s; Cranes; Derricks; Ditching or Trenching Machines; Draglines; Fork Lifts (setting steel, machinery or pipe); Front-End Loaders (except Farm-type tractors); Grease Serviceman; Hoist, 1 drum, 4 stories or more or 40 feet (on structures other than buildings); Hoist, 2 drums and over; Hydrolifts; Heavy Duty Mechanic; Motor Patrols; Piledrivers; Pump, concrete (6" & over); Road Pavers; Rollers on asphalt or brick; Scoopmobiles; Scrapers; Sideboom Cats; Shovels; Tractorvators; Welder, journeyman; Well Point System; Winch Cats (hoisting); Winch Truck, A-Frame (handling steel or pipe)

DECISION NO. LA77-4104

POWER EQUIPMENT OPERATORS - ZONE 5

GROUP 1 - Scale Operator; Oiler-Driver on Motor Crane; Batch Plant Operator

GROUP 2 - Pumps under 3 inch suction; Mechanic Helper

GROUP 3 - Oiler

GROUP 4 - Fireman

GROUP 5 - Combination Oiler-Compressor; Combination Oiler-Fireman; Asphalt Spreaders; Backhoe (all types); Bulldozers; Cableways; Cherry Pickers (all types); Concrete Mixers (over 1 sack); Cranes; Deck Winch (2 drums or over); Derricks; Ditching or trenching machines (riding type); Draglines; Dredges; Fork Lifts (other than farm type) outside warehouses; Foundation Drill; Front End Loaders (except farm type); Grease Serviceman; Hoist-1 drum (4 stories or more on buildings); Hoist-1 drum (over 40 feet on structures other than buildings Hoist (2 drum or over); Locomotives (all types); Mechanic; Mixer Plant Operator-Central Mix; Motor Patrols; Piledrivers; Pull Cat; Pump Crete-6" and over discharge; Push Cat; Road Pavers; Rollers (Plant Mix Asphalt); Scrapers; Shovels; Sidebooms; Unit Operator; Welder, Journeyman; Well Point System; Whirleys; Winch Cats (Cat D-4 and over); Winch Truck with A-Frame (5 ton and over); Work Boats-requiring licensed operator

GROUP 6 - Bush Hog; Compressor; Concrete pump-under 6" discharge; Concrete Saw; Deck Winch (1 drum); Distributors; Ditching or trenching machines (non-riding type); Dowel Bar Machine; Farm-type tractors (when used to pull discs, grass-cutters, etc.); Hoist-1 drum (under 4 stories on buildings); Hoist-1 drum (40 feet or under on structures other than buildings); Kolum Buff Machines; Mixers (1 sack and under); Motorized street sweepers self-propelled; Pump (3" and over); Test Pump-Internal combustion engine powered; Water Blast Pumps

GROUP 7 - Asphalt Plant Operator; Boom Trucks; Bull Floats; Concrete Spreader; Farm Type Front End Loaders; Finishing Machines (Roadway, riding type); Roller (other than plant mix asphalt); Straddle Buggies; Winch Truck with A-Frame (under 5 tons); Work Boat-not requiring licensed operator

POWER EQUIPMENT OPERATORS - ZONE 6

GROUP 1 - Snatch Cat; Pumps, 3 inch suction or more

GROUP 2 - Pumps, under 3 inch suction; Mechanic Helper

GROUP 3 - Oiler

GROUP 4 - Batch Plant Operator

GROUP 5 - Air Compressor; Asphalt Plant Engineer; Blade Grader; Distributor (Bitum Surface); Finishing Machine (Concrete, Paving); Hoist - 1 drum, less than 4 stories; Concrete Mixer under 16S; Oiler Driver; Pump Crete; Street & Road Sweeper; Roller (except on asphalt or brick); Roller, asphalt or brick (under 5 tons); Post-hole digger; Tractor operated Bush Hog and similar grass or bush cutting equipment

GROUP 6 - A-Frame Truck; Crew Boat Operator; Fireman; Fork Lift; Straddle Buggy; Traxcavator, Scoopmobile and similar front-end loading equipment with Scoop or Bucket under 1 cubic yard capacity; Locomotive; Well Point System; Unit Operator; Hoist - 1 drum, 4 stories or over

GROUP 7 - Backhoe; Cable Way; Concrete Mixer, 16S and up; Derrick; Crane; Dragline Dredge; Equipment Maintenance Mechanic; Hoist - 2 drum; Locomotive Crane; Paving Mixer; Piledriver; Road Paver; Roller on asphalt or brick (5 tons or over); Shovel; Sideboom Cat; Bulldozer; Motor Patrol; Scraper; Hydrolift Crane, Hydrolift Truck, Yard Crane, Cherry Picker, etc.; Foundation, Boring and Reaming Machine; Cement Stabilizer; Trenching Machinn; Asphalt Spreader; Traxcavator & similar front end loading equipment with scoop or bucket of 1 cubic yard or more capacity; Tug Boat Operator; Turnapull, Euclid, DW-10 & other similar self-loading earth moving equipment; Concrete Pump (not Pump Crete)

POWER EQUIPMENT OPERATORS - ZONE 6 (CONT'D)

GROUP 8 - Crane Operator, 60 tons & over; Crane Operator, Boom 100 feet & over; Piledriver Operator, Leads 100 feet & over

GROUP 9 - Crane Operator, 100 tons & over; Crane Operator, Boom 150 feet & over; Piledriver Operator, Leads 150 feet & over

GROUP 10 - Crane Operator, Boom 250 feet & over; Piledriver Operator, Leads over 250 feet

POWER EQUIPMENT OPERATORS - ZONE 7

GROUP 1 - Assistant Master Mechanic

GROUP 2 - Master Mechanic

GROUP 3 - Oilers

GROUP 4 - Batch Plant Operators; Mechanic Helpers; Oilers (Drivers)

GROUP 5 - A-frame truck, except when working with ironworkers or pipefitters; Air Compressor; Asphalt Plant Engineers; Asphalt Finisher, Screed Men; Blade Graders; Boat Operator; Bullfloats; Concrete Joining Machines; Concrete Mixers, 16s and under; Concrete Spreader; Crusher Operator; Deck Winch Operator (1); Distributors, asphalt "Ditch Witch" and similar equipment; Electric Elevators (inside); Finishing Machine; Fireman; Form Graders; Fork Lifts; Hoist, 1 drum, under 4 stories; Power Subgrader; Pug Mill Operators; Pull Tractors; Pump, Pump Crete; Rollers, except on brick and asphalt; Rubber tired Front End Loader (with or without blade attachments) less than 1 cu. yd. capacity; Scale Operator; Scoopmobile; Snatch Cats; Spray Machines; Stabilizers, less than 3 drums; Straddle-Buggy; Track Machines and equivalent Machines; Tractors or Bulldozers smaller than D-6

GROUP 6 - A-Frame Truck, when working with ironworkers and pipefitters; Bulldozers D-6 and larger; Cable Ways; Concrete Mixers, over 16-s paving machines; Cranes, Derricks; Draglines and Clam Shells; Deck Winches (2); Gradealls; Hi-Ho and similar type equipment; Hoist, 1 drum, 4 stories and over; Hoist, 2 drums or more; Hydro cranes; Mechanic; Motor Patrols; Piledrivers; Rollers on brick and asphalt; Rubber Tired Front End Loader, with or without attachments, 1 cu. yd. capacity or more; Scrapers; Shovels; Backhoes (all types); Sideboom Cats; Stabiliers, 3 drums or more; Traxcavators; Trenching Machines; Unit Operator; Welder, journeymen; Well Point Systems (gas, diesel, electric, etc.); Concrete Pump/Boom Combinations

AREA COVERED BY POWER EQUIPMENT OPERATORS (BUILDING CONSTRUCTION) ZONES

POWER EQUIPMENT OPERATORS CLASSIFICATION DEPINITION

GROUP I
Concrete paving curing machine

GROUP II
Belt type conveyors (material & concrete); broom (self propelled); fork lift; grease truck operator; head oiler; hydro lift; tractor (under 50 drawbar HP with or without attachment); Industrial locomotive brakeman; front end loader (2 cy or less); fireman; oiler; screedman; roller (pull type); mulching machine; roller (self-propelled)

GROUP III
Concrete paving form greder; concrete paving gang vibrator; concrete paving joint or saw machine; concrete paving sub grader; tractor with backhoe attachment; subgrade or base finisher; power plant (electric general or welding machine)

GROUP IV
Bulldozer (including self-propelled roller with dozer attachment); batch or continuous mix plant (concrete soil-cement, or asphalt); roller (steel wheel); front end loader (2 cy thru 10 cy); scraper operator; motor grader

GROUP V
Asphalt distributor; asphalt paving or laydown machine; asphalt retort heater; mixer, heavy duty, asphalt or soil cement; trenching machine; clam type shaftmucker; backhoe, clamshell, dragline, gradall, shovel (under 3/4 cy); elevating grader or belt loader; cranes (crawler or mobile) under 20 ton; air compressor (300 CFM & over); crushing screening and washing plants; drilling machine (cable core or rotary); mixer, concrete (1 cy and less); pump (6" intake or over); winch truck; hoist (1 drum); industrial locomotive motorman; lumber stacker; tractor (50 drawbar HP or over)

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITION (CONT'D)

GROUP VI
Concrete paver mixer; hoist (2 drum and over); sideboom; traveling crane; piledriver; backhoe, clamshell, dragline, gradall, shovel (3/4 cy to 3 cy); cranes (crawler or mobile) 20 ton to 40 ton; front end loader (over 10 cy); mixer, concrete (over 1 cy); mechanic and/or welder)

GROUP VII
Concrete slip-form paving machine; concrete paving finishing machine; concrete paving longitudinal float; gunite machine; refrigerator; jumbo form or drilling stage; slusher; concrete paving spreader; pumpcrete machine; grout pump operator

GROUP VIII
Mine hoist; bulldozer (multiple units); scraper (multiple units); mucking machine; backhoe, clamshell, dragline, gradall, shovel (over 3 CY); cranes (crawler or mobile) over 40 tons

GROUP IX
Belt loader (CMI types) operator; derrick, cableway

GROUP X
Pipemobile operator; mole operator

DECISION NO. NY77-3008

BUILDING, HEAVY, AND HIGHWAY CONSTRUCTION	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vocation	Education and/or Appr. Tr.

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

Footnotes:

a. Two hours paid time off on Election Day.

b. Holidays; A through F, Washington's Birthday, Good Friday, Christmas Eve, providing the employee has worked 30 full days during the 90 calendar days prior to the holiday and the regularly scheduled work days immediately proceeding and following the holidays.

c. Holidays: A through F, Washington's Birthday, Good Friday, Election Day for the President of the U.S. and Election of Governor of New York State, providing the employee works the day before and the day after the holiday.

d. Holiday: Independence Day and Labor Day.

e. Holidays: A through F.

f. One weeks vacation after one year's work; two weeks vacation after two years work.

DECISION NO. NY77-3008

LABORERS: HEAVY AND HIGHWAY CONSTRUCTION	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vocation	App. Tr.
CLASS A	$8.24	.55	.65	a	
CLASS B	8.44	.55	.65	a	
CLASS C	8.64	.55	.65	a	1
CLASS D	8.84	.55	.65	a	

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; E-Christmas Day.

FOOTNOTE:
a. Paid Holidays A through F, provided the employee has worked the day before and after the holiday.

LABORERS: HEAVY AND HIGHWAY CONSTRUCTION:

CLASS A
Laborers, drill helper, flagmen, outboard and hand boats.

CLASS B
Bull float, chain saw, concrete aggregate, bin, concrete bootman, gin buggy, hand or machine vibrator, jackhammer, mason tender, mortar mixer, pavement breaker, handlers of all steel mesh, small generators for laborers' tools, installation of bridge drainage pipe, pipelayers, vibrator type rollers, tamper, drill doctor, tail or screw op. on asphalt paver, water pump op. (1½" and single diaphragm), nozzle (asphalt, gunnite, seeding and sand blasting), laborers on chain link fence erection, rock splitter and power unit, pusher type concrete saw and all other gas, electric, oil and air tool operators, wrecking laborer.

CLASS C
All rock or drilling machine operators (except quarry master and similar type), acetylene torch op., asphalt raker, powderman.

CLASS D
Blasters, form setters, stone or granite curb setters.

DECISION NO. NY77-3008

DECISION NO. NY77-3008

BUILDING --POWER EQUIPMENT OPERATORS:

GROUP I: Master Mechanic

GROUP II: all boom type equipment (100 ft or less), all pan and carry-all operators, Archer hoist, back and pull hoe operator, blast or rotary drill, track or cat mounted, boiler (when used for power), boom trucks, cableway operator, concrete paver machine, crane operator, derrick operator, dragline operator, elevating grader (self-propelled), head tower operator, hot roller (finisher course), hydraulic booms, hydro crane, maintenance engineer, mucking machine operator, multiple drum hoist, (more than 1 drum in use), Peine crane, pile dribing machine operator, power grader machine operator, scoopmobile, shovel operator, skimmer operator, test core drill machine, tractor shovel operator, vertical caisson auger drill, well drilling machine

GROUP III: Back filling machine operator, Kolman loader, roller machine operator, snatch and pusher cats, stone crusher, towed or self-propelled rollers, trenching machine operator

GROUP IV: Air hoist operator, cage hoist operator, conveyor operator, conveyor system, (belt-crete or similar), hoisting engine op., house elevator, (when used for hoisting), industrial tractor, locomotive op., (irrespective of power), push button hoist op., Strato tower, tractors (when using winch power)

GROUP V: Concrete mixer op., (½ c.y. or over), gasoline driven boring machine hydraulic system pumps, hydro hammer, finishing machine op., (asphalt spreader), finishing machine op.

GROUP VI: Air compressor operator, (under 160 CFM), air compressor op., (over 160 CFM), generator mechanical heater, (when 3 are in a battery), power plant (in excess of 10KW), welding machine operator, (to and including 3 machines)

GROUP VII: Bulldozer & tractor, (50 h.p., drawbar or under), monorail

GROUP VIII: Firemen

GROUP IX: Truck crane driver

GROUP X: Aggregate bin op., cement bin op., concrete mixer op., (under ½ c.y.), tractor machines

GROUP XI: Grout Machine Operator, Heating Boiler Operator (used for temporary heat), lubrucatuib unit on truck, pneumatic mixer operator

GROUP XII: Pump Operator (4" or over); Pump Operator 2-3 in a battery)

DECISION NO. NY77-3008

BUILDING--POWER EQUIPMENT OPERATORS: (CONT'D)

GROUP XIII: Bulldozer & tractor (50 H.P. drawbar and under), jeep tronch, mulchers, power brooms 7 rakes, seeders

GROUP XIV: Apprentice Engineer or Oiler, Mechanical Heaters (when 1 or 2 are used), Pump Operators (one inch), Pump Operators (2 inches), Pump Operators (3 inches)

GROUP XV: Crane with boom over 100 feet

GROUP XVI: Crane with boom over 200 feet

GROUP XVII: Crane with boom over 300 feet

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTE:

a. Holidays: A through F, provided employee works the working day before and the working dat after the holiday.

DECISION NO. NY77-3008

DECISION No. PA77-3059

POWER EQUIPMENT OPERATORS DEFINITIONS CLASSIFICATIONS

GROUP 1 - Machines doing hook work, any machine handling machinery, cable spinning machines, helicopters, machines similar to the above

GROUP 2 - All types of cranes, all types of backhoes, cableways, draglines, keystones, all types of shovels, derricks, trench shovels, trenching machines, hoist with two towers, pavers 21E and over, all types overhead cranes; building hoists (double drum) gradalls, mucking machines in tunnel, all front end loaders 3-½ c.y. and over, tandem scrapers, pippin type backhoes, boat Captains, batch plant operators (concrete) drills, self-contained rotary drills, fork lifts, 20 ft. lift and over machine to the above

GROUP 3 - Conveyors, building hoists (single drum) scrapers and tournapulls, spreaders, high or low pressure boilers, concrete pumps, well drillers, bulldozers and tractors, asphalt plant engineers, roller (high grade finishing), ditch witch type trencher, all loaders under 3-½ cu. yds., mechanic-welders, motor patrols, drill helper-self contained rotary drills, core drill operators forklift trucks under 20 ft. lift, machines similar to the above

GROUP 4 - Welding machines, well points, compressors, pumps, heaters, farm tractors, form line graders, fine grade machines, road finishing machines, concrete breaking machines, rollers, seaman pulverizing mixer, power broom, seeding spreader, tireman (for power equipment), machines similar to above

GROUP 5 - Fireman, grease truck

GROUP 6 - Oilers and deck hands (personnel boats), core frill helper

GROUP 7 - All machines with booms (including jib, masts, leads, etc.): 100 ft. and over

GROUP 7-A - 150 ft. and over

GROUP 7-B - 200 ft. and over

DECISION NO. PA77-3059

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day and F-Christmas Day.

FOOTNOTES:

a. Paid Holidays: C and D.

b. Employer shall contributes .12 per day per employee.

c. Employer contributes 4% basic hourly rate for 5 years or more of service or 2% basic hourly rate for 6 months to 5 years of service as vacation pay credit.

d. Paid Holidays: A through F.

e. Employer contributes $2.05 per hour to health and welfare and pension fund.

f. Paid holidays, A through F, Washington's Birthday, Good Friday and Christmas Eve, provided the employee has worked 45 days for the employer during the 120 days prior to the holiday, and is available for work the days preceding and following the holiday.

g. Paid holidays: Washington's Birthday; Good Friday; Memorial Day; Labor Day; Presidential Election Day; Veterans Day and Thanksgiving Day.

h. $41.00 per month for employees who have worked 60 hours or more during the month.

j. $25.00 per month to employees employed for over 13 weeks.

k. Paid Holidays: A thru F provided the employee works the day before and the day after the holiday.

POWER EQUIPMENT OPERATORS

Group 1: Auger Machine Operator (post holes, etc.); Batch Bin Weighman, Scissorman or Hopperman; Beginner Operator; Brakeman and Helper; Crusher Oiler; Oiler; Utility; Screed Operator; Tractor Operators (farm, crawler or wheel type, 60 HSP (drawbar) or less with or without use of power attachments, except for use of back hoe or bucket)

Group 2: Broom Operators, self-propelled; Cableway Signalman (bellboy); Concrete Saw (self-propelled); Fireman; Power Loader, belt and bucket type

Group 3: Air Compressor over 315 cu. ft. capacity; Chip Spreader Operator; Form Grader Operator; Joint Machine Operator; Longitudinal Float Operator; Mixer Operator Concrete (under one yard); Helper (welder or heavy duty); Roller Operators, self-propelled (pneumatic, rubber tired, sheep foot, vibratory or combination type); Tire Repairman

Group 4: Pump Operator (all others)

Group 5: Conveyor Belt Operator; Fork Lift and Lumber Staker; Screening Plant Operator

Group 6: A-Frame Truck; Tractor Operators (farm, crawler or wheel type, over 60 HSP (drawbar) without use of power attachments

Group 7: Oiler, Lead Utility

Group 8: Gunnite and Grout Machine Operator; Mulching Machine Operator; Oil Distributor

Group 9: Front End Loader (up to and including 1½ cu. yds.); Pavement Breakers, Hydro-tamper and similar type machines; Pumps, well points

Group 10: Hoist Operator (one drum)

POWER EQUIPMENT OPERATORS (Cont'd)

Group 11: Haulage Motorman and Industrial type Motormen; Motor Patrol Operator (all others); Pump Operator (in tunnels, shafts, raises); Hydro type Cranes (up to 15 tons)

Group 12: Air Compressor, two or more machines or tunnels, shafts, raises of plant Operator; Asphalt Plant Operator; Bituminous Lay-down Machine Operator; CMI Machine and similar; Concrete Batch Plant; Concrete Finish Machine Operator; Concrete Multi Blade Span Saw (Hunt process or similar); Concrete Spreader and Paver Operator; Curbser Operator; Drilling Machine, integrated (Core, Rotary, Caisson, Diamond); Elevating Grader; Front End Loader (over 1½ cu. yds.); Jumbo Form Operator; Mixer Operator, base course pug mill type; Mixer Bituminous Operator (travel plant); Mixer Operator Concrete (over one yard); Motor Patrol Operator (finish); Mucking Machine Operator (all types); Pneumatic Guns; Pumpcrete Operator; Roller Operator, (tandem steel wheel, three axle or three wheel); Scraper Equipment (all types); Shovels, Draglines, Cranes, Piledrivers, all truck mounted cranes, (manufacturers' rating) up to 3½ yards, all attachments; Hydro type Cranes, (15 ton and over); Shuttle Car Operator; Subgrade Machine Operator (power); Tractor Operator, all with use of power attachments and including Pushcat, Dozer, Tournadozer, etc. (The use power attachment shall not include disking, pulling or rollers, and similar unskilled actions); Trenching Machine Operator; Wash Plant Operator

Group 13: Welder, Machine Doctor

Group 14: Hoist Operator (two or more drums of shafts or raises); Repairman; Mechanics; Machine Doctors, Welders and Helper; Heavy Duty Mechanic, Machine Doctor

Group 15: Cableway Operators; Mixer Dual Drum; Cranes, (Whirley, Gantry, Stiffleg, Overhead traveling)

Group 16: Shovels, Draglines, Cranes, Piledrivers, all truck mounted Cranes (manufacturer's rating) 3½ yards to 7 cu. yds., all attachments; Wheel Excavator Operator

Group 17: Shovels, Draglines, Cranes, Piledrivers, all truck mounted Cranes, (manufacturer's rating) 7 cu. yds. and over, all attachments

TRUCK DRIVERS	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
Pick-up Truck Drivers (when used for hauling)	$ 5.45	.25	.35		
Dump Truck Drivers (water level capacity box):					
7 cu. yds. and less	5.50	.25	.35		
Over 7 cu. yds. to and including 10 cu. yds.	5.65	.25	.35		
Over 10 cu. yds. to and including 13 cu. yds.	5.87	.25	.35		
Over 13 cu. yds. to and including 20 cu. yds.	6.25	.25	.35		
Over 20 cu. yds. to and including 25 cu. yds.	6.25	.25	.35		
Over 25 cu. yds. to and including 30 cu. yds.	6.35	.25	.35		
Over 30 cu. yds. to and including 35 cu. yds.	6.40	.25	.35		
Over 35 cu. yds. to and including 40 cu. yds.	6.45	.25	.35		
Over 40 cu. yds. to and including 45 cu. yds.	6.50	.25	.35		
Over 45 cu. yds. (to be negotiated prior to use)					
Snow Plow Truck Drivers (the cu. yd. rate of the truck driver classification):					
Pilot Car Drivers	5.45	.25	.35		
Gravel Spreader	5.50	.25	.35		
Flat Rack Material Truck Drivers:					
Less than 2 tons	5.50	.25	.35		
2 tons to 5 tons	5.65	.25	.35		
Over 5 tons	5.75	.25	.35		
Low Boy and Tandem Axle Float Drivers	6.25	.25	.35		
Gang Truck Drivers	5.50	.25	.35		

TRUCK DRIVERS (Cont'd)	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
Stringing Truck Drivers:					
Single axle type truck	$ 5.50	.25	.35		
Multiple axle type truck; semi	6.25	.25	.35		
Winch Trailer Truck Drivers (cable and hoist)	5.75	.25	.35		
Utility Winch Truck Drivers	5.75	.25	.35		
"A" Frame Truck Drivers	5.75	.25	.35		
Warehousemen, Partsmen and Helpers	5.50	.25	.35		
Material Checkers	5.65	.25	.35		
Transit Mix or wet mix Truck Drivers:					
Less than 5 cu. yds.; Single axle	5.75	.25	.35		
Over 5 cu. yds. to and including 10 cu. yds.; Tandem axle	5.85	.25	.35		
Over 10 cu. yds.	5.95	.25	.35		
Power Broom Drivers and/or Operators	5.65	.25	.35		
Water Truck Drivers:					
2500 gal. or less (straight truck)	5.50	.25	.35		
2500 gal. or less (semi truck)	5.65	.25	.35		
Over 2500 gal. to and including 3600 gal.	5.75	.25	.35

Painters, brush and spray	6.63				

LABORERS
(Building Construction)

Group 1: Axeman and hand faller; Concrete worker (wet or dry) (curing and drying); Car and truck loader; Dumpman; Erector and installer (includes the installation and erection of all fences, right-of-way, median fence, snow fence, etc., guard rails, section rails, reference posts, guide posts, signs and right-of-way markers); Form stripper; Form setter helper (paving); General laborer; Gunite helper; Landscaper helper; Material handler (lumber, rods, cement, concrete); Nozzleman (air and water); Pipe setter helpers, non-metallic; Pipe setters helpers, corrugated; All work pertaining to pre-watering, pre-irrigation and pre-wetting; Rodman; Riprap Man; Sandblaster pot tender; Signalman, grade, concrete, etc.; Scissorman or hopper man; Stake jumper for equipment; Tar and asphalt pot tender; Wrecking and demolition crews; Unloading and packing of steel rods and mesh (reinforcing); Heater tender and pilot car operator

Group 2: Asphalt raker and tamper; Bin wall installer; Bituminous curb builder; Carpenter tender; Cement mason tender; Chuck tender; Form setter (paving); Hand operator vibrator roller; Landscaper; Mechanical form cleaner; Mortar man on stone riprap; Operator of pneumatic, electric, gas tamper and similar mechanical tools; Powderman helper; Pipe setter, corrugated; Culvert pipe, multi-plate, sectional plate and similar type; Pipe wrapper; Power-type concrete buggy (push); Power saw operator (clearing); Vibrator (concrete); Creosote material handler (corrosive enamel or its equal); Burner (cutting torch)

Group 3: Concrete saw; Gunite nozzleman; High scaler (using air tools from bos'n chair, swing stage lift belt, or block and tackle, shall receive $.20 per hour more than the classified rate); Jackhammer and pavement breaker; Sandblaster nozzleman; Sewer pipe installer, non-metallic; Caulker; Collarman; Jointer; Mortarman; Rigger; Jacker; Power-type concrete buggy (ride); Shoring and lagging of open ditch

Group 4: Powderman and blaster; Wagon drill, air crack, diamond and other drills for blasting powder or grouting

Group 5: Hod carriers; Mason tender; Plasterers tenders; Terrazzo tenders; Tile setter tenders, and scaffold builders

Group 6: Tunnel and underground work: Miners (drills) Machine man; Timberman; Steelman; Drill doctor; Form setter and movers; Spaders; Tuggers; Spilling and/or caisson workers; Jackhammer men; Finishers; Re-bar man; Powderman

Group 7: Nipper; Chuck tender; Top man or toplander

Group 8: Brakeman and vibrator man

Group 9: Mucker and bull gang laborer

HEAVY CONSTRUCTION LABORERS	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
Group 1:					
Axeman and hand faller; Bin Wall Installer Helpers; Concrete Worker (wet or dry); Concrete Workers (curing and drying); Dumpman; Erector and Installer (including the installation and erection of fences, snow fences, guard rails, median rails, median posts, signs and right-of-way marker); Form Stripper; Form Setter Helper (paving); General Labor; Gunite Helper; Heater Tender; Landscaper Helper; Material Handler (lumber, rods, cement, concrete); Nozzleman, air and water; Pipe Setters' Helpers (non-metallic); Pipe Setters' Helpers (corrugated); Pre-watering, pre-wetting and pre-irrigation (all work); Rip Rap Man; Sandblaster Pot Tender; Signal Men; Grade Concrete, etc.; Sciasor Man or Hopper Man; Stake Jumber for equipment; Tar and asphalt pot tender; Wrecking and demolition crews	$ 4.77

HEAVY CONSTRUCTION
POWER EQUIPMENT OPERATORS

Group 1: Auger Machine Operator (post holes, etc.); Batch Bin Weighman, Scissorman or Hopperman; Beginner Operator; Brakeman and Helper; Crusher Oiler; Oiler; Utility; Screed Operator; Tractor Operators (farm, crawler or wheel type, 60 HSP (drawbar) or less with or without use of power attachments, except for use of back hoe or bucket)

Group 2: Broom Operators, self-propelled; Cableway Signalman (bellboy); Concrete Saw (self-propelled); Fireman; Power Loader, belt and bucket type

Group 3: Air Compressor over 315 cu. ft. capacity; Chip Spreader Operator; Form Grader Operator; Joint Machine Operator; Longitudinal Float Operator; Mixer Operator Concrete (under one yard); Helper (welder or heavy duty); Roller Operators, self-propelled (pneumatic, rubber tired, sheep foot, vibratory or combination type); Tire Repairman

Group 4: Pump Operator (all others)

Group 5: Conveyor Belt Operator; Fork Lift and Lumber Staker; Screening Plant Operator

Group 6: A-Frame Truck; Tractor Operators (farm, crawler or wheel type, over 60 HSP (drawbar) without use of power attachments

Group 7: Oiler, Lead Utility

Group 8: Gunnite and Grout Machine Operator; Mulching Machine Operator; Oil Distributor

Group 9: Front End Loader (up to and including 1½ cu. yds.); Pavement Breakers, Hydro-tamper and similar type machines; Pumps, well points

Group 10: Hoist Operator (one drum)

HEAVY CONSTRUCTION
POWER EQUIPMENT OPERATORS (Cont'd)

Group 11: Haulage Motorman and Industrial type Motormen; Motor Patrol Operator (all others); Pump Operator (in tunnels, shafts, raises); Hydro type Cranes (up to 15 tons)

Group 12: Air Compressor, two or more machines or tunnels, shafts, raises of plant Operator; Asphalt Plant Operator; Bituminous Laydown Machine Operator; CMI Machine and similar; Concrete Batch Plant; Concrete Finish Machine Operator; Concrete Multi Blade Span Saw (Hunt process or similar); Concrete Spreader and Paver Operator; Curbser Operator; Drilling Machine, integrated (Core, Rotary, Caisson, Diamond); Elevating Grader; Front End Loader (over 1½ cu. yds.); Jumbo Form Operator; Mixer Operator, base course pug mill type; Mixer Bituminous Operator (travel plant); Mixer Operator Concrete (over one yard); Motor Patrol Operator (finish); Mucking Machine Operator (all types); Pneumatic Guns; Pumpcrete Operator; Roller Operator, (tandem steel wheel, three axle or three wheel); Scraper Equipment (all types); Shovels, Draglines, Cranes, Piledrivers, all truck mounted cranes, (manufacturers' rating) up to 3½ yards, all attachments; Hydro type Cranes, (15 ton and over); Shuttle Car Operator; Subgrade Machine Operator (power); Tractor Operator, all with use of power attachments and including Pushcat, Dozer, Tournadozer, etc. (The use power attachment shall not include disking, pulling or rollers, and similar unskilled actions); Trenching Machine Operator; Wash Plant Operator

Group 13: Welder, Machine Doctor

Group 14: Hoist Operator (two or more drums of shafts or raises); Repairman; Mechanics; Machine Doctors, Welders and Helper; Heavy Duty Mechanic, Machine Doctor

Group 15: Cableway Operators; Mixer Dual Drum; Cranes, (Whirley, Gantry, Stiffleg, Overhead traveling)

Group 16: Shovels, Draglines, Cranes, Piledrivers, all truck mounted Cranes (manufacturer's rating) 3½ yards to 7 cu. yds., all attachments; Wheel Excavator Operator

Group 17: Shovels, Draglines, Cranes, Piledrivers, all truck mounted Cranes, (manufacturer's rating) 7 cu. yds. and over, all attachments

DOT/FAA—Transition area in Lanai, Hawaii..... 20621; 4–21–77

List of Public Laws

NOTE: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's LIST OF PUBLIC LAWS.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

Memorandum of May 19, 1977

Import Relief Determination Under Section 202(b) of the Trade Act of 1974: Television Receivers

[Decision Memorandum on Television Receivers]

Memorandum for the Special Representative for Trade Negotiations

THE WHITE HOUSE,
Washington, May 19, 1977.

Pursuant to Section 202(b)(1) of the Trade Act of 1974 (P.L. 93–618), I have determined the actions I will take with respect to the report of the United States International Trade Commission (USITC) dated March 22, 1977, concerning television receivers, color and monochrome, assembled or not assembled, finished or not finished, and subassemblies thereof. In that report the Commission determined that color television receivers, assembled or not assembled, finished or not finished, provided for in item 685.20 of the TSUS are being imported into the United States in such increased quantities as to be a substantial cause of serious injury to the domestic industry producing articles like or directly competitive with the imported articles. Three Commissioners found injury in both the color and monochrome television industries.

Pursuant to Section 330(d) of the Tariff Act of 1930, as amended, the President may accept, in the case of an evenly divided USITC vote on an injury determination, the determination of either set of Commissioners on the question of injury. I have decided to accept the determination of those three Commissioners who voted that the domestic monochrome television industry has not been seriously injured or threatened with serious injury by increased imports. Import relief is therefore not authorized for this industry under section 203 of the Trade Act of 1974. I have, however, decided to accept the determination of those three Commissioners who voted that the domestic industry producing subassemblies of color television receivers has been seriously injured by increased imports.

Pursuant to section 202(b)(1) of the Trade Act, I have determined to provide import relief to the television industry producing color television receivers, assembled or not assembled, finished or not finished and subassemblies thereof provided for in item 685.20 of the TSUS.

I am, therefore, directing you to negotiate and conclude an orderly marketing agreement with the Government of Japan, the major supplying country, to resolve the immediate problems of our domestic color television industry for a three-year period which will provide the domestic industry time to remedy the injury found to exist.

This determination is to be published in the FEDERAL REGISTER.

Jimmy Carter

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IV—FEDERAL CROP INSURANCE CORPORATION, DEPARTMENT OF AGRICULTURE

PART 401—FEDERAL CROP INSURANCE

Regulations for the 1969 and Succeeding Crop Years; Extension of Final Dates for Filing Applications

AGENCY: Federal Crop Insurance Corporation.

ACTION: Extension of sales closing dates.

SUMMARY: This is an extension of the final dates for the filing of applications for crop insurance for the 1977 crop year on barley, combined crop, flax, peas, oats, wheat, and sugar beets in all those counties remaining open for the filing of such applications which have a closing date from March 31 to April 15. Such extension shall be until the close of business on April 22, 1977.

EFFECTIVE DATE: April 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–3325).

SUPPLEMENTARY INFORMATION: In view of changed crop conditions, a number of counties which had been closed for certain commodities have been reopened. Extension of application closing dates in all counties will ease administrative burdens on both the farmer and the Corporation. Increased participation in the program in counties which had not previously been closed will strengthen the risk structure of the Corporation. Accordingly, as previously announced, the Corporation has determined that it would be desirable to extend the time for filing applications for crop insurance on such commodities, in accordance with the provision for such extensions found in 7 CFR § 401.103. Since these extensions are to the benefit of producers, and since producers need to be informed of these extensions immediately, it is found and determined that compliance with the notice of proposed rule making procedure would be impracticable and contrary to the public interest. Therefore, this amendment is issued without compliance with such procedure.

Accordingly, 7 CFR § 401.103 is amended by adding at the end of paragraph (b) thereof the following sentence:

§ 401.103 Application for Insurance.

* * * * * * *

(b) * * * The time for filing applications for crop insurance for the 1977 crop on barley, combined crop, flax, peas, oats, wheat, and sugar beets in all counties and states remaining open and having a March 31 to April 15 closing date, is hereby extended until the close of business on April 22, 1977. Such applications received during this period will be accepted only after it is determined that no adverse selectivity will result.

* * * * * * *

(Sec. 506, 516; 52 Stat. 73 as amended, 77 as amended (7 U.S.C. 1506, 1516).)

* * * * * * *

Dated: April 22, 1977.

W. OTTO JOHNSON,
Acting Manager, Federal Crop Insurance Corporation.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Valencia Orange Reg. 555, Amdt. 1]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amendment to Final Rule.

SUMMARY: This amendment increases the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period May 13–19, 1977. The amendment recognizes that demand for Valencia oranges has improved, since the regulation was issued. This action will increase the supply of oranges available to consumers.

DATES: Weekly regulation period May 13–19, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250; (202) 447–3545.

SUPPLEMENTARY INFORMATION: (a) *Findings.* (1) Pursuant to the amended marketing agreement and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of recommendations and information submitted by the Valencia Orange Administrative Committee, established under the marketing agreement and order, and other available information, it is found that the limitation of handling of Valencia oranges as provided in this amendment will tend to effectuate the declared policy of the act.

(2) Demand in the Valencia orange markets has improved since the regulation was issued. Amendment of the regulation is necessary to permit orange handlers to ship a large quantity of Valencia oranges to market to supply the increased demand. The amendment will increase the quantity permitted to be shipped in the interest of producers and consumers.

(3) It is further found that it is impracticable and is contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information became available upon which this amendment is based and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restrictions on the handling of Valencia oranges.

(b) *Order, as amended.* The provisions in paragraph (b)(1) (i), and (ii) of § 908.855 Valencia Orange Regulation 555 (42 FR 24061) are hereby amended to read as follows:

§ 908.855 Valencia Orange Regulation 555.

* * * * * * *

(b) * * * (1) * * *

(i) District 1: Unlimited.

(ii) District 2: Unlimited.

* * * * * * *

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674).)

Dated: May 18, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Regular Reserves

Correction

In FR Doc. 77-13688, appearing at page 24252 in the FEDERAL REGISTER of

Friday, May 13, 1977, in the middle column, in the first sentence of the "Summary", the word "rule" should be changed to read "rules".

Title 13—Business Credit and Assistance

CHAPTER III—ECONOMIC DEVELOPMENT ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 306—BUSINESS DEVELOPMENT PROGRAM

Refinancing Assistance

AGENCY: Economic Development Administration, Commerce.

ACTION: Final rule.

SUMMARY: These regulations implement the refinancing authority contained in section 202(a)(3)(D) of the Public Works and Economic Development Act of 1965, as amended by Pub. L. 94-487. These regulations establish the policies and procedures through which qualified applicants may obtain refinancing assistance.

DATES: Effective date: May 23, 1977. Comments by: June 22, 1977.

ADDRESSES: Send comments to: Assistant Secretary for Economic Development, U.S. Department of Commerce, Room 7800B, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT:

Glenn S. Waldron, Director, Office of Business Development, U.S. Department of Commerce, Room 7866, Washington, D.C. 20230, Telephone 202-377-5236.

SUPPLEMENTARY INFORMATION: 13 CFR 306.1(a) is amended by the addition of language which describes the existence and intended use of the refinancing authority. The refinancing authority is conceived of as an operative instruction which provides a new direction in the use of existing business development tools. As a result, all the forms of business development assistance, with the exception of lease guarantees, are available for use with the refinancing authority. The refinancing authority may only be used in conjunction with one of the appropriate forms of business development assistance.

13 CFR 306.3 is amended by adding a new subsection (h) which contains the statutory and administrative requirements and limitations on the use of the refinancing authority. Subsection (h) incorporates the statutory qualifications surrounding refinancing assistance. The refinancing authority can only be used for debts which create a legally obtained lien against an applicant's property. Also, before the refinancing authority can be used, the Assistant Secretary must determine that such action is necessary to save or create jobs in a designated area.

Paragraph (1) of subsection (h) describes the types of property with which the refinancing authority may be used.

Paragraph (2) incorporates by reference the limitation on the use of the refinancing authority which is contained at § 306.1(a).

Paragraph (3) describes EDA's basic concept for the use of the refinancing authority. It will be used primarily in situations in which it will produce a clearly visible economic impact on threatened enterprises and jobs. The refinancing authority is not intended to substitute less expensive Federal financing for existing debt because it would be more convenient to the applicant. A true need for refinancing must exist.

Paragraph (4) sets forth EDA's policy with regard to the use of the refinancing authority for "strong" applicants who will be expanding profitable businesses. Frequently, it is to the advantage of EDA to consolidate all liens in one package rather than have a more confused collateral position. Refinancing in these situations is primarily at the behest of, and for the convenience of, EDA.

Paragraph (5) establishes EDA's policy with regard to the use of the refinancing authority in situations involving existing long term debt. It is EDA's policy that existing lenders of long term money remain with the companies that they are financing, and that pressures to have Federal money "take out" substantial portions of such debt structure be discouraged. However, where simplification of debt structure is necessary to enable a company to continue in operation or to expand facilities, use of the refinancing authority is appropriate. The twenty-five percent limitation is a guideline to indicate firmly to lending institutions that they must work with EDA on refinancing projects and not expect a eral government "take out".

Paragraph (6) announces EDA's policy of not using its limited financial assistance resources to refinance loans which have already utilized Federal appropriations.

Because this rule relates to the EDA grant and loan program, it is exempted from the procedures described in § 553 of the Administrative Procedure Act (5 U.S.C. 553). However, in the spirit of the public policy set forth in that Act, interested persons may submit written suggestions regarding these regulations to the above address.

NOTE.—EDA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Accordingly, 13 CFR Part 306 is amended as follows:

1. By revising § 306.1(a) to read as follows:

§ 306.1 Purpose.

(a) The purpose of this subpart is to set forth policies and procedures through which qualified applicants may obtain financial assistance under section 202 of the Act. The following types of financial assistance are available to business development projects for the financing and, with the exception of assistance described in paragraph (a)(5) of this section, the refinancing of debts which create legally obtained liens against property:

* * * * *

2. By revising § 306.3 by adding a new paragraph (h) to read as follows:

§ 306.3 Types of financial assistance.

* * * * *

(h) Provide for the refinancing of debts which create legally obtained liens against the applicant's property if the Assistant Secretary has made one of the following determinations: such action is necessary to save employment in a designated area; such action is necessary to avoid a significant rise in unemployment in a designated area; or such action is necessary to create new or increased employment in a designated area

(1) Those debts which can be refinanced may be secured by legally obtained liens on either real, personal or intangible property of the applicant.

(2) The refinancing authority may only be used in conjunction with forms of business development assistance which are appropriate and allowable under § 306.1(a).

(3) EDA will entertain proposals for refinancing primarily as such proposals pertain to workouts involving high interest costs on short term notes and accelerated loans that are affecting the financial stability of a company to a greater degree than it could possibly sustain, thereby not only jeopardizing existing jobs but the existence of the applicant itself.

(4) In the context of viable applicants intending to expand and create new jobs, EDA will consider some refinancing as part of a larger project in order to simplify lien positions or debt structure.

(5) EDA will not ordinarily consider substituting its exposure, either directly or on a guarantee basis, on existing long-term debt unless such substitution is a minor part of a more comprehensive project. Generally, the amount of such substitution must be less than twenty-five (25) percent of the total project cost. The substitution of lenders must be necessary to either simplify debt structure or free up collateral for the non-refinancing portion of the EDA assistance.

(6) The refinancing authority will not be used to refinance SBA or other (non-EDA) Federal direct or guaranteed loans.

(Pub. L. 94-487, 90 Stat. 2331 (42 U.S.C. 3121 et seq.); Sec. 701, Pub. L. 89-136, 79 Stat. 570 (42 U.S.C. 3211); Department of Commerce Organization Order 10-4, 40 FR 56702.)

ROBERT T. HALL,
Assistant Secretary for Economic Development.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 76-EA-69, Amdt. 39-2908]

PART 39—AIRWORTHINESS DIRECTIVES

Canadair Aircraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) which requires an inspection and alteration of fasteners located in the wheel wells of Canadair CL-215 type airplanes. These airplanes operate on the water and the absence or looseness of the fasteners will permit water to seep into the wheel wells.

DATES: Effective date: May 26, 1977. Compliance is required prior to U.S. airworthiness certification since there are no CL-215 airplanes registered within the U.S.

ADDRESSES: Canadair Circular 136-CL-215 may be acquired from the manufacturer at P.O. Box 6087, Montreal, Canada.

FOR FURTHER INFORMATION CONTACT:

I. Mankuta, Airframe Section, Engineering and Manufacturing Branch, AEA-212, Federal Building, J. F. K. International Airport, Jamaica, New York 11430, Telephone 212-995-2875.

SUPPLEMENTARY INFORMATION: There have been reports of structural damage and missing or loose fasteners of the attachment fittings of the main landing gear. These fasteners are in the wheel well and will permit water to enter the hull of the airplane when it is operating on water. Since this condition is likely to exist or develop in other airplanes of the same type design, an Airworthiness Directive is being issued to require an inspection and alteration of the fasteners. However, this airplane is of Canadian manufacture and there are none registered in the U.S to which the AD presently applies.

Since this rule does not burden any person in view of the fact that there are presently no U.S. registered CL-215 type airplanes, notice or public procedure hereon are unnecessary.

It has been determined that the expected impact of the proposed regulation is so minimal that the proposal does not warrant an evaluation.

DRAFTING INFORMATION

The principal authors of this document are I. Mankuta, Flight Standards Division, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new Airworthiness Directive:

CANADAIR: Applies to Canadair CL-215-1A10 Airplanes, Serial Numbers 1001 through 1040 and 1046 certificated in all categories that have not been altered in accordance with Canadair Service Information Circular No. 136-CL-215.

Compliance required prior to U.S. Airworthiness certification.

Inspect and alter main landing gear actuator attachment fitting P/N 215-34014 -1 and -2 in accordance with Canadair Service Information Circular No. 136-CL-215, page 2 of 3 dated June 11, 1976, or an approved equivalent.

Equivalent inspections and parts must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region.

This amendment becomes effective on May 26, 1977.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 313(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Jamaica, New York, on May 12, 1977.

L. J. CARDINALI,
Acting Director, Eastern Region.

[FR Doc.77-14477 Filed 5-20-77;8:45 am]

[Docket No. 77-GL-11, Amdt. 39-2904]

PART 39—AIRWORTHINESS DIRECTIVES

Detroit Diesel Allison, Model 250-C20/C20B/C20C and 250-B17/B17B Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This airworthiness directive (AD) requires that certain engines equipped with P/N 6887113 or 6888633 third stage turbine wheels be operated with a power turbine (N_2) operating speed restriction. This engine operating limitation prohibits sustained operation in the 90 to 98 percent N_2 range. It thereby reduces the risk of third stage turbine blade failure due to vibrational stress which results from operating certain unidentifiable wheels at these N_2 speeds.

NOTE.—All operators are cautioned that it has not been conclusively determined that compliance as herein prescribed will eliminate all of the risk factor which attaches to this condition.

EFFECTIVE DATE: June 24, 1977.

COMPLIANCE

Compliance required within the next 10 hours time in service after the effective date of this AD.

ADDRESSES: Copies of Detroit Diesel Allison Commercial Engine Bulletins and Commercial Service Letters referenced herein may be obtained by contacting: Detroit Diesel Allison, Division of General Motors Corp., P.O. Box 894, Indianapolis, Indiana 46206.

FOR FURTHER INFORMATION CONTACT:

William Ashworth, Engineering and Manufacturing Branch, Flight Standards Division, AGL-214, Federal Aviation Administration, 2300 E. Devon Avenue, Des Plaines, Illinois 60018, telephone 312-694-4500, extension 308.

SUPPLEMENTARY INFORMATION: There recently have been several instances of third stage turbine blade failure on 250-C20 series engines equipped with P/N 6887113 third stage power turbine wheels. As a result, in the case of single engine rotocraft, a power reduction was experienced below that necessary to sustain flight.

Investigations revealed that, in each instance, the most probable cause of these failures is high vibratory stresses developed in the blades when the wheel is operated at a speed that excites the disc at a resonant frequency.

The 10 hour time in service compliance time for the operating restriction has been established by the agency on the basis of safety considerations. This compliance time provides the lead time for operators to schedule and plan compliance with the AD with a minimum burden. To prescribe the operating restriction required by this AD under the usual notice and public procedures followed by the agency within the time the agency has determined is required in the interest of safety, would necessarily result in a reduction of the compliance time required by this AD. This could possibly leave the operators insufficient time to schedule airplanes for compliance with the AD. Therefore, compliance with the operating restriction required by this AD within the time the agency has determined is necessary makes strict compliance with the notice and public procedure provisions of the Administrative Procedure Act impracticable and this amendment becomes effective 30 days after publication in the FEDERAL REGISTER. However, interested persons are invited to submit such written data, views, or arguments as they may desire regarding this AD. Communications should identify the docket number and be submitted in duplicate to the Federal Aviation Administration, Office of the Regional Counsel, Attention: Rules Docket, 2300 E. Devon Avenue, Des Plaines, Illinois 60018. All communications received before the effective date will be considered by the Administrator, and the AD may be changed in the light of comments received. All comments will be available both before and after the effective date in the Rules Docket for examination by interested persons. Operators are urged to submit their comments as early as possible since it may not be possible to evaluate comments received near the effective date in sufficient time to amend the AD before it becomes effective.

Since this condition is likely to exist or develop in other engines of this type design including the 250-B17 series engines, an airworthiness directive is

being issued to prohibit operation in the 90 to 98 percent N_2 speed range.

In accordance with Departmental Regulatory Reform, dated March 23, 1976, we have determined that the expected impact of this final rule is so minimal that it does not warrant an evaluation.

DRAFTING INFORMATION

The principal authors of this document are W. Ashworth, Flight Standards Division, Great Lakes Region, and J. McLaughlin, Office of the Regional Counsel, Great Lakes Region.

ADOPTION OF THE AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following Airworthiness Directive:

DETROIT DIESEL ALLISON: Applies to 250–C20, C20B, and C20C engines, as installed in rotorcraft certificated in all categories, equipped with P/N 6887113 or 6888633 third stage turbine wheels that do not incorporate Detroit Diesel Allison Commercial Engine Bulletin 1119 and Commercial Service Letter 1065 or later FAA approved revisions. Applies also to 250–B17 and B17B engines, as installed in aircraft certificated in all categories, equipped with P/N 6887113 or 6888633 third stage turbine wheels that do not incorporate Detroit Diesel Allison Commercial Engine Bulletin 1087 or later FAA approved revisions.

Compliance required within the next 10 hours time in service after the effective date of this AD, unless already accomplished.

To reduce the risk of engine power loss resulting from third stage turbine blade failure, provide placards, markings, flight manual changes or other appropriate information prohibiting operation of the engine between 90 and 98 percent N, except during transients while maintaining safe flight practices. This restriction also applies to autorotation practice and engine idle during engine out simulation on multi-engine aircraft. (Detroit Diesel Allison Commercial Service Letters No. 1062 Rev. 1 and 1066 for the 250–C20 series engines and No. 1031 Rev. 1 and 1034 for the 250–B17 series engines also pertain to this subject.)

This amendment becomes effective June 24, 1977.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423) sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Des Plaines, Ill., on May 11, 1977.

LEON C. DAUGHERTY,
Acting Director,
Great Lakes Region.

[FR Doc.77–14358 Filed 5–20–77;8:45 am]

[Docket No. 77–WE–12–AD, Amdt. 39–2905]

PART 39—AIRWORTHINESS DIRECTIVES

General Dynamics Models 240, 340/440 Airplanes Including Those Modified for Turbopropeller Power per STC's SA1054WE, SA1096WE and SA4–1100

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) which requires repetitive inspections and/or replacement of the nose landing gear uplock quadrant to preclude possible failure of the quadrant due to stress corrosion of the aluminum uplock quadrant lug that could prevent lowering the nose landing gear.

EFFECTIVE DATE: May 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Jerry J. Presba, Executive Secretary, Airworthiness Directives Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009. Telephone 213–536–6351; or Richard G. Wittry, Attorney, Office of the Regional Counsel, Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009, Telephone 213–536–6274.

SUPPLEMENTARY INFORMATION: There has been a recent report that a Model 340 operator was unable to lower the nose landing gear thereby incurring moderate to extensive damage to the airplane. This has been attributed by the manufacturer to a failed aluminum uplock quadrant lug caused by stress corrosion. The only known previous failure was in 1969 on a military model 240 (T–29B). At that time service bulletins were issued recommending a one time inspection and/or replacement of the part with either an identical uncracked part (aluminum) or a steel alternate part. Since this condition is likely to exist or develop in other airplanes of the same type design, an airworthiness directive is being issued to require repetitive inspections until the part is replaced with a steel alternate part. New aluminum parts may be installed subject to continued repetitive inspection being accomplished and limited to 1,200 hours total time in service.

The principal authors of this Airworthiness Directive are Fred R. Patschke, Project Engineer, Airframe Branch, Aircraft Engineering Division, FAA Western Region; and Richard G. Wittry, Attorney, Office of the Regional Counsel, FAA Western Region.

Accordingly, pursuant to the authority delegated to me by the Administrator (11 CFR 11.89), § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR Part 39) is amended by adding the following new airworthiness directive:

GENERAL DYNAMICS: Applies to Models 240, 340/440 airplanes, including those modified for turbopropeller power per STC's SA1054WE, SA1096WE, and SA4–1100, certificated in all categories.

Compliance required as indicated.

To detect stress corrosion to the aluminum uplock quadrant lug in the nose landing gear and prevent possible failure of the lug, accomplish the following:

(a) Within the next 60 hours time in service after the effective date of this AD, and at intervals not to exceed 60 hours time in service thereafter, until (c), below, is performed:

(1) Remove the AN 3–21 bolt attaching the nose landing gear uplatch release cable clevis and the emergency release cylinder to the uplock assembly.

(2) Inspect P/N 240–5250109–6 nose landing gear uplock quadrant for cracks in the AN3 bolt attach lug using a 2X or stronger magnifier, or dye penetrant method.

(3) If cracks are found, prior to further flight, replace the quadrant with either a new aluminum quadrant, P/N 240–5250109–6, or a steel quadrant, P/N 240–5250109–9. If a new aluminum quadrant is installed, perform steps (1) through (4) at intervals not to exceed 600 hours time in service.

(4) Reinstall the AN3 bolt attaching release cable and emergency release cylinder and check rigging of the nose landing gear uplock installation per the applicable maintenance manual.

(b) After the effective date of this AD, all aluminum quadrants, P/N 240–5250109–6, must be replaced before accumulating 1,200 hours time in service.

(c) Installation of a steel quadrant, P/N 240–5250109–9, constitutes terminating action for this AD, and normal maintenance practices may be observed.

(d) Special flight permits may be issued in accordance with FAR 21.197 to authorize operation of the aircraft to a base for the accomplishment of the inspections required by this AD.

(e) Equivalent inspections and replacement parts may be used when approved by the Chief, Aircraft Engineering Division, FAA Western Region.

NOTE.—General Dynamics Service Bulletins 600 (240D) Service Bulletin No. 32–3 and 640 (340D) Service Bulletin No. 32–2 pertain to this same subject.

This amendment becomes effective May 26, 1977.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Los Angeles, Calif., on May 9, 1977.

ROBERT H. STANTON,
Director, FAA Western Region.

[FR Doc.77–14475 Filed 5–20–77;8:45 am]

[Docket No. 77–WE–14–AD; Amdt. 39–2906]

PART 39—AIRWORTHINESS DIRECTIVES

McDonnell Douglas Model DC–8 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive which requires a visual inspection of the elevator gear tab crank arm assemblies and the gust lock assembly for failure and/or cracks. Failure of the elevator gear tab crank arm could cause loss of longitudinal control on takeoff or in flight.

EFFECTIVE DATE: May 26, 1977. Compliance required within the next 300 hours time in service or 30 days after the effective date of this AD, whichever occurs first.

FOR FURTHER INFORMATION CONTACT:

Wallace M. Frei, Executive Secretary, Airworthiness Directives Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009, Telephone 213–536–6351; or Richard G. Wittry, Attorney, Office of the Regional Counsel, Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009, Telephone 213–536–6274.

SUPPLEMENTARY INFORMATION: The FAA has received a report that an airplane landed in strong gusty winds (30 knots steady with gusts to 50 knots). While taxiing crosswise to the wind the crew activated the elevator gust lock handle, with the handle forces encountered being normal. The gust lock is designed to immobilize the elevator in the neutral or faired position while on the ground to prevent elevator movement and possible damage due to gusts. The airplane was then parked with the tail directly into the wind. At this point, the control columns were agitating fore and aft to such a degree as to cause concern for injury to the crew by being struck by the control column. The airplane remained parked tail to the wind for some time. When the next crew boarded for the return flight, the control columns were stationary, although the wind was still blowing strongly.

During taxi for takeoff, the crew performed the normal elevator control throw check, with no problems being detected. During the takeoff roll, at approximately 80 to 90 knots, the nose of the airplane became light. The crew checked to assure the gust lock had been removed. The airplane then lifted off despite pilot action to lower the nose of the airplane. The pilot raised the gear, applied forward control pressure, the left wing dropped, and the airplane landed gear up. All four engines were knocked off the airplane before it stopped.

Investigation revealed that the gust lock crank arm was broken and that the elevator geared tab drive arms on the left elevator were failed. It appeared the elevators had been driven beyond normal limits, which caused damage to the elevator leading edge and control linkages. This damage possibly caused jamming of the elevator in the airplane nose up position, which caused the airplane to rotate prematurely.

The manufacturer has issued Alert Service Bulletin A27–262 specifying visual inspection of the elevator geared tab crank arm assemblies and gust lock assembly for failure and/or cracks. Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days to require inspection of the McDonnell Douglas Model DC–8 Series elevator geared tab crank arm assemblies and gust lock assembly.

The principal authors of this Airworthiness Directive are Everett W. Pittman, Aerospace Engineer, AWE–122, Aircraft Engineering Division, FAA Western Region; and Richard G. Wittry, Attorney, Office of the Regional Counsel, AWE–7.2, FAA Western Region.

Accordingly, and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

MCDONNELL DOUGLAS: Applies to Model DC–8 Series airplanes, certificated in all categories.

Compliance required within the next 300 hours time in service or 30 days after the effective date of this AD, whichever comes first, unless already accomplished within the past 30 days.

To detect cracks and prevent failure or jamming of the elevator geared tab crank arm and gust lock assemblies, comply with the following:

(a) Visually inspect both the left and right side inboard and outboard elevator geared tab crank arm assemblies, P/N's 4710541 and 4710542 for failure and/or cracks.

(b) Visually inspect the P/N 5644178 gust lock assembly, and specifically, the torque tube section of the P/N 4644181 crank assembly, for failure and/or cracks.

(c) Failed or cracked parts must be replaced with like serviceable parts before further flight.

(d) Verify that clearance exists between the crank assemblies, P/N 4710541 and 4710542, and the box section for all positions along elevator travel.

NOTE.—McDonnell Douglas DC–8 Alert Service Bulletin A27–262, dated April 28, 1977, covers the same subject.

(e) Special flight permits may be issued in accordance with FAR's 21.197 and 21.199 to authorize operation of an airplane to a base to perform the inspections required by this AD.

This amendment becomes effective May 26, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Los Angeles, Calif., on May 9, 1977.

ROBERT H. STANTON,
Director, FAA Western Region.

[Docket No. 76–NE–28; Amdt. 39–2910]

PART 39—AIR WORTHINESS DIRECTIVES

Pratt & Whitney JT8D–1, –1A, –1B, –7, –7A, –9, –9A, and –11 Aircraft Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment will amend Airworthiness Directive 76–24–01, Amendment 39–2775 by revising the compliance time of the present AD to require earlier removal of the eighth stage compressor disk, P/N 496908. The amendment will also incorporate an eddy current inspection procedure as an alternative to disk removal prior to December 31, 1977.

Subsequent to the issuance of AD 76–24–01, Amendment 39–2775, an operator experienced an eighth stage compressor disk failure which resulted in serious aircraft damage. After review of this failure and the preceding failure history, the FAA has determined it necessary, in the interest of safety, to revise the compliance time of AD 76–24–01.

DATES: Effective date, June 22, 1977.

Compliance schedule.—As prescribed in the body of the AD.

ADDRESSES: Persons, affected by this directive, desiring copies of Pratt & Whitney Aircraft Special Instruction No. SI–10F–77, titled "Eddy Current Inspection of Eighth Stage Disk," may obtain copies upon request to Pratt & Whitney Aircraft, Division of United Technologies Corporation, 400 Main Street, East Hartford, Connecticut 06108. This document may also be examined at Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

FOR FURTHER INFORMATION CONTACT:

Jay J. Pardee, Propulsion Section, ANE–214, Engineering and Manufacturing Branch, Flight Standards Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone 617–273–7337.

SUPPLEMENTARY INFORMATION: AD 76–24–01, Amendment 39–2775 (41 FR 52047), appeared in the FEDERAL REGISTER on November 26, 1976. The AD was issued to require removal of the eighth stage compressor disk, P/N 496908, due to fatigue cracking of the disk which resulted in uncontained failure of the disk.

A Notice of Proposed Rule Making appeared in the FEDERAL REGISTER on April

4, 1977 (41 FR 52017). This NPRM proposed to modify the compliance time in the present AD by requiring eight stage disk removal by June 30, 1977, for those disks above 8,000 cycles, in lieu of the present requirement to remove disks by December 31, 1977, for those disks above 6,000 cycles. In addition, the NPRM proposed to create another compliance category which would allow disks between 6,000 and 8,000 cycles to continue in service until September 30, 1977, after which they must be removed. The NPRM also proposed a new retirement life of 6,000 cycles for P/N 496908 compressor disks after September 30, 1977.

This amendment, as adopted, will incorporate the accelerated removal schedule and additional compliance category as proposed in the NPRM. It will also provide an eddy current inspection as an alternative to disk removal for those disks in both the June 30, 1977, and September 30, 1977, compliance categories. Disks in both categories will be permitted to continue in service, under the provisions of the inspection procedure, until December 31, 1977. After December 31, 1977, the retirement life for the P/N 496908 compressor disk will be 6,000 cycles since new.

After the issuance of AD 76-24-01, a U.S. certificated air carrier experienced a severe eighth stage compressor disk failure while climbing through 14,000 feet. The disk sustained a 360° rim separation which exited through a 12-inch by 20-inch hole in the engine case, resulting in separation of the engine starter, start bleed valve, and portions of the upper and lower cowling. A review of the preceding failure history indicated six similiar uncontained disk failures, two of which resulted in fires and five of which caused secondary aircraft damage. Based on the degree of serious secondary aircraft damage sustained during these failures, the FAA has determined that the eighth stage compressor disk failure mode does have potentially hazardous effects due to the release of high energy projectiles. The original AD compliance was based upon a low energy type failure. Therefore, the FAA has determined it necessary, in the interest of safety, to revise the compliance time of AD 76-24-01 to require earlier removal of eighth stage compressor disks.

The final rule differs from the proposed rule in that it incorporates an eddy current inspection as an alternative to disk removal prior to December 31, 1977. Therefore, operators may elect to continue disks in service beyond the June 30, 1977, and September 30, 1977, removal dates providing they inspect these disks in accordance with the approved inspection procedures. The final rule allows disks, operated under the provisions of the inspection procedure, to continue in service until December 31, 1977, after which they must be retired. The final rule also establishes a retirement life of 6,000 cycles for the P/N 496908 compressor disk after December 31, 1977, in lieu of the September 30, 1977, date in the proposed rule. In addition, minor editorial changes were made to clarify the compliance requirements of the AD.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Several commentators stated that the disk removal compliance dates in the NPRM would generate overhaul shop workloads significantly beyond their capacity causing increased aircraft out-of-service days due to maintenance delays. In addition, these commentators stated that the overhaul shop and aircraft days out-of-service situation would be further aggravated by a shortage of replacement eighth stage disks and associated engine hardware needed to rebuild engines after disk replacement. Shortages of other engine parts would require engines to be rebuilt, after disk replacement, with uneconomically short times before next scheduled shop maintenance visit.

A comment was received from the manufacturer which suggested the use of an eddy current inspection procedure as an alternative to disk removal. The inspection procedure utilizes an eddy current probe, inserted through holes drilled in the seventh and eighth stage stator outer shrouds, to detect cracks in the eighth stage disk. The crack detection capability of the inspection method combined with a 120-cycle repetitive inspection requirement is designed to ensure continued safe operation of the P/N 496908 compressor disk until its removal. Other commentators also suggested the use of the eddy current inspection as an alternative to disk removal which will alleviate aircraft grounding, premature engine removals, and provide flexibility in maintenance scheduling.

Another commentator suggested that eddy current inspection procedure be used as an alternative to disk removal but suggested that all disks with over 6,000 cycles continue in service until September 30, 1977. After September 30, 1977, these disks must be removed or subjected to eddy current inspection. Disks operating under the provisions of the eddy current procedure may continue in service until December 31, 1977. The commentator stated that the September 30, 1977, compliance date would provide adequate time for operators to prepare for the eddy current inspection program, by procuring probes, training personnel, and drilling inspection holes, without disruption of public service during the busy summer season. In addition, the commentator stated that statistical probability analysis predicted only a small improvement in expected failure rate for the June 30, 1977, NPRM compliance date as opposed to the suggested September 30, 1977, date.

The FAA concurs with the use of an eddy current inspection procedure as an alternative to disk removal. The final rule will therefore incorporate provisions to continue disks in service beyond the removal dates proposed in the NPRM with a December 31, 1977, limiting date providing they are inspected in accordance with Pratt & Whitney Aircraft Special Instruction No. SI-10F-77, titled "Eddy Current Inspection of Eighth Stage Disk."

The FAA believes that incorporation of the eddy current inspection in the final rule, as an alternative to disk removal, will provide sufficient relief in the areas of overhaul shop capacity, engine replacement parts, and economical build standards.

The FAA has also determined that the eddy current inspection probes will be available in a time frame compatible with the requirements of the final rule.

However, the FAA does not agree with the commentator's suggestion that all disks over 6,000 cycles should be allowed to operate until September 30, 1977, before they must be removed or subjected to the eddy current inspection. The June 30, 1977, compliance date for disks over 8,000 cycles was selected only after careful consideration of all pertinent safety factors including failure modes and preceding failure history. After additional review of this entire matter of compliance time, the FAA still considers that the June 30, 1977, and September 30, 1977, compliance dates, as proposed in the NPRM, represent the most appropriate compliance period for this AD in terms of safety.

This AD will affect U.S. domestic carriers and foreign carriers by requiring increased maintenance effort to meet the disk removal or optional disk inspection requirements. It is expected that the optional eddy current inspection provisions of the final rule will significantly reduce the economic impact anticipated under the fixed time disk removal requirements of the NPRM.

Drafting Information

The principal authors of this document are Jay J. Pardee, Engineering and Manufacturing Branch, and George L. Thompson, Regional Counsel Office.

Adoption of the Amendment

Accordingly, Section 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13), Amendment 39-2775 (41 FR 52047), AD 76-24-01 is amended as follows:

1. By deleting the words in Paragraph 1 beginning with "prior to reaching" and ending with "not to be exceeded."

2. By inserting in Paragraph 1 after "P/N 496908" the words "in accordance with the following schedule:."

3. By adding the following new paragraphs:

"A. After June 30, 1977, remove disks prior to accumulating 8,000 cycles since new. In lieu of removal, disks may be continued in service until December 31, 1977, if inspected in accordance with Pratt & Whitney Aircraft Special Instruction No. SI-10F-77 by June 30, 1977, and every 120 cycles thereafter. Cracked disks shall be replaced prior to further flight. The established life limit of 11,000 cycles shall not be exceeded.

B. After September 30, 1977, remove disks prior to accumulating 6,000 cycles since new. In lieu of removal, disks may be continued in service until December 31, 1977, if inspected in accordance with Pratt & Whitney Aircraft Special Instruction No. SI-10F-77 by September 30, 1977, and every 120 cycles thereafter. Cracked disks shall be replaced prior to further flight. The established life limit of 11,000 cycles shall not be exceeded.

After December 31, 1977, P/N 496908 compressor disk retirement life is 6,000 cycles since new.

Upon request of the operator, an FAA Maintenance Inspector, subject to prior approval of the Chief, Engineering and Manufacturing Branch, FAA, New England Region, may adjust the inspection intervals specified in this AD to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for that operator.

The manufacturer's Special Instruction No. SI-10F-77 identified and described in this directive is incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Pratt & Whitney Aircraft, Division of United Technologies Corporation, 400 Main Street, East Hartford, Connecticut 06108. These documents may also be examined at Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, and at FAA Headquarters, 800 Independence Avenue SW., Washington, D.C. A historical file on this AD which includes the incorporated material in full is maintained by the FAA at its Headquarters in Washington, D.C., and at New England Region.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

This amendment becomes effective on June 22, 1977.

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Burlington, Massachusetts, on May 18, 1977.

WILLIAM E. CROSBY,
Acting Director,
New England Region.

NOTE.—The incorporation by reference provisions of this document was approved by the Director of the Federal Register on June 16, 1967.

SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES

[Docket No. 16773, Amdt. No. 1073]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase

Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Independence Avenue SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription

Copies of all SIAPs, mailed weekly, may be ordered from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The current annual subscription price is $150; add $30 for each additional copy mailed to the same address.

FOR FURTHER INFORMATION CONTACT:

William L. Bersch, Flight Procedures and Airspace Branch (AFS-730), Aircraft Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 9) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA forms are identified as FAA Forms 8260-3, 8260-4 and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the Federal Register expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs but refer to their graphic depiction on charts printed by publishers of aeronautic materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The principal authors of this document are Rudolph L. Fioretti, Flight Standards Service, and Richard W. Danforth, Office of the Chief Counsel.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective on the dates specified, as follows:

1. By amending § 97.23 VOR-VOR/DME SIAPs identified as follows:

• • • Effective June 30, 1977:

Delano, CA—Delano Muni., VOR Rwy 32, Amdt. 1.
West Palm Beach, FL—Palm Beach International, VOR Rwy 9L, Amdt. 9.
Marion, IL—Williamson County, VOR-A, Amdt. 2.
Marion, IL—Williamson County, VOR Rwy 2, Amdt. 7.
Marion, IL—Williamson County, VOR Rwy 20, Amdt. 9.
Alpena, MI—Phelps-Collins, VOR Rwy 12 (TAC), Amdt. 6.
Alpena, MI—Phelps-Collins, VOR Rwy 18 (TAC), Amdt. 7.
Alpena, MI—Phelps-Collins, VOR Rwy 36 (TAC), Admt. 8.

Lebanon, NH—Lebanon Regional, VOR–A, Amdt. 12.
Truth or Consequences, NM—Truth or Consequences Municipal, VOR–A, Amdt. 8.
Midland, VA—Warrenton-Fauquier, VOR Rwy 14, Amdt. 1.

• • • Effective May 12, 1977:

Nantucket, MA—Nantucket Memorial, VOR Rwy 24, Amdt. 8.

2. By amending § 97.25 SDF–LOC–LDA SIAPs identified as follows:

• • • Effective June 30, 1977:

West Palm Beach, FL—Palm Beach International, LOC(BC) Rwy 27R, Amdt. 7.
Moline, IL—Quad-City, LOC BC Rwy 27, Amdt, 17.
Joplin, MO—Joplin Muni., LOC BC Rwy 31, Amdt. 15.
Lebanon, NH—Lebanon Regional, LOC Rwy 7, Original.

• • • Effective June 2, 1977:

Pine Bluff, AR—Grider Field, LOC Rwy 17, Original.

3. By amending § 97.27 NDB/ADF SIAPs identified as follows:

• • • Effective June 30, 1977:

West Palm Beach, FL—Palm Beach International, NDB Rwy 9L, Amdt. 14.
Marion, IL—Williamson County, NDB Rwy 20, Amdt. 3.
Moline, IL—Quad-City, NDB Rwy 9, Amdt. 22.
Alpena, MI—Phelps-Collins, NDB Rwy 18, Amdt. 10, cancelled.
Joplin, MO—Joplin Muni., NDB Rwy 13, Amdt. 19.
Lebanon, NH—Lebanon Regional, NDB–B, Amdt. 1.

• • • Effective June 16, 1977:

Miami, FL—Dade-Collier Training and Transition, NDB Rwy 9, Admt. 9.
Naples, FL—Naples Muni., NDB Rwy 4, Amdt. 1.
Naples, FL—Naples Muni., NDB Rwy 22, Amdt. 1

The FAA published an amendment in docket No. 16741, Amdt No. 1070 to part 97 of the Federal Aviation Regulations (42 FR 21609; April 28, 1977) under § 97.27 effective June 16, 1977, which is hereby amended as follows: Marathon, FL—Marathon Flight Strip, NDB Rwy 7 Original is rescinded.

4. By amending § 97.29 ILS–MLS SIAPs identified as follows:

• • • Effective June 30, 1977:

West Palm Beach, FL—Palm Beach International, ILS Rwy 9L, Amdt. 16.
Marion, IL—Williamson County, ILS Rwy 20, Amdt. 3.
Moline, IL—Quad City, ILS Rwy 9, Amdt. 22.
Columbus West Point Starkville, MS—Golden Triangle Regional, ILS Rwy 18, Amdt. 1.
Joplin, MO—Joplin Muni., ILS Rwy 13, Amdt. 17.
Lebanon, NH—Lebanon Regional, ILS Rwy 7, Amdt. 4.

• • • Effective June 16, 1977:

Miami, FL—Dade-Collier Training and Transition, ILS Rwy 9, Amdt. 9.

The FAA published an amendment in Docket No. 16659, Amdt No. 1068 to Part 97 of the Federal Aviation Regulations (42 FR 20118; April 18, 1977) under § 97.29 effective May 26, 1977, which is hereby amended as follows: Richmond, VA—Richard Evelyn Byrd Int'l Arpt., ILS Rwy 15, Amdt. 1 is rescinded.

5. By amending § 97.31 RADAR SIAPs identified as follows:

• • • Effective June 30, 1977:

West Palm Beach, FL—Palm Beach International, RADAR–1, Amdt. 6.
Moline, IL—Quad-City, RADAR–1, Amdt. 1.
Erie, PA—Erie Int'l, RADAR–1, Amdt. 3.

• • • Effective May 5, 1977:

Great Falls, MT—Great Falls Int'l, RADAR–1, Amdt. 7.

6. By amending § 93:33 RNAV SIAPs identified as follows:

• • • Effective June 30, 1977:

Joplin, MO—Joplin Muni., RNAV Rwy 31, Amdt. 2.

• • • Effective May 5, 1977:

Spartanburg, SC—Spartanburg-Downtown Memorial, RNAV Rwy 4, Amdt. 4.

(Secs. 307, 313(a), 601, 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348 1354(a), 1421, 1510); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Delegation: 24 FR 5662 and Paragraph 802 of Order FS P 1100.1, as amended March 9, 1973.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Washington, D.C., on May 13, 1977.

JAMES M. VINES,
Chief,
Aircraft Programs Division.

NOTE.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on May 12, 1969.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

PART 7—TEMPORARY INCOME TAX REGULATIONS UNDER THE TAX REFORM ACT OF 1976

Income Tax Deduction for Removing Certain Barriers to Handicapped and Elderly; Public Hearing on Interim Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Public hearing on interim regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations concerning income tax deductions for removing certain barriers to the handicapped and elderly.

DATES: The public hearing will be held on June 21, 1977, beginning at 10 a.m. Outlines of oral comments are due by June 13, 1977.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue NW., Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

George H. Bradley of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Room 4317, Washington, D.C. 20224 (202–566–3935).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is interim regulations under section 190 of the Internal Revenue Code of 1954 which appear in the FEDERAL REGISTER for April 4, 1977 (42 FR 17870). This statutory provision relates to income tax deductions for certain expenditures to remove architectural and transportation barriers to the handicapped and elderly.

A correction notice was published in the FEDERAL REGISTER for April 14, 1977 (42 FR 19479).

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rule making and who desire to present oral comments at the hearing on the proposed regulations should submit an outline of the comments to be presented at the hearing and the time they wish to devote to each subject by June 13, 1977. Such outlines should be submitted to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224. Each speaker will be limited to 10 minutes for an oral presentation exclusive of time consumed by questions from the panel for the Government and answers thereto.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers, and copies of the agenda will be available free of charge at the hearing.

ROBERT A. BLEY,
Director, Legislation and Regulations Division.

[FR Doc.77–14622 Filed 5–20–77;8:45 am]

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 725–77]

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

Conduct of Legal Proceedings

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: Under 28 U.S.C. 515(a), Department of Justice attorneys, when specifically directed by the Attorney General, are authorized to conduct any kind of legal proceeding, including grand jury proceedings, which United States Attorneys are authorized by law to conduct, whether or not the attorney is a resident of the district where the proceeding is brought. Present regulations delegate certain of the Attorney General's authority under this statute to certain Department officials. This order broadens the authority delegated by the Attorney General expressly to include the designation of attorneys to conduct legal proceedings, and extends the delegation to all Divisions.

EFFECTIVE DATE: May 12, 1977.

FOR FURTHER INFORMATION CONTACT:

John M. Harmon, Acting Assistant Attorney General, Office of Legal Counsel, Department of Justice, Washington, D.C. 20530 (202–739–2041).

By virtue of the authority vested in me by 28 U.S.C. 509, 510 and 5 U.S.C. 301, Part 0 of Chapter I of Title 28, Code of Federal Regulations, is amended as follows:

1. A new § 0.13 is added at the end of Subpart B, to read as follows:

§ 0.13 Legal proceedings.

(a) Each Assistant Attorney General and Deputy Assistant Attorney General is authorized to exercise the authority of the Attorney General under 28 U.S.C. 515(a), in cases assigned to, conducted, handled, or supervised by such official, to designate Department attorneys to conduct any legal proceeding, civil or criminal, including grand jury proceedings and proceedings before committing magistrates, which United States attorneys are authorized by law to conduct, whether or not the designated attorney is a resident of the district in which the proceedings is brought.

(b) Each Assistant Attorney General is authorized to redelegate to Section Chiefs the authority delegated by paragraph (a) of this section, except that such redelegation shall not apply to the designation of attorneys to conduct grand jury proceedings.

§ 0.40 [Amended]

2. Paragraph (a) of § 0.40 of Subpart H is amended by deleting "designation of attorneys to present evidence to grand juries."

§ 0.43 [Revoked]

3. Section 0.43 of Subpart H is revoked.

§ 0.50 [Amended]

4. Paragraph (a) of § 0.50 of Subpart J. is amended by deleting "and designation of attorneys to present evidence to grand juries."

§ 0.60 [Revoked]

5. Section 0.60 of Subpart K is revoked.

(28 U.S.C. 509, 510 and 5 U.S.C. 301.)

Dated: May 12, 1977.

GRIFFIN B. BELL,
Attorney General.

Title 38—Pensions, Bonuses, and Veterans' Relief

CHAPTER I—VETERANS ADMINISTRATION

PART 3—ADJUDICATION

Subpart B—Burial Benefits

HEARSE CHARGES FOR TRANSPORTING BODIES

AGENCY: Veterans Administration.

ACTION: Final Regulation.

SUMMARY: The VA has amended its regulation relating to hearse charges for transporting a body to place of burial.

EFFECTIVE DATE: May 11, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. T. H. Spindle, Chief, Regulations Staff, Compensation and Pension Service Veterans Administration, Washing, D.C. 20420 (202–389–3005).

SUPPLEMENTARY INFORMATION: On page 16839 of the FEDERAL REGISTER of March 30, 1977, there was published a notice of proposed regulatory development to amend § 3.1606(b) relating to hearse charges. When a person dies in a Veterans Administration facility to which he or she was properly admitted for hospital, nursing home or domiciliary care under 38 U.S.C. 610 or 611(a), the Veterans Administration is usually required to pay the cost of transporting the body to the place of burial. (38 U.S.C. 903) The Veterans Administration is also directed to pay the cost of transporting the body of certain veterans who die outside of a Veterans Administration facility when burial will be made in a National Cemetery. (38 U.S.C. 908)

Claims have been received for payment of charges for transporting a body by hearse over quite long distances when common carrier service was readily available. In these claims the hearse charges greatly exceeded the common carrier rate. Therefore, § 3.1606 is amended to provide that payment of hearse charges for transporting a body over long distances will be limited to prevailing common carrier rates where it is reasonable and customary for shipment to be made by common carrier. This limitation will not be for application where common carrier service is unavailable or where use of a common carrier would clearly be impractical. When a common carrier is used to transport a body, charges for use of a hearse to deliver the body to and from the carrier will be paid.

Interested persons were given 30 days in which to submit comments, suggestions or objections regarding the proposed regulation. No written comments have been received and the proposed regulation is hereby adopted without change and is set forth below.

NOTE.—The Veterans Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A–107.

Approved: May 11, 1977.

By direction of the Administrator.

RUFUS H. WILSON,
Deputy Administrator.

In § 3.1606, paragraph (b)(3) is added to read as follows:

§ 3.1606 Transportation items.

The transportation costs of those persons who come within the provisions of §§ 3.1600(g) and 3.1605 (a), (b), (c) and (d) may include the following:

• • • • • •

(b) *Transported by hearse.* • • •

(3) Payment of hearse charges for transporting the remains over long distances are limited to prevailing common carrier rates when common carrier service is available and can be easily and effectively utilized.

[FR Doc.77–14558 Filed 5–20–77;8:45 am]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 715–8]

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Compliance With Standards and Maintenance Requirements

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This action amends the general provisions of the standards of performance to allow methods other than Reference Method 9 to be used as a means of measuring plume opacity. The Environmental Protection Agency (EPA) is investigating a remote sensing laser radar system of measuring plume opacity and believes it could be considered as an alternative method to Reference Method

9. This amendment would allow EPA to propose such systems as alternative methods in the future.

EFFECTIVE DATE: June 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Don R. Goodwin, Emission Standards and Engineering Division, Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone no. 919–688–8146, ext. 271.

SUPPLEMENTARY INFORMATION: As originally expressed, 40 CFR 60.11(b) permitted the use of Reference Method 9 exclusively for determining whether a source complied with an applicable opacity standard. By this action, EPA amends § 60.11(b) so that alternative methods approved by the Administrator may be used to determine opacity.

When § 60.11(b) was originally promulgated, the visible emissions (Method 9) technique of determining plume opacity with trained visible emission observers was the only expedient and accurate method available to enforcement personnel. Recently, EPA funded the development of a remote sensing laser radar system (LIDAR) that appears to produce results adequate for determination of compliance with opacity standards. EPA is currently evaluating the equipment and is considering proposing its use as an alternative technique of measuring plume opacity.

This amendment will allow EPA to consider use of the LIDAR method of determining plume opacity and, if appropriate, to approve this method for enforcement of opacity regulations. If this method appears to be a suitable alternative to Method 9, it will be proposed in the FEDERAL REGISTER for public comment. After considering comments, EPA will determine if the new method will be an acceptable means of determining opacity compliance.

(Secs. 111, 114, 301(a), Clean Air Act, sec. 4(a) of Pub. L. 91–604, 84 Stat. 1683; sec. 4(a) of Pub. L. 91–604, 84 Stat. 1687; sec. 2 of Pub. L. No. 90–148, 81 Stat. 504 (42 U.S.C. 1857c–6, 1857c–9 and 1857g(a)).)

NOTE.—Economic Impact Analysis: The Environmental Protection Agency has determined that this action does not contain a major proposal requiring preparation of an Economic Impact Analysis under Executive Orders 11821 and 11949 and OMB Circular A–107.

Dated: May 10, 1977.

DOUGLAS M. COSTLE,
Administrator.

Part 60 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

1. Section 60.11 is amended by revising paragraph (b) as follows:

§ 60.11 Compliance with standards and maintenance requirements.

* * * * *

(b) Compliance with opacity standards in this part shall be determined by conducting observations in accordance with Reference Method 9 in Appendix A of this part or any alternative method that is approved by the Administrator. Opacity readings of portions of plumes which contain condensed, uncombined water vapor shall not be used for purposes of determining compliance with opacity standards. The results of continuous monitoring by transmissometer which indicate that the opacity at the time visual observations were made was not in excess of the standard are probative but not conclusive evidence of the actual opacity of an emission, provided that the source shall meet the burden of proving that the instrument used meets (at the time of the alleged violation) Performance Specification 1 in Appendix B of this part, has been properly maintained and (at the time of the alleged violation) calibrated, and that the resulting data have not been tampered with in any way.

* * * * *

(Secs. 111, 114, 301(a), Clean Air Act, Sec. 4 (a) of Pub. L. 91–604, 84 Stat. 1683; sec. 4(a) of Pub. L. 91–604, 84 Stat. 1687; sec. 2 of Pub. L. No. 90–148 81 Stat. 504 (42 U.S.C. 1857c–6, 1857c–9, 1857g(a)).)

[FR Doc.77–14562 Filed 5–20–77;8:45 am]

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 146—MODERN FOREIGN LANGUAGE AND AREA STUDIES

Awards of Grants and Contracts

AGENCY: Office of Education, HEW.

ACTION: Final regulation.

SUMMARY: These proposed regulations set forth rules and criteria governing the award of grants and contracts to institutions of higher education, qualified organizations and individuals for the purpose of providing Federal financial assistance to establish and operate Language and Area Studies Centers, Graduate and Undergraduate International Studies Programs, for the award of fellowships to individuals undergoing training in any center or under any program receiving Federal financial assistance under the NDEA Act, and for research and studies.

EFFECTIVE DATE: Pursuant to section 431(d) of the General Education Provisions Act, as amended (20 U.S.C. 1232 (d)), this regulation has been transmitted to the Congress concurrently with its publication in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment.

DATES: None.

ADDRESSES: None.

FOR FURTHER INFORMATION CONTACT:

Edward L. Meador, Division of International Education, 7th and D Streets, SW., Room 3907, Regional Office Building #3, Washington, D.C. 20202 (202/245–9691)

SUPPLEMENTARY INFORMATION: The National Defense Education Act of 1958 in its statement of findings and declaration of policy says, "The Congress finds and declares that the security of the Nation requires the fullest development of the mental resources and technical skills of its young men and women. The present emergency demands that additional and more adequate educational opportunities be made available. The defense of this Nation depends upon the mastery of modern techniques developed from complex scientific principles. It depends as well upon the discovery and development of new principles, new techniques, and new knowledge."

(20 U.S.C. 401.)

The importance of a knowledge of foreign languages and area studies to the attainment of this policy was recognized by the inclusion in the Act of Title VI—Modern Foreign Language and Area Studies. This Title authorizes: Federal financial assistance to institutions of higher education for the establishment and operation of International Studies Centers and for Graduate and Undergraduate International Studies Programs, fellowships for graduate students in foreign language and area studies, and Federal financial assistance to public and private agencies, organizations and institutions as well as individuals for research in the area of foreign language and area studies.

"The International Studies Centers Program" provides grants to higher education institutions or consortia of such institutions to establish and operate centers focusing on one world region. These centers offer instruction in two or more of the area's principal languages and in other disciplines in order to provide training in understanding that particular world area. Other centers that feature instruction in comparative approaches to topics of concern to more than one nation, international relations, or interregional studies are also eligible for support. Awards are available in each category to centers having a combination of graduate and undergraduate instruction (unless undergraduate instruction is not offered) as well as to those offering only undergraduate training.

"The Graduate and Undergraduate International Studies Programs" may provide grants of up to two years, or in certain instances 3 years, to higher education institutions or consortia of such institutions to establish instructional programs in international studies at the graduate or undergraduate levels. Programs must be global or multi-area in instructional coverage. "Graduate International Studies Programs" are designed to strengthen linkages among disciplines and between various international specialties and professional schools to bring an interdisciplinary and/or comparative focus to issues or topics of concern to more than one nation. "Undergraduate International Studies Programs" are designed to develop an international dimension in the general education program of institutions, particularly in the first 2 years of postsecondary study.

The "Foreign Language and Area Studies Fellowships Program" offers academic-year awards for graduate students in foreign language and area studies. Quotas of fellowships are made to selected U.S. higher education institutions, and individuals apply to these institutions for fellowships. Institutions selected for quotas of fellowships have programs in the field of language and area studies that may be interdisciplinary or multidisciplinary, and may include such fields as anthropology, economics, geography, history, linguistics, literature, philosophy, political science, sociology, or other professional studies, and must include study of the language(s) of the geographic area of specialization.

One commenter addressing this area (§ 146.33(a)), requested an explanation as to the source and rationale for the priority discipline, language and world area designation.

In view of general Federal budget priorities and funding constraints, the current employment realities regarding supply and demand for international studies specialists, and the basic justification for the available fellowships appropriation—a sharper focus and higher priority on the disciplines, languages, and world area where there are critical shortages of highly trained personnel—the Commissioner necessarily emphasizes increasing preference for those quality programs which reflect the national interest disciplinary priorities. However, the increasing emphasis on the priority disciplines is made within the context of the total resources of language and area studies centers/programs, i.e., it is only one criterion albeit an important one, on which the quality of the centers/programs will be evaluated.

The specific priorities were determined by periodic conferences and studies, the latest of which was the "Language and Area Studies Review" by Richard D. Lambert sponsored by the Social Science Research Council and funded by the U.S. Office of Education.

Although no formally structured mechanism for the assessment of priorities exists, the Commissioner with the assistance of scholars experienced in the world area will periodically review the priorities.

The "Research and Studies Program" supports surveys and studies to determine the need for increased or improved instruction in modern foreign language, area, and international studies or to develop more effective methods or specialized materials for such training.

Public and private agencies, organizations and institutions as well as individuals may apply to the Commissioner of Education for support under the research program.

Notice of proposed rulemaking was published in the FEDERAL REGISTER of August 12, 1976 (41 FR 34052–34060) setting forth regulations for Modern Foreign Language and Area Studies, authorized by Title VI of the National Defense Education Act of 1958 as amended (20 U.S.C. 511–513). Pursuant to section 503 of the Education Amendments of 1972 (Pub. L. 92–318), hearings were held in Washington on September 28, 1976 and comments were received on the proposed regulation. In addition, written comments were received and considered.

The following is a discussion of comments received, with each comment followed by the response of the Office of Education.

SUMMARY OF COMMENTS AND RESPONSES

1. 146.2 DEFINITIONS

Comment. A commenter suggested that the examples of disciplines provided in the definition of a center should include geography, language and literature, and sociology and that the examples should be the same wherever provided (§ 146.2(c) and § 146.12(c)).

Response. This suggestion reflects current program policy and the suggested addition of examples has been made in § 146.2(c) and § 146.12(c).

2. 146.11(b) SCOPE

Comment. A commenter suggested that Bangladesh be added to the list of countries included in South Asia.

Response. The Commissioner agrees and the suggestion is adopted. Further, Nepal was also added to the list of countries in South Asia.

3. 146.12 CORE INSTRUCTIONAL ACTIVITIES

Comment. A commenter suggested that "Centers offering instruction in international studies with other than a single area studies focus" should be able to draw on existing language instruction facilities and ought not to become involved in developing language instruction unless inadequate facilities make it necessary.

Response. This suggestion reflects current program policy and § 146.12(b) has been amended to reflect the change.

Comment. One commenter objected to what he assumed was the requirement in § 146.12(c) for the inclusion of professional training in center's core instructional offerings. The comment expresses a preference for use of recommendation and persuasion by centers to influence professional schools.

Response. The suggestion was not adopted. The language of the section specifies examples of the types of linkages that may be arranged between centers and professional training programs to satisfy this section of the regulations. The examples do not indicate that a center must force its courses on professional schools, but rather that persuasion be used to influence those schools to participate in the activities of the Center.

4. 146.13 EDUCATIONAL OUTREACH ACTIVITIES

Comment. A commenter suggested that the wording in § 146.13(b)(2) be modified to emphasize that outreach activities be directed to schools and teachers.

Response. This suggestion was accepted and the regulation was modified accordingly.

Comment. Obligating centers to spend 15 percent of their funds for outreach activities is either superfluous or wrong. If the Office of Education puts emphasis on outreach, it is wrong because 15 percent is a small proportion. It is superfluous if an institution agrees that outreach activities are important.

Response. The regulation was not changed in § 146.13(c). The stipulation that the equivalent of 15 percent of the grant funds be used for outreach activities was intended to stimulate all centers to engage in activities that would use the resources developed in the core program to strengthen international education in other institutions or agencies. Each center will plan its outreach activities in relation to its resources and the needs of its area. An amount which represents at least 15 percent of the grant was thought to be sufficient as a minimum for outreach activities but not so large that it would weaken the core program.

5. 146.14 CRITERIA FOR SELECTION OF CENTERS

Comment. A commenter suggested that the word "center" be replaced by the word "program" in § 146.14(a) (5) and (7) because "program" implies a broader concept of institutional support and because institutional assistance to professional associations should be a positive factor in the evaluation process.

Response. The regulation was not changed. The definition of "center" and the criteria for selection make clear that the center's basic purpose is to make available to students a wide range of educational resources. Because the general purpose of the NDEA centers' program is to assure the availability of instructional resources, the suggested award of Federal funds on the basis of criteria not directly related to the institution's instructional program would be inappropriate.

Comment. Several suggestions were made to eliminate § 146.14(b) because it was assumed that geographical location as a consideration for a grant award would result in awarding grants to centers having lower substantive qualifications.

Response. These suggestions have not been adopted. The legislative history is clear that Title VI was passed to address nationwide needs for instruction in modern foreign languages and related fields. These needs are not unique to any particular areas of the country. Consequently since the money available is limited, it is appropriate, in selecting grantees to take into account the proximity of a proposed center to any other

center focusing on the same world area or specialized field of study. To fail to do so could result in a duplication of available center programs and dilute the potential national impact of the program. As expressly indicated in the regulation provision, the subject criterion does not supplant considerations of program excellence; it is merely another factor to be taken into consideration.

6. 146.16 ALLOWABLE COSTS

Comment. Objection is raised to specific exclusion of research from allowable costs. Two alternative suggestions are made for inclusion of research:

1. Allot a certain percentage of center funding to language and area research to be administered by a committee at the center institution.

2. Broaden the scope of subpart E to include the type of basic research in African (and possibly other non-Western) studies without which effective instructional material cannot be prepared.

Response. These suggestions are not adopted.

1. There is a faculty research program under Fulbright-Hays.

2. Considerable support is now given to research in centers through salaries of faculty who normally do research, foreign travel of staff engaged in research and library acquisitions to further research.

3. NDEA center grants have been relatively immune from sensitivity in the foreign policy arena. This immunity could easily be lost if NDEA funds were used for even a limited amount of individual faculty overseas research on subjects that were sensitive in the foreign country.

4. Subpart E, concerning Section 602 Research, does not exclude support of the type of basic research which is prerequisite for the development of effective instructional materials for non-Western languages and areas.

7. 146.31 FELLOWSHIP AUTHORIZATION

Comment. One commenter stated that § 146.31(a) appears to mean that no quotas of Foreign Language and Area Studies fellowships will be allocated to an institution that has neither an international studies center nor a graduate or undergraduate international studies program receiving Federal financial assistance under the Act.

Response. Section 601(b) of Title VI of the National Defense Education Act authorizes the payment of stipends to individuals undergoing advanced training in any center or under any program receiving financial assistance under the title. While this provision is ambiguous, the ambiguity stems from whether the phrase, "receiving financial assistance under this title" qualifies centers as well as programs. We have been advised by the Office of General Counsel that the phrase, "receiving federal funds under this title" may be viewed as modifying only programs and this approach was adopted in these regulations. Thus, a student who does not enroll in either a center or a Title VI funded program is ineligible to receive a fellowship.

Comment. A commenter inquired whether graduate professional students would be eligible to receive a fellowship under the program.

Response. Graduate professional students are eligible and the regulation has been amended to clarify that point.

8. 146.33 CRITERIA FOR DETERMINATION OF INSTRUCTIONAL FELLOWSHIP QUOTAS

Comment. A commenter suggested that § 146.33(a)(1) should not exclude fellowship support for Swahili; that the inclusion of the broad term humanities among specific disciplines in § 146.33(a)(2) was ambiguous; and that professional education in engineering be included in § 146.33(g).

Response. The regulation was not changed. Swahili is not excluded. An institutional application for quotas of fellowships in African studies is evaluated on the basis of criteria found in the Office of Education General Provisions at 45 CFR 100a.26(b) and the appropriate criteria in § 146.33. Consequently, the language component of an African language and area studies program and/or center is only one factor, albeit an important one, in the determination whether an institution will receive a quota of fellowships in African studies. Moreover, it is not the intent of § 146.33(a)(1) to exclude Swahili but rather to indicate priorities in the support of African language training.

The specific priority disciplines encompassed by the term humanities are listed in § 146.33(a)(1) and were meant to apply to the other world areas, excluding Western European studies. Language clarifying this intent is incorporated in § 146.33(a)(2) through § 146.33(a)(7).

The language in § 146.33(g) does not exclude professional education in engineering provided the institutional application can demonstrate that its center or program offerings in engineering are consistent with the broad fellowship authorization, as stated in § 146.31.

9. 146.35 STUDENT ELIGIBILITY

Comment. A commenter suggested that if an institution cannot utilize all the fellowships that were assigned to a particular language these fellowships be returned to the Office of Education so that they can be used by another institution for the same area languages.

Response. This suggestion has not been adopted. The administrative procedures in the grant process make this suggestion impracticable. The implementation of this suggestion would require an amendment to the grants of two institutions each time an individual fellowship was concerned. Some grant funds could also be lost if the necessary amendments were required after the period for making amendments had expired.

10. 146.36 APPLICATION AND SELECTION OF FELLOWS

Comment. A commenter suggested that the wording "two years of college instruction" in § 146.36(b)(6) and "three years of college instruction" in § 146.36(b)(7) is ambiguous and should be replaced by a specified number of semester or credit hours.

Response. This suggestion is accepted and appropriate changes have been made in § 146.36(b)(6) and (7).

Comment. One commenter suggested that great care be taken to assure that the wording in § 146.36(b)(8) about "documented competency" does not eliminate highly qualified candidates in very rarely taught languages; e.g., Twi, Haitian, Creole, Nepali.

Response. The regulation was not changed. Documented competency does not eliminate the application of beginning students in rarely taught languages. It serves as an indicator of the level of proficiency of the applicant.

11. 146.37 DURATION, AMOUNT, AND PAYMENT OF FELLOWSHIPS

Comment. A commenter suggested that the exclusion of overseas doctoral dissertation research, as specified in § 146.37(a), was both ambiguous, in that it did not prevent a pre-dissertation stage student from working overseas while enrolled for university credit at home, and unfortunate, in that it would eliminate a student's chance to study language in the context of an overseas experience.

Response. The regulation was not changed. The Fellowship authorization and the raison d'etre for the allocation of fellowships among institutions is to enable students who are selected for awards to receive their education at a selected institution. Students are to benefit from the resources available at these institutions' centers and programs of excellence and not necessarily from the resources available overseas. This is not meant to imply that the study of language in the context of culture is not considered important. Section 143.37(c) enables students to do so in established advanced language programs overseas, set up by eligible institutions. What is suggested is that the purpose of this program is not to provide an overseas experience either at the pre-dissertation stage or at the dissertation stage but to provide training at U.S. institutions of higher education. The stipend is totally inadequate to enable a student overseas to conduct meaningful research for his dissertation since this was not the basic intention.

Comment. A commenter suggested that stipends remain unrealistically low, reflecting no adjustment for inflation that has occurred since the inception of the three-year incremental rate, and, more importantly, no meaningful change since the $2,250 stipends were established.

Response. Section 146.37(b) is amended to give each Fellow the cost of tuition and fees and a maintenance allowance in the amount of $2,925 per academic year. Concurrently, the dependency allowance of $500 for each dependent was discontinued. The increase in the stipend is expected to compensate adequately for the elimination of the separate dependency allowance in those grants in which a dependent was concerned. This change will also simplify the administration of the program.

Comment. One commenter suggested that Ph. D. degree in § 146.37(b)(3) be replaced by "approved doctoral program".

Response. Reference to the Ph. D. degree has been eliminated.

12. SUBPART D RESEARCH AND STUDIES

Section 302(d) of Pub. L. 94-482, The Education Amendments of 1976, amended section 602 to give the Commissioner grant authority. Accordingly, §§ 146.51 through 146.55 were modified where appropriate to take that change into account.

13. GUIDELINES, CHAPTER II, PART I-1.2 EDUCATIONAL OUTREACH ACTIVITIES

Comment. A commenter suggested that the Guidelines, Chapter II, Part I, § 1.2(b) be amended to permit reimbursement for travel for elementary and secondary school teachers participating in center-sponsored workshops.

Response. This suggestion has been adopted in part. The specific exclusion of participant travel from the list of activities for which Federal funds may be used has been deleted. Thus, participant travel will be subject to negotiation for each individual grant.

14. GENERAL COMMENT

Comment. A commenter suggests that the regulations include provisions for (1) rapid and easy access by the centers to their review committees' reports, and (2) establishing a meaningful grievance procedure for those applicants whose proposals are turned down.

Response. This suggestion is being adopted without making a change in the regulations. Modifications are being made in the procedures for notifying institutions that a proposal cannot be funded. This notification will include information on the evaluation of the proposal and the subsequent staff action.

Comment. A commenter suggested that the centers need assurances of committed funds by the January previous to the year in which they will be used. Perhaps "forward funding" is the only solution.

Response. No change in the wording of the regulations is being made as the result of this suggestion since "forward funding" is presently being used. Grants are made for the following academic year as early in the previous academic year as the appropriation and grant review processes allow.

Furthermore, the three year cycle minimizes this problem for the second and third year of the grant.

Comment. A commenter suggested that consideration be given to an institutional administrative supplement.

Response. No change is deemed desirable. It is the policy of the Foreign Language and Area Studies program to pay actual tuition and fees rather than fixed institutional allowances. To pay both cannot be justified in that it essentially means paying twice for the same service.

After consideration of all comments, the Commissioner hereby adopts the proposed regulation which was published in the FEDERAL REGISTER on August 12, 1976, with the changes noted above. This regulation is set forth below.

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular 107.

(Catalog of Federal Domestic Assistance Programs: 13.434 Foreign Language and Area Studies—Fellowships; 13.435 Foreign Language and Area Studies—Centers—International Studies Program; 13.436 Foreign Language and Area Studies—Research.)

Dated: April 7, 1977.

WILLIAM F. PIERCE,
Acting United States Commissioner of Education.

Approved: May 11, 1977.

JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare.

Part 146 is revised to read as follows:

Sec.

Subpart A—General Provisions

146.1 Scope and purpose.
146.2 Definitions.
146.3 General provisions regulations.

Subpart B—International Studies Centers

146.11 Scope.
146.12 Core instructional activities.
146.13 Educational outreach activities.
146.14 Criteria for selection of centers.
146.15 Applications.
146.16 Allowable costs.
146.17 Multiyear projects.

Subpart C—Graduate and Undergraduate International Studies Programs

146.21 Scope.
146.22 Graduate international studies programs: activities.
146.23 Undergraduate international studies programs: activities.
146.24 Criteria for selection of graduate and undergraduate international studies programs.
146.25 Applications.
146.26 Allowable costs.
146.27 Multiyear projects.

Subpart D—Foreign Language and Area Studies Fellowships

146.31 Fellowship authorization.
146.32 Allocation of fellowships among institutions.
146.33 Criteria for determination of institutional fellowship quotas.
146.34 Institutional applications.
146.35 Student eligibility.
146.36 Application and selection of fellows.
146.37 Duration, amount, and payment of fellowships.
146.38 Employment.
146.39 Oath and criminal information.
146.40 Student responsibilities.
146.41 Responsibilities of institutions receiving quotas of fellowships.

Subpart E—Research and Studies

146.51 Scope.
146.52 Eligible applicants.
146.53 Applications.
146.54 Research activities.
146.55 Criteria for selection of research projects.

AUTHORITY: Title VI, National Defense Education Act of 1958 as amended (20 U.S.C. 511-513).

Subpart A—General Provisions

§ 146.1 Scope and purpose.

It is the purpose of this part to provide Federal financial assistance to institutions of higher education (a) for the establishment and operation of centers for the teaching of modern foreign languages and such other related fields needed to provide a full understanding of the areas in which such languages are commonly used and international studies with other than a modern foreign language and area studies focus, (b) for the establishment and operation of programs at the undergraduate and graduate level in international studies and the international aspects of professional and other fields of study, (c) for the award of fellowships to individuals undergoing advanced training in any center, or under any program receiving Federal financial assistance under the Act, and (d) for research, including (1) the conduct of studies and surveys to determine the need for increased or improved instruction in modern foreign languages and other related fields; (2) research on more effective teaching methods; and (3) development of specialized materials for training in foreign languages or related fields.

(20 U.S.C. 511, 512)

§ 146.2 Definitions.

(a) "Act" means Title VI of the National Defense Education Act of 1958 as amended.

(20 U.S.C. 511-513)

(b) "Academic year" means a period of time, generally not less than 8 months, in which a full-time student would normally be expected to complete the equivalent of two semesters, two trimesters, or three quarters.

(c) "Center" means an officially designated academic unit of an institution of higher education (or a combination of institutions), with its own administrative structure, encompassing various academic disciplines, such as anthropology, art, business, economics, education, history, law, music, political science, geography, language and literature, and sociology through which a concentration of educational resources is made available for training in modern foreign languages, for instruction in related fields needed to provide a full understanding of the areas, regions, or countries in which such languages are commonly used, or for training and research in international studies and the international aspects of professional and other fields of study.

(20 U.S.C. 511-512)

(d) "Institution of higher education" means an institution of higher education as defined in section 103(b) of the National Defense Education Act of 1958.

(20 U.S.C. 403)

(20 U.S.C. 511-512 unless otherwise noted)

§ 146.3 General provisions regulations.

Assistance under this part is subject to the applicable provisions of Subchapter

A of this chapter relating to fiscal, administrative property management, and other matters (General Provisions for Office of Education Programs—45 CFR Part 100a).

(20 U.S.C. 511–512)

Subpart B—International Studies Centers

§ 146.11 Scope.

(a) The Commissioner is authorized to award grants to and contracts with institutions of higher education or consortia of such institutions to pay part of the costs of operating international studies centers. A center may be one of the following two types:

(1) One type of center will provide instruction primarily during the academic year on both the graduate level and the undergraduate level (unless undergraduate instruction is not offered at the institution) in modern foreign languages and area studies or in international studies with other than a modern foreign language and area studies focus.

(2) The other type of center will offer instruction during the academic year on the undergraduate level in modern foreign language and area studies or international studies with other than a modern foreign language and area focus. This undergraduate center shall provide training for students planning to continue their study at the graduate or professional level and shall also help to prepare students for direct entrance into a profession, such as education or business, in which specialized training in international studies plays a significant role.

(b) Centers may focus upon one world region and offer instruction in its principal languages and in related disciplines necessary to provide a full knowledge of that area or they may focus upon international or comparative multidisciplinary studies. The majority of the centers funded, either at the undergraduate, graduate, or combined graduate and undergraduate levels, will focus on single world areas. Such world areas include East Asia (including Japan, China, and Korea), South Asia (India, Sri Lanka, Bangladesh, Nepal, and Pakistan), the Middle East (including North Africa), the Soviet Union and Eastern Europe, Africa, Latin America, Southeast Asia (including Indonesia and the Philippines as well as Vietnam, Cambodia, Laos, Thailand, Malaysia, and Burma), contemporary Western Europe, Canada, and Inner Asia. Of the total number of centers assisted, it is anticipated that not more than 20 percent will be undergraduate centers and not more than 20 percent will be centers with other than a primary focus on foreign language and area studies, such as comparative area studies or international affairs.

(c) Center activities shall be carried out primarily within the United States and principally on the campus (or campuses) of the institution(s) involved.

(20 U.S.C. 511(a))

§ 146.12 Core instructional activities.

(a) Centers offering instruction in modern foreign language and area studies must concentrate on one world region (such as East Asia or Africa) and offer instruction in two or more of that region's principal languages. They must also offer instruction in other fields which are needed to provide a full understanding of the areas, regions, or countries in which the languages are commonly used.

(b) Centers offering instruction in international studies with other than a single area studies focus may offer instruction in international relations (such as diplomacy, law, economics, and politics), in comparative approaches to topics of transnational concern (such as food and hunger, international trade and business, energy and environment), or on studies with an interregional focus. This type of center must also provide multidisciplinary instruction and must assure that foreign language training is available.

(c) All centers must include in their core offerings both interdisciplinary approaches to the world area or topic of the center and a wide range of disciplines, such as anthropology, economics, fine arts, geography, history, language and literature, music, philosophy and religion, political science, and sociology, which may be needed for improved understanding of that world area or topic. Centers shall also incorporate in their core instructional offerings, where relevant, professional training in such fields as education, business, journalism, architecture and urban planning, law, public administration, library science, and the health professions, if such training is available at their institutions. Linkages with such professional training programs may be accomplished in a variety of ways, such as cross-listing of courses and cross-registration, offering of courses on the area or topic of the center's focus in the professional school, preparation of special center courses designed for students in professional training, and formulation of joint degree programs.

(20 U.S.C. 511(a))

§ 146.13 Educational outreach activities.

(a) In addition to the instruction described in § 146.12, centers must provide two or more of the services listed in paragraph (b) of this section (educational outreach activities) to agencies, organizations, and individuals interested in the resources of the center but not a part of the institution(s) operating the center. However, at least one of the services shall be a service listed in paragraphs (b) (1) or (2) of this section.

(b) Educational outreach activities include—

(1) Assistance, such as sharing of library resources, faculty workshops, and cross-registration of students, to other institutions of higher education, particularly those with teacher education programs and two-year colleges;

(2) Assistance, such as in-service teacher training, bibliographic assistance, textbook evaluation, curriculum development, and direct instructional services, to state and local elementary and secondary educational agencies and schools;

(3) Assistance, such as workshops and special courses, to the business community; and

(4) Sharing of resources, such as general lectures, films, and book and art exhibits, with the community at large.

(c) Centers shall expend an amount for outreach activities which represents at least 15 percent of the grant funds awarded under the subpart.

(20 U.S.C. 511(a))

§ 146.14 Criteria for selection of centers.

(a) In addition to evaluation on the basis of criteria found in the Office of Education General Provisions 45 CFR 100a.26(b), the Commissioner will further evaluate applications for Federal support to operate international studies centers in accordance with the following criteria:

(1) The quality of the institution's existing instruction for the world area or topic for which Federal assistance is requested, as evidenced by existing course offerings, faculty qualifications, and the nature and extent of relevant library holdings;

(2) The extent to which the proposed instructional activities of the center will strengthen existing international studies of the institution both in range and in depth;

(3) The extent to which cooperative arrangements have been worked out with other departments, schools, and special and professional programs of the grantee institution and the extent to which the center includes appropriate multi-and inter-disciplinary instruction;

(4) The reasonableness of the allocation of Federal funds among center activities;

(5) The amount and percentage of financial support to be provided to the center by the institution during the grant period. Such support may be measured in terms of the number of tenured faculty in the center, the percent of their time spent on the center's program and the extent to which the core program is built into the regular budget of the institution, including the estimated support for the second and third years of the proposed project;

(6) The regular coursework, language training, courses in area or international studies, and provisions for overseas experience which will be provided students participating in center programs;

(7) The nature and extent of assistance to be provided by the center for educational outreach activities; and

(8) The extent to which provision is made by the institution for overseas experience for faculty and students, and for cooperation with foreign scholars, institutions, and governments.

(b) The Commissioner will weigh each criterion listed in paragraph (a) of this section, including those listed in § 100a.26(b), equally in evaluating an application. An applicant may receive as much as five points or as low as zero points under each criterion.

(c) In order to help achieve a reasonable geographic distribution of Title VI international studies centers throughout

the United States the Commissioner will, consistent with desired program excellence, take into account the proximity of any proposed center to any other center focusing on the same world area or specialized field of study in awarding grants under this program.

(20 U.S.C. 511(a))

§ 146.15 Applications.

(a) Applicants for funds under this subpart shall file an application with the Commissioner before the closing date for such applications established annually by the Commissioner. Such applications shall describe the activities to be undertaken and shall contain sufficient information to enable the Commissioner to evaluate the application on the basis of the criteria established in § 146.14.

(b) Applications from a consortium of institutions of higher education shall designate one of the member institutions as the grantee institution.

(20 U.S.C. 511(a))

§ 146.16 Allowable costs.

(a) Funds awarded under this subpart may be used to pay for those costs reasonably related to the operation of a center.

(b) Funds awarded under this subpart may not be used for financial assistance for students or for center research.

(20 U.S.C. 511(a))

§ 146.17 Multiyear projects.

(a) The Commissioner may require that institutions applying for assistance under this subpart project their goals and activities over a three-year period. Multiyear approval is intended to offer projects a reasonable degree of stability over time and to facilitate additional long range planning.

(b) Approval of multiyear projects shall not commit the Federal government to provide financial assistance from appropriations not currently available and the funding of these projects after the initial year of support is subject to annual evidence of satisfactory performance and the availability of funds.

(20 U.S.C. 511(a)).

Subpart C—Graduate and Undergraduate International Studies Programs

§ 146.21 Scope.

The Commissioner is authorized to award grants to and contracts with institutions of higher education or consortia of such institutions to pay part of the costs of establishing and operating graduate and undergraduate international studies programs. Such programs will focus on the development of international components in course offerings and new methods for teaching international studies.

(20 U.S.C. 511(a))

§ 146.22 Graduate international studies programs: activities.

(a) The Commissioner may award grants to and contracts with institutions of higher education conferring postbaccalaureate degrees or to consortia of such institutions to assist in the initiation and development of (1) international components for existing problem- or topic-oriented courses of study or (2) instruction on a problem or topic of contemporary concern to an existing international studies program. The resulting program must provide instruction related to more than one of the world regions listed in § 146.11(b) and shall provide course offerings of a comparative or interdisciplinary nature that will strengthen linkages among disciplines and among various international studies programs and professional schools. Such programs will bring an interdisciplinary and comparative focus to problems, issues, or topics of mutual concern among nations.

(b) Institutions must make foreign language training available to students enrolled in programs developed under this subpart.

(c) In order to receive funds, the institution must assure that the activities initiated under this subpart will be continued after Federal support has been terminated.

(d) Program activities must be carried out within the United States and principally on the campus (or campuses) of the institution(s) involved. Program activities may take place throughout the calendar year during both the summer and the academic year; however, such activities may not be carried out exclusively in the summer.

(20 U.S.C. 511(a))

§ 146.23 Undergraduate international studies programs: activities.

(a) The Commissioner may award grants to and contracts with institutions of higher education or to consortia of such institutions, to assist them in providing an effective international perspective to the undergraduate general education program, particularly in the first two years of postsecondary study. Such programs shall provide instruction in more than one of the world areas listed in § 146.11(b).

(b) Institutions shall make foreign language training available to students enrolled in programs developed under this subpart.

(c) In order to receive funds, the institution must assure that the activities initiated under this subpart will be continued after Federal support has been terminated.

(d) Program activities must be carried out within the United States and principally on the campus (or campuses) of the institution(s) involved. Program activities may take place throughout the calendar year during both the summer and the academic year; however, such activities may not be carried out exclusively in the summer.

(20 U.S.C. 511(a))

§ 146.24 Criteria for selection of graduate and undergraduate international studies programs.

(a) In addition to evaluation on the basis of criteria found in the Office of Education General Provisions at 45 CFR 100a.26(b), the Commissioner will further evaluate applications for Federal support for graduate and undergraduate international studies programs in accordance with the following criteria:

(1) The international nature, contemporary relevance, and interdisciplinary and comparative dimensions of the program;

(2) The extent to which provision is made for evaluation of the effect of the program on those receiving training;

(3) The institution's capability to provide foreign language study;

(4) The commitment of the institution to the establishment and operation of the program as evidenced by maximum use of available resources (including institutional financial support);

(5) The reasonableness of the allocation of Federal funds among program activities; and

(6) The extent to which a clearly improved educational experience will be available at the institution for students within two years and the caliber of program that will be continued after Federal support is withdrawn.

(b) The Commissioner will weigh each criterion listed in paragraph (a) of this section, including those listed in § 100a.26(b), equally in evaluating an application. An applicant may receive as much as five points or as low as zero points under each criterion.

(20 U.S.C. 511(a))

§ 146.25 Applications.

(a) Applicants for funds under this subpart shall file an application with the Commissioner before the closing date for such applications established annually by the Commissioner. Such applications shall describe the activities to be undertaken and shall contain sufficient information to enable the Commissioner to evaluate the application on the basis of the criteria established in § 146.24.

(b) Applications from a consortium of institutions of higher education shall designate one of the member institutions as the grantee institution.

(20 U.S.C. 511(a))

§ 146.26 Allowable costs.

(a) Funds awarded under this subpart may be used to pay for those costs reasonably related to the operation of a program.

(b) Funds awarded under this subpart may not be used to pay for financial assistance for students or for program research and dissemination activities.

(20 U.S.C. 511(a))

§ 146.27 Multiyear projects.

(a) The Commissioner may require that institutions applying for assistance under this subpart project their goals and activities over a two year period except that a consortium of institutions may be required to project their goals and activities over a three year period. Multiyear approval is intended to offer projects a reasonable degree of stability over time and to facilitate additional long range planning.

(b) The Commissioner anticipates that grants and contracts of up to $45,000 per year may be awarded under this subpart. Approval of projects for more than one year does not commit the Federal government to provide financial assistance from appropriations not currently available and the funding of these projects after the initial year of support is subject to annual evidence of satisfactory performance and the availability of funds.

(20 U.S.C. 511(a)).

Subpart D—Foreign Language and Area Studies Fellowships

§ 146.31 Fellowship authorization.

(a) Foreign language and area studies fellowships may be awarded through eligible institutions of higher education to graduate students, including graduate students seeking professional degrees, who are undergoing advanced training in modern foreign languages, in related area studies or in international studies at any center as defined in § 146.2 (c), or in any program funded under Subpart C of this part, if such students provide reasonable assurance that they will, upon completion of their training, be available for teaching service in an institution of higher education, an elementary or secondary school, or for such other service of a public nature as defined in § 146.35(b).

(b) For purposes of this subpart an "eligible institution" means an institution of higher education operating a center or conducting a program authorized under Subpart C of this part.

(20 U.S.C. 511(b)).

§ 146.32 Allocation of fellowships among institutions.

In order to insure that the students who are selected to receive fellowships under this subpart shall receive training in programs and centers of the highest quality, the Commissioner requests applications from eligible institutions for quotas of fellowships. Such applications are reviewed on the basis of the criteria set forth in § 146.33 and quotas of fellowships will be allocated to institutions whose applications are selected in accordance with such criteria.

(20 U.S.C. 511(b)).

§ 146.33 Criteria for determination of institutional fellowship quotas.

In addition to evaluation on the basis of criteria found in the Office of Education General Provisions at 45 CFR 100a.26(b), the Commissioner will evaluate applications for quotas of foreign language and area studies fellowships from institutions of higher education in accordance with the following criteria:

(a) (1) The extent to which an institution which is applying for a quota of fellowships in African studies includes as part of its language and area studies program such disciplines as economics, history, humanities (art, drama, music, philosophy, religion), sociology, and languages other than Swahili;

(2) The extent to which an institution which is applying for a quota of fellowships in East Asian studies includes as part of its language and area studies program such disciplines as anthropology, economics, geography, sociology, and humanities (art, drama, music, philosophy, religion);

(3) The extent to which an institution which is applying for a quota of fellowships in East European Studies includes as a part of its language and area studies program such disciplines as anthropology, geography, humanities (art, drama, music, philosophy, religion); sociology, and languages other than Russian;

(4) The extent to which an institution which is applying for a quota of fellowships in Latin American studies includes as part of its language and area studies program such disciplines as humanities (art, drama, music, philosophy, religion); sociology, Portuguese, and Amerindian languages;

(5) The extent to which an institution which is applying for a quota of fellowships in Middle Eastern studies includes as part of its language and area studies program such disciplines as anthropology, economics, geography, humanities (art, drama, music, philosophy, religion); political science, sociology, and languages other than Hebrew;

(6) The extent to which an institution which is applying for a quota of fellowships in South Asian studies includes as part of its language and area studies program such disciplines as anthropology, humanities (art, drama, music, philosophy, religion), linguistics, literature, sociology, and geography;

(7) The extent to which an institution which is applying for a quota of fellowships in Southeast Asian studies includes as part of its language and area studies program such disciplines as economics, history, humanities (art, drama, music, philosophy, religion), linguistics, literature, and sociology; and

(8) The extent to which an institution which is applying for a quota of fellowships in Western European studies includes as part of its language and area studies program such disciplines as anthropology, economics, geography, philosophy and religion, political economy, sociology, and languages other than French, German, Italian, or Spanish;

(b) The quality of the institution's existing foreign language and area studies program for the area for which a quota of fellowships is being requested as evidenced by course offerings, faculty, and library holdings;

(c) The degree to which the center or the program of the institution has provided for intra-institutional cooperation with other foreign language and area programs and the nature and extent of coordination with the institution's professional schools and other special university programs;

(d) The degree of institutional commitment to the development of its foreign language and area studies program or center as evidenced by faculty appointments, university scholarships and teaching assistantships, funding of library acquisitions, and continuing support from the institution's general funds;

(e) The degree requirements of the institution's foreign language and area studies center or program and whether proficiency in one or more foreign languages is required;

(f) The extent to which the institution's foreign language and area studies center or program provides extracurricular activities which enhance the student's foreign language proficiency and knowledge of the world area he is studying; and

(g) The extent to which the institution's center or program includes in its offerings professional training such as business, law, journalism or education, and the quality of such offerings.

(h) The Commissioner will weigh each criterion listed in paragraph (a) of this section, including those listed in § 100a.26(b), equally in evaluation an application. An applicant may receive as much as five points or as low as zero points under each criterion.

(i) Lowest priority will be given to applications for fellowships from centers or programs focusing on France, Germany, Italy, and Spain.

(20 U.S.C. 511(b)).

§ 146.34 Institutional applications.

Applicants for quotas of fellowships under this subpart shall file an application with the Commissioner before the closing date for such applications established annually by the Commissioner. Such applications shall contain sufficient information to enable the Commissioner to evaluate the applications on the basis of the criteria in § 146.33.

(20 U.S.C. 511(b)).

§ 146.35 Student eligibility.

(a) *General.* To be eligible to receive a fellowship under this subpart a person shall:

(1) Be a citizen or national of the United States or in the United States for other than a temporary purpose with the intent to become a permanent resident thereof;

(2) Provide reasonable assurance that on completion of training he will (i) be available for teaching in an institution of higher education or in an elementary or secondary school or (ii) be available for other service of a public nature, as defined in paragraph (b) of this section;

(3) Subscribe to the oath and supply the information required in § 146.39;

(4) Have earned a baccalaureate or comparable degree before the fellowship begins;

(5) Be accepted for graduate level training in foreign languages and appropriately related area studies in a center or program with a quota of fellowships;

(6) Agree to pursue full-time study in accordance with his university's requirement during the entire award period, except as provided in § 146.38.

(b) *Other service of a public nature.* "Other service of a public nature" means employment with Federal, State or local governments, international organizations in which the United States participates, or nonprofit, nonsectarian organizations the activities of which contribute significantly to the conduct of United States foreign relations, or such other employment that will contribute to the Nation's cultural, educational, or scientific understanding of other countries.

(20 U.S.C. 511(b)).

§ 146.36 Application and selection of fellows.

(a) (1) *Application.* Applications for fellowships under this subpart shall be submitted to an institution which has received a quota of fellowships and shall be submitted to that institution before the closing date for such applications established by that institution. Such applications shall contain sufficient information to enable the applicant to be evaluated in accordance with the selection criteria set forth in paragraph (b) of this section, but shall in any event include the applicant's general academic record, career goal, educational background, language background and self evaluation of language competence, employment history, and proposed study program.

(2) In addition to the requirements set forth in paragraph (a) (1) of this section, if an individual applies for a fellowship with the intent of using that fellowship to support Ph.D. dissertation research in the United States, he shall also provide a brief description of his project, including

(i) The title of the project and signature of his graduate advisor;

(ii) The project statement of purpose;

(iii) A description of the precise topic to be investigated;

(iv) A description of methods by which research goals are to be attained;

(v) A statement as to the use of the relevant foreign language as a major research tool; and

(vi) A description of proposed travel within the United States considered to be research-related.

(b) *Selection.* The Commissioner shall select fellows and alternates from nominees submitted by institutions receiving quotas of fellowships for particular world areas. The Commissioner shall select, and the institutions shall nominate, fellows and alternates on the basis of the following criteria:

(1) A high level of academic ability as evidenced by such indices as grade point average, class ranking, or such other measures as the institutions may choose to use;

(2) Whether the applicant will major in an area of the world listed in § 146.33 (a);

(3) Whether the applicant's study program includes those disciplines listed in § 146.33(a) for the language and area to be studied;

(4) The extent to which the applicant's study plan includes appropriate foreign language training through formal study;

(5) For a fellowship in Japanese or Chinese, the extent to which at least 6 semester hours (9 quarter hours) or their equivalent in either of those languages has been successfully completed or equivalent proficiency in either language has been achieved;

(6) For a fellowship in Russian, the extent to which at least 12 semester hours (18 quarter hours) or their equivalent in that language have been successfully completed or equivalent proficiency in that language has been achieved;

(7) For a fellowship in Latin American Spanish, the extent to which at least 18 semester hours (27 quarter hours) or their equivalent in that language have been successfully completed or equivalent proficiency in that language has been achieved; and

(8) For a fellowship in any of the other languages, the extent to which documented competency in the language for which the fellowship is sought has been acquired.

(9) Lowest priority shall be given to a nominee who does not intend to pursue foreign language training or who is a native speaker of the language for which an award is sought.

(20 U.S.C. 511(b))

§ 146.37 Duration, amount, and payment of fellowships.

(a) *Duration.* Fellowships under this subpart will be awarded for one academic year and may not be revoked without the approval of the Commissioner nor may they be postponed to an academic year subsequent to that specified in the award. No applicant may receive more than a cumulative total of 48 months fellowship support (including the time period of the grant applied for) under Title VI of the National Defense Education Act and section 102(b)(6) of the Mutual Educational and Cultural Exchange Act (Pub. L. 87-256—Fulbright-Hays Act). Of the 48 months maximum, support for dissertation research is limited to either (1) 12 months overseas under Fulbright-Hays and 9 months in the United States under Title VI for dissertation completion or (2) a maximum of 18 months in the United States for dissertation research.

(b) *Amount.* Each individual selected by the Commissioner for a fellowship will receive the cost of tuition and fees, and a maintenance allowance in the amount of $2,925.00 per academic year.

(c) If a fellow is enrolled in an established advanced language program overseas, set up by an American institution of higher education and approved by the Commissioner for purposes of this subpart, tuition charges shall reflect the tuition costs of the overseas program only; if required by university policy, a nominal fee for in absentia registration at the home institution may be included in the award.

(d) Payments shall be made in installments to cover a specific period of the academic year, and shall be paid as long as the fellow is enrolled and in good standing. In the event of overpayment or underpayment of award benefits, the student must notify his institution so that appropriate allowance adjustments can be made; however, all award increases are subject to the availability of funds. Overpayments may not be retained by the student.

(20 U.S.C. 511(b)).

§ 146.38 Employment.

A fellow may accept limited employment during the fellowship period, preferably in a job related to his field of study, provided that such employment does not prolong the time normally required to complete the fellow's course of study.

(20 U.S.C. 511(b)).

§ 146.39 Oath and criminal information.

(a) In conformity with 1001(f) of the National Defense Education Act, no funds under a fellowship or stipend may be paid to any individual unless such individual has subscribed to an oath or affirmation in the following form:

I do solemnly swear (or affirm) that I will bear true faith and allegiance to the United States of America and will support and defend the Constitution and laws of the United States against all its enemies, foreign and domestic.

(b) No fellowship stipend shall be awarded to any individual unless such individual has provided the Commissioner with a full statement regarding any crimes of which he has ever been convicted (other than crimes committed before attaining 16 years of age and minor traffic violations for which a fine of $25 or less was imposed) and regarding any criminal charges punishable by confinement of 30 days or more which may be pending against him at the time of his application for such stipend.

(20 U.S.C. 581(f)).

§ 146.40 Student responsibilities.

(a) The student shall submit to the Commissioner through the grantee institution, a report after each award period giving a full account of his accomplishments under the award and his future study or employment plans. No fellowship funds shall be released to a student who has not met the reporting requirements of a previous award.

(b) The student is responsible for informing the institution of any change in his study program, or academic status.

(20 U.S.C. 511(b)).

§ 146.41 Responsibilities of institutions receiving quotas of fellowships.

(a) Each institution of higher education receiving a quota of fellowships shall:

(1) Publicize its quota(s) of fellowships and its foreign language and area studies programs;

(2) Set a deadline for fellowship applications;

(3) Screen applications and recommend nominees;

(4) Notify applicants that, subject to final approval by the Commissioner, they have been recommended as a fellow or alternate;

(5) Issue to each approved fellow, after the term begins, the amount of funds to cover benefits under this subpart to which the fellow is entitled; and

(6) Notify the Commissioner of any change in the study program, or academic status of a fellow.

(b) If a fellowship is vacated during the academic year, the institution must obtain approval from the Commissioner prior to making a fellowship substitution from the alternates listed in the official grant agreement.

(20 U.S.C. 511(b))

Subpart E—Research and Studies

§ 146.51 Scope.

Under this subpart, the Commissioner is authorized to award grants and contracts for studies and surveys to determine the need for increased or improved instruction in modern foreign languages and other fields needed to provide a full understanding of the areas, regions, or countries in which such languages are commonly used, to conduct research on more effective methods of teaching such languages and such fields, and to develop specialized materials for use in training students and teachers.

(20 U.S.C. 512)

§ 146.52 Eligible applicants.

Public and private agencies, organizations and institutions as well as individuals are eligible to receive grants and contracts under this subpart.

(20 U.S.C, 512)

§ 146.53 Applications.

(a) Applicants for support under this subpart shall file an application with the Commissioner before the closing date established annually by the Commissioner. Such applications shall describe the activities to be undertaken and shall contain sufficient information to enable the Commissioner to evaluate the applications on the basis of the criteria established in § 146.55.

(b) Requests for information shall be sent to the Division of International Education, Bureau of Postsecondary Education, Office of Education, Washington, D.C. 20202.

(20 U.S.C. 512)

§ 146.54 Research activities.

Activities conducted under this subpart may include:

(a) Studies and surveys, including conferences, to assess the state of the art of foreign language and international studies instruction in the United States, to determine new emphases needed, to identify priority needs for specialized materials, and to define and analyze national trends through, for example, surveys of enrollments, degree requirements, and newly developing types of training programs;

(b) Research in teaching methodology (1) which applies linguistic theories and concepts of modern language pedagogy to projects that can thereby be expected to increase the understanding of second language acquisition and to improve language teaching, and (2) which applies modern teaching approaches to international studies;

(c) The preparation of specialized instructional materials, particularly for modern foreign languages which are not widely taught in the United States and for which there is only a limited commercial market; and for international studies concerned with the non-Western world.

(20 U.S.C. 512)

§ 146.55 Criteria for selection of research projects.

In addition to evaluation on the basis of criteria found in the Office of Education General Provisions at 45 CFR 100a.-26(b), the Commissioner will evaluate applications in accordance with the following criteria:

(a) For research, studies, and surveys the criteria are—

(1) The extent to which the proposed activity may be expected to develop new knowledge significant to the purpose of section 602 of the Act.

(2) The extent to which problems, questions, or hypotheses to be dealt with are well formulated, and reflect adequate knowledge of other related research;

(3) The specificity of the statement of procedures to be followed, including sampling techniques, controls, data to be gathered, and statistical and other analyses to be done; and

(4) The adequacy of the proposed teaching, testing, and research methodology.

(b) For the development of instructional materials, the criteria are—

(1) The extent to which the proposed work may contribute significantly to strengthening international studies programs of educational institutions;

(2) The extent to which all existing related materials are cited or accounted for, including a critical commentary on their adequacy, in the justification of the proposal.

(3) The degree of specificity concerning the final form of the projected instructional materials.

(4) The degree to which the proposed contents and final form of the materials reflect an empirical knowledge of the organization for instruction and academic practices of those American institutions in which they will ultimately be used; and

(5) The extent to which provision has been made for pretesting the materials in the classroom and for revision before publication.

(c) The Commissioner will evaluate each criterion listed in paragraphs (a) and (b) of this section, including those listed in § 100a.26(b), equally. An applicant may receive as much as five points or as low as zero points under each criterion.

(20 U.S.C. 512)

APPENDIX—GUIDELINES

National Defense Education Act of 1958 as amended, Title VI Sections 601–603
Grants to Institutions of Higher Education for International Studies
Centers and Programs and Foreign Language and Area Studies Fellowships; Contracts and Grants for Research and Studies

2.2 Research in teaching methodology
2.3 Preparation of specialized instructional materials

CHAPTER I—INTRODUCTION

PART 1—GUIDELINES

§ 1.1 Scope of guidelines.

(a) The guidelines contained in this document are recommendations and suggestions for meeting the legal requirements which apply to assistance under the National Defense Education Act, Title VI, Section 601–603. The legal requirements include the Act itself (20 U.S.C. 511–513) and the regulations (45 CFR 146). The guidelines are not to be construed as requirements. However, where the guidelines set forth a permissible means of meeting a legal requirement, the guidelines may be relied upon.

(20 U.S.C. 1441; 113 Congl Rec. 5936, 5939 (daily ed. May 23, 1967)); *United States* v. *Jefferson County Board of Education*, 372 F. 2d 836, 857 (1966))

(b) Where a guideline is issued in connection with or affecting a provision in the regulations, the pertinent regulation will be cited after the citation of legal authority for the guideline, in the parentheses following the guideline. For example, if the legal authority for the guideline is Section 601(a) of the Act (20 U.S.C. 511(a)), and the guideline affects Section 146.12(d) of the regulation (45 CFR 146.12(d)), the following citation will be placed on the line immediately following the guideline: (20 U.S.C. 511(a); 45 CFR 146.12 (d)). If no particular section of the regulation is affected, no citation to the Code of Federal Regulations (CFR) will be made.

(20 U.S.C. 1232(a))

CHAPTER II—INTERNATIONAL STUDIES CENTERS

PART 1—PROGRAM OUTLINE

§ 1.1 Core instructional activities.

(a) The core instructional offerings of a center should encompass a variety of disciplines and options for professional training at the various degree levels. While center proposals for Federal funding may include summer intensive language programs, symposia, or workshops (inservice teacher training programs, for example), the major effort of a center should be focused on instruction during the regular academic year.

(20 U.S.C. 511(a); 45 CFR 146.12)

(b) Federal funds may be used to assist a wide variety of the center's instructional program: faculty salaries (including teaching assistants and language informants), administrative salaries, library staff salaries, teaching materials (including library acquisitions), and faculty travel. Federal funds may also be used to develop further resources for the center: faculty development, revision of existing courses, development of new courses or seminars, hiring of new personnel, summer intensive langauge programs, and forging of new linkages with professional schools and other programs at the institution.

(20 U.S.C. 511(a); 45 CFR 146.16)

§ 1.2 Educational outreach activities.

(a) The educational outreach activities of a center may take a variety of forms, as appropriate to the center's purposes and resources and to needs and interests of such interested parties as other institutions of higher education, elementary and secondary educational agencies, business, and the community at large. Information about examples of outreach activities which have been undertaken by centers is available from the International Studies Branch, Division of International Education, Bureau of Postsecondary Education, Office of Education, Washington, D.C. 20202. However, no list of past or present examples should be considered complete; centers are encouraged to be imaginative and to create appropriate categories of activities here as well as in their core instructional offerings. Many outreach activities may be part of the institution's normal program; nonetheless, where justified, they should be included in any application for Federal support if they are an integral part of the center's activities. Applicants should keep in mind that one of the criteria used in evaluating applications for centers is the extent to which the applicant is carrying out or will carry out such activities.

(20 U.S.C. 511(a); 45 CFR 146.13)

(b) Federal funds for outreach activities may be used for teaching and administrative salaries, faculty travel (for example, in organizing a workshop for teachers at any level of education), honoraria for visiting lectures, dissemination of information about center activities and resources, and collection of materials for loan or rental to other educational agencies. Further, with regard to such educational outreach activities, in view of the limited Federal funds available for all international studies needs, the use of such funds for meals or lodging of persons attending special workshops is discouraged.

(20 U.S.C. 511(a); 45 CFR 146.16)

CHAPTER III—GRADUATE AND UNDERGRADUATE INTERNATIONAL STUDIES PROGRAMS

PART 1—PROGRAM OUTLINE

§ 1.1 Graduate international studies programs.

(a) Graduate international studies programs should focus on issues or problems of both contemporary and future importance involving more than one geographic region of the world, one of which could be North America.

(b) Examples of subjects on which graduate programs may be based are:

(1) International trade and business;
(2) Comparative environmental studies;
(3) The Atlantic Community; and
(4) Population growth and planning.

(c) While proposed programs for Federal funding may include summer symposia or workshops, the main efforts of the program should be focused on instruction during the regular academic year.

(d) Federal funds may be used to permit the recipient institution to develop or rework curricula, orient faculty, purchase library books and periodicals, or perhaps accelerate plans for the hiring of new people to round out existing staff resources.

(e) Proposed programs which have a mixed graduate/undergraduate character will be considered and should be submitted in the graduate category.

(f) Programs usually have a very limited administrative structure and are generally not officially designated academic units (such as centers).

(20 U.S.C. 511(a); 45 CFR 146.22, 146.24, and 146.26)

§ 1.2 Undergraduate international studies programs.

(a) Proposals for undergraduate international studies programs may focus on any of several approaches for strengthening the international dimensions of the general education portion of the instructional program at eligible institutions. Examples of some approaches are listed below, but are not intended to be all-inclusive, nor are these approaches in any way mutually exclusible:

(1) A broad, integrated approach to the contemporary world. Through this kind of approach, international dimensions might be introduced in an interdisciplinary, or multidisciplinary settings.

(2) The comparative approach to foreign area studies and world problems. Proposals may provide for development of programs which would move curricula from concern solely with American and Western European models to a context in which other cultures would be seriously studied also. Topical studies drawing on different disciplines and examining in different societies such phenomena as urbanization, man and his environment, violence and conflict resolution, and social change and economic development may provide further possibilities for developing a comparative perspective.

(3) The development of a broader view of the world through the arts, music, and drama. A program which focuses on the arts should be concerned as well with the larger cultural context.

(4) Transnational concerns, involving a wide range of topics and issues which transcend the boundaries of nation states. Such common super-state problems as environment, disease, food supply, conflict resolution, and social change may be useful ways to introduce international studies to the undergraduate curriculum.

(5) Intercultural communication. Two categories of special relevance for American education are (i) improvements in foreign language instruction and (ii) intercultural communication broadly speaking—interaction and development of mutual understanding, or "cultures speaking to cultures." A program with special attention to language instruction might encourage fresh approaches to the learning of both language itself and language as a "window" on foreign cultures(s), developing students' understanding of systems of verbal and non-verbal communication. Cross-cultural or inter-cultural training strives to develop in an individual an awareness of the impact of one's own culture and the culture of others on one's own attitudes, habits, behavior and perception in interaction with others, to increase appreciation of other cultures, and to enhance ability to affect behavior in interaction with persons of other cultures.

(b) While proposed programs for Federal funding may include summer symposia or workshops, the main efforts of the program should be focused on instruction during the regular academic year.

(c) Federal funds may be used to permit the recipient institution to develop or rework curricula, orient faculty, purchase library books and periodicals, or perhaps accelerate plans for the hiring of new people to round out existing staff resources.

(d) Programs usually have a very limited administrative structure and are generally not officially designated academic units (such as centers).

(20 U.S.C. 511(a); 45 CFR 146.23, 146.24, and 146.26)

CHAPTER IV—GUIDELINES FOR FOREIGN LANGUAGE AND AREA STUDIES FELLOWSHIPS

PART 1—ADMINISTRATIVE PROVISIONS

§ 1.1 Formation of committees.

(a) It is recommended that the initial step for an institution which intends to apply for allocations of fellowships for one or more language and area study center or program should be the appointment by the university administration of a committee responsible to the graduate dean (1) for the preparation of proposals and (2) for the nomination of candidates at institutions receiving an allocation of fellowships.

(b) It is suggested that the chairman of this committee be the dean of the graduate school or his designee and that the other members of the committee be faculty members in the departments and professional schools which participate in the language and area studies center or program.

§ 1.2 Responsibilities of the committee and the committee chairman.

(a) The committee should be responsible for reviewing applications and recommending candidates for fellowships.

(b) The committee chairman should be responsible for:

(1) Forwarding the forms, cards, and instructions to nominees;

(2) Advising applicants (including any who might be temporarily located abroad) of the importance of prompt mailing of all required forms;

(3) Instructing applicants to complete and return to him all forms;

(4) Forwarding to the Office of Education forms completed by the nominees. The committee chairman should retain for the institution's files one copy of the Biographical Data form containing personal background, language background, and educational information on the student.

(5) Forwarding to the Commissioner any requests for supplements;

(6) Completing, signing, and forwarding to the Commissioner (i) the List of Nominees/Alternates which contains the names of recommended fellowship candidates by language and world area; (ii) Institutional Summary of Fellowships which contains the number of nominees by world area; (iii) the List of Awardees and Benefits which contains the names of the actual fellowship holders and the total cost of benefits to be paid to them.

(20 U.S.C. 511(b)); 45 CFR 146.23–25 and 146.28).

§ 1.3 *Declination of award by principal candidate.*

(a) If a fellow declines an award before the beginning of the fall term, the committee may select from its list of approved alternates an eligible alternate to fill the vacancy thus created. The committee chairman should promptly request approval of the Commissioner, giving the name of the candidate who declined the award, the reason (if possible) for his declination, the name of the alternate selected to fill the vacancy, and the estimated cost of the award to the alternate.

(20 U.S.C. 511(b); 45 CFR 146.35).

§ 1.4 *Vacated fellowships.*

(a) If a student vacates a fellowship in the course of the academic year, the institution should seek approval of the Commissioner if it desires to use the balance of the fellowship for an approved alternate, beginning with the term following the one in which the original holder of the fellowship relinquished it.

(20 U.S.C. 511(b); 45 CFR 146.35).

§ 1.5 *Reallocating awards.*

(a) If more than one language and area studies center or program within an institution receives a quota of awards, the appropriate official of the institution may, with prior approval of the Commissioner, reallocate awards among these centers or programs in order to meet priorities set forth in 45 CFR 146.35 and changing program and student needs.

(20 U.S.C. 511(b); 45 CFR 146.35).

CHAPTER V—GUIDELINES FOR RESEARCH

PART 1—APPLICATIONS

§ 1.1 *Application procedures.*

(a) For the information of applicants, proposals and applications under this subpart should conform to the information requirements set forth in HEW procurement regulations (41 CFR 3-4.5202-1(b)).

(b) Additional information about proposals and applications is available from the Division of International Education. It is advisable to provide a brief project outline for preliminary discussion before submitting a formal application.

(20 U.S.C. 512; 45 CFR 146.53 and 41 CFR 3-4.5202(b))

PART 2—RESEARCH ACTIVITIES

§ 2.1 *Studies and surveys.*

Federal funds may be used to assist projects designed to assess the state of the art of foreign language, area, and other international studies in the United States, determine new emphases, identify needs and priorities for specialized materials, and define and analyze national trends, for example, through surveys of enrollments, degree requirements, or newly developing types of training programs. Assistance is available to support conferences only if the conference is primarily concerned with activities authorized by Title VI of the Act. Assistance to professional organizations to hold annual or periodic conventions which serve primarily organizational aims and which have been taking place without Federal Support thus far, cannot be justified.

(20 U.S.C. 512; 45 CFR 146.55)

§ 2.2 *Research in teaching methodology.*

(a) For foreign languages: Studies may be assisted for investigation of certain aspects of the processes of second-language acquisition, which can be expected to increase an understanding of such processess and thereby contribute to the development of more effective teaching approaches; and for experimental projects for applying modern concepts of foreign language teaching pedagogy and for testing their effectiveness in controlled situations. With the growing significance of foreign language competence as an integral part of education in fields other than language teaching, such as international economics, industry, law, tourism, and trade, projects exploring appropriate approaches to language training specifically for the professions will also be considered.

(b) For international studies: Studies and experimental projects may be assisted for development of more effective methods of teaching about foreign areas, intercultural communication, and other aspects of international education. Methodologies which might be explored, for example, could include interdisciplinary or team teaching, or other innovative curriculum approaches to international studies.

(20 U.S.C. 512; 45 CFR 146.55)

§ 2.3 *Preparation of specialized instructional materials.*

(a) For languages which are not widely taught in the United States and which are of little or no interest for commercial publication: Decisions about Federal assistance will be guided by the recommendations on priority needs resulting from national conferences (such as the Conference on the Uncommonly-taught Languages held in Columbia, Maryland, from September 29 to October 2, 1974; the report from this conference, *Material Development Needs in the Uncommonly-taught Language: Priorities for the Seventies*, is available from the Center for Applied Linguistics, 1611 North Kent Street, Arlington, Virginia 22209) and conferences of language specialists representing a geographic or linguistic world area. National languages, languages of major regional or cultural significance, and other languages for which instruction is not widely available in the United States will be given priority. North American Indian languages, Hawaiian, Somoan, Micronesian, and languages native to the United States and its territories, are not considered foreign languages in this context. Since research is supported only in modern foreign languages, languages nearing extinction, although of linguistic interest, will not be considered. Materials for the study of English as a foreign language do not fall within the purview of NDEA Title VI. French, German, Italian, and Spanish are considered commonly-taught languages requiring no Federal assistance for general materials development.

(b) For international studies, primarily concerned with the non-Western world: General reference works, specialized research tools, or basic materials in a given field of study or world area are assigned a higher priority than studies focusing on specific periods, phenomena, and personalities.

(20 U.S.C. 512; 45 CFR 146.55)

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[FCC 77-319]

PART 19—EMPLOYEE RESPONSIBILITIES AND CONDUCT

Improvement of the Commission's Overall Financial Disclosure System

AGENCY: Federal Communications Commission.

ACTION: Corrected Order.

SUMMARY: This is an Order adopting an amendment of the criteria of position categories, and requiring incumbents to file statements of employment and financial interests. The action, taken with the agreement of the U.S. Civil Service Commission, increases the number of employees who must file such statements. The amendment was adopted pursuant to the Commission's policy of strengthening the standards of ethical conduct, and improving its overall financial disclosure system.

EFFECTIVE DATE: May 26, 1977.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Fred J. Goldsmith, Office of Executive Director (202-632-7143).

SUPPLEMENTARY INFORMATION:

Adopted: February 10, 1977.

Released: May 18, 1977.

Order. In the matter of amendment of Part 19 to improve the Commission's overall financial disclosure system.

1. These amendments to Part 19 of the Commission's Rules and Regulations are made pursuant to the Commission's policy of strengthening the standards of ethical conduct, and improving the Commission's overall financial disclosure system.

2. Because the amendment involves internal Commission personnel and management matters exclusively, compliance with the prior notice and effective date requirements of 5 U.S.C. 553 is unnecessary.

3. *Accordingly, it is ordered,* Effective May 26, 1977, pursuant to the authority contained in sections 4(i), 303(r) and 5(b) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 155(b), and 303(r), that § 19.735-403 of Part 19 of the FCC rules is hereby deleted, and the following inserted in lieu thereof:

§ 19.735-403 Employees required to submit statements.

Except as provided in § 19.735-404, statements of employment and financial interests shall be required from the following employees of the Commission:

(a) Employees who are Administrative Law Judges.

(b) Employees who are Members of the Review Board.

(c) All other employees who are in Grade GS-13 or above.

(d) Employees who are in Grade GS-11 or above and who are Heads or Supervisors or Assistant Heads or Supervisors of field offices.

(e) All purchasing agents.

(f) All employees serving as auditors or accountants, with the principal duty of auditing private enterprises.

(g) All employees, professional, administrative, and clerical, in the offices of the Commissioners.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; (47 U.S.C. 154, 155, 303).)

FEDERAL COMMUNICATIONS COMMISSION,[1]
VINCENT J. MULLINS,
Secretary.

[FR Doc.77-14539 Filed 5-20-77;8:45 am]

[1] Commissioner Lee absent.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Extension of time for filing briefs.

SUMMARY: This notice extends the date for filing briefs on the hearing held April 5-8, 1977, at Irving, Texas, concerning a proposed base-excess plan in 11 Southwest markets. Interested parties requested the additional time to complete their analysis of the record.

DATE: Briefs now are due on or before June 1, 1977.

ADDRESS: Briefs (six copies) should be filed with the Hearing Clerk, Room 1077 South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT:

Robert F. Groene, Marketing Specialist, Dairy Division, Agricutural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202-447-4824).

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notices of Hearing: Issued February 11, 1977, published February 14, 1977 (42 FR 9674); issued March 3, 1977, published March 8, 1977 (42 FR 13024); and issued March 25, 1977, published March 31, 1977 (42 FR 17130).

Notice is hereby given that the time for filing briefs, proposed findings, and conclusions on the record of the public hearing held April 5-8, 1977, at Irving, Texas, with respect to proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the aforesaid specified marketing areas pursuant to the above listed notices is hereby extended to June 1, 1977.

This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

Signed at Washington, D.C. on May 18, 1977.

IRVING W. THOMAS,
Acting Administrator.

[Airspace Docket No. 77-EA-28]

PROPOSED ALTERATION OF CONTROL ZONE & TRANSITION

Aberdeen, Md.

Correction

In FR Doc. 77-13515, appearing at page 24067, in the issue for Thursday, May 12, 1977, make the following corrections:

1. In the fourth full paragraph, of the second column, on page 24067, reverse the quotation marks after the word insert.

2. In the sixth line of the fifth paragraph, in the same column and page, change the initials "OR", to read "VOR".

[14 CFR Part 71]

[Airspace Docket No. 77-SW-17]

TRANSITION AREA

Proposed Alteration

AGENCY: Federal Aviation Administration (FAA), (DOT).

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the Killeen, Texas, transition area to provide controlled airspace for aircraft utilizing the newly installed STARN RBN in the execution of an instrument approach procedure to Gray AAF.

DATES: Comments must be received by June 16, 1977.

ADDRESSES: Send comments on the proposal to: Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101.

The official docket may be examined at the following location: Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101.

An informal docket may be examined at the Office of the Chief, Airspace and Procedures Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

John A. Jarrell, Airspace and Procedures Branch (ASW-535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101; telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION: In Subpart G, § 71.181 (42 FR 440) of FAR Part 71, the description of the Killeen, Texas, transition area reflects the controlled airspace needed to conduct instrument approach procedures at Gray Army Air Field. The STARN Radio Beacon (RBN) has now been installed on the localizer course of the ILS to runway 15 at the Army Air Field where it serves a dual purpose of providing the compass locator at the ILS outer marker and an NDB approach capability to the runway. Alteration of the transition area is now required to provide controlled airspace for aircraft executing an ILS or NDB instrument approach to runway 15.

COMMENTS INVITED

Interested persons may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101. All communications received by June 16, 1977, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be change in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

DRAFTING INFORMATION

The principal authors of this document are John A. Jarrell, Air Traffic Division, and Robert L. Nelson, Office of the Regional Counsel, Southwest Region.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, or by calling 817-624-4911, extension 302. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should contact the office listed below.

THE PROPOSAL

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations as hereinafter set forth.

§ 71.181 [Amended]

In Subpart G, § 71.181 (42 FR 440), the Killeen, Texas, transition area is amended to read, in part, by deleting:

Within 3.5 miles each side of the 341° bearing from Gray RBN (Latitude 31°07'18" N., Longitude 97°51'02" W.) extending from the 7-mile radius area to 11.5 miles north of the RBN;" and substituting therefor: "within 3.5 miles each side of the 329°M, 337°T, bearing from STARN RBN (Latitude 31°10'03" N., Longitude 97°52'41" W.) extending from the 7-mile radius area to 11.5 miles north of the RBN.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Fort Worth, Texas, on April 29, 1977.

HENRY L. NEWMAN,
Director, Southwest Region.

[FR Doc.77-14473 Filed 5-20-77;8:45 am]

DEPARTMENT OF THE INTERIOR

Geological Survey

[30 CFR Part 211]

COAL MINING OPERATING REGULATIONS

Proposed Adoption of Cooperative Agreement With Colorado: Comment Period Scheduled

AGENCY: Geological Survey, Interior.

ACTION: Proposed rule, comment period scheduled.

SUMMARY: This document proposes to adopt a Cooperative Agreement between the Department of the Interior, and the State of Colorado that will govern the procedures that will be used to administer and enforce surface mining reclamation standards in Colorado. Presently, both Colorado and the Department perform overlapping and duplicative functions which impose unnecessary costs on both the respective governments, and the regulated industry. The Agreement eliminates this duplication and overlap wherever possible.

DATES: Comments must be received by June 6, 1977.

ADDRESSES: Comment Address: Director, Geological Survey, National Center, Reston, Virginia 22092.

FOR FURTHER INFORMATION CONTACT:

Robert Uram, Office of the Solicitor, U.S. Department of the Interior, Washington, D.C. 20240, Telephone No. 202-343-4803.

SUPPPLEMENTAL INFORMATION: On May 17, 1976, the Department of the Interior adopted new regulations to govern the management of federally owned coal resources. 41 FR 20252 (1976). Those regulations authorize the Department to enter into cooperative agreements with states in which Federal coal leases have been or will be issued for the purpose of avoiding duality in the administration and enforcement of surface coal mine reclamation operations. 30 CFR 211.75 (b).

The Secretary and the Governor of Colorado have completed the negotiation of a Cooperative Agreement under this authority. The Agreement provides that the State of Colorado will be principally responsible for the administration and enforcement of surface coal mine reclamation operations on Federal coal leases in Colorado.

The Department of the Interior surface mining regulations require a Federal coal lessee to conduct mining operations in a manner that ensures the effective reclamation of mined lands.

An operator must, in particular, meet all the performance standards in 30 CFR 211.40 (1976). The Department's regulations require this degree of protection to be maintained, and the Department cannot enter into a Cooperative Agreement which compromises the degree of environmental protection established under Federal laws and regulations. The proposed Cooperative Agreement maintains this degree of environmental protection.

The State of Colorado's reclamation regulations do not contain mandatory requirements that afford general protection of environmental quality and values at least as stringent as would occur under the exclusive application of Federal law. However, the State of Colorado has the authority to administer its reclamation laws in a manner that provides the same degree of environmental protection as required by Federal law. The proposed Cooperative Agreement commits the State of Colorado to this degree of environmental protection on Federal coal leases and requires the State of Colorado to ensure that "all mining plans approved under this Agreement shall afford general protection of the environment at least as stringent as would occur under the exclusive application of 30 CFR 211." The proposed Agreement also requires that the procedures of the State are as effective as the procedures of the Department of the Interior to enforce the requirements of the mining plan. If the State of Colorado is unable to meet these assurances, the Department has the duty, under the proposed Agreement, to notify Colorado that it intends to cancel the Agreement. The Department of the Interior will require reports from the State of Colorado and will conduct inspections to determine whether the State of Colorado is complying with the assurances of the Agreement.

Article III, paragraph H of the Cooperative Agreement requires the State of Colorado to devote adequate funds to administer and enforce reclamation requirements on Federal coal leases in the State. It is the understanding of both the Secretary of the Interior and the Governor of Colorado that the Department of the Interior will provide funds to the State of Colorado under a separate procurement contract on a cost-of-service basis. The Department intends to reimburse the State of Colorado for services, such as certain types of inspections, that the State will be performing for the Federal Government. The language of Article III shall be construed in a manner consistent with this understanding.

In the regulations promulgated on May 17, 1976, the Department also established a procedure by which the Department could adopt the substantive, on-the-ground standards of a State's reclamation law as the Federal standards for operations on Federal coal leases in the State, as long as the State's requirements afforded "general protection of environmental quality and values at least as stringent as would occur under exclusive application of (the Federal standards)." 30 CFR 211.75(a). In an advance notice of proposed rulemaking, the Department explained what steps it would take to determine whether it would adopt the requirements of a State's reclamation law. 41 FR 27993 (1976). This rulemaking takes no action under this section, and does not affect the requirement of 30 CFR 211.40, or the standards the Department of the Interior will use to approve a mining plan.

Four elements are central to a Cooperative Agreement for the administration and enforcement of surface coal mine reclamation standards: mine plans; inspections; enforcement provisions; and bonding requirements. The Department has reviewed Colorado's law, and believes that the State of Colorado is capable of administering and enforcing reclamation operation on Federal coal leases in Colorado in such a way that Federal interests are protected.

Although the proposed Agreement grants the State the principal authority for administering and enforcing reclamation operations, we note the following. First, the Federal Coal Leasing Amendments Act of 1975, Pub. L. 94-377, requires the Secretary to approve the mining plan of a Federal lessee. Article IV, section C states the Secretary's duty to review and approve mining plans independently from State review and approval. The Agreement does avoid the application of conflicting standards by allowing the submission of one mining plan to the State and the Department.

Second, the Department retains its authority to establish the amount of the performance bond to be imposed. Article VII, section A avoids the imposition of double bonds by providing that the Department's bond requirement, if higher than the State's will only be for the amount of the difference between the two amounts.

The proposal contains chiefly the text of the Cooperative Agreement, but it also contains proposed technical changes in 30 CFR 211.10, 211.74, and 211.77 to conform those rules to the fact that the Cooperative Agreement, if adopted, will contain the requirements of a Federal lessee's mining plan in Colorado.

This proposed rulemaking does not explicitly amend 43 CFR Subpart 3041, but the Department wishes to state that the enforcement and administration provisions of that Subpart will be administered consistently with the changes in 30 CFR Part 211 proposed here.

COMMENT PERIOD

Final Cooperative Agreements have also been signed with Wyoming (effective February 1, 1977) and New Mexico, Utah, and North Dakota (all effective May 1, 1977). In these rulemaking proceedings, the Department set a 30-day comment period. The Department has concluded that it is both unnecessary and contrary to the public interest to have a 30-day comment period on this proposal. A shorter comment period is allowed.

This rulemaking proceeding is extremely similar to the one previously completely for Wyoming, Utah, New Mexico, and North Dakota. The public has had the opportunity to comment on the concept of this type of Cooperative Agreement in those proceedings, in addition to the opportunity to comment on 30 CFR 211.75(b) prior to its adoption last May. The previous agreements failed to generate significant comments. This Agreement does not significantly deviate from those prior actions. A full 30-day comment period is unnecessary, because the public has had repeated opportunities to comment on this type of proposal.

In addition, the 30-day comment period is contrary to the public interest because it may extend this rulemaking proceeding past the date of enactment of new federal surface mining legislation. The Department has supported the enactment of strong surface mining legislation, and in particular has offered amendments to that legislation to ensure that Federal-State cooperation in regulating reclamation of Federal lands would be encouraged. On April 29, 1977, the House passed H.R. 2, its version of the surface mining legislation. Senate consideration of similar legislation is also well-advanced, and final legislation could be passed soon. It is important to complete this rulemaking before the legislation is enacted so that Colorado's regulatory program will be able to receive the full benefits of the new legislation. Section 523 of H.R. 2, for example, recognizes the validity of Cooperative Agreements (with appropriate modifications) to regulate coal surface mining on Federal lands "existing on the date of enactment of this Act." H.R. 2 permits these Agreements to remain in effect prior to approval of a state program under the bill. In the absence of a Cooperative Agreement, H.R. 2 would temporarily displace Colorado from regulating Federal lands after the Department adopted a Federal lands program, and prior to the approval of a state program. Since Colorado has an excellent program, the public interest would be enhanced if this temporary displacement could be prevented. Although neither the date of enactment, nor the particular provisions of surface mining legislation is certain, it is possible a bill containing provisions similar to section 523 in H.R. 2 will be enacted in the near future. Consequently, a shortened comment period is needed to help ensure that this rulemaking can be completed before the legislation has been enacted. Comments are requested by June 6, 1977.

The environmental impacts of this proposed action are discussed in the final Environmental Impact Statement, Surface Management of Coal Resources (43 CFR Subpart 3041) and Coal Mining Operating Regulations (30 CFR Part 211) (1976). NEPA does not require, and the Department has not prepared, a separate impact statement for this action.

Dated: May 18, 1977.

CECIL D. ANDRUS,
Secretary.

1. Accordingly, the Department proposes to amend 30 CFR § 211.10 by adding a new paragraph (e) (6) to read as follows:

§ 211.10 Exploration and mining plans.

. . . . . .

(e) *States with § 211.75(b) agreements.* . . .

(6) *Colorado.* A Federal coal lessee in the State of Colorado who must submit a mining plan or permit under both State and Federal law shall submit in lieu of the mining plan required in this section, a mining plan containing the information required by:

(i) 34-32-112, C.R.S. (1973);

(ii) Colorado Mined Land Reclamation Board Rules and Regulations, Rule 2, section 2.1 (referred to as "Board Rule");

(iii) 30 CFR 211.10(c); and

(iv) A statement certifying that a copy of the plan has been given to the State of Colorado and the Secretary.

2. The Department proposes to amend 30 CFR 211.74 by adding a new paragraph (g) (6) to read as follows:

§ 211.74 Variances.

. . . . . .

(g) *States with § 211.75(b) agreements.* . . .

(6) *Colorado.* A Federal coal lessee in the State of Colorado shall request and receive variances from the State of Colorado and the Secretary under the provisions of 30 CFR 211.74,

3. The Department proposes to amend 30 CFR 211.77 by adding a new paragraph (f) to read as follows:

§ 211.77 States with cooperative agreements.

. . . . . .

(f) *Colorado.* The administration and enforcement of reclamation requirements on federal coal leases in Colorado subject to this part shall be done according to the Cooperative Agreement between the State of Colorado and the Department of the Interior. The Cooperative Agreement is published at (date and page of publication of final rule, if adopted, to be inserted), and is available at appropriate offices of the Department of the Interior.

4. The State of Colorado and the Department of the Interior propose to enter into a Cooperative Agreement to designate the State of Colorado as the principal party to administer surface coal mine reclamation operations on Federal coal leases in Colorado to read as follows:

Cooperative agreement between the United States Department of the Interior and the State of Colorado. Under Section 32 of the Mineral Leasing Act of 1920, 30 U.S.C. Section 189, and Section 307 of the Federal Land Policy and Management Act of 1976, and 30 CFR 211.75(b).

This agreement (referred to as the Cooperative Agreement) is made between the State of Colorado acting by and through Governor Richard D. Lamm (referred to as the Governor) and the United States Department of the Interior, acting by and through the Secretary of the Interior (referred to as the Secretary).

ARTICLE I

PURPOSE

This Cooperative Agreement provides for a cooperative program between the United States Department of the Interior and the State of Colorado with respect to the administration and enforcement of coal surface mine reclamation requirements under coal leases issued by the Department of the Interior under the Mineral Leasing Act of 1920. The basic purpose of the agreement is to prevent duality of administration and enforcement of surface reclamation requirements by designating the State of Colorado to the extent possible, as the principal entity to enforce reclamation laws and regulations on Federal coal leases in Colorado.

ARTICLE II

EFFECTIVE DATE

The Cooperative Agreement is effective on the ____ day of _____, 19____, and remains in effect until terminated as provided in Article IX.

ARTICLE III

REQUIREMENTS FOR COOPERATIVE AGREEMENT

The Governor affirms that the State of Colorado will comply with all of the provisions of this Cooperative Agreement and will continue to meet all the conditions and requirements specified in this Article upon which the approval of the Secretary is based.

A. *Responsible Administrative Agency.* The Colorado Department of Natural Resources

and the Colorado Mined Land Reclamation Board (referred to as the State Agency) are, and shall continue to be, the agencies responsible for administering this Cooperative Agreement on behalf of the Governor on Federal coal leases throughout the State.

B. *Authority of State Agency.* The State Agency designated in Paragraph A of this Article has, and shall continue to have, authority to carry out this Cooperative Agreement.

C. *State Reclamation Law.* The State Agency shall ensure that all mining plans approved under this agreement shall afford general protection of the environment at least as stringent as would occur under the exclusive application of 30 CFR part 211, and that the standards used to approve a mining plan of a Federal lessee will not unreasonably impair coal mining that is in the overriding national interest.

D. *Effectiveness of State Procedures.* The existing procedures of the State of Colorado shall be, in the judgment of the Secretary, substantially as effective for the purpose of enforcing the reclamaiton requirements of 30 CFR part 211 as the procedures of the Department of the Interior.

E. *Inspection of Mines.* The Governor affirms that the State Agency will inspect all mines on Federal coal leases located in the State, in accordance with the minimum schedule in Article V.

F. *Enforcement.* The Governor affirms that the State Agency will enforce the Agreement in a manner that ensures effective environmental protection.

G. *Qualified Personnel.* The State Agencies will have an adequate number of fully qualified personnel necessary for the enforcement of this Cooperative Agreement.

H. *Funds.* The State Agency will, subject to appropriations from the Colorado General Assembly, devote adequate funds for the administration and enforcement of reclamation requirements on Federal coal leases in the State.

I. *Reports and Records.* The State Agencies shall make reports to the Secretary, containing information about its compliance with the terms of this Cooperative Agreement, as the Secretary shall from time to time require. The State Agencies shall also make available to the Secretary, upon request, information developed under this Cooperative Agreement.

The Secretary affirms that the Department of the Interior will comply with all of the provisions of this Cooperative Agreement.

Article IV

MINE PLANS

Federal regulations, 30 CFR 211.10(c), and State laws and regulations require that the operator of lands leased, permitted or licensed for coal mining receive approval of a mining plan or permit prior to conducting operations.

A. *Contents of Mining Plans and Permits.* The State Agencies and the Secretary agree that a Federal coal lessee must submit a mining plan or permit application under both State and Federal law, which plan or permit must include, at a minimum, the following information: 1. The information required by:

(a) 34-32-112, C.R.S. (1973);

(b) Colorado Mined Land Reclamation Board Rules and Regulations, Rule 2, Section 2.1 (referred to as "Board Rule"); and

(c) 30 CFR 211.10(c).

2. A Statement certifying that a copy of the mining plan or permit application has been given to both the State Agency and the Secretary.

If either the State Agency or the Secretary requires the operator to submit additional information the operator shall submit the information to both the State Agency and the Secretary. The operator will request variances from the mining plan in accordance with 30 C.F.R. § 211.74, and shall file the request with the State Agency and the Secretary.

B. *Review of Plan.* The State Agency and the Secretary shall each review and analyze the adequacy of the plan, permit, or request for an amendment or a variance from the plan or permit.

C. *Approval of Mining Plans.* The State Agency shall review the adequacy of the mining plan or permit or any request for a variance from a plan as provided in 34-32-108 and 34-32-112. The State Agency shall notify the Secretary of its action pursuant to such provisions. The Secretary shall then independently review and take action on the mining plan or permit as required by 30 C.F.R. 211.10(d), or request for a variance as required by 30 C.F.R. 211.74, or a change to an approved mining plan or permit which was acted upon by the State Agency. The Secretary shall notify the State Agency of his action and the State Agency shall reconsider the action if necessary to comply with this Cooperative Agreement.

Article V

INSPECTIONS

A. The State Agency shall inspect as authorized by 34-32-121, C.R.S. (1973), and Board Rule 8, Section 8.1, as frequently as necessary but at least quarterly the operations area of all Federal Coal leases, permits and licenses where operations affecting the reclamation of mined lands are conducted or are to be conducted, for the purpose of determining whether the operator is complying with all applicable laws, regulations and orders and all requirements of approved mining plans that affect the reclamation of mined lands. The State Agency shall also perform all inspections required under 30 CFR 211.41. Such inspections performed in accordance with 30 CFR 211.41 shall be considered in meeting the quarterly inspection requirement.

B. The State Agency will, subsequent to conducting any inspection, file with the Secretary a report on (1) the general conditions of the lands under coal lease, permit or license, (2) the manner in which the operations are being conducted and (3) whether the operator is complying with applicable reclamation requirements. A copy of this report shall be furnished to the operator on request, and shall be made available for public inspection during normal business hours at the offices of the Federal Mining Supervisor.

C. For the purpose of evaluating the manner in which the Cooperative Agreement is being carried out and to ensure that reclamation is being effectively performed, the Secretary may inspect from time to time mines on Federal coal leases within the State. Inspections by the Secretary may be made in association with the regular inspection by the State Agency.

D. The Secretary may conduct inspections on Federal coal leases to determine whether the operator is complying with requirements that are unrelated to reclamation.

Article VI

ENFORCEMENT

A. If the State Agency determines that the operator is not complying with a requirement that relates to the reclamation of lands disturbed by surface mining, it shall take such steps as required by 34-32-124, C.R.S. (1973), and Board Rule 8, Section 8.2.

B. If, in the judgment of the State Agency, an operator is conducting activities on lands subject to this Agreement which fail to comply with a requirement that relates to reclamation and those activities threaten immediate and serious damage to the environment, the State Agency shall take immediate action, as authorized by 34-32-124 (2), C.R.S. (1973).

C. The State Agency shall notify the Secretary of all violations of applicable laws regarding reclamation on Federal coal leases including violations of Federal laws and regulations or lease terms and of all actions taken under 34-32-124, and Board Rule 8, Section 8.2.

D. This section does not limit the Secretary's authority to seek cancellation of a Federal coal lease under Federal laws and regulations, or prevent the Secretary from taking appropriate steps to correct actions that violate Federal law, but not State law, or from taking appropriate measures to remedy violations of a mining plan or other appropriate requirements.

E. Failure to adequately enforce the reclamation laws and regulations shall be grounds for termination of this Cooperative Agreement.

Article VII

SURETY OR BONDS

A. *Amount and Responsibility.* The State Agency may require Federal coal lessees subject to the provisions of 30 CFR Part 211 to submit surety as provided in 34-32-117, C.R.S. (1973). The Secretary shall reduce the Federal bond required for reclamation purposes under 43 CFR 3041.3 and 30 CFR 211.3, by the amount of the surety required by the State Agency only if the release of all or any portion of the State Agency's surety is conditioned on compliance with the requirements of the approved plan, and the amount released is appropriate to the work completed. Where the surface of the lands is not owned by the United States, the State Agency shall notify the surface owner and solicit and take into account his comments before recommending release of the surety.

B. *Notification.* Prior to releasing the surety provided for in 34-32-117, C.R.S. (1973), for lands the surface on which is owned by the Federal Government, the State Agency shall consult with and seek the advice and consent of the Secretary.

C. *Release of Surety.* The State Agency shall hold the operator responsible and liable for successful reclamation as required by 34-32-117, 34-32-118, C.R.S. (1973).

Article VIII

OPPORTUNITY TO COMPLY WITH COOPERATIVE AGREEMENT

The Secretary may, at his sole discretion, and without instituting or commencing proceedings for withdrawal of approval of the Cooperative Agreement, notify the State Agency that it has failed to comply with the provisions of the Cooperative Agreement. The Secretary shall specify how the State Agency has failed to comply and shall state the period of time within which the defects in administration shall be remedied and satisfactory evidence presented to him that the State Agency has remedied the defects in administration and is in compliance with and has met the requirements of the Secretary. The time period specified shall not be less than 30 days. Upon failure of the State Agency to meet the requirements of the Secretary within the time specified, the Secretary may institute proceedings for withdrawal of approval of the Cooperative Agreement as set forth in Article IX.

Article IX

TERMINATION OF COOPERATIVE AGREEMENT

The Cooperative Agreement may be terminated as follows:

A. *Termination by the State.* The Cooperative Agreement may be terminated by the Governor upon written notice to the Secretary, specifying the date upon which the Cooperative Agreement shall be terminated, but which date of termination shall not be less than 60 days from the date of the notice.

B. *Termination by the Secretary.* The Cooperative Agreement may be terminated by the Secretary whenever the Secretary finds, after giving due notice to the State Agency and affording the State Agency an opportunity for a hearing:

1. That the State Agency has failed to comply substantially with any provision of the Cooperative Agreement; or

2. That the State Agency has failed to comply with any assurance given by the State Agency upon which the Cooperative Agreement is based, or any condition or requirement which is specified in Article III; or

3. That action unrelated to surface coal mine reclamation will unreasonably and substantially prevent the mining of federal coal.

C. *Termination by Operation of Law.* This Cooperative Agreement shall terminate by operation of law when no longer authorized by Federal laws and regulations or Colorado laws and regulations.

D. *Notice or Proposed Termination.* Whenever the Secretary proposes to terminate the Cooperative Agreement he shall:

1. Give written notice to the Governor and to the State Agency;

2. Specify and set out in the written notice the grounds upon which he proposes to terminate the Cooperative Agreement;

3. Specify the date upon which and the place where the State Agency will be afforded an opportunity for hearing and to show cause why the Cooperative Agreement should not be terminated by the Secretary. The date upon which such hearing shall be held shall not be less than 30 days from the date of such notice, and the place of hearing shall be in the State.

4. The Secretary shall also publish a notice in the Federal Register containing the items in 1-3 of this paragraph.

5. Within 30 days of the date of the written notice specifying the date of the hearing, the State Agency may file a written notice with the Secretary stating whether or not it will appear and participate in the hearing. The notice shall specify the issues and grounds specified by the Secretary for termination which the State Agency will oppose or contest and a statement of its reasons and grounds for opposing or contesting. Failure to file a written notice in the Office of the Secretary within 30 days shall constitute a waiver of the opportunity for hearing, but the State Agency may present or submit before the time fixed for the hearing written arguments and reasons why the Cooperative Agreement should not be terminated, and within the discretion of the Secretary may be permitted to appear and confer in person and present oral or written statements, and other documents relative to the proposed termination.

E. *Conduct of Hearing.* The hearing will be conducted by the Secretary. A record shall be made of the hearing and the Governor shall be entitled to obtain a copy of the transcript. The Governor shall be entitled to have legal and technical and other representatives present at the hearing or conference, and may present, either orally or in writing, evidence, information, testimony, document, records, and materials as may be relevant and material to the issues involved.

F. *Notice of Withdrawal of Approval of Cooperative Agreement.* After a hearing has been held, or the right to a hearing has been waived or forfeited by the State Agency, the Secretary, after consideration of the evidence, information, testimony, and arguments presented to him shall advise the Governor of his decision. If the Secretary determines to withdraw approval of the Cooperative Agreement, he shall notify the State Agency of the intended withdrawal and shall afford the State Agency an opportunity to present evidence satisfactory to the Secretary that the State Agency has remedied the specified defects in its administration of the Cooperative Agreement. The Secretary shall state the period of time within which the defects in administration shall be remedied and satisfactory evidence presented to him, and upon failure of the State Agency to do so within the time stated, the Secretary may thereupon withdraw his approval of the Cooperative Agreement without any further opportunity afforded to the State Agency for a hearing.

Article X

REINSTATEMENT OF COOPERATIVE AGREEMENT

The Cooperative Agreement which has been terminated may be reinstated upon application by the Governor and upon giving evidence satisfactory to the Secretary that the State Agency can and will comply with all the provisions of the Cooperative Agreement and has remedied all defects in administration for which the Cooperative Agreement was terminated.

Article XI

AMENDMENTS OF COOPERATIVE AGREEMENT

This Cooperative Agreement may be amended by mutual agreement of the Governor and the Secretary. And amendment proposed by one party shall be submitted to the other with a statement of the reasons for such proposed amendment. The party to whom the proposed amendment is submitted shall signify its acceptance or rejection of the proposed amendment, and if rejected shall state the reasons for rejection. Upon acceptance by the Governor and the Secretary, the amendment shall be adopted after Federal rulemaking.

Article XII

CHANGES IN STATE OR FEDERAL STANDARDS

The Secretary of the Interior or the State of Colorado may from time to time revise and promulgate new or revised reclamation requirements or enforcement and administration procedures. The Secretary and the State Agency shall immediately inform the other of any final changes in their respective laws or regulations. Each party shall, if it determines it to be necessary to keep this Cooperative Agreement in force, change or revise its respective laws or regulations. For changes which may be accomplished by rulemaking, each party shall have six months in which to make such changes. For changes which require legislative authorization, each party has until the close of its next legislative session at which such legislation can be considered in which to make the changes. If such changes are not made, then the termination provision of Article IX may be invoked.

Article XIII

QUALIFICATIONS AND EXPERIENCE OF PERSONNEL

The State Agency shall be adequately staffed with, or have readily available to it an adequate number of qualified personnel to carry out fully the requirements of the Cooperative Agreement. The personnel of the State Agency shall be so qualified that the end result of their efforts is comparable to that which would have resulted from administration by Department of the Interior personnel.

Article XIV

CONFLICT OF INTEREST

No employee of the State Agency responsible for the administration of the State law and rules and regulations relating to this Cooperative Agreement shall participate in the review, analysis, administration, decision-making, or enforcement actions relating to any operation subject to this Cooperative Agreement if such person has, directly or indirectly, any financial interest in a company, partnership, organization, or corporation (parent or subsidiary) which owns, operates, or has a financial interest in such operation subject to this Cooperative Agreement.

Article XV

EQUIPMENT AND LABORATORIES

The State Agency shall have equipment, laboratories, and facilities with which all inspections, investigations, studies, tests, and analyses which are necessary to carry out the requirements of the Cooperative Agreement can be performed or determined or have access to such facilities.

Article XVI

EXCHANGE OF INFORMATION

A. *Organizational and Functional Statement.* The Governor and the Secretary shall advise each other of the organization, structure, functions, and duties of the offices, departments, divisions, and persons within their organizations. Each shall advise promptly the other in writing of changes in personnel, officials, heads of departments or divisions, or a change in the function or duties of persons occupying the principal offices within the organization. The State Agency and the Secretary shall advise each other in writing the location of its various offices, addresses, telephone numbers, and the names, location, telephone numbers of their respective mine inspectors and the area within the State for which such inspectors are responsible, and shall advise promptly of any changes in such.

B. *Laws, Rules and Regulations.* The Governor and the Secretary shall provide to each other copies of their respective laws, rules, regulations and standards, pertaining to the enforcement and administration of this Cooperative Agreement and promptly furnish copies of any final revision of such laws, rules, regulations, and standards when the revision becomes effective.

Article XVII

RESERVATION OF RIGHTS

This Cooperative Agreement shall not be construed as waiving or preventing the assertion of any rights the State of Colorado and the Secretary may have under the Mineral Leasing Act, the Constitution of the United States, or the Constitution or laws of the State of Colorado.

RICHARD D. LAMM,
Governor, State of Colorado.

MAY 12, 1977.

CECIL D. ANDRUS,
Secretary,
Department of the Interior.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 60]

[FRL 718–7]

STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Proposed Revision of Reference Method 11

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) proposes a revision to Reference Method 11, the method for determining the hydrogen sulfide content of fuel gas streams. EPA has found that interferences resulting from the presence of mercaptans in some petroleum refinery fuel gases can lead to erroneous results when using the current method. This proposed revision would eliminate the problem of mercaptan interferences and insure the accuracy of test methods.

DATES: Comments must be received on or before July 22, 1977.

ADDRESS: Comments should be submitted in triplicate to the Emission Standards and Engineering Division, Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Attention: Mr. Don R. Goodwin.

All public comments received will be available for inspection and copying during normal business hours at EPA's Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Don R. Goodwin, Emission Standards and Engineering Division, Environmental Protection Agency, Research Triangle Park, North Carolina 27711 (919–688–8146), extension 271.

SUPPLEMENTARY INFORMATION: On March 8, 1974, the Environmental Protection Agency (EPA) promulgated standards of performance limiting emissions of sulfur dioxide from new, modified, and reconstructed fuel gas combustion devices within petroleum refineries. The standard limits the hydrogen sulfide content of fuel gas fired in combustion devices to 230 mg/dscm. Reference Method 11 was promulgated with the standard as the performance test method for measuring H_2S in the fuel gases. After promulgation, EPA discovered that interference resulting from the presence of mercaptans in some refinery fuel gases can lead to erroneous results. A study found that the cadmium hydroxide/cadmium sulfate absorbing solution specified in Method 11 was an efficient collector of mercaptans as well as hydrogen sulfide, thus causing a serious interference when mercaptans are present in significant concentrations. Studies were also made examining other substances often present in refinery fuel gases. No measurable interference resulted from the presence of carbon oxysulfide, dimethyl sulfoxide, ethylene, or thiophene. Acetaldehyde and acetone were observed to interfere at the 2,400 and 48,000 mg/m³ level, respectively.

As a result of this study, revisions to Method 11 are being proposed. The major change would substitute a new absorbing solution that is essentially free from mercaptan interference. New sections would also be added describing the range and sensitivity, interferences, and precision and accuracy of the revised Method 11. Although mercaptans are seldom present in fuel gases in sufficient quantities to significantly affect the test results, the proposed revision would ensure the accuracy of results in cases where high levels are present.

This revision of Method 11 does not affect the stringency of the standard for fuel gas combustion devices within petroleum refineries. The source test emission data which served as the basis for the standard were gathered at sources with negligible concentration levels of mercaptans in the fuel gas.

(Secs. 111, 114, 301(a), Clean Air Act, as amended, Pub. L. 91–604, 84 Stat. 1678 (42 U.S.C. 1857c–6, 1857c–9, and 1857g(a)).)

ECONOMIC IMPACT ANALYSIS: The Environmental Protection Agency has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Analysis under Executive Orders 11021 and 11949 and OMB Circular A–107.

Dated: May 6, 1977.

DOUGLAS M. COSTLE,
Administrator.

It is proposed to amend Part 60 of Chapter I of Title 40 of the Code of Federal Regulations by revising Method 11 of Appendix A—Reference Methods as follows:

APPENDIX A—REFERENCE METHODS

* * * * *

METHOD 11—DETERMINATION OF HYDROGEN SULFIDE CONTENT OF FUEL GAS STREAMS AT STATIONARY SOURCES

1. *Principle and applicability.*—1.1 *Principle.* Hydrogen sulfide (H_2S) is collected from a source in a series of midget impingers and absorbed in ph. 3.0 cadmium sulfate ($CdSO_4$) solution to form cadmium sulfide (CdS). The latter compound is then measured iodometrically. An impinger containing hydrogen peroxide is included to remove SO_2 as an interfering species.

1.2. *Applicability.* This method is applicable for the determination of the hydrogen sulfide content of fuel gas streams at stationary sources.

2. *Range and sensitivity.* The limit of detection is approximately 8 mg/m³ (6 ppm). The maximum of the range is 740 mg/m³ (520 ppm).

3. *Interferences.* Any compound that reduces iodine or oxidizes iodide ion will interfere in this procedure, provided it is collected in the cadmium sulfate impingers. Sulfur dioxide in concentrations of up to 2,600 mg/m³ is eliminated by the hydrogen peroxide solution. Thiols precipitate with hydrogen sulfide. In the absence of H_2S, only co-traces of thiols are collected. When methane- and ethane-thiols at a total level of 300 mg/m³ are present in addition to H_2S, the results vary from 2 percent low at an H_2S concentration of 400 mg/m³ to 14 percent high at an H_2S concentration of 100 mg/m³. Carbon oxysulfide of 20 percent does not interfere. Certain carbonyl-containing compounds react with iodine and produce recurring end points. However, acetaldehyde and acetone at concentrations of 1 and 3 percent, respectively, do not interfere.

Entrained hydrogen peroxide produces a negative interference equivalent to 100 percent of that of an equimolar quantity of hydrogen sulfide. Avoid the ejection of hydrogen peroxide into the cadmium sulfate impingers.

4. *Precision and accuracy.* Collaborative testing has shown the within-laboratory coefficient of variation to be 2.2 percent and the overall coefficient of variation to be 5.0 percent. The method bias was shown to be −4.8 percent when only H_2S was present. In the presence of the interferences cited in Section 3, the bias was positive at low H_2S concentrations and negative at higher concentrations. At 230 mg H_2S/m³, the level of the compliance standard, the bias was +2.7 percent. Thiols had no effect on the precision.

5.1 *Apparatus.*

5.1.1 Sampling line. Six to 7 mm (¼ in.) Teflon[1] tubing to connect sampling train to sampling valve. Depending on sampling stream pressure, a pressure-reduction regulator may be required just prior to the Teflon sampling line.

If significant amounts of water or amine are present in the sample stream, a corrosion-resistant cold trap should be used immediately after the sample tap. The trap should not be operated below 0°C to avoid condensation of C_3 or C_4 hydrocarbons.

5.1.2 Impingers. Five midget impingers, each with 30 ml capacity. The internal diameter of the impinger tip must be 1.00 mm ±0.05 mm. The impinger tip must be positioned 4 to 6 mm from the bottom of the impinger.

5.1.3 Glass or Teflon connecting tubing for the impingers.

5.1.4 Ice bath container—To maintain absorbing solution at a low temperature.

5.1.5 Silica gel drying tube. To protect pump and dry gas meter.

5.1.6 Sampling valve. Needle valve or equivalent to adjust gas flow rate. Stainless steel or other corrosion-resistant material.

5.1.7 Dry gas meter. Sufficiently accurate to measure sample volume to within 1 percent and calibrated with a wet test meter over the range of flow rates used in sampling. Gas volume for one dial revolution must not be more than 10 liters. The gas meter should have a gas petcock or equivalent on the outlet connector which can be closed during the leak test.

5.1.8 Flow meter. Rotameter or equivalent, to measure 0.5 to 2.0 liters/min (1 to 4 CFH) flow rate.

5.1.9 Graduated cylinder. 25 ml size.

5.1.10 Barometer. To measure atmospheric pressure to within ±2.5 mm (0.1 in.) Hg.

5.1.11 U-Tube manometer. 0–30 cm water column. For leak check procedure.

5.1.12 Rubber squeeze bulb. To pressurize train for leak check.

5.1.13 Tee, pinchclamp, and connecting tubing. For leak check.

5.1.14 Vacuum pump. Required for air purge.

5.1.15 Needle valve or orifice. To set air purge flow to 1 liter/min.

5.1.16 Tube packed with active carbon. To filter air during purge.

5.1.17 Volumetric flask. One 1,000 ml.

5.1.18 Volumetric pipette. One 15 ml.

5.2 Sample Recovery.

[1] Mention of trade names of specific products does not constitute endorsement by the Environmental Protection Agency.

5.2.1 Sample container. Iodine flask, glass-stoppered; 500 ml size.

5.2.2 Pipette. 50 ml volumetric type.

5.2.3 Graduated cylinders. One each 25 and 250 ml.

5.2.4 Flasks. 125 ml, Erlenmeyer.

5.2.5 Wash bottle.

5.2.6 Volumetric flasks. Three 1,000 ml.

5.3 Analysis.

5.3.1 Flask. 500 ml glass-stoppered iodine flask.

5.3.2 Burette. 50 ml.

5.3.3 Flask. 125 ml, Erlenmeyer.

5.3.4 Pipettes, volumetric. One 25 ml; two each 50 and 100 ml.

5.3.5 Volumetric flasks. One 1,000 ml; two 500 ml.

5.3.6 Graduated cylinders. One each 10 and 100 ml.

6. *Reagents.* Unless otherwise indicated, it is intended that all reagents conform to the specifications established by the Committee on Analytical Reagents of the American Chemical Society, where such specifications are available. Otherwise, use best available grade.

6.1 Sampling.

6.1.1 Cadmium sulfate absorbing solution. Dissolve 41.0 g of $3CdSO_4 \cdot 8H_2O$ and 15.0 ml of 0.1 M sulfuric acid in a 1-liter volumetric flask that contains approximately ¾ liter of deionized distilled water. Dilute to volume with deionized water. Mix thoroughly. pH should be 3.0±0.1. Add 10 drops of Dow-Corning Antifoam B[1]. Shake well before use. If Antifoam B is not used, the alternate acidified iodine extraction procedure must be used.

6.1.2 Hydrogen perioxide, 3 percent. Dilute 30 percent hydrogen peroxide to 3 percent as needed. Prepare fresh daily.

6.1.3 Water. Deionized, distilled, to conform to ASTM specifications D1193–72, Type 3.

6.2 Sample recovery.

6.2.1 Tydrochloric acid solution (HCl), 3M. Add 240 ml of concentrated HCl (specific gravity 1.19) to 500 ml of deionized, distilled water in a 1-liter volumetric flask. Dilute to 1 liter with deionized water. Mix thoroughly.

6.2.2 Iodine solution, 0.1 N. Dissolve 24 g of potassium iodide (KI) in 30 ml of deionized, distilled water. Add 12.7 g of resublimed iodoine (I_2) to the potassium iodide solution. Shake the mixture until the iodine is completely dissolved. If possible, let the solution stand overnight in the dark. Slowly dilute the solution to 1 liter with deionized, distilled water, with swirling. Filter the solution if it is cloudy. Store solution in a brown-glass reagent bottle.

6.2.3 Standard iodine solution, 0.01 N. Pipette 100.0 ml of the 0.1 N iodine solution into a 1 liter volumetric flask and dilute to volume with deionized, distilled water. Standardize daily as in Section 8.1. This solution must be protected from light. Reagent bottles and flasks must be kept tightly stoppered.

6.3 Analysis.

6.3.1 Sodium thiosulfate solution, standard 0.1 N. Dissolve 24.8 g of sodium thiosulfate penthahydrate ($Na_2SO_4O_5H_2O$) or 15.8 g of anhydrous sodium thiosulfate ($Na_2S_2O_3$), in 1 liter of deionized, distilled water and add 0.01 g of anydr. ; sodium carbonate (Na_2CO_3) and 0.4 ml of chloroform ($CHCl_3$) to stabilize. Mix thoroughly by shaking or by aerating with nitrogen for approximately 15 min and store in a glass-stoppered, reagent bottle. Standardize as in Section 8.2.

6.3.2 Sodium thiosulfate solution, standard 0.01 N. Pipette 50.0 ml of the standard 0.1 N thiosulfate solution into a volumetric flask and dilute to 500 ml with distilled water.

6.3.3 Starch indicator solution. Suspend 10 g of soluble starch in 100 ml of deionized, distilled water and add 15 g of potassium hydroxide (KOH) pellets. Stir until dissolved. dilute with 900 ml of deionized distilled water and let stand for 1 hour. Neutralize the alkali with concentrated hydrochloric acid, using an indicator paper similar to Alkacid test ribbon, then add 2 ml of glacial acetic acid as a preservative.

NOTE.—Test starch indicator solution for decomposition by titrating with 0.01 N iodine solution 4 ml of starch solution in 200 ml of distilled water that contains 1 g potassium iodide. If more than 4 drops of the 0.01 N iodine solution are required to obtain the blue color, a fresh solution must be prepared.

7. *Procedure.* 7.1 Sampling.

7.1.1 Assemble the sampling train as shown in Figure 11–1, connecting the five midget impingers in series. Place 15 ml of 3 percent hydrogen peroxide solution in the first impinger. Leave the second impinger empty. Place 15 ml of the cadmium sulfate absorbing solution in the third, fourth, and fifth impingers. Place the impinger assembly in an ice bath container and place crushed ice around the impingers. Add more ice during the run, if needed.

7.1.2 Connect the rubber bulb and manometer to first impinger, as shown in Figure 11–1. Close the petcock on the dry gas meter outlet. Pressurize the train to 30-cm water pressure with the bulb and close off tubing connected to rubber bulb. Train must hold a 30-cm water pressure with not more than a 1 cm drop in pressure in a 1-min interval. Stopcock grease is acceptable for sealing ground glass joints.

7.1.3 Purge the connecting line between the sampling valve and the first impinger. Close valve and connect the sample line to the train. Open the petcock on the dry gas meter outlet. Record the initial reading on the dry gas meter.

7.1.4 Open the sampling valve and then adjust the valve to obtain a rate of approximately 1 liter/min. Maintain a constant flow rate during the test. Record the meter temperature.

7.1.5 Sample for at least 10 min. At the end of the sampling time, close the sampling valve and record the final volume and temperature readings.

7.1.6 Disconnect the impinger train from the sampling line. Connect the charcoal tube and the pump, as shown in Figure 11–1. Purge the train with clean ambient air for 15 min to ensure that all H_2S is removed from the hydrogen peroxide. For sample recovery, cap the open ends and remove to a clean area that is away from sources of heat. The area should be well lighted, but not exposed to direct sunlight.

7.2 Sample recovery.

7.2.1 Discard the contents of the hydrogen peroxide impinger. Carefully rinse the contents of the third, fourth, and fifth impingers into a 500 ml iodine flask.

NOTE 2.—The impingers normally have only a thin film of cadmium sulfide remaining after a water rinse. If Antifoam B was not used or if significant quantities of yellow cadmium sulfide remain in the impingers, the alternate recovery procedure must be used.

7.2.2 Pipette exactly 50 ml of 0.01 N iodine solution into a 125 ml Erlenmeyer flask. Add 10 ml of 3 M HCl to the solution. Quantitatively rinse the acidified iodine into the iodine flask. Stopper the flask immediately and shake briefly.

7.2.2 (Alternate). Extract the remaining cadmium sulfide from the third, fourth, and fifth impingers using the acidified iodine solution. Immediately after pouring the acidified iodine into an impinger, stopper it and

[1] Mention of trade names of specific products does not constitute endorsement by the Environmental Protection Agency.

shake for a few moments, then transfer the liquid to the iodine flask. Do not transfer any rinse portion from one impinger to another; transfer it directly to the iodine flask. Once the acidified iodine solution has been poured into any glassware containing cadmium sulfide, the container must be tightly stoppered at all times except when adding more solution, and this must be done as quickly and carefully as possible. After adding any acidified iodine solution to the iodine flask, allow a few minutes for absorption of the H_2S before adding any further rinses. Repeat the iodine extraction until all cadmium sulfide is removed from the impingers. Extract that part of the connecting glassware that contains visible cadmium sulfide.

Quantitively rinse all of the iodine from the impingers, connectors, and the beaker into the iodine flask using deionized, distilled water. Stopper the flask and shake briefly.

7.2.3 Allow to stand about 30 min. in the dark for absorption of the H_2S into the iodine, then complete the titration analysis as in Section 7.3.

NOTE 3.—Caution! Iodine evaporates from acidified iodine solutions. Samples to which acidified iodnie have been added may not be stored, but must be analyzed in the time schedule stated in Section 7.2.3.

7.2.4. Prepare a blank by adding 45 ml of cadmium sulfate absorbing solution to an iodine flask. Pipette exactly 50 ml of 0.01 iodine solution into a 125-ml Erlenmeyer flask. Add 10 ml of 3 M HCl. Follow the same impinger extracting and quantitative rinsing procedure carried out in sample analysis. Stopper the flask, shake briefly, let stand 30 min in the dark, and titrate with the samples.

NOTE 4.—The blank must be handled by exactly the same procedure as that used for the samples.

7.3 Analysis.

NOTE 5.—Titration analyses should be conducted at the sample-cleanup area in order to prevent loss of iodine from the sample. Titration should never be made in direct sunlight.

7.3.1 Using 0.01 N sodium thiosulfate solution, rapidly titrate samples in iodine flasks using gentle mixing, until solution is light yellow. Add 4 ml of starch indicator solution and continue titrating slowly until the blue color just disappears. Record V_t, the volume of sodium thiosulfate solution used (ml).

7.3.2 Titrate the blanks in the same manner as the samples. Run blanks each day until replicate values agree within 0.05 ml. Average the replicate titration values which agree within 0.05 ml.

8. *Calibration and standards.* 8.1 Standarize the 0.01 N iodine solution daily as follows: Pipette 25 ml of the iodine solution into a 125 ml Erlenmeyer flask. Add 2 ml of 3 M HCl. Titrate rapidly with standard 0.01 N thiosulfate solution until the solution is light yellow, using gentle mixing. Add four drops of starch indicator solution and continue titrating slowly until the blue color just disappears. Record V_t, the volume of thiosulfate solution used (ml). Repeat until replicate values agree within 0.05 ml. Average the replicate titration values which agree within 0.05 ml and calculate the exact normality of the iodine solution using Equation 9.1. Repeat the standardization daily.

8.2 Standardize the 0.1 N thiosulfate solution as follows: Oven-dry potassium dichromate ($K_2Cr_2O_7$) at 180 to 200°C. Weight to the nearest milligram, 2 g of potassium dichromate into a 500 ml volumetric flask, dissolve in deionized, distilled water and dilute to exactly 500 ml. In a 500 ml iodine flash, dissolve approximately 3 g of potassium iodide (KI) in 45 ml of deionized, distilled water, then add 10 ml of 3 M hydrochloric acid solution. Pipette 50 ml of the dichromate solution into this mixture. Gently swirl the solution once and allow it to stand in the dark for 5 min. Dilute the solution with 100 to 200 ml of deionized distilled water, washing down the sides of the flask with part of the water. Titrate with 0.1 N thiosulfate until the solution is light yellow. Add 4 ml of starch indicator and continue titrating slowly to a green end point. Record V_t, the volume of thiosulfate solution used (ml). Repeat until replicate analyses agree within 0.05 ml. Calculate the normality using Equation 9.2. Repeat the standardization each week.

9. *Calculations.* Carry out calculations retaining at least one extra decimal figure beyond that of the acquired data. Round off results only after the final calculation.

9.1 Normality of the Standard Iodine Solution.

$$N_I = \frac{N_I V_I}{V_I}$$

where
N_I = normality of iodine, g-eq/liter;
V_I = volume of iodine used, ml;
N_T = normality of sodium thiosulfate, g-eq/liter; and
V_T = volume of sodium thiosulfate used, ml.

9.2 Normality of the Standard Thiosulfate Solution.

$$N_T = 2.04 \frac{W}{V_T}$$

where
W = weight of $K_2CR_2O_7$ used, g;
V_T = volume of $Na_2S_2O_3$ used, ml;
N_T = normality of standard thiosulfate solution, g-eq/liter; and
2.04 = conversion factor.

$$= \frac{(6 \text{ eq I}_2/\text{mole } K_2Cr_2O_7)\ (1{,}000 \text{ ml/liter})}{(294.2 \text{ g } K_2Cr_2O_7/\text{mole})\ (10 \text{ aliquot factor})}$$

9.3 Dry Gas Volume. Correct the sample volume measured by the dry gas meter to standard conditions (20° C) and 760 mm Hg.

$$V_{m,std} = V_m \left(\frac{T_{std}}{T_m}\right)\left(\frac{P_{bar}}{P_{std}}\right)$$

where
$V_{m,std}$ = volume at standard conditions of gas sample through the dry gas meter, standard liters;
V_m = volume of gas sample through the dry gas meter (meter conditions), liters;
T_{std} = absolute temperature at standard conditions, 293 K;
T_m = average dry gas meter temperature, °K;
P_{bar} = barometric pressure at the orifice meter, mm Hg; and
P_{std} = absolute pressure at standard conditions, 760 mm Hg.

9.4 Concentration of H_2S. Calculate the concentration of H_2S in the gas stream at standard conditions using equation:

$$C_{H_2S} = \frac{K[(V_I N_I - V_T N_T)\ \text{sample} - (V_I N_I - V_T N_T)\ \text{blank}]}{V_{m,std}}$$

where (metric units):
C_{H_2S} = concentration of H_2S at standard conditions, mg/dscm;
K = conversion factor = 17.0×10^3

$$= \frac{(34.07 \text{ g/mole } H_2S)(1{,}000 \text{ liters/m}^3)(1{,}000 \text{ mg/g})}{(1{,}000 \text{ ml/liter})(2 H_2S \text{ eq/mole})}$$

V_I = volume of standard iodine solution, ml;
N_I = normality of standard iodine solution, g-eq/liter;
V_T = volume of standard sodium thiosulfate solution, ml;
N_T = normality of standard sodium thiosulfate solution, g-eq/liter; and
$V_{m,std}$ = dry gas volume at standard conditions, liters.

10. *Stability.* The absorbing solution is stable for at least 1 month. Sample recovery and analysis should begin within 1 hour of sampling to minimize oxidation of the acidified cadmium sulfide. Once iodine has been added to the sample, the remainder of the analysis procedure must be completed according to Sections 7.2.2, 7.2, and 7.3.

EFFLUENT LIMITATIONS GUIDELINES FOR EXISTING SOURCES AND NEW SOURCE PERFORMANCE STANDARDS

Independent Rendering Industry; Proposed Rules

AGENCY: Environmental Protection Agency.

ACTION: Proposed rules.

SUMMARY: This document proposes certain changes in the pollutant discharge limitations for processing plants in the independent rendering industry. The independent renderer recovers salable products such as fats, oils, and proteinaceous meal from discarded animal materials. The effect of the proposed changes would be to make certain pollutant limitations for existing plants (1983 requirements) less stringent and for new plants more stringent than those originally promulgated. EPA has concluded the proposed changes are appropriate after completing a restudy of the industry as directed by the U.S. Court of Appeals for the Eighth Circuit.

DATE: Send comments on rule or economic analysis on or before June 22, 1977.

ADDRESSES: Send comments on rule to the Effluent Guidelines Division, Office of Water and Hazardous Materials, Environmental Protection Agency, 401 M St. S.W., Washington, D.C. 20460; send comments on economic analysis to the Office of Analysis and Evaluation, WH-586, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460; documents relating to this rulemaking proceeding are available for inspection and copying at the EPA Public Information Reference Unit, Room 2922 (EPA Library), Waterside Mall, 401 M St. SW., Washington, D.C.; the supplemental report is available at the EPA Public Information Reference Unit, EPA regional offices, and state water pollution control offices.

FOR FURTHER INFORMATION CONTACT:

Harold Coughlan, Effluent Guidelines Division, Office of Water and Hazardous Materials, Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460 (202-426-2560).

SUPPLEMENTARY INFORMATION:

Summary of Background and Basis of Proposed Amendments

A. Background and Methodology

The new source performance standards for the renderer subcategory of the Meat Products and Rendering Processing Point Source Category, published on January 3, 1975, and codified at 40 CFR 432.105 (Subpart J) was remanded to the Agency for further study on August 30, 1976, by the U.S. Court of Appeals for the Eighth Circuit (*National Renderers Association, et al.*, v. *EPA, et al.*, 541 F. 2d 1281).

Therefore, EPA has reevaluated the technical and economic information on which the original regulation was based, as well as new information in both areas. The Agency finds substantiated the subcategorization, process waste water characteristics, and applicable control technology. However, the new information on cost and performance of the technology led to clarification of the economic impact of such controls on the industry. Consequently, the Agency proposes to amend the standards of performance for new sources and, at the same time, the Agency proposes to amend these portions of the regulations which set forth effluent limitations guidelines representing best available technology economically achievable (§ 432.103).

In summary, the changes proposed rely on the existence of demonstrated technology, and reflect equal requirements for both best available technology economically achievable and standards of performance for new sources. For existing sources the restrictions on BOD, TSS, and ammonia are less stringent than originally promulgated; for new sources the restrictions on these pollutants are more stringent than established in the original new source performance standards. Original limitations for pH and fecal coliform remain unchanged in both cases. The oil and grease requirements are unchanged for BATEA and more stringent for new sources.

In support of the original regulations EPA published a technical report entitled, "Development Document for Effluent Limitations Guidelines and New Source Performance Standards for the Renderer Segment of the Meat Products and Rendering Processing Point Source Category (January 1975)" and a companion economic impact report entitled, "Economic Analysis of Proposed Effluent Guidelines Independent Rendering Industry (July 1974)". Together, these reports presented detailed summaries and rationale for all technical and economic information and conclusions developed therefrom. Subsequent to the remand, the Agency reviewed this data and information and determined that up-to-date data and information on all salient aspects of production, processes, and equipment, waste water sources, effluent control characteristics, and various financial aspects would be necessary to fully respond to questions raised by the Court in its August 30, 1976, opinion. In brief, these questions involved: (1) the waste water treatment technology necessary to meet the new source standards; (2) the cost of such technology; and (3) the probable impact of that cost on decisions to build and operate new rendering plants.

By November 7, 1976, questionnaires were sent pursuant to section 308 of the Act to 380 independent renderers identified by the National Renderers Association. By February 10, 1977, a total of only 250 responses had been received of which 148 contained any substantive information of use in the Agency's study. Only 44 plants provided waste water effluent information necessary to evaluate treatment system effectiveness. In addition to the industry questionnaires sent, earlier sources were revisited, including a resurvey of the technical literature, a second field sampling survey at a rendering plant, additional consultants studies, new submissions from rendering and treatment equipment manufacturers, current NPDES permit data, and information from EPA regional offices and State agencies.

All data and information were reviewed to focus upon both typical and "best" (or "exemplary") practices for in-plant waste control and water usage, raw materials processed, materials recovery, and biological waste treatment methods employed, and any other applicable effluent polishing techniques such as filtration. Analyses of the technical data included quantitative and qualitative reviews, profile, sorting, and statistical assessment where possible and general engineering evaluations. Cost data were compiled from plant submissions, engineering reports, and suppliers; all such data were updated to 1976 base year dollars. Costs of meeting the standards were computed using "model" rendering plants developed to represent a range of both size and type of production process, and incorporated all components of treatment or control systems which the data revealed would achieve the proposed effluent levels. Similarly, economic impact studies utilized both individual plant submissions and the most recent engineering and equipment supplier estimates for financial profiles, capital facilities, cost operating expenses, etc. Current treatment cost data derived in the technical study were used in the actual impact assessment.

B. Findings

After considering all the information available at this time, the Agency finds substantiated its earlier conclusions that the principal sources of waste water are process spills, raw materials drainage, condenser condensate, and plant clean up operations. The Agency also supported its conclusions with respect to characteristics of the waste waters and appropriate effluent control measures.

The data showed that the wastes generated by the independent rendering plants are biodegradable and amenable to treatment and control by in-plant measures, materials recovery using catch basins and biological treatment processes. With proper design and operation of these systems, a stable high quality effluent can be reliably attained with BOD5, TSS, oil and grease, and ammonia mass loadings equal to or better than the proposed new source standards and 1983 limitations.

As discussed in the original Development Document, waste loads are reduced by minimizing the entry of raw materials into the waste water stream. Water use is reduced by careful attention to cleanup procedures (such as frequent dry clean up of spills and drainage prior to plant washdown) and by careful selection of condensing system. In the current study it was found that approximately 50 percent of the plants that supplied condenser system information had condensers that required no water for cooling (air cooled condensers) or allowed no contact between the cooling water and the waste water (shell and tube condensers). Information developed during this reappraisal of new source standards showed that some manufacturers now include air cooled or shell and tube condensers as part of the standard rendering process equipment and that at least 15 plants have replaced high water usage barometric condensers with air cooled or shell and tube condensers. The type of condenser employed significantly affects the volume of polluted waste water generated by rendering plants. The survey data showed an average flow of approximately 3,900 gallons per 1,000 lb raw material (RM) processed for barometric condensers compared with an average of approximately 150 gallons per 1,000 lb (RM) for air or shell and tube condensers. The use of air cooled or shell and tube condensers is prevalent, as noted in the technical supplement. These condensers are used in all rendering subcategories including those rendering poultry materials.

EPA determined that the use of a dissolved air flotation ("DAF") system is not required to meet any of the proposed limitations or standards. The questionnaire data showed that catch basins with skimmers/settlers are, in the rendering industry, an effective alternative to DAF units and are substantially less expensive than the air flotation system. Thus, while DAF is an option industry can consider, it is more costly than a catch basin and its use is not necessary to meet proposed standards.

"End of pipe" waste water treatment processes which are able to reduce this industry's waste to acceptable levels include activated sludge (extended aeration with equalization), combinations of anaerobic, aerobic, and aerated lagoons, disposal on land, ridge and furrow irrigation, evaporation-percolation ponds, disinfection, and sludge disposal. An equalization tank is recommended for use with extended aeration systems because it will alleviate raw waste load surges which otherwise reduce the efficiency of these systems. The Agency does not consider equalization necessary for lagoon systems because the large volumes and long waste detention times of lagoons adequately dampen any surges in raw waste loads.

In more specific terms, four of the existing well designed and operated plants that meet the proposed limits were of the following design:

Plant 180—Extended aeration form of activated sludge.

Plant 185—Anaerobic followed by aerobic lagoons.

Plants 200 and 202—Mechanically aerated followed by aerobic lagoons.

For primary treatment, plants number 180 and 185 utilize catch basins and plant 202 uses an inoperative DAF unit as a catch basin. Plant 200 utilizes a catch basin followed by a DAF unit.

Two of the principal approaches to meeting the new source standards and the 1983 limitations can be demonstrated by reference to the above rendering plants. Plants 200 and 202 are meeting the standards by maintaining discharge flows at low levels (30.5 and 53 gallons per 1000 lb raw material) in concert with lagoon waste treatment systems of average efficiency. By contrast, plant number 180 discharges 20 percent more than the exemplary flow rate cited above but meets the standards by having a high degree of waste treatment efficiency. The effluent from this activated sludge system is also filtered through mixed media filters. (The standards and limitations actually are met prior to filtering). Operating information for the filter showed that at least a 50 percent reduction in BOD5 and TSS can be effected by this process. The Eighth Circuit noted in its opinion of August 30, 1976, that filters are capable of such reductions. Other industries that have successfully tested and installed filters, include steel manufacturing, petroleum refining, brewing, corn wet milling, wine processing, and food processing.

It must be emphasized that the technology to meet the standards does not require filters. However, even when considered as a possible add-on to lagoons, the economic analysis showed impact was not significantly affected.

In summary, the proposed revised 1983 effluent limitations and new source standards are based on well known and demonstrated control technology. The inplant technology demonstrated includes options such as water conservation, which can be obtained through use of accepted air-cooled and shell and tube condensers and good housekeeping. The end-of-pipe technology employed by exemplary plants includes biological treatment as found in the following systems: anaerobic—aerobic lagoons, anaerobic—mechanicaly aerated—aerobic lagoons, mechanically aerated—aerobic lagoons, and activated sludge (extended aeration) plus chlorination.

Economic Impact Analysis

This section summarizes the economic and inflationary impacts of the new source performance standards and the BATEA requirements on the independent rendering segment of the meat products and rendering processing point source category.

An inflationary impact statement is not necessary because this regulatory action would not exceed any of the four (4) criteria established by the Administrator.

The proposed BATEA requirements for BOD5, TSS and ammonia are less stringent than those originally promulgated. The investment and annual costs necessary to meet the amended BATEA requirements in almost all instances are lower than those for the original limitations. For this reason, a new economic impact analysis was not performed for the revised BATEA standards. Before promulgation of the revised standards a review of the economic analysis of BATEA and public comment will be performed to insure that these regulations will not result in undue economic impact.

The proposed NSPS are more stringent than those originally promulgated for BOD5, TSS, oil and grease and ammonia. The impact of the standards is expected to be minimal for the industry. Almost no construction would be impeded by the imposition of pollution control costs. Plants that would be built in the absence of pollution control costs would also be built in the presence of such costs. Required price increases are expected to be minimal as are the effects on employment, growth and international trade.

The Agency has considered the economic impact of the internal costs (investment plus cost of operation, maintenance, capital and depreciation) and external costs (price increases and impeded growth). For each model rendering plant, the following impact indicators were analyzed; required price increases, after tax income, return on sales and invested capital.

Following is a summary of the economic impact analysis for the model plants. It will be noted that some of the plants generate a profit even though their net present value of projected stream of costs and revenue is negative. In these instances the plant was considered "marginally" likely to be built; i.e., viability would depend on the effectiveness of management and/or slight improvement in economic conditions over those originally assumed.

Small batch processing plants. Technology investment costs ranged from $25,300 to $41,200 and annual costs range from $5,900 to $17,400. Analysis showed that the small packinghouse, dead animal and the poultry offal plants would not be built even in the absence of effluent control costs. The analysis also showed that the dead animal plant, when using used processing equipment, was marginally likely to be built provided no pollution control costs were imposed.

Since small plants (less than 75,000 lb./day raw material) are exempted from any effluent regulations the proposed new source performance standards will not affect this model plant.

Medium batch processing plants. Technology costs range from $61,200 to $106,600 and annual cost range from $11,900 to $27,200. Analysis showed that the packinghouse and poultry batch processing plants would be viable both before and after imposition of pollution controls provided the plants were using used processing equipment. The plants using new processing equipment would be marginally viable and viability would depend on the effectiveness of management.

Large batch plants. Technology investment costs range from $126,000 to

$223,600 while annual costs range from $23,700 to $50,600. The analysis showed that the plants would be built and construction would not be impeded by the imposition of effluent control.

Medium continuous process plants. Technology investment costs range from $81,800 to $142,600, while annual costs range from $15,900 to $39,000. The analysis showed the imposition of various treatment alternatives on the packinghouse and poultry offal plants result in them becoming only marginally likely to be built. However, if operating conditions are only slightly more favorable than originally assumed, it is probable the imposition of effluent control requirements, would not impede growth of these plants.

Large continuous process plants. Technology investment costs range from $158,200 to $257,200, and annual costs range from $27,100 to $61,300. All large plants are economically viable with or without the imposition of effluent control costs.

The external cost analysis performed showed that the required price increases to maintain baseline conditions after installation of pollution control equipment are estimated to be minimal. For almost all new plants, required price increases are less than 2 percent, although for small dead animal new source plants the required price increase could be as high as 4.1 percent. For all batch poultry and medium continuous poultry plants, the required price increase would be approximately 2.8 percent.

EPA invites public comment on the economic analysis. Comment should be sent to EPA, Office of Analysis and Evaluation, WH-586, 401 M Street SW., Washington, D.C. 20460.

SUMMARY OF INITIAL COMMENTS AND RESPONSES

The National Renderers Association provided comments on the draft economic and technical reports prepared by EPA's contractors. The National Renderers Association principally drew into question the recommended ammonia and oil and grease limitations.

The technical Supplement to the Development Document shows the proposed Agency ammonia values to be achievable. Several plants are currently meeting them by operating at or below recommended waste water flow rates (e.g., 150 gal per 1,000 lb (RM) and by providing adequate biological treatment for the process waste. The basis for the proposed effluent limitations for ammonia as well as BOD5 and total suspended solids are applicable only to independent rendering plants. As indicated in the original development document, rendering operations differ materially from meat processing packinghouses and poultry processers.

Oil and grease is a major pollutant parameter in all plants in the rendering industry and a principal parameter for assessing overall performance of treatment and control systems. Accordingly, the Agency has established a limitation for oil and grease.

The NRA suggested that the quantity of grease in a rendering plant discharge is directly related to the BOD5 value for that discharge. The NRA recommends that since oil and grease is degradable and non-toxic, it should not be limited or, at least, that monitoring requirements be made optional. The Agency encourages comments with respect to the points raised by NRA, including any specific data on the relationship between BOD5 and the grease content of rendering plant discharges.

SUMMARY OF PROPOSED REVISIONS TO THE NEW SOURCE PERFORMANCE STANARDS AND THE 1983 LIMITATIONS

As a result of the data, information and Court remand, comments assembled for this restudy of the industry, the following changes are proposed to be made in the new source preformance standards and in the effluent limitations guidelines based upon the use of best available technology economically achievable.

(1) New source standards will be changed to make them more stringent than the promulgated limitations. The proposed standards are identical to the proposed 1983 limitations. pH and fecal coliform restrictions in the new source standards have remained unchanged.

(2) The BOD5, TSS and ammonia limits for 1983 limitations have been adjusted upward to allow increased discharges reflecting the performance of plants in the industry.

The report entitled "Supplement to Development Document for Effluent Limitations Guidelines and New Source Performance Standards for the Renderer Segment of the Meat Products and Rendering Processing Point Source Category" details the analysis undertaken in support of the proposed regulations. This document is available for inspection at the EPA Public Information Reference Unit, Room 2922 (EPA Library), Waterside Mall, 401 M St., S.W., Washington, D.C., at all EPA regional offices, and at State water pollution control offices. The analysis prepared for EPA of the possible economic effects of the regulation, entitled "Economic Analysis of Effluent Guidelines (NSPS) on the Independent Rendering Industry Updated to 1976 Conditions" is also available for inspection at these locations.

A copy of the reports used in developing the proposed regulation and a copy of all public comments are available for inspection and copying at the EPA Public Information Reference Unit, Room 2922 (EPA Library) Waterside Mall, 401 M St., S.W., Washington, D.C. The EPA information regulation, 40 CFR Part 1, provides that a reasonable fee may be charged for copying.

In addition, Section 8 of the FWPCA authorizes the Small Business Administration, through its economic disaster loan program, to make loans to assist any small business concerns in effecting additions to or alterations in their equipment, facilities, or methods of operation so as to meet water pollution control requirements under the FWPCA, if the concern is likely to suffer a substantial economic injury without such assistance.

For further details on this Federal loan program write to EPA, Office of Analysis and Evaluation, WH-586, 401 M St., S.W., Washington, D.C. 20469.

In consideration of the foregoing, it is proposed to amend 40 CFR Part 432 as follows:

Dated: May 2, 1977.

DOUGLAS M. COSTLE,
Administrator.

Subpart J—Rendering Subcategory

1. By revising § 432.103(a) to read as follows:

§ 432.103 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
Metric units (kilograms per 1,000 kg or raw material)		
BOD5	0.18	0.09
TSS	0.22	0.11
Oil and grease	0.10	0.05
Ammonia	0.14	0.07
pH	Within the range 6.0 to 9.0.	
Fecal coliforms	Maximum at any time 400 mpn/1,000 ml.	
English units (pounds per 1,000 lb of raw material)		
BOD5	0.18	0.09
TSS	0.22	0.11
Oil and grease	0.10	0.05
Ammonia	0.14	0.07
pH	Within the range 6.0 to 9.0.	
Fecal coliforms	Maximum at any time 400 mpn/1,000 ml.	

* * * * *

2. By revising § 432.105 to read as follows:

§ 432.105 Standards of performance for new sources.

The following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

Effluent characteristics	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
Metric units (kilograms per 1,000 kg of raw material)		
BOD5	0.18	0.09
TSS	0.22	0.11
Oil and grease	0.10	0.05
Ammonia	0.14	0.07
pH	Within the range 6.0 to 9.0.	
Fecal coliforms	Maximum at any time mpn/1,000 ml.	
English units (pounds per 1,000 lb of raw material)		
BOD5	0.18	0.09
TSS	0.22	0.11
Oil and grease	0.10	0.05
Ammonia	0.14	0.07
pH	Within the range 6.0 to 9.0.	
Fecal coliforms	Maximum at any time 400 mpn/1,000 ml.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 76-28]

[46 CFR Parts 25, 33, 75, 94, 161, 164, 167, 180, 192]

LIFESAVING EQUIPMENT

Lights and Retro-Reflective Material for Life Preservers and Other Lifesaving Equipment

AGENCY: Coast Guard. Department of Transportation.

ACTION: Proposed Rules.

SUMMARY: The Coast Guard is considering amending the lifesaving equipment regulations to require lights and retro-reflective material on life preservers carried on vessels engaged in ocean, coastwise, and Great Lakes service. Life preservers carried on vessels engaged in lakes, bays, sounds, and river service would be required to have retro-reflective material. Additionally, the proposed amendments also contain new approval specifications for lights used on personal flotation devices and for retro-reflective material.

The proposals are based upon recommendations of four Coast Guard marine boards of investigation of vessel casualties. The boards recommended that life preservers be provided with lights for use in locating survivors of vessel casualties. The most recent board also recommended that life preservers be provided with retro-reflective material.

DATES: All comments received before July 4, 1977 will be considered before further action is taken on this notice.

ADDRESS: (a) *Comments:* Written comments on this notice should be submitted to and will be available for examination at the Coast Guard Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590.

(b) *Economic Evaluation.* A copy of the economic evaluation from which the economic summary in this document is taken is available for examination at the address listed in paragraph (a) above.

(c) *Other Materials:* Copies of the Marine Boards of Investigation referenced in this notice, the study entitled "Comparative Evaluation of Visual Distress Signals" (Report No. C.G.-D-47-78, dated August 1976) and proposed Federal Specification L-S-300C entitled "Sheeting and Tape, Reflective: Nonexposed Lens" are available for examination at the address listed in paragraph (a) above. Copies of the study may be obtained from the National Technical Information Service, Springfield, Virginia 22151.

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590 (202-426-1477).

SUPPLEMENTARY INFORMATION: The principal project manager and lawyer involved in the drafting of this notice are LCDR Paul K. Anderson, Project Manager, and William R. Register, Project Attorney.

Interested persons are invited to participate in this proposed rule making by submitting written data, views, or arguments. Each person submitting a comment should include his or her name and address, identify this notice (CGD 76-28) and give reasons in support of the comment. The proposal may be changed in light of comments received. No hearing is contemplated but one may be held at a time and place set in a later notice in the FEDERAL REGISTER if requested by an interested person desiring an opportunity to comment orally at a public hearing and raising a genuine issue.

A notice of proposed rule making was published in the FEDERAL REGISTER on March 1, 1972 (37 FR 4293), to require lights on life preservers. The notice was later withdrawn to conduct additional study, and notice of withdrawal was published in the FEDERAL REGISTER of July 7, 1972 (37 FR 13350).

The proposed regulations in this notice are based in part upon the results of the additional study, which is entitled "Comparative Evaluation of Visual Distress Signals" (Report No. C.G.-D-47-78, dated August 1976), and upon the recommendations of the marine boards of investigation involving the casualties to the SS *Panoceanic Faith*, MV *Theresa F.*, F/V *Fenwick Island*, and SS C.V. *Sea Witch—Esso Brussels*. The proposed specifications are also based in part upon proposed Federal Specification L-S-300C entitled "Sheeting and Tape, Reflective: Nonexposed Lens."

DISCUSSION OF THE PROPOSED REGULATIONS

The proposed regulations would apply to all inspected vessels. The proposals would also apply to commercial, uninspected vessels, including those carrying six or less passengers for hire. The lifesaving equipment regulations for commercial, uninspected vessels are contained in Part 25 of Title 46, Code of Federal Regulations. Part 25 allows these vessels a choice of carrying different types of life preservers.

The authority to regulate uninspected vessels carrying six or less passengers for hire is contained in Section 5 of the Federal Boat Safety Act of 1971. Section 6 of this Act requires consultation with the National Boating Safety Advisory Council (NBSAC) with respect to proposed regulations issued under the authority of Section 5. Accordingly, the regulations proposed in this notice for commercial uninspected vessels carrying six or less passengers for hire will be presented to NBSAC at its next meeting, which is scheduled for May 1977. Notice of this meeting will be published in the FEDERAL REGISTER.

The proposed regulations would require vessels engaged in ocean, coastwise, or Great Lakes service to have lights and retro-reflective material on life preservers carried on board. The possibility that survivors of a casualty to one of these vessels could drift from the scene of the casualty before the arrival of help is always present because of the response time of search and rescue units for the areas in which these vessels operate. Use of life preserver lights can aid in detection of survivors in these cases.

The proposed regulations would also require use of retro-reflective material on life preservers carried on vessels engaged in lakes, bays, sounds, or rivers service. Survivors of a casualty to one of these vessels would in all probability not drift far from the scene of the casualty before the arrival of help. These vessels operate in areas that generally are within close range of search and rescue units, and retro-reflective material can provide effective assistance in detection of survivors in these cases.

The proposed amendment to Parts 161 and 164 contain approval specifications for lights used on personal flotation devices and for retro-reflective material used on lifesaving equipment. Section 489 of Title 46, U.S. Code, requires that these items be approved by the Coast Guard; and these specifications set out design requirements, approval tests, and procedures for obtaining approval.

The effective date of the regulations proposed in this notice would be one year after their publication in the FEDERAL REGISTER as final regulations. The regulations upon becoming effective would apply both to existing vessels and to vessels built after the effective date of the regulations.

This proposal has been reviewed for economic effects under Department of Transportation "Policies to Improve

Analysis and Review of Regulations" (41 FR 16200). The costs to outfit life preservers on vessels with lights and retro-reflective material in the first year after these regulations became effective would be approximately $12,000,000.

The principal economic benefits resulting from the use of lights and retro-reflective material on life preservers would be those associated with the number of additional lives saved in vessel casualties. Coast Guard data compiled concerning search and rescue incidents in 1975 indicates that approximately 360 incidents involving commercial vessels or its occupants occurred in which a night search was conducted without success in locating the search target. Use of lights and retro-reflective material required by this proposal should significantly increase the probability of detecting survivors at night.

(46 U.S.C. 375, 390b, 391a, 416, 481, 526p, and 1454, 49 U.S.C. 1655(b), and 49 CFR 1.46.)

In consideration of the foregoing, the Coast Guard proposes to amend Title 46, Code of Federal Regulations, as follows:

PART 25—REQUIREMENTS

1. New paragraphs (e) through (i) would be added to § 25.25–5 of Part 25 to read as follows:

§ 25.25–5 Life preservers and other lifesaving equipment required.

* * * * *

(e) Each life preserver, each special purpose water safety buoyant device intended to be worn, and each buoyant vest carried on a vessel that is engaged in ocean, coastwise, or Great Lakes service must have (1) A light that is approved under Subpart 161.012 of this chapter; and (2) Retro-reflective material that is approved under Subpart 164.018 of this chapter.

(f) Each light required by this section for an item of lifesaving equipment must be securely attached to the front shoulder area of the item.

(g) If a light required by this section has a non-replaceable power source, it must not be used for more than three years after the date of manufacture of the power source. If the light has a replaceable power source, the power source must be replaced within three years after its date of manufacture and the light must be replaced when it is no longer serviceable.

(h) Each life preserver, each special purpose water safety buoyant device intended to be worn, and each buoyant vest carried on a vessel that is engaged in lakes, bays, sounds, or river service must have retro-reflective material that is approved under Subpart 164.018 of this chapter.

(i) Each item required by this section to have retro-reflective material must have at least 200 sq. cm. (31 square inches) of the material attached on its front side, at least 200 sq. cm. (31 square inches) on its back side, and, if the item is reversible, at least 200 sq. cm. (31 square inches) of material on each of its reversible sides. The material attached on each side of the item, and on each reversible side, must be divided equally between the upper quadrants of the side and the material in each quadrant must be attached as closely as possible to the shoulder area of the item.

PARTS 33, 75, 94, 167, 180, AND 192

2. The following requirements would be added to the lifesaving equipment regulations applicable to vessels in Parts 33, 75, 94, 167, 180 and 192:

(a) Each life preserver carried on a vessel engaged in ocean, coastwise, or Great Lakes service must have—

(1) A light that is approved under § 161.012 of this chapter; and

(2) Retro-reflective material that is approved under Subpart 164.018 of this chapter.

(b) Each light required by paragraph (a) must be securely attached to the front shoulder area of the life preserver.

(c) If a light required by paragraph (a) has a nonreplaceable power source, it must not be used for more than three years after the date of manufacture of the power source. If the light has a replaceable power source, the power source must be replaced within three years after its date of manufacture and the light must be replaced when it is no longer serviceable.

(d) Each life preserver carried on a vessel engaged in lakes, bays, sounds, or river service must have retro-reflective material that is approved under Subpart 164.018 of this chapter.

(e) Each life preserver required to have retro-reflective material must have at least 200 sq. cm. (31 square inches) of material attached on its front side, at least 200 sq. cm. (31 square inches) on its back side, and if the life preserver is reversible, at least 200 sq. cm. (31 square inches) of material on each of its reversible sides. The material attached on each side of the life preserver, and on each reversible side, must be divided equally between the upper quadrants of the side and the material in each quadrant must be attached as closely as possible to the shoulder area of the life preserver.

PART 161—ELECTRICAL EQUIPMENT

3. A new Subpart 161.012 would be added to Part 161 to read as follows:

Subpart 161.012—Personal Flotation Device Lights

Sec.

161.012–1 Scope.
161.012–3 PFD.
161.012–5 Approval procedures.
161.012–7 Construction.
161.012–9 Performance.
161.012–11 Approval tests.
161.012–13 Production tests and inspections.
161.012–15 Markings.

§ 161.012–1 Scope.

This subpart prescribes construction and performance requirements, approval and production tests, and procedures for approving personal flotation device lights fitted on Coast Guard approved life preservers, buoyant vests, and other personal flotation devices.

§ 161.012–3 PFD.

As used in this subpart, "PFD" means Coast Guard approved personal flotation device.

§ 161.012–5 Approval procedures.

(a) An application for approval of a light under this subpart must be sent to the Commandant (G–MMT–3/83), U.S. Coast Guard, Washington, D.C. 20590.

(b) Each application for approval must contain the name and address of the applicant, a detailed description of the applicant's production testing program, and a laboratory test report containing observations and results of approval testing that show whether the light meets the construction and performance requirements of this subpart.

(c) The Commandant advises the applicant whether the light is approved. If the light is approved, an approval certificate is sent to the applicant.

§ 161.012–7 Construction.

(a) Each light must be designed to be attached to a PFD without damaging the PFD or interfering with its performance.

(b) Each light and its power source must be designed to be removed and replaced without damage to the PFD.

(c) The power source of a light must have at least a 3 year storage life.

(d) Each light must be capable of preventing leakage from its container of any chemicals it contains or produces.

(e) Each component of a light must be designed to remain serviceable in a marine environment for at least as long as the storage life of the light's power source.

(f) No light may have a water pressure switch.

§ 161.012–9 Performance.

(a) If a light is a flashing light, the maximum period between flashes when the light is first activated must be less than one second.

(b) Each light when activated must be capable of being seen from a distance of at least one nautical mile on a dark, clear night.

(c) Each light must be designed to operate continuously for at least 8 hours while completely submerged in water.

(d) Each light must be designed to operate both in sea water and in fresh water.

§ 161.012–11 Approval tests.

(a) The approval tests described in this section must be conducted for each light submitted for Coast Guard approval. The tests must be conducted by a laboratory that has the equipment and procedures necessary to conduct the tests and that is free of influence and control of the applicant and other manufacturers, suppliers, and vendors of PFD lights.

(b) A sample light must be activated at night under clear atmospheric conditions. If the power source is water activated, two lights must be used; and one of the power sources must be immersed in fresh water and the other in salt water having the approximate salinity of sea water. The light, or lights, when activated must be seen from a distance of at least one nautical mile against a dark background.

(c) At least ten sample lights must be selected at random from a group of at least 25. Five samples must be submerged in salt water having the approximate salinity of sea water and the five other samples must be submerged in fresh water. Each light must then be activated and left submerged for eight hours. At least nine of the ten lights must operate continuously over the eight hour period. If the lights are flashing lights, at least nine of the ten must have a maximum period of not more than one second between flashes when first activated.

(d) Individual tests must be conducted on a sample light to determine whether the light meets the requirements of § 161.012–7.

§ 161.012–13 Production tests and inspections.

(a) The manufacturer of approved lights must randomly select a sample of ten lights from each lot of lights produced. Each lot must not exceed 1,000 lights. At least nine of the ten lights, when tested in accordance with the test described in § 161.012–11(c), must meet the test criteria prescribed by that section. If less than nine lights meet the test criteria, another random sample of ten lights must be taken and tested. If less than nine of these lights meet the test criteria, none of the lights in the lot may be marked with the Coast Guard approval number assigned to the lights.

(b) The Coast Guard does not inspect lights approved under this subpart on a regular schedule. However, the Commandant may select samples and conduct tests and examinations whenever necessary to determine whether the lights are being manufactured in compliance with the requirements in this subpart.

§ 161.012–15 Markings.

(a) Each light manufactured under Coast Guard approval must be permanently and legibly marked with—

(1) The manufacturer's name or trade mark that clearly identifies the model designation; and

(2) The Coast Guard approval number assigned to the light.

(b) The power source of each light must be permanently and legibly marked with its date of manufacture.

PART 164—MATERIALS

4. A new Subpart 164.018 would be added to Part 164 to read as follows:

Subpart 164.018—Retro-Reflective Material for Lifesaving Equipment

Sec.

164.018–1 Scope.
164.018–3 Classification.

Sec.

164.018–5 Federal specification.
164.018–7 Approval procedures.
164.018–9 Design requirements.
164.018–11 Approval tests.
164.018–13 Production inspection procedures.

§ 164.018–1 Scope.

This subpart prescribes design requirements, approval tests, and procedures for approving retro-reflective material used on lifesaving equipment.

§ 164.018–3 Classification.

The following types of retro-reflective material are approved under this specification:

(a) Type I.—Material used on flexible surfaces and rigid surfaces, except rigid surfaces that are continuously exposed.

(b) Type II.—Weather resistant material used on continuously exposed rigid surfaces.

§ 164.018–5 Federal specification.

(a) Federal Specification L–S–300C entitled "Sheeting and Tape, Reflective: Nonexposed Lens" forms a part of this specification. This Federal specification may be purchased from the Business Service Center, General Services Administration, Washington, D.C. 20407.

(b) When changes are made to this Federal specification, the effective date for their use as a part of the regulations in this subpart will be the effective date set by the issuing authority unless otherwise determined by the Coast Guard.

§ 164.018–7 Procedure for approval.

(a) An application for approval of retro-reflective material must be sent to the Commandant (G–MMT–3/83), U.S. Coast Guard, Washington, D.C. 20590.

(b) Each application for approval must contain the name and address of the applicant, a detailed description of the quality control procedures used in manufacturing the material, and a test report containing observations and results of approval testing conducted.

(c) The Commandant advises the applicant whether the retro-reflective material is approved. If the material is approved, an approval certificate is sent to the applicant.

§ 164.018–9 Design requirements.

(a) Type I retro-reflective material must be capable of being attached to lifesaving equipment either by sewing or by an adhesive. Type II material must be capable of being attached to lifesaving equipment either by mechanical fasteners or by an adhesive.

(b) If retro-reflective material is designed for use with an adhesive that is not applied when the material is manufactured, the proper adhesive to be used must be stated on the material or on the package in which the material is supplied to the user.

(c) When retro-reflective material designed for use with an adhesive is tested in accordance with the "adhesion" test method listed in § 164.018–11, the material must not peel for a distance of more than 5 cm. (2 in.).

(d) When dry material is tested in accordance with the "reflective intensity" test method listed in § 164.018–11, the reflective intensity of the material must be equal to or greater than the values for reflective intensity listed in Table 164.018–9.

(e) When wet material is tested in accordance with the "reflective intensity during rainfall" test method listed in § 164.018–11, the reflective intensity of the material must not be reduced by more than ten percent of the values listed in Table 164.018–9.

(f) The reflective intensity of material after testing in accordance with the "resistance to accelerated weathering" test method listed in § 164.018–11 must not be reduced by more than 50 percent of the values listed in Table 164.018–9.

(g) Retro-reflective material must not support fungus growth, and the reflective intensity of the material must not be reduced after testing in accordance with the "fungus resistance" test method listed in § 164.018–11.

(h) After retro-reflective material is tested in accordance with the "resistance to water immersion" test method listed in § 164.018–11, it must continue to have retro-reflective characteristics, except that retro-reflectivity is not required in the area extending 5 mm (0.2 inches) on each side of the cuts made in the material.

(i) Except as provided in paragraphs (c) through (h) of this section, retro-reflective material when tested in accordance with § 164.018–11 must meet the requirements prescribed in the test methods listed in Federal Specification L–S–300 for the materials.

TABLE 164.018–9.—*Reflective intensity.*

	Incidence angle [1] (in degrees)	Reflective intensity [1]
Divergence angle: [1]		
0.2	−4	150.0
0.2	+30	75.0
0.5	−4	57.0
0.5	+30	33.0
2.0	−4	2.5
2.0	+30	2.0

[1] These terms are described in Federal specification L–S–300.

§ 164.018–11 Approval testing.

(a) Retro-reflective material submitted for Coast Guard approval must be tested in accordance with the following test methods described in Federal Specification L–S–300:

(1) Test conditions.

(2) Test panels.

(3) Adhesion test method using a 0.79 kg (1.75 lb.) test weight. (This test method is required only for material that is designed for use with an adhesive).

(4) Flexibility test method and subtest methods "flexibility at standard conditions" and "flexibility at reduced temperatures," except that when testing Type I material a 1.5 mm (1/16 inch) mandrel must be used in place of the mandrel described in these test methods and the material must be unmounted.

(5) Solvent resistance.
(6) Reflective intensity.
(7) Resistance to accelerated weathering test method and subtest methods "reflective intensity after accelerated weathering," "reflective intensity during rainfall," and "adhesion after accelerated weathering." (The "adhesion after accelerated weathering" test method is required only for materials designed for use with an adhesive. The "resistance to accelerated weathering" test method must be performed for 250 hours, if testing Type I material, and for 1000 hours if testing Type II material).
(8) Resistance to heat, cold, and humidity.
(9) Resistance to water immersion test method except that the material must also be examined with a light for retro-reflective characteristics.
(10) Fungus resistance.
(11) Abrasion resistance.

(b) If material is designed for use with an adhesive, the "adhesion" test method required by paragraph (a)(3) of this section must be repeated using a 0.79 kg. (1.75 lb.) test weight and using each of the following materials as a test panel in place of the aluminum test panel required by this test method:

(1) Smooth panel of cured rigid polyester resin (Types I and II material).
(2) Cotton drill or canvas (Type I material only).
(3) Nylon fabric (Type I material only).
(4) Flexible vinyl sheeting (Type I material only).
(5) Natural or synthetic rubber sheeting (Type I material only).

(c) Each material listed in paragraph (b) of this section when used as a test panel must be bonded to a rigid backing.

§ 164.018–13 Production inspections.

The Coast Guard does not inspect retro-reflective material approved under this subpart on a regular schedule. However, the Commandant may select samples and conduct tests and examinations whenever necessary to determine whether retro-reflective material is being manufactured in compliance with the requirements of this subpart.

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11021, as amended, and OMB Circular A–107.

Dated: May 11, 1977.

O. W. SILER,
Admiral,
U.S. Coast Guard Commandant.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

(Docket No. 21239; RM–2803)

FM BROADCAST STATIONS IN BONITA SPRINGS, JENSEN BEACH, JUPITER, MIAMI, DELRAY BEACH, AND POMPANO BEACH, FLORIDA

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed Rule Making and Order to Show Cause.

SUMMARY: In response to a petition filed by Gold Coast Broadcasting Corporation, a Notice of Proposed Rule Making is released proposing the substitution of Class C Channel 241 for Channel 240A currently assigned to Bonita Springs, Florida. Because of spacing requirements, channel assignment changes are proposed for five other Florida cities. An Order to Show Cause is directed to two current license holders who would be affected by the proposal.

DATES: Comments must be received on or before June 27, 1977, and reply comments must be received on or before July 18, 1977.

ADDRESSES: Send comments to: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Victor D. Ines, Broadcast Bureau, Policy and Rules Division, 202–632–7792.

SUPPLEMENTARY INFORMATION:

Adopted: May 11, 1977.

Released: May 18, 1977.

In the matter of amendment of § 73.202(b), Table of assignments, FM Broadcast Stations. (Bonita Springs, Florida).

1. *Petitioner, Proposed and Comments.*—(a) Notice of Proposed Rule Making is given concerning amendment of the FM Table of Assignments (§ 73.202 (b) of the Commission's Rules and Regulations) as concerns Bonita Springs, Florida.

(b) A petition for rule making was filed by Gold Coast Broadcasting Corporation ("petitioner"), through counsel, proposing the substitution of Class C Channel 241 for Channel 240A currently licensed to petitioner in Bonita Springs, Florida. In order for the proposed Channel 241 substitution to meet Commission spacing requirements with present transmitter sites of adjacent and co-channel facilities, petitioner also proposes three additional changes in the Table of Assignments. First, Channel 272A is proposed as a substitution for Channel 296A currently assigned to Jensen Beach, Florida.[1] Second, Channel 296A is proposed as a substitution for Channel 244A licensed to Lighthouse Broadcasting (WRYZ–FM) in Jupiter, Florida. And third, Channel 243 is proposed as a substitution for Channel 242 licensed to Bartell Broadcasting of Florida, Inc. (WMJX–FM) in Miami, Florida.[2] No oppositions have been received.

2. *Community Data.*—(a) *Location:* Bonita Springs is located on the southwest coast of Florida, approximately midway between Fort Myers and Naples, Florida.

(b) *Population:* Bonita Springs, 1,932; Lee County, 105,216 (1970 U.S. Census).

(c) *Local Broadcast Service:* WLEQ–FM (Channel 240A) licensed to petitioner, is the only currently assigned aural service in Bonita Springs.

(d) *Economic Data:* Petitioner indicates that, with an average year-round temperature of 77.4°, Bonita Springs is an ideal vacationing and retirement area which experiences a great influx of tourists in the winter months. Approximately one-third of the community's working force is engaged in agriculture, one-third in construction, and one-third in sales and service related occupations. Petitioner has furnished data predicting rapid growth for the community, and it would initially appear that Bonita Springs and the surrounding area could economically support the requested assignment.

3. *Preclusion Considerations:* A preclusion study was made for all the channels involved in the proposal (Channels 241, 272A, 296A and 243). Additional preclusion occurs on Channels 240A, 244A and 272A. The preclusion on Channel 240A occurs in the southwestern coastal regions of the Everglades. The preclusion on Channel 272A occurs in Lake Okeechobee. Since these preclusions occur over a body of water or marsh or over sparsely populated areas, they appear to be of little significance. However, the preclusion on Channel 244A occurs off the coast of southern Florida in an area of the Florida Keys.[3] Petitioner has indicated that Channels 228A, 272A, 276A or 280A could be assigned to this precluded area. Additionally, if the proposed substitution of Channel 272A is made at Jensen Beach, Florida, spacing considerations will prevent Channel 274 presently used at Pompano Beach, Florida, from ever relocating within Delray Beach, Florida, the city to which that channel is currently assigned.[4] Since the substitution of Jensen Beach can only be accomplished if Channel 274 remains at Pompano Beach, the Table of FM channel assignments should be amended accordingly to reflect this location restriction. Although petitioner does not include this change as part of his current petition, we will propose the change as this would additionally bring the assignment into conformity with the present provisions of Section 73.203(b) which no longer allows a channel assigned to one city to be used at a different city if the distance between the two communities exceed 15 miles as is the case here.

4. *Coverage.* The petitioner shows that a Class C station operating with proposed facilities of 100 kW ERP and a 550 foot antenna would provide a 1mV/m service contour over an area of approximately 7,086 square kilometers (2,736 square miles) to 156,015 persons. In addition, a showing was made of other FM services located within the proposed service area and this data indicated that all portions of the described service area are currently receiving from one to eight FM services.

5. *Comments.* (a) Although petitioner has asserted sufficient need and interest to warrant issuance of this Notice to further pursue the possibility of making the changes proposed, petitioner should indicate the portion of the area and population that would be receiving the proposed second FM service. Petitioner should also indicate whether there are any areas and populations that would receive a second aural service.[5]

(b) Regarding petitioner's request to substitute Class C Channel 241 for its currently assigned Class A channel, the current Commission policy regarding such modification requests is that the public interest is best served where interested parties are given an equal opportunity to apply for any newly assigned channel.[6] Since no other parties have thus far expressed an interest in the proposed Class C Channel 241 in Bonita Springs, we are proposing to make the requested modification. However, should another party oppose the proposed modification and express an appropriate interest in the Channel 241 assignment in comments to this Notice, comparative consideration must be afforded to any competing application for the channel assigned. Additionally, since petitioner's request would require deletion of the Class A assignment, petitioner should indicate whether other Class C channels would be available for assignment.

(c) As indicated above, since Stations WRYZ–FM, Jupiter, Florida, and WMJX–FM, Miami, Florida, would be required to change frequencies if the proposed assignment is made, they must be given the opportunity to indicate whether they consent to or are opposed to the changes proposed and the Order to Show Cause is adopted for this purpose. Their general comments on the appropriateness of the proposal are also invited.

PROPOSED AMENDMENT TO THE FM TABLE OF ASSIGNMENTS

6. In view of the above, the Commission proposes to amend the FM Table of Assignments (§ 73.202(b) of the Commission's Rules and Regulations) with regard to the communities below as follows:

City	Channel No. Present	Channel No. Proposed
Bonita Springs, Fla.	240A	241
Jensen Beach, Fla.	296A	272A
Jupiter, Fla.	244A	296A
Miami, Florida	226, 242, 247, 256, 268, 198	226, 243, 247, 256, 268, 208
Delray Beach, Fla.	274	
Pompano Beach, Fla.		274

7. *It is ordered,* That pursuant to Section 316(a) of the Communications Act of 1934, as amended, the licensee of Station WRYZ–FM, Jupiter, Florida, shall show cause why its license should not be modified to specify operation on Channel 296A if the Commission determines that the public interest would best be served by adopting the proposed assignment.

8. *It is further ordered,* That pursuant to Section 316(a) of the Communications Act of 1934, as amended, the licensee of Station WMJX–FM, Miami, Florida, shall show cause why its license should not be modified to specify operation on Channel 243 if the Commission determines that the public interest would best be served by adopting the proposed assignment.

9. Pursuant to Section 1.87 of the Commission's Rules and Regulations, the licensees of Stations WRYZ and WMJX may, not later than June 27, 1977, request that a hearing be held on the proposed modification. Pursuant to § 1.87(f), if the right to request a hearing is waived, WRYZ and WMJX may, not later than June 27, 1977, file a written statement showing with particularity why their licenses should not be modified as proposed in this Order to Show Cause. In this case, the Commission may call on WRYZ and WMJX to furnish additional information, designate the matter for hearing, or issue, without further proceedings, an Order modifying the license as provided in the Order to Show Cause. If the right to request a hearing is waived and no written statement is filed by the date referred to above, WRYZ and WMJX will be deemed to consent to modification as proposed in the Order to Show Cause and a final Order will be issued by the Commission, if the channel changes mentioned above are found to be in the public interest.

10. *Authority:* The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

11. *Comments and Replies:* Interested persons and parties may file comments on or before June 27, 1977, and reply comments on or before July 18, 1977.

12. *It is further ordered,* That the Secretary of the Commission shall send a copy of this Order by certified mail, return receipt requested, to Station WRYZ–FM, Lighthouse Broadcasting, Radio Park, Jupiter, Florida 33458, and Station WMJX–FM, Bartell Broadcasting of Florida, Inc., 825 41st Street, Miami Beach, Florida 33140, the parties to whom the Order to Show Cause is directed.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who

[1] There are currently four applicants for the Jensen Beach 296A frequency, and petitioner requests that the channel on which the successful Jensen Beach applicant will operate on should be conditioned on the outcome of this rule making.

[2] Petitioner agrees to meet the "reasonable costs" which would be incurred, under applicable Commission precedents, in the event the Jupiter and Miami stations are required to change channels.

[3] Marathon, Florida (pop. 3,097) lies in this area, and is presently assigned fulltime AM Station WFFG and WMUM–FM on Channel 232A.

[4] Under previous Commission Rules, Channel 274 was allowed to be used at Pompano Beach even though the channel was assigned to Delray Beach. The current Rules (§ 73.203(b)) will not allow this situation if the cities involved are more than 15 miles apart.

[5] See Anamosa and Iowa City, Iowa, 46 F.C.C. 2d 520 (1974). A showing of second service is important, as ordinary we would not assign a Class C channel to a community as small as Bonita Springs.

[6] See Cheyenne, Wyoming, 62 F.C.C. 2d 63 (1976).

filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission Rules.)

5. *Number of copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATOR, EMERGENCY NATURAL GAS ACT OF 1977

[Docket No. E77-103]

MID LOUISIANA GAS CO.

Emergency Order

On May 12, 1977, Mid Louisiana Gas Company (Mid Louisiana) filed, pursuant to Section 6 of the Emergency Natural Gas Act of 1977 (Act), Pub. L. 95-2 (91 Stat. 4 (1977)), a petition to make certain emergency purchases of natural gas from Houston Pipeline Company (Houston). Mid Louisiana also requested permission to have this gas transported. For the reasons set forth below, I authorize the emergency purchases of natural gas and the transportation requested.

By contract dated May 2, 1977, Mid Louisiana agreed to purchase up to 900,000 Mcf of gas at a rate of up to 15,000 Mcfd on a best efforts basis from Houston at a mutually agreeable point of delivery. The contract between Mid Louisiana and Houston is to begin on the date of first delivery of gas and to remain in effect for a period of sixty consecutive days thereafter.

Mid Louisiana will purchase these supplies at a price of $2.20 per MMBtu inclusive of all state and local taxes and other adjustments. I find this price to be fair and equitable in accordance with Order No. 2.

Mid Louisiana advises that a series of arrangements have been made for the transportation of the subject gas. Transcontinental Gas Pipeline Corporation (Transco) has agreed to transport the subject gas from a mutually agreeable point of delivery on its existing pipeline facilities located in Fort Bend County, Texas to an existing interconnection between the facilities of Mid Louisiana and Transco in St. James Parish, Louisiana. Mid Louisiana has agreed to pay Transco a transportation charge of 12.25 cents per dekatherm plus three percent of the volume for use as compressor fuel. If additional measuring facilities must be constructed by Transco, Mid Louisiana has agreed to reimburse a portion of this cost. I find no basis for prescribing other charges since the parties have agreed upon the transportation charges.

According to the official files of the Federal Power Commission, Houston is not classified as a natural gas company within the meaning of the Natural Gas Act. Section 6(b)(1)(A) of the Act provides in part that "(t)he provisions of the Natural Gas Act shall not apply • • • to any sale to an interstate pipeline • • • under the authority of subsection (a) or to any transportation by an intrastate pipeline in connection with such sale • • •." 91 Stat. at 8. In addition § 6(c)(2) provides:

Compliance by any pipeline with any order under this subsection shall not subject such pipeline to regulation under the Natural Gas Act or to regulation as a common carrier under any provisions of state law.

Midland Louisiana advises and I find that the gas made available by Houston will result in a commingling of interstate natural gas with Houston's normal intrastate system gas supply and with volumes of gas owned by other parties. The contractual provisions between Houston and its producers, transporters and other suppliers of gas prohibit the sale of natural gas in interstate commerce and the commingling of their intrastate pipeline system gas supplies with gas moving in interstate commerce. The sale, transportation and delivery of gas for which Midland Louisiana seeks approval may result in some commingling of interstate natural gas with Houston's normal intrastate gas supplies and with gas owned by other third parties. This order shall be considered as applying to all such commingled gas.

Under the provisions of section 9 (b), (c) of Pub. L. 95-2 (91 Stat. 4.9), the suppliers of such gas, which is so commingled, may not terminate existing contracts with Houston or such other parties or require a redetermination of prices provided in such contracts by reasons of this transaction. Contractual termination, prohibition or redetermination provisions in any such contracts referred to above are not enforceable by reason of Section 9 of Pub. L. 95-2 since Houston is selling, delivering and transporting gas for Midland Louisiana pursuant to Section 6(a) of that Act. Houston and any third person whose gas is commingled with mid Louisiana's gas shall refer all relevant information concerning any attempt to terminate existing contracts or require a redetermination of prices to the Administrator for appropriate action.

Midland Louisiana shall submit weekly reports as required by Order No. 4.

Pursuant to Section 6(a) of the Act, I hereby authorize Houston to sell to Midland Louisiana up to 15,000 Mcfd of natural gas on the terms and conditions set forth in Midland Louisiana's filing in 6(c)(1) of the Act, I hereby authorize and order Houston to transport gas for Midland Louisiana.

This order is issued pursuant to the authority delegated to me by the President in Executive Order No. 11969 (February 2, 1977), and shall be served upon Midland Louisiana and Houston. This order shall be published in the FEDERAL REGISTER.

This order and authorization granted herein are subject to the continuing authority of the Administrator under Pub. L. 95-2 and the rules and regulation which may be issued thereunder.

RICHARD L. DUNHAM,
Administrator.

MAY 16, 1977.

DEPARTMENT OF AGRICULTURE

Forest Service

PROPOSED RECONSTRUCTION OF THE BIG CREEK DAM EIS—THE SELWAY-BITTERROOT WILDERNESS WITH PROVISIONS FOR THE USE OF MOTORIZED EQUIPMENT

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Proposed Reconstruction of the Big Creek Dam EIS—The Selway-Bitterroot Wilderness with Provisions for the Use of Motorized Equipment, Forest Service Report Number USDA-FS-DES(Adm) 77-02.

The environmental statement concerns the proposed reconstruction of the existing Big Creek Dam located at the outlet of Big Creek Lakes in the Selway-Bitterroot Wilderness, Montana.

This draft environmental statement was transmitted to CEQ on May 17, 1977.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3210, 12th St. and Independence Ave. SW., Washington, DC 20013.
USDA, Forest Service, Northern Region, Federal Building, Missoula, MT 59807.
USDA, Forest Service, Bitterroot National Forest, 316 North Third Street, Hamilton, MT 59840.

A limited number of single copies are available upon request to:

USDA, Forest Service, Bitterroot National Forest, 316 North Third Street, Hamilton, MT 59840.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any

environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor Robert S. Morgan, Bitterroot National Forest, 316 North Third Street, Hamilton, MT 59840.

Comments must be received by July 17, 1977, in order to be considered in the preparation of the final environmental statement.

EINAR L. ROGET,
Acting Deputy Chief,
Forest Service.

MAY 17, 1977.

COMMISSION ON CIVIL RIGHTS

IOWA ADVISORY COMMITTEE

Meeting Amendment

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Iowa Advisory Committee (SAC) of the Commission a notice previously published in the FEDERAL REGISTER Friday, April 1, 1977, (FR Doc. 77-9732 on page 17508 is hereby amended. The meeting will be held at 2101 Fleur Drive, Room 226, Holiday Inn South, Des Moines, Iowa 50315 instead of Estes Residence 944 9th Avenue.

The date and time of the meeting will remain the same.

Dated at Washington, D.C., May 18, 1977.

JOHN I. BINKLEY,
Advisory Committee
Management Officer.

[FR Doc.77-14518 Filed 5-20-77;8:45 am]

IOWA ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a factfinding meeting of the Iowa Advisory Committee (SAC) of the Commission will convene at 5 p.m. on June 15, 1977 and will end at 1 p.m. on June 16, 1977, at City Council Chambers, East 1st and Locust Street, Des Moines, Iowa.

Persons wishing to attend this open meeting should contact the Committee Chairperson, or the Central States Regional Office of the Commission, Old Federal Office Building, 911 Walnut Street, Room 3103, Kansas City, Missouri 64106.

The purpose of this Advisory Committee hearing is to receive testimony on the administration and implementation of the Comprehensive Employment and Training Act program in the Greater Des Moines area.

This meeting will be conducter pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., May 18, 1977.

JOHN I. BINKLEY,
Advisory Committee
Management Officer.

SAN FRANCISCO, CALIFORNIA

Hearing on Age Discrimination

Notice is hereby given pursuant to the provisions of the Civil Rights Act of 1957, as amended, 42 U.S.C. 1975 et seq. (1976), that the U.S. Commission on Civil Rights will hold a public hearing dealing specifically with the provisions of the Age Discrimination Act of 1975, enacted as part of the Older Americans Amendments of 1975, 42 U.S.C. 6101 et seq. (1976). The hearing will be held on June 27 and June 28, 1977, in San Francisco, California at the Hastings College of the Law, University of California, 198 McAllister Street, Moot Court, 4th Floor, Room 423, San Francisco, California. An Executive Session, if appropriate, will be convened on June 27 at the Hastings College of the Law, University of California, 198 McAllister Street, Moot Court, 4th Floor, Room 423, San Francisco, California.

The purpose of the hearing is to elicit the views of interested parties, including Federal departments and agencies, on issues relating to age discrimination in programs and activities receiving Federal financial assistance and particularly with respect to the reasonableness of distinguishing on the basis of age among potential participants in, or beneficiaries of, specific federally assisted programs.

The hearing will focus particular attention on the following programs and activities: Comprehensive Employment and Training Act Public Service Employment Programs; Community Mental Health Centers; Community Health Centers; Vocational Rehabilitation, Legal Services; Title XX of the Social Security Act; Food Stamps; Medicaid, and selected areas within Education.

Dated at Washington, D.C., May 17, 1977.

ARTHUR S. FLEMMING,
Chairman.

PETTYJOHN BROTHERS SHOE MANUFACTURING, INC.

Petition for Determination of Eligibility To Apply for Trade Adjustment Assistance

A petition by Pettyjohn Brothers Shoe Manufacturing, Inc., 601–603 Twelfth Street, Lynchburg, Virginia 24505, a producer of footwear for infants and children, was accepted for filing on May 13, 1977, pursuant to section 251 of the Trade Act of 1974 (Pub. L. 93–618) and § 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315). Consequently, the United States Department of Commerce has initiated an investigation to determine whether increased imports into the United States of articles like or directly competitive with those produced by the firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of the petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of June 2, 1977.

JACK W. OSBURN, JR.,
Chief Trade Act Certification Division, Office of Planning and Program Support.

MARITIME ADMINISTRATION

[Docket No. S-558]

OVERSEAS BULKTANK CORP. AND INTERCONTINENTAL BULKTANK CORP.

Application

Notice is hereby given that Overseas Bulktank Corporation (Overseas) and Intercontinental Bulktank Corporation (Intercontinental), affiliated companies, 1114 Avenue of the Americas, New York, New York 10036, have filed a letter application dated April 28, 1977, with the Maritime Subsidy Board (the Board), pursuant to Title VI of the Merchant Marine Act, 1936, as amended (the Act), to add one vessel each to their Operating-Differential Subsidy Agreements (OSDA), Contract Nos. MA/MSB–218 and MA/MSB–216, respectively, to expire December 31, 1977, unless extended, in the carriage of export bulk raw and processed agricultural commodities in the foreign commerce of the United States (U.S.) from ports in the U.S. to ports in the Union of Soviet Socialist Republics (U.S.S.R.), or other permissible ports of discharge. Dry or liquid bulk cargoes may be carried from the U.S.S.R. and other foreign ports inbound to U.S. ports during voyages subsidized for carriage of export bulk raw and processed agricultural commodities to the U.S.S.R., or other permissible ports of discharge.

Overseas has applied to include the ST *Overseas Valdez*, 37,814 deadweight tons (DWT), in MA/MSB–218 and Intercontinental has applied to include the ST *Overseas Alice*, 37,314 DWT, in MA/MSB–216. Both have been bareboat chartered to Sea Tankers, Inc (Tankers), 1114 Avenue of the Americas, New York, New York 10036, an affiliate of Overseas and Intercontinental, and included in Tankers' ODSA, MA/MSB–233. These bareboat charters are due to expire on May 23, 1977 and June 10, 1977.

Full details concerning the U.S.-U.S.S.R. export bulk raw and processed agricultural commodities subsidy program, including terms, conditions and restrictions upon both the subsidized operators and vessels, appear in Title 46 of the Code of Federal Regulations, Part 294.

For purposes of section 605(c) of the Act, it should be assumed that should the Board grant the requested approval, the vessels named above will engage in the described trade, on a full-time basis, during the indicated time period. Under such approval, each voyage must be approved for subsidy assistance prior to its commencement, and the Board will act on such request(s) as an administrative matter for which there is no requirement for further section 605(c) notice(s).

Any person having an interest in the granting of the application and who would contest a finding by the Board that the service now provided by vessels of U.S. registry for the carriage of cargoes previously specified is inadequate, must on or before June 2, 1977, notify the Board's Secretary, in writing, of his interest and of his position; and file a petition for leave to intervene in accordance with the Board's Rules of Practice and Procedure (46 CFR Part 201). Each such statement of interest and petition for leave to intervene shall state whether a hearing is requested under section 605(c) of the Act and, with as much specificity as possible, the facts that the intervenor would undertake to prove at such hearing.

In the event a hearing under section 605(c) of the Act is ordered to be held with respect to the subject application, the purposes of such hearing will be to receive evidence relevant to (1) whether the application herein described, with respect to the vessels to be operated in an essential service and served by citizens of the U.S., would be in addition to the existing service or services, and if so, whether the service already provided by the vessels of U.S. registry is inadequate, and (2) whether in the accomplishment of the purposes and policy of the Act additional vessels should be operated thereon.

If no request for hearing and petition for leave to intervene is received within the specified time, or if the Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing, the Board will take such action as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program No 11.504 Operating-Differential Subsidy (ODS).)

Dated: May 18, 1977.

By order of the maritime Subsidy Board, Maritime Administration.

JAMES S. DAWSON, JR.,
Secretary.

ACTIVITIES OF ADVISORY COMMITTEES

Public Availability of Report on Closed Meetings

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I, Supp. V, 1975) and Office of Management and Budget Circular No. A–63 of March 27, 1974, those advisory committees of the Department which held meetings in 1976 that were closed to the public have prepared reports on the activities of these meetings. Copies of the reports have been filed and are available for public inspection at two locations:

Library of Congress, Rare Book Reading Room, Room 256, Main Building, 10 First Street SE., Washington, D.C. 20540.

Department of Commerce, Central Reference and Records Inspection Facility, Room 5316, Main Commerce Building, 14th Street between Constitution Avenue and E Streets NW., Washington, D.C. 20230.

The reports cover the closed and partially closed meetings of thirty-eight committees and twelve subcommittees, the names of which are listed below.

COMMITTEE (SUBCOMMITTEE)

Computer Peripherals, Components, and Related Test Equipment Technical Advisory Committee.
Computer Systems Technical Advisory Committee.
Foreign Availability Subcommittee.
Hardware Subcommittee.
Technology Transfer Subcommittee.
Electronics Instrumentation Technical Advisory Committee.
Industry Policy Advisory Committee for Multilateral Trade Negotiations (MTN).
Industry Sector Advisory Committee (ISAC) on Aerospace Equipment for MTN.
ISAC on Automotive Equipment for MTN.
ISAC on Communication Equipment and Non-Consumer Electronic Equipment for MTN.
ISAC on Construction, Mining, Agricultural, and Oil Field Machinery and Equipment for MTN.
ISAC on Consumer Electronic Products and Household Appliances for MTN.
ISAC on Drugs, Soaps, Cleaners, and Toilet Preparations for MTN.
ISAC on Electrical Machinery, Power Boilers, Nuclear Reactors, and Engines and Turbines for MTN.
ISAC on Ferrous Metals and Products for MTN.
ISAC on Food and Kindred Products for MTN.

ISAC on Hand Tools, Cutlery, and Tableware for MTN.
ISAC on Industrial Chemicals and Fertilizers for MTN.
ISAC on Leather and Products for MTN.
ISAC on Lumber and Wood Products for MTN.
ISAC on Machine Tools—Other Metalworking Equipment, and Other Nonelectrical Machinery for MTN.
ISAC on Miscellaneous Manufactures, Toys, Muscial Instruments, Furniture, Etc., for MTN.
ISAC on Nonferrous Metals and Products for MTN.
ISAC on Office and Computing Equipment for MTN.
ISAC on Other Fabricated Metal Products for MTN.
ISAC on Paint, Gum and Wood Chemicals, and Miscellaneous Chemical Products for MTN.
ISAC on Paper and Products for MTN.
ISAC on Photographic Equipment and Supplies for MTN.
ISAC on Railroad Equipment and Miscellaneous Transportation Equipment for MTN.
ISAC on Retailing for MTN.
ISAC on Rubber and Plastics Materials for MTN.
ISAC on Scientific and Controlling Instruments for MTN.
ISAC on Stone, Clay, and Glass Products for MTN.
ISAC on Textiles and Apparel for MTN.
National Advisory Committee on Oceans and Atmosphere.
North Pacific Fishery Management Council.

COMMODITY FUTURES TRADING COMMISSION

PROPOSED FUTURES CONTRACTS

Availability

In accordance with its established policy, the Commodity Futures Trading Commission ("Commission") is making available copies of the following proposed futures contracts submitted for contract market designation pursuant to sections 5 and 5a of the Commodity Exchange Act, as amended.

1. Gold submitted by the New York Mercantile Exchange.
2. Crude Coconut Oil submitted by the Chicago Mercantile Exchange.
3. Stud Lumber submitted by the Chicago Mercantile Exchange.

Copies of these proposed contracts will be available at the Commission's offices in Washington, New York, Chicago, Minneapolis, Kansas City and San Francisco. Additionally, the Commission will furnish copies of these proposed contracts upon request to the Executive Secretariat.

Any person interested in expressing his views on the terms and conditions of any of the proposed contracts should send his comments by June 22, 1977 to Ms. Jane Stuckey, Executive Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581. Copies of all comments will be available for inspection at the Commission's Washington office.

Issued in Washington on May 17, 1977.

WILLIAM T. BAGLEY,
Chairman.

CONSUMER PRODUCT SAFETY COMMISSION

NATIONAL ADVISORY COMMITTEE FOR THE FLAMMABLE FABRICS ACT

Meeting

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of meeting: National Advisory Committee for the Flammable Fabrics Act.

SUMMARY: This notice announces a meeting of the National Advisory Committee on Monday, June 6, 1977, from 9:30 a.m. to 5 p.m., and Tuesday, June 7, 1977, from 9:30 a.m. to 1 p.m., in the third floor hearing room, 1111 18th Street NW., Washington, D.C.

SUPPLEMENTARY INFORMATION: The National Advisory Committee provides advice and recommendations on Commission proposals and plans to reduce the frequency and severity of burn injuries involving flammable fabrics.

Agenda topics tentatively scheduled include a discussion of wearing apparel, information and education activities in the area of flammability, and a discussion of the Commission's priority-setting mid-year review of its activities.

The meeting is open to the public; however, space is limited. Persons who wish to make oral or written presentations to the Advisory Committee should notify the Office of the Secretary (see address below) by May 31, 1977. The notification should list the name of the individual who will make the presentation, the person, company, group, or industry on whose behalf the presentation will be made, the subject matter, and the approximate time requested.

CONTACT PERSON FOR ADDITIONAL INFORMATION:

Dee Wilson, Assistant Secretary, Office of the Secretary, Suite 300, 1111 18th Street NW., Washington, D.C. 20207, telephone 202-634-7700.

Dated: May 19, 1977.

SADYE E. DUNN,
Deputy Secretary.

[FR Doc.77-14666 Filed 5-20-77;8:45 am]

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

GENERAL ADVISORY COMMITTEE

Meeting

MAY 19, 1977.

Pursuant to provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770) in accordance with the purpose of Section 26 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2036) and Section 104(d) of the Energy Reorganization Act of 1974 (42 U.S.C. 5814), notice is hereby given that the General Advisory Committee will hold a meeting on June 7 and 8 in Washington, D.C. The following constitutes that portion of the Committee's agenda for the above meeting which will be open to the public. The open sessions will be held in Room 4222C at ERDA Headquarters Building, 20 Massachusetts Avenue, NW., Washington, D.C.:

JUNE 7—20 MASSACHUSETTS AVENUE, NW., WASHINGTON, D.C.

9:00—5:00 p.m.—GAC's Solar Study.
7:00—9:00 p.m.—GAC's Business Session.

JUNE 8— 20 MASSACHUSETTS AVENUE, NW., WASHINGTON, D.C.

9:00—10:00 a.m.—Briefing on Synthetic Fuels Commercialization.
10:00—11:00 a.m.—Briefing on Near- and Long-Term Conservation Technologies.
11:00—12:00 noon—Briefing on International Reaction to the National Energy Policy.
1:00—2:00 p.m.—Briefing on Waste/Storage Current Status of Plans for Disposal.

In addition to the above agenda items, the Committee will meet in closed session with staff in sessions not open to the public under the authority of Section 10 (d) of Pub. L. 92-463 as follows:

JUNE 8

2:00—3:00 p.m.—Briefing by National Academy of Sciences Committee on Nuclear and Alternative Energy Studies (CONAES) (Exemption 4 of 5 U.S.C. 552b(c)).
3:00—5:00 p.m.—Briefing: Alternative Enrichment Technologies and reprocessing (Exemptions 1 and 3 of 5 U.S.C. 552b(c)).

Those sessions will involve information exempt from disclosure under 5 U.S.C. 552b(c), exemptions (1), (3), and (4).

I have determined that it is necessary to close these portions of the meeting to receive and discuss information which falls within exemptions (1), (3), and (4) of 5 U.S.C. 552b(c). Any non-exempt material that may be discussed at these sessions will be inextricably intertwined with the discussion of exempt material and no further separation is practical. It is essential to close such portions of the meeting to protect such classified and privileged information.

Practical considerations may dictate alterations in the above agenda or schedule.

The Chairman is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business.

With respect to public participation in agenda items, scheduled above, the following requirements shall apply:

(a) Persons wishing to submit written statements on agenda items may do so by mailing 13 copies thereof, postmarked no later than May 31, 1977, to the Secretary, General Advisory Committee, U.S. Energy Research and Development Administration, Washington, D.C. 20545. Comments shall be based on the above agenda items. Minutes of the meeting will be kept open for 30 days for the receipt of written statements for the record.

(b) Information as to whether the meeting has been rescheduled or relocated can be obtained by a prepaid telephone call to the Office of the Secretary of the Committee on 202-376-4678 between 8:30 a.m. and 5 p.m., eastern time. Members of the public who are interested in attending are urged to call since the location or schedule may change.

(c) Questions at the meeting may be propounded only by members of the General Advisory Committee.

(d) Seating to the public will be made available on a first-come, first-served basis.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the course of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(f) Copies of the minutes will be made available for copying, following their certification by the Chairman, in accordance with the Federal Advisory Committee Act, at the Energy Research and Development Administration's Public Document Room, 20 Massachusetts Avenue NW., Washington, D.C. 20545, upon payment of all charges required by law.

HARRY PEEBLES,
Deputy Advisory Committee Management Officer.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 731-8; OPP-50294]

ABBOTT LABORATORIES

Issuance of Experimental Use Permits

The Environmental Potection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 275-EUP-13. Abbott Laboratories, North Chicago, Illinois 60064. This experimental use permit allows the use of 266.34 pounds each of the plant growth regulators gibberellic acid and N-[phenylmethyl]-1H-purin-6-amine on apples to evaluate improvement of typiness or shape of the fruit. A total of 8,496 acres is involved; the program is authorized only in the States of Alabama, Arkansas, California, Colorado, Connecticut, Georgia, Idaho, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, Tennessee, Utah, Vermont, Virginia, Washington, West Virginia, and Wisconsin. The experimental use permit is effective from April 5, 1977, to June 1, 1978. Temporary tolerances for residues of the active ingredients in or on apples have been established.

No. 275-EUP-16. Abbott Laboratories, North Chicago, Illinois 60064. This experimental use permit allows the use of 1.25 pounds each of the plant growth regulators gibberellic acid and N-[phenylmethyl]-1H-purin-6-amine in a tank mixture on apples to evaluate improvement of typiness or shape of the fruit. A total of 40 acres is involved; the program is authorized only in the States of California, Colorado, Georgia, Idaho, Illinois, Michigan, New York, North Carolina, Ohio, Oregon, Pennsylvania, South Carolina, Utah, Vermont, Virginia, Washington, and West Virginia. The experimental use permit is effective from April 5, 1977, to June 1, 1978. Temporary tolerances for residues of the active ingredients in or on apples have been established.

Interested parties wishing to review the experimental use permits are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St. SW., Washington, D.C. 20460. It is suggested that such interested persons call 202-755-4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4 p.m. Monday through Friday.

(Sec. 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 1 6(a) et seq.).)

Dated: May 11, 1977.

MARTIN H. ROGOFF,
Acting Director, Registration Division.

[FRL 732-1]

HENRY D. SMITH

Approval of State Application for Nebraska Drinking Water Primary Enforcement Responsibility

In accordance with the provisions of Section 1413 of the Safe Drinking Water Act (SDWA), (88 Stat. 1661; 42 U.S.C. 300f et seq.) and 40 CFR 142 (41 FR 2918, January 20, 1976), Dr. Henry D. Smith, Director of Health, Nebraska State Department of Health, has submitted to the Environmental Protection Agency (EPA) an application to assume primary enforcement responsibility over public water supply systems in the state of Nebraska.

Notice is hereby given that the Regional Administrator, EPA, Region VII, has approved this application for primary enforcement authority, to become effective on June 22, 1977. This action is based on a thorough evaluation of the state's public water supply supervision program in relation to the requirements of 40 CFR 142.10, including the adoption and implementation of:

1. State primary drinking water regulations;
2. An inventory of public water supply systems;
3. A systematic program of sanitary surveys;
4. A state program for certification of laboratories;
5. State laboratory facilities certified by EPA;
6. A public water supply system plan review program;
7. Adequate statutory or regulatory enforcement authority;
8. Record-keeping and reporting procedures;
9. A program for issuing variances and exemptions;
10. A plan for providing safe drinking water under emergency circumstances.

This evaluation has shown that the Nebraska program fulfills all requirements for obtaining primary enforcement authority.

Any interested person may request a public hearing to consider the Regional Administrator's determination on or before June 22, 1977. If a public hearing is requested and granted, this determination shall not become effective until such time, following the hearing, as the Regional Administrator issues an order affirming or rescinding the determination. Requests for hearing shall be addressed to:

Charles V. Wright, Acting Regional Administrator, U.S. Environmental Protection Agency, 1735 Baltimore, Kansas City, Missouri 64108.

and shall include the following information:

1. The name, address, and telephone number of the individual, organization, or other entity requesting a hearing.
2. A brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such hearing.
3. The signature of the individual making the request; or, if the request is made on be-

half of an organization or other entity, the signature of a responsible official of the organization or other entity.

A complete copy of the Nebraska application for primary enforcement responsibility is available for public inspection during normal business hours at the Office of the Regional Administrator and at the following location in Nebraska:

The Nebraska State Department of Health, Division of Environmental Engineering, 301 Centennial Mall South, Lincoln, Nebraska 68509.

Dated: May 13, 1977.

CHARLES V. WRIGHT,
Acting Regional Administrator, Region VII.

[FRL 731-5; OPP-50298]

ARMY ENVIRONMENTAL HYGIENE AGENCY, ET AL.

Issuance of Experimental Use Permits

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 38349-EUP-2. U.S. Army Environmental Hygiene Agency, Fort George G. Meade, Maryland 20755. This experimental use permit allows the use of 22 pounds of the insecticide temephos in three effluent drainage canals to evaluate control of black fly larvae. The total area involved is 3.6 km.; the program is authorized only in the State of Tennessee. The experimental use permit is effective from April 14, 1977, to April 14, 1978.

No. 6296-EUP-1. Nutrilite Products, Inc., Buena Park, California 90620. This experimental use permit allows the use of 94 ounces of pyrethrin and 56.2 ounces of *Bacillus thuringiensis* Berliner as insecticides on ornamental flowers and various raw agricultural products to evaluate control of various insects. The program is authorized in the contiguous 48 States, Alaska, and Hawaii. The experimental use permit is effective from April 14, 1977, to April 14, 1978. Exemptions from the requirement of a tolerance for residues of the active ingredients in or on raw agricultural commodities have been established (40 CFR 180.1011 and 40 CFR 180.1001 (b) (7)).

No. 10464-EUP-4. Weyerhaeuser Company, Centralia, Washington 98531. This experimental use permit allows the use of 59.5 pounds of the herbicide 3-Cyclohexyl-6-(dimethylamino) - 1 - methyl - 1,3,5 - triazine-2,4 (1H,3H)-dione on Loblolly pine to evaluate control of non-crop vegetation. A total of 5 acres is involved; the program is authorized only in the States of Arkansas and North Carolina. The experimental use permit is effective from April 14, 1977, to April 14, 1978.

Interested parties wishing to review the experimental use permits are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St., SW., Washington, D.C. 20460. It is suggested that such interested persons call 202-755-4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

(Sec. 5, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; (7 U.S.C. 136(a) et seq.)).)

Dated: May 13, 1977.

BASF WYANDOTTE CORP.

Filing of Pesticide Petition

BASF Wyandotte Corp., 100 Cherry Hill Rd., P.O. Box 181, Parsippany N.J. 07054, has submitted a petition (PP7F1889) to the Environmental Protection Agency (EPA) which proposes that 40 CFR 180.355 be amended by establishing a tolerance for combined residues of the herbicide bentazon (3 isopropyl-1*H*-2,1,3-benzothiadiazin-4 (3*H*)-one-2,2-dioxide) and its 6- and 8-hydroxy metabolites in or on the raw agricultural commodity lima beans (succulent) at 0.05 part per million (ppm). On January 17, 1977, a notice was published (42 FR 3191) in the FEDERAL REGISTER announcing that BASF Wyandotte had filed PP 7F1889 proposing the establishment of tolerances for the subject pesticide on the raw agricultural commodity group seed and pod vegetables (dry) at 0.05 ppm. The tolerance on lima beans (succulent) should have been included in that notice but was inadvertently omitted. The proposed analytical method for determining residues is a gas chromatographic procedure using a flame photometric detector in the sulfur specific mode (394 nanometers). Notice of this submission is given pursuant to the provisions of section 408(d)(1) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this petition to the FEDERAL REGISTER Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M St. SW., Washington DC 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in inspecting them. Inquiries concerning this petition may be directed to Product Manager (PM) 25, Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone at 202-426-2632. Written comments should bear a notation indicating the petition number. Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the FEDERAL REGISTER Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: May 11, 1977.

MARTIN H. ROGOFF,
Acting Director, Registration Division.

DEPARTMENT OF AGRICULTURE

Issuance of Experimental Use Permits

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 27586-EUP-8. U.S. Department of Agriculture, Forest Service, Washington, D.C. 20013. This experimental use permit allows the use of approximately 32.1 pounds of the insecticide nucleopolyhedrosis virus on forest areas to evaluate control of Gypsy moth larvae. A total of 6,605 acres is involved; the program is authorized only in the States of Pennsylvania, New Jersey, Massachusetts, and New York. The experimental use permit is effective from April 22, 1977, to April 22, 1978.

No. 27586-EUP-13. U.S. Department of Agriculture, Forest Service, Washington, D.C. 20250. This experimental use permit allows the use of 38 pounds of the fungicide Methyl 2-benzimidazolecarbamate hydrochloride in elm trees to evaluate control of Dutch Elm disease. A total of approximately 525 trees is involved; the program is authorized only in the State of Michigan and in Washington, D.C. The experimental use permit is effective from May 27, 1977, to May 27, 1978.

No. 27586-EUP-16. U.S. Department of Agriculture, Forest Service, Washington, D.C. 20250. This experimental use permit allows the use of 130 pounds of the fungicide Methyl 2-benzimidazolecarbamate phosphate in elm trees to evaluate control of Dutch Elm disease. A total of approximately 600 trees is involved; the program is authorized only in the States of Illinois and Ohio. The experimental use permit is effective from May 27, 1977, to May 27, 1978.

Interested parties wishing to review the experimental use permits are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St., SW., Washington, D.C. 20460. It is suggested that such interested persons call 202-755-4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

MINNESOTA

Approval of State Plan for Certification of Pesticide Applicators

Section 4(a)(2) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended (7 U.S.C. 136 et seq.), and the implementing regulations of 40 CFR Part 171, require each State desiring to certify applicators to submit a plan to the U.S. Environmental Protection Agency (EPA) for its certification program. Any State certification program under this section shall be maintained in accordance with the State Plan approved under this section.

On February 25, 1977, notice was published in the FEDERAL REGISTER (42 FR 11038) of the intent of the Regional Administrator, EPA Region V, to approve, on a contingency basis, the Minnesota State Plan for the Certification of Pesticide Applicators (Minnesota State Plan). Contingent approval was requested by the State of Minnesota pending promulgation of implementing regulations. Copies of the Minnesota State Plan were made available for public inspection at the State Office Building, Minnesota Department of Agriculture, St. Paul, Minnesota; the Pesticide Branch, Air and Hazardous Materials Division, EPA, Region V, Chicago; and the Federal Register Section, Technical Services Division, Office of Pesticide Programs, EPA, Washington, D.C.

The Minnesota State Plan will remain available for public inspection at the Minnesota Department of Agriculture, State Office Building, St. Paul, Minnesota.

Comments were received from the National Canners Association and Orkin Exterminating Company, Inc. The National Canners Association commented that, because pesticide applicator training is not mandated by the amended FIFRA, the proposed training budget of the Minnesota Cooperative Extension Service (MN CES) should not be considered by EPA in its assessment of the adequacy of funding to support the pesticide applicator certification program. The State Plan identifies the MN CES as a primary cooperating agency, and as such, includes a training plan with an estimate of funds needed to carry out proposed training activities under the certification program. However, the Agency determined the adequacy of funding needed to conduct the certification program based only upon funding data provided by the lead agency.

The Minnesota State Plan subcategorizes commercial applicators engaged in Agricultural Pest Control-Plant into a) Herbicide and b) Insecticides-Fungicides. The National Canners Association commented that commercial applicators who apply nematocides would not be covered by either of Minnesota's Agricultural Pest Control subcategories. Minnesota proposes to certify such applicators under the Insecticides-Fungicides subcategory, even though the subcategory title does not include the word "Nematocide".

Minnesota proposes to establish a Food Manufacturing and Processing Pest Control subcategory under Category 7, Industrial, Institutional, Structural, and Health Related Pest Control. Orkin commented that this subcategory is based upon type of business which may require use of restricted use pesticides. Therefore, before structural pest control applicators could use restricted use pesticides in food manufacturing and processing pest control, the applicator would be required to pass both Structural Pest Control and Food Manufacturing and Processing Pest Control examinations before becoming certified. The Minnesota State Plan states that structural pest control applicators, defined as persons engaged in structural pest control for hire, will be certified under the Structural Pest Control and/or Fumigation subcategories, and upon successful completion of the certification requirements, will be authorized to use or supervise the use of restricted use pesticides in food manufacturing and processing environments; the Food Manufacturing and Processing examination is not a requirement for certification. State-defined noncommercial applicators (commercial applicators not for hire) seeking certification in either Structural Pest Control, Fumigation, or Food Manufacturing and Processing Pest Control, are required to pass the appropriate subcategory examination before being certified. While EPA is aware that the Food Manufacturing and Processing Pest Control subcategory is limited to noncommercial applicators, the Agency also recognizes the need to certify certain pesticide applicators previously exempt from State licensing requirements. Because a large number of noncommercial applicators are involved in the food manufacturing and processing area, Minnesota desires to establish the new subcategory for certification purposes. This proposal is not inconsistent with the FIFRA or regulations promulgated thereunder.

The National Canners Association and Orkin commented on recertification procedures proposed in the Minnesota State Plan. National Canners commented that in addition to MN CES training programs, private applicators should have the option to become recertified by taking a written examination. Each time the private applicator purchases a restricted use pesticide, he/she must sign an attestation form, affirming that one of the certification options has been completed within the last three years. The attestation form identifies a written or oral examination. Therefore, a written examination is one of the recertification options available to the private applicator. Accordingly, the statement found in the second column (42 FR 11039) stating that private applicators will be required to participate in an approved training session every three years, should now read as follows: "For recertification, private applicators will be required to complete one of the certification options, except single purchase/single use, every three years." Orkin commented that Minnesota's procedures for recertifying structural pest control applicators are too stringent. Pursuant to implementing regulations under Section 4 of FIFRA, states must establish procedures to assure that certified applicators continue to meet the requirements of changing technology and in addition, assure a continuing level of competency and ability to use pesticides safely and properly. Further, under Section 24 of FIFRA, the states are given a great deal of flexibility in developing their individual programs provided those programs meet the prescribed Federal standards. This comment pertains to regulatory requirements established under State Law and addresses an issue which is not germane to the acceptability of the Plan under Federal regulations. The Agency has forwarded the comment to the Minnesota Department of Agriculture for consideration.

The MN CES has notified the Agency regarding a statement which appeared in the notice of intent to approve the State Plan. In the third column (42 FR 11038) the Agency states that private applicators must present their Private Applicator Training Card to the licensed dealer each time a restricted use pesticide is purchased. The MN CES pointed out that presentation of the training card it not required since the private applicator must sign the attestation form upon purchase. The Agency concurs with this comment. Accordingly, the word "must" is hereby replaced by the word "may".

It has been determined that the Minnesota State Plan will satisfy the requirements of the amended FIFRA and of 40 CFR Part 171, if the regulations described in the State Plan, which are necessary for its implementation, are promulgated by the Minnesota Department of Agriculture. This contingent approval shall expire October 21, 1977, if these terms and conditions are not satisfied by that time. On or before the expiration of the period of contingent approval, a notice shall be published in the FEDERAL REGISTER concerning the extent to which these terms and conditions have been satisfied, and the approval status of the Minnesota State Plan as a result thereof.

EFFECTIVE DATE

Pursuant to Section 4(d) of the Administrative Procedure Act, 5 U.S.C. 553 (d), the Agency finds that there is good cause for providing that the contingent approval granted herein to the Minnesota State Plan shall be effective upon publication. Neither the Minnesota State Plan itself nor this Agency's contingent approval of the Plan creates any direct or immediate obligation on pesticide applicators or other persons in the State of Minnesota. Delays in starting the work necessary to implement the Plan such as may be occasioned by providing some later effective date for this contingent approval are inconsistent with the public interest. Accordingly, this con-

tingent approval shall become effective immediately.

Dated: May 4, 1977.

GEORGE R. ALEXANDER, JR.,
Regional Administrator,
Region V.

ZOECON CORP. AND MOBAY CHEMICAL CORP.

Issuance of Experimental Use Permits

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 20954-EUP-8. Zoecon Corporation, Palo Alto, California 94304. This experimental use permit allows the use of 975 pounds of the insecticide hexadecyl cyclopropanecarboxylate on cotton to evaluate control of spider mites. A total of 150 acres is involved; the program is authorized only in the States of Arizona and California. The experimental use permit is effective from April 19, 1977, to April 19, 1978. This permit is being issued for use on cotton grown for seed purposes only.

No. 3125-EUP-136. Mobay Chemical Corporation, Kansas City, Missouri 64120. This experimental use permit allows the use of 381 pounds of the nematicide Ethyl 3-methyl-4-(methylthio) phenyl (1-methylethyl) phosphoramidate on apples, cherries, and peaches to evaluate control of nematodes. The experimental use permit is effective from April 11, 1977, to April 11, 1978.

No. 3125-EUP-137. Mobay Chemical Corporation, Kansas City, Missouri 64120. This experimental use permit allows the use of 381 pounds of the nematicide Ethyl 3-methyl-4-(methylthio) phenyl (1-methylethyl) phosphoramidate on apples, cherries, and peaches to evaluate control of nematodes. A total of 152 acres is involved for both this permit and the one above; the programs are authorized only in the States of California, Connecticut, New Hampshire, New Jersey, New York, Maine, Michigan, Pennsylvania, Rhode Island, and Vermont. This experimental use permit is also effective from April 11, 1977, to April 11, 1978. The permits will use the same active ingredients, but different formulations. A temporary tolerance for residues of the active ingredients in or on apples, cherries, and peaches has been established.

Interested parties wishing to review the experimental use permits are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St. SW., Washington, D.C. 20460. It is suggested that such interested persons call 202-755-4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4 p.m. Monday through Friday.

(Sec. 5, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751 (7 U.S.C. 136(a) et seq.)).)

Dated: May 13, 1977.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

FEDERAL COMMUNICATIONS COMMISSION

[Report No. I-347]

INTERNATIONAL AND SATELLITE RADIO

Applications Accepted for Filing

MAY 16, 1977.

The Applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications if, upon further examination, it is determined they are defective and not in conformance with the Commission's Rules, Regulations and its policies. Final action will not be taken on any of these applications earlier than 31 days following the date of this notice. Section 309(d) (1).

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

SATELLITE COMMUNICATIONS SERVICES:

The following Teleprompter Corporation applications are requesting modification of licenses to permit the reception of signals from stations: WTCG-TV, Channel 17, Atlanta, Georgia, WYAH-TV, Channel 27, Portsmouth, Virginia, and the programming of the Spanish International Communications Corporation, Miami, Florida.

350-DSE-ML-77 KB50, Eugene, Oregon.
351-DSE-ML-77 KB51, Tacoma, Washington.
352-DSE-ML-77 KB55, Dubuque, Iowa.
353-DSE-ML-77 KB56, Rochester, Minnesota.
354-DST-ML-77 KB54, Great Falls, Montana.
355-DSE-ML-77 KB63, Santa Cruz, California.
356-DSE-ML-77 KSB69, Missoula, Montana.
357-DSE-ML-77 KB72, El Paso, Texas.
358-DSE-ML-77 KB79, Pocatello, Idaho.
359-DSE-ML-77 KB80, Lewiston, Idaho.
360-DSE-ML-77 KB81, Reno, Nevada.
361-DSE-ML-77 KB84, Santa Maria, California.
362-DSE-ML-77 KD39, Muscoy, California.
363-DSE-ML-77 KD77, Kalispell, Montana.
364-DSE-ML-77 WB47, Fairmont, West Virginia.
365-DSE-ML-77 WB49, Tuscaloosa, Alabama.
366-DSE-ML-77 WB52, Gadsden, Alabama.
367-DSE-ML-77 WB54, Rock Island, Nebraska.
368-DSE-ML-77 WB62, South Shore, Kentucky.
369-DSE-ML-77 WB63, Florence, Alabama.
370-DSE-ML-77 WB73, Huntsville, Alabama.
371-DSE-ML-77 WB93, Danbury, Connecticut.
374-DSE-77 Telecable of Overland Park, Inc. (KB75), Overland Park Kansas. Modification of license to permit the reception of signals from station: WYAH-TV, Channel 27, Portsmouth, Virginia.
375-DSE-ML-77 Teleprompter Corporation (WB57), West Palm Beach, Florida. Modification of license to: (1) delete paragraph 6.D, of the stations pending license which prohibits the use of this station facility on a shared cost-sharing basis and (2) to permit the reception of signals from stations: WTCG-TV, Channel 17, Atlanta, Georgia, WYAH-TV, Channel 27, Portsmouth, Virginia, and the programming of the Spanish International Communications Corporation in Miami, Florida.
376-DSE-P/L-77 International Telemeter Corp. and Columbia Cablevision d.b.a. Atco Missouri Earth Station, a joint enterprise, Columbia, Missouri. For authority to construct, own, and operate a domestic communications satellite receive-only earth station at this location. Lat. 38°57'-48", Long. 92°16'27". Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 10 meter antenna.
377-DSE-P/L-77 Teleservice Corp. of America, De Ridder, Louisiana. For authority to construct, own, and operate a domestic communications satellite receive-only earth station at this location. Lat. 30°52'-09", Long. 93°17'20". Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 5 meter antenna.
379-DSE-P/L-77 Teleprompter Corporation. Greenwood, South Carolina. For authority to construct, own, and operate a domestic communications satellite receive-only earth station at this location. Lat. 34°11'-52", Long. 82°05'27". Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 4.5 meter antenna.
380-DSE-P/L-77 Teleprompter Corporation. Dothan, Alabama. For authority to construct, own, and operate a domestic communications satellite receive-only earth station at this location. Lat. 31°14'30", Long. 85°21'10". Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 4.5 meter antenna.
381-DSE-P/L-77 Teleprompter Corporation. Wenatchee, Washington. For authority to construct, own, and operate a domestic communications satellite receive-only earth station at this location. Lat. 47°25'-08", Long. 120°18'28". Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 4.5 meter antenna.
382-DSE-P/L-77 Teleprompter Corporation. Ironwood, Michigan. For authority to construct, own, and operate a domestic communications satellite receive-only earth station at this location. Lat. 46°28'45", Long. 90°08'51". Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 4.5 meter antenna.
383-DSE-P/L-77 Teleprompter Corporation. Palestine, Texas. For authority to construct, own, and operate a domestic communications satellite receive-only earth station at this location. Lat. 31°46'55", Long. 95°38'26". Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 4.5 meter antenna.
384-DSE-ML-77 Houma Cablevision (KD81), Houma, Louisiana. Modification of license to permit the reception of signals from station WYAH-TV, Channel 27, Portsmouth, Virginia.
385-DSE-ML-77 Al-Pine Cablevision, Inc. (KD43), Alexandria, Louisiana. Modification of license to permit the reception of signals from station WYAH-TV, Channel 27, Portsmouth, Virginia.

386-DSE-P-77 University of Georgia, Athens, Georgia. For authority to construct, own and operate a domestic communications satellite receive-only earth station at this location. Lat. 33°56'41", Long. 83°22'39". Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 10 meter antenna.
387-DSE-P-77 Washburn University of Topeka, Topeka, Kansas. For authority to construct, own and operate a domestic communications satellite receive-only earth station at this location. Lat. 39°03'50", Long. 95°45'58". Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 10 meter antenna.
388-DSE-P-77 West Virginia Board of Regents, Morgantown, West Virginia. For authority to construct, own and operate a domestic communications satellite receive-only earth station at this location. Lat. 39°38'49", Long. 79°58'30". Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 10 meter antenna.
389-DSE-ML-77 Nilcom, Inc. (WB67), Belvidere, Illinois. Modification of license to permit the shared use of this station's facilities with a non-affiliated cable system.
SSA-8-77 Western Union Telegraph Company, Glenwood, New Jersey/McLean, Virginia. Special temporary authority to continue an ongoing developmental program consisting of radio transmission tests and demonstrations to document the feasibility of utilizing small aperture receive-only terminals as an integral segment of domestic communications satellite system operations.

PURAC TASK ON PERSONAL USE RADIO COMMUNICATIONS NEEDS

Meeting

In preparation for the next meeting of the Personal Use Radio Advisory Committee (PURAC), the PURAC task investigating personal use radio communications needs will meet June 9, 1977, at 10 a.m. in Room 7317 of the offices of the Federal Communications Commission at 2025 M Street NW., Washington, D.C. 20554. The agenda for this meeting will be to review the progress of the task to date, and to begin formalizing the findings of the group for presentation to the full PURAC.

This meeting is open to the public, however, facilities are limited and priority seating will be given to members of PURAC. For more information, contact Mr. Ted Andros, Hy-Gain de Puerto Rico, Inc., 1320 South Dixie Highway, Suite 950, Coral Gables, Florida 33146 (305-661-6161).

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

FEDERAL ENERGY ADMINISTRATION

ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION ACT

Intention To Issue Prohibition Orders to Certain Major Fuel Burning Installations; Change in Schedule for Public Hearing in Boston, Mass.

The Federal Energy Administration (FEA) gave notice in the FEDERAL REGISTER on Friday, May 13, 1977, that FEA has issued a "Notice of Intention to Issue Prohibition Orders to Certain Major Fuel Burning Installations" and would hold a hearing on the notice of intention on May 24, 1977, in Boston, Massachusetts.

This notice is to inform persons interested in that notice of intention that the hearing will be held instead on June 3, 1977, in Augusta, Maine, Washington-York Room, Augusta Civic Center, Community Drive, beginning at 9 a.m.

Consequently the revised schedule for public hearings on the above-mentioned notice of intention is as follows:

June 3—Augusta, Maine, Washington-York Room, Augusta Civic Center, Community Drive, at 9 a.m.

Issued in Washington, D.C., on May 18, 1977.

ERIC J. FYGI,
Acting General Counsel.

[FR Doc.77-14512 Filed 5-20-77;8:45 am]

ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION ACT

Negative Determination of Environmental Impact Re Nebraska Public Power District Sheldon Generating Station, Powerplants 1 and 2

Pursuant to 10 CFR 208.4 and 305.9, the FEA hereby gives notice that it has performed an analysis and review of the environmental impact of the proposed issuance of a Notice of Effectiveness for the prohibition order to Nebraska Public Power District's Sheldon Generating Station, powerplants 1 and 2.

On June 30, 1975, the FEA issued a prohibition order to the above-listed powerplants which prohibited the powerplants from burning natural gas or petroleum products as their primary energy source. The prohibition order provided, however, that in accordance with the requirements of 10 CFR Part 303 and 305, the order would not become effective until either, (1) the Administrator of the Environmental Protection Agency (EPA) notifies the FEA, in accordance with section 119(d)(1)(B) of the Clean Air Act, that the particular powerplants will be able on and after July 1, 1975, to burn coal and to comply with all applicable air pollution requirements without a compliance date extension under section 119, or (2) if no notification is given by EPA, the date that the Administrator of EPA certifies pursuant to section 119(d)(1)(B) of the Clean Air Act is the earliest date that the particular powerplants will be able to comply with all applicable air pollution requirements under section 119 of that Act; and until FEA has performed an analysis of the environmental impact of the issuance of a Notice of Effectiveness, pursuant to 10 CFR 305.9, and has served the powerplants the Notice of Effectiveness, as provided in 10 CFR 303.10(b), 303.37(b), and 305.7.

The FEA has analyzed and reviewed the effect on the human environment of issuance of the Notice of Effectiveness, and has determined it is clear that issuance of a Notice of Effectiveness for the prohibition order to the above listed powerplants is not a "major Federal action significantly affecting the quality of the human environment" within the meaning of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(c) FEA has determined that an environmental impact statement is not required.

Additional copies of this negative determination of environmental impact and copies of the environmental assessment upon which it is based are available upon request from the National Energy Information Center, Room 1404, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461. Copies of the documents are also available for public review in the FEA Freedom of Information Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C.

Interested persons are invited to submit data, views, or arguments with respect to the negative determination and the associated environmental assessment to Executive Communications, Box MR, Room 3309, Federal Energy Administration, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation, "Negative Determination—Proposed NOE to Nebraska Public Power District's Sheldon Generating Station, Powerplants 1 and 2." Fifteen copies should be submitted on or before June 13, 1977.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data

and to treat it according to that determination.

Issued in Washington, D.C. on May 17, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

VOLUNTARY AGREEMENT AND PLAN OF ACTION TO IMPLEMENT INTERNATIONAL ENERGY PROGRAM

Approval by the Administrator of the Federal Energy Administration and the Attorney General of the Industry Supply Advisory Group (ISAG)

Pursuant to Section 5(a) of the Voluntary Agreement and Plan of Action to Implement the International Energy Program, the membership of certain U.S. companies in the Industry Supply Advisory Group (ISAG) has been approved by the Administrator of the Federal Energy Administration and the Attorney General. The text of the letter from the Attorney General to the Administrator, FEA, dated April 6, 1977, is set out as Appendix A, and the text of the letter from the Administrator, FEA, to the relevant member companies dated May 2, 1977, is set out as Appendix B.

Issued in Washington, D.C., May 17, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

APPENDIX A

LETTER OF THE ATTORNEY GENERAL TO THE ADMINISTRATOR OF FEA DATED APRIL 6, 1977

This is in response to your letter, dated February 18, 1977, which requests my approval for certain U.S. oil companies to become members of a new industry group created by the International Energy Agency (IEA), which is to be called the Industry Supply Advisory Group (ISAG). My approval is requested pursuant to Section 5(a) of the Voluntary Agreement and Plan of Action to Implement the International Energy Program.

The IEA has established an emergency management organization to administer its international oil sharing program in the event of an emergency. An integral part of the organiaztion is an Industry Supply Advisory Group (ISAG) which would work at IEA headquarters with the IEA Allocation Coordinator and his staff in implementing the allocation procedures in the IEA Emergency Management Manual. In general, under the guidance and supervision of the Allocation Coordinator, the ISAG would make industry supply expertise available to the IEA. From among the voluntary allocation actions proposed by the 31 IEA-desig-best balance each of the 19 IEA member Finally, it would assist the Allocation Coordi-tor's approval those actions which would best balance each of the 19 IEA member countries' allocation rights and obligations. Finally, it would assist the Allocation Coordinator in evaluating allocation actions and the possible need for further actions.

To do its work most effectively the group has been organized into three subgroups under an ISAG Manager. A Supply Coordination Group, consisting of a head and eight assistants, would be responsible for the evaluation and selection of Reporting Company voluntary offers. A Country Supply Group comprising a head and five assistants would advise on the effect of proposed reallocation actions on individual IEA member countries. Finally, a four-member Supply Analysis Group would conduct supporting studies relating to the reallocation effort.

The ISAG would not be a continuously active group. As its functions indicate, it would be convened only during an actual emergency or for further tests of the IEA's emergency allocation system. Apart from this it would meet only for organizational or preliminary planning sessions.

The IEA has now formally requested 19 of the 31 Reporting Companies to make available individuals from their staffs to serve on ISAG. Gulf Oil Corp. has been invited to serve as ISAG Manager, responsible for the overall supervision and guidance of the ISAG staff in its emergency allocation work. The British Petroleum Co., Ltd. has been asked to head the Supply Coordination Group, with a membership of Ashland Oil, Inc., Continental Oil Co., Ente Nazionale Idrocarburi (ENI), Exxon Corp., Mobil Oil Corp., Phillips Petroleum Co., Shell International Petroleum Co., Ltd., and Standard Oil Co. (Indiana). VEBA, AG has been designated as head of the Country Supply Group, which would include Axel Johnson & Co. AB, OeMV Aktiengesellschaft, Texaco, Inc., Standard Oil Company of Ohio, and a representative of the Petroleum Company of Ohio, and a representative of the Petroleum Association of Japan. Finally, Standard Oil Company of California has been invited to head the Supply Analysis Group, with Occidental Petroleum Corp. and Shell Oil Co. as members. One company for this subgroup has not yet been designated. Since twelve of these firms are U.S. oil company participants in the Voluntary Agreement, you have requested my approval of their acceptance of membership in ISAG.

The Department of Justice has consistently favored as broad a representation as practicable on industry groups serving the IEA. We note that nineteen separate companies are to serve on ISAG and that the twenty presently-slated positions are to include at least twelve of the twenty-one U.S. company participants. Moreover, every company which had earlier expressed an interest in serving on ISAG was invited to do so by the IEA. None was denied the opportunity to participate. Accordingly, pursuant to Section 5(a) of the Voluntary Agreement and Plan of Action to Implement the International Energy Program, I hereby give my approval to acceptance of membership on the IEA's Industry Supply Advisory Group by Gulf Oil Corp., Ashland Oil, Inc., Continental Oil Co., Exxon Corp., Mobil Oil Corp., Phillips Petroleum Co., Standard Oil Co. (Indiana), Texaco, Inc., Standard Oil Company of Ohio, Standard Oil Company of California, Occidental Petroleum Corp. and Shell Oil Co. This approval also covers each firm's membership on the appropriate ISAG subgroup as set forth above.

APPENDIX B

LETTER OF THE ADMINISTRATOR OF FEA TO MEMBER COMPANIES DATED MAY 2, 1977

The International Energy Agency (IEA) has requested that your company accept membership in the Industry Supply Advisory Group (ISAG) created by the IEA as an integral part of its emergency management organization. Pursuant to Section 5(a) of the Voluntary Agreement and Plan of Action to Implement the International Energy Program, in your letter of January 14, 1977, you requested my approval of your accepting the IEA invitation.

It is anticipated that the ISAG will be activated by the IEA as soon as possible after a finding has been made that an international energy supply emergency in fact exists. Prior to an actual emergency, the ISAG may convene to assist the IEA in certain planning functions including further testing of the IEA's emergency allocation system.

Composed of oil industry supply experts chosen from among the 31 IEA designated Reporting Companies, the ISAG will work under the guidance and supervision of the IEA Allocation Coordinator and will:

1. Make industry supply expertise available to the IEA;
2. Evaluate and select from among voluntary allocation actions proposed by the Reporting Companies those actions which will best balance each of the 19 IEA member countries' allocation rights and obligations; and
3. Assist the IEA Allocation Coordinator in evaluating allocation actions and the possible need for further actions.

To perform these functions as effectively as possible, the ISAG has been organized into three subgroups so that its members may concentrate attention on particular emergency allocation activities:

A Supply Coordination Group, responsible for the evaluation and selection of Reporting Company voluntary offers;

A Country Supply Group, responsible for advising the IEA on the effect of proposed reallocation actions on individual IEA member countries; and

A Supply Analysis Group, responsible for the conduct of supporting studies relating to the reallocation effort.

These three subgroups will carry out their responsibilities under an ISAG manager who will have responsibility for providing the overall supervision of and guidance to the ISAG and its three subgroups. The establishment of the ISAG is a critical step in the development of an effective system for dealing with possible future supply emergencies.

Pursuant to Section 5(a) of the Voluntary Agreement and Plan of Action to Implement the International Energy Program, I hereby approve your membership on the Industry Supply Advisory Group of the IEA and your membership in the [Supply Coordination Group, Country Supply Group, Supply Analysis Group].

A copy of the letter from the Attorney General reflecting his approval, as required by the Voluntary Agreement, is enclosed.

FEDERAL PREVAILING RATE ADVISORY COMMITTEE

CLOSED COMMITTEE MEETINGS

Pursuant to the provisions of section 10 of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that meetings of the Federal Prevailing Rate Advisory Committee will be held on:

Thursday, June 2, 1977.
Thursday, June 9, 1977.
Thursday, June 16, 1977.
Thursday, June 23, 1977.
Thursday, June 30, 1977.

The meetings will convene at 10 a.m., and will be held in Room 5A06A, Civil Service Commission Building, 1900 E Street NW., Washington, D.C.

The Federal Prevailing Rate Advisory Committee is composed of a Chairman, representatives of five labor unions holding exclusive bargaining rights for Federal blue-collar employees, and representatives of five Federal agencies. Entitlement to membership on the Committee is provided for in section 5347 of the Prevailing Rate Act of 1972 (Pub. L. 92-392).

The Committee's primary responsibility is to review the prevailing rate system and from time to time advise the Civil Service Commission thereon.

At these scheduled meetings, the Committee will consider proposed plans for implementation of the Prevailing Rate Act of 1972 (Pub. L. 92-392), which Law establishes pay systems for Federal prevailing rate employees.

The meetings will be closed to the public on the basis of a determination made by the Chairman of the Civil Service Commission under section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) and 5 U.S.C., section 552b(c)(9)(B), that the closing is necessary in order to provide this labor-management Committee with the opportunity to advance proposals and counter-proposals in meaningful debate on issues related solely to the Federal Wage System with the view toward ultimately formulating advisory policy recommendations for the consideration of the Civil Service Commission.

Summary minutes of these meetings will be made available to the public, upon written request to the Committee Secretary, after the pay policy issues discussed at these meetings have been finalized by Civil Service Commission action. Annually, the Committee publishes for the Civil Service Commission, the President, and Congress a comprehensive report of pay issues discussed, concluded recommendations thereon, and related activities. These reports are also available to the public, upon written request to the Committee Secretary.

Members of the public are invited to submit material in writing to the Chairman concerning Federal Wage System pay matters felt to be deserving of the Committee's attention. Additional information concerning these meetings may be obtained by contacting the Secretary, Federal Prevailing Rate Advisory Committeee, Room 1338, 1900 E Street NW., Washington, D.C. 20415 (202-632-9710).

DAVID T. ROADLEY,
Chairman, Federal Prevailing
Rate Advisory Committee.

MAY 17, 1977.

[3] 4(c)(8) and 4(C)(12) notifications processed by Reserve Bank on behalf of the Board of Governors under delegated authority.

CENTRAL BANCORPORATION, INC.

Acquisition of Bank

The Central Bancorporation, Cincinnati, Ohio, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares of the successor by merger to First National Bank of Mercer County, Celina, Ohio. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Cleveland. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than June 17. 1977.

Board of Governors of the Federal Reserve System, May 17, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

MIDLAND CAPITAL CO.

Formation of Bank Holding Company

Midland Capital Co., Oklahoma City, Oklahoma, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 100 percent of the voting shares, less directors' qualifying shares, of Northwest Bank, Oklahoma City, Oklahoma. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Midland Capital Co., Oklahoma City, Oklahoma, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Midland Mortgage Co., Oklahoma City, Oklahoma, and its subsidiary, Johnston Records Co., Oklahoma City, Oklahoma. Notice of the application was published on April 20, 1977, in the San Antonio Light, San Antonio, Texas, and on April 21, 1977, in the following newspapers: Arizona Daily Star, Tucson, Arizona; Broken Arrow Ledger, Broken Arrow, Oklahoma; the Canon City Daily Record, Canon City, Colorado; Colorado Springs Gazette Telegraph, Colorado Spring, Colorado; the Colorado Springs Sun, Colorado Springs, Colorado; Daily Oklahoman, Oklahoma County, Oklahoma; the Houston Post, Houston, Texas; Lawton Constitution, Lawton, Oklahoma; the Pueblo Chieftain, Pueblo, Colorado; the Rocky Mountain News, Denver, Colorado; Tulsa World, Tulsa, Oklahoma; the Tustin News, Tustin, California; West Prescott Courier, Prescott, Arizona. On April 22, 1977, notice was published in the Arizona Republic, Phoenix, Arizona.

Applicant states that the proposed subsidiary would engage in the activities of mortgage banking including originating and servicing all types of residential and commercial mortgage loans. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweight possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and re-

ceived by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than June 14, 1977.

Board of Governors of the Federal Reserve System, May 17, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-14479 Filed 5-20-77;8:45 am]

UNITED BANKS CORP.

Formation of Bank Holding Company

United Banks Corporation, Hanover, New Hampshire, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 100 percent of the voting shares, less directors' qualifying shares, of the successor by merger to Hanover Bank & Trust Company, Hanover, New Hampshire, and 100 percent of the voting shares, less directors' qualifying shares, of Lebanon Bank & Trust Company, Lebanon, New Hampshire. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Boston. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than June 14, 1977.

Board of Governors of the Federal Reserve System, May 17, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on May 17, 1977. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FEA request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed request, comments (in triplicate) must be received on or before June 10, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Staff, 202-275-3532.

FEDERAL ENERGY ADMINISTRATION

FEA requests an extension on change clearance of Form FEA-P328-Q-0, Foreign Crude Oil Cost Report. This is an existing quarterly report to collect detailed information on crude oil acquisition costs for the foreign trading affiliates of United States companies. The FEA-P328-Q-0 is a mandatory report under the Federal Energy Administration Act of 1974 (Pub. L. 93-275) and the Energy Policy and Coordination Act of 1975 (Pub. L. 94-163). FEA estimates respondents to number approximately 16 firms which acquire 100,000 barrels of crude oil per day from non-IEA countries and reporting burden to be 10 hours per response.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

GENERAL SERVICES ADMINISTRATION

REGIONAL PUBLIC ADVISORY PANEL ON ARCHITECTURAL AND ENGINEERING SERVICES

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of a meeting of the Regional Public Advisory Panel on Architectural and Engineering Services, Region 6, from 11 a.m. June 8 through June 10, 1977, Room 181, Federal Building, 1500 East Bannister Road, Kansas City, Missouri. The meeting will be devoted to the initial step of the procedures for screening and evaluating the qualifications of architect-engineers under consideration for selection to furnish professional services for the following proposed projects: (1) Alterations, Federal Building, 1500 E. Bannister Road, Kansas City, Missouri; and (2) three supplemental one-year term contracts, two in the state of Missouri and one in the state of Iowa. The meeting will be open to the public.

H. D. HARVELL,
Regional Administrator.

[Intervention Notice No. 31; Application No. 57032]

SOUTHERN CALIFORNIA GAS CO. AND CALIFORNIA PUBLIC UTILITIES COMMISSION

Proposed Intervention in Utility Rate Application

The General Services Administration seeks to intervene in a proceeding before the California Public Utilities Commission concerning an application (Application No. 57032) of the Southern California Gas Company for authority to engage in a solar demonstration project and to include in its rates the amount necessary to fund a solar energy program. GSA represents the interests of the executive agencies of the United States Government, as users of gas utility services.

The Southern California Gas Company estimates the venture capital for the program to be more than $10 million which it proposes to raise through a 0.033-cent per therm surcharge on all retail gas sales. There remain many questions about the safeguards and possible rewards this program will bring to the ratepayer.

Persons desiring to make inquiries concerning this case to GSA should submit them, in writing, to Mr. Spence W. Perry, Assistant General Counsel, Regulatory Law Division, General Services Administration, 18th and F Streets NW., Washington, D.C. 20405, telephone 202-566-0750, on or before June 22, 1977, and refer to this notice number.

Persons making inquiries are put on notice that the making of an inquiry shall not serve to make any persons parties of record in the proceeding.

(Section 201(a)(4), Federal Property and Administrative Services Act, 40 U.S.C. 481(a)(4).)

Dated: May 10, 1977.

JOEL W. SOLOMON,
Administrator of General Services.

BIOLOGICAL SCIENCES TRAINING REVIEW COMMITTEE

Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of June 1977:

BIOLOGICAL SCIENCES TRAINING REVIEW COMMITTEE

DATE: June 22-24, 9 a.m.

PLACE: Conference Room B, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

OPEN: June 22, 9-9:30 a.m.

CLOSED: Otherwise.

CONTACT:

Helen Pohlenz, Room 9C-09, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857 (301-443-3855).

PURPOSE: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to biological sciences research training and makes recommendations to the National Advisory Mental Health Council for final review.

AGENDA: From 9-9:30 a.m., June 22, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of Section 552b(c)(6), Title 5 U.S. Code and Section 10(d) of Public Law 92-463 (5 U.S.C. Appendix I).

Substantive program information may be obtained from the contact person listed above. The NIMH Information Officer who will furnish upon request summaries of the meeting and rosters of the committee members is Mr. Edwin Long, Deputy Director, Division of Scientific and Public Information, NIMH, Room 15-105, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857 (301-443-3600).

Dated: May 17, 1977.

CAROLYN T. EVANS,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

Office of Education

NATIONAL ADVISORY COUNCIL ON WOMEN'S EDUCATIONAL PROGRAMS

Schedule and Proposed Agenda

AGENCY: Office of Education National Advisory Council on Women's Educational Programs.

ACTION: Notice.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Advisory Council on Women's Educational Programs and its Executive, Federal Policy and Practices, Legislation, Program and Public Information Committees. It also describes the functions of the Council. Notice of the meeting is required pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463). This document is intended to notify the general public of their opportunity to attend.

DATES: June 8, 7:00 to 10:00 p.m. and June 9, 10, 11, 1977, 8:30 a.m. to 5:30 p.m.

ADDRESS: June 8, Copley Plaza Hotel, Back Bay Room, June 9, 10, 11, Massachusetts State Department of Education, 31 Saint James Avenue, Boston, Massachusetts.

FOR FURTHER INFORMATION CONTACT:

Kathy Maurer, National Advisory Council on Women's Educational Programs, 1832 M Street, N.W. No. 821, Washington, D.C. 20036, 202-382-3862.

SUPPLEMENTARY INFORMATION: The National Advisory Council on Women's Educational Programs is established pursuant to Pub. L. 93-380, section 408(f)(1). The Council is mandated to (a) Advise the Commissioner with respect to general policy matters relating to the administration of the Women's Educational Equity Act of 1974; (b) Advise and make recommendations to the Assistant Secretary concerning the improvement of educational equity for women; (c) Make recommendations to the Commissioner with respect to the allocation of any funds pursuant to section 408 of Pub. L. 93-380, including criteria developed to insure an appropriate distribution of approved programs and projects throughout the Nation: (d) Make such reports to the President and the Congress on the activities of the Council as it determines appropriate; (e) Develop criteria for the establishment of program priorities; and (f) Disseminate information concerning its activities under section 408 of Pub. L. 93-380.

Under the authority of section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463), and clauses (2) and (6) of subsection (c) of section 552b of Title 5 of the United States Code, the 8:30 a.m. to 12:30 p.m. session of the Council on June 9, 1977 will be closed to the public. Closure of this section of the Council meeting is to allow a free and frank discussion of internal personnel matters. To discuss such matters in open meeting would constitute a "clearly unwarranted invasion of personal privacy," which is exempt from disclosure under 5 U.S.C. (c)(6). The remainder of the Council meeting, from 8:30 a.m. to 5:30 p.m. on June 10, and from 8:30 a.m. to 1:00 p.m. on June 11, will be open to the public. The agenda will include (1) Election of officers, (2) Executive Director's Report, (3) Committee reports and action recommendations; and (4) Presentations from a local project funded by the Women's Educational Equity Act and from others.

The meetings of the committees will take place from 1:30 p.m. to 5:30 p.m. on June 9, 1977, except the Public Information Committee which will meet from 12:00 to 1:30 p.m. on June 10, 1977. All committee meetings will be open to the public. The agenda for the Executive Committee will include preparation for the Council meeting. The agenda for the Federal Policy and Practices Committee will include discussion of the Council's review of the Education Division of HEW. The agenda for the Legislation Committee will include discussion of current legislation affecting women. The agenda for the Program Committee will include the Council's evaluation of the Women's Educational Equity Act Program. The agenda for the Public Information Committee will include development of criteria for selection of topics and participants in the Council's public sessions.

Records will be kept of all Council proceedings and will be available for public inspection at the Council offices at Suite 821, 1832 M Street, N.W., Washington, D.C.

Signed at Washington, D.C. on May 18, 1977.

JOY R. SIMONSON,
Executive Director.

Health Resources Administration

HEALTH PROFESSIONS EDUCATIONAL ASSISTANCE ACT, 1976

U.S. Citizen Foreign Medical Student Transfer Under Capitation Requirements

Effective October 1, 1977, section 502 of Public Law 94-484 (Health Professions Educational Assistance Act of 1976, October 12, 1976) amends the authority for making annual grants (called capitation grants) to health professions schools for the support of their educational programs. Under this authority, health professions schools must meet certain requirements in order to receive capitation grants. Among other things, a medical school applying for a grant must, in its application, provide assurances satisfactory to the Secretary that it will reserve positions for eligible United States foreign medical students in the school year beginning immediately before the fiscal year for which the grant is applied for, i.e., academic year 1978-79. Assurances must also be given for academic years 1979-80 and 1980-81 if the medical school is to be eligible for grants from fiscal year 1979 and fiscal year 1980 funds, respectively.

Since the passage of Public Law 94-484, there has been much public interest concerning the Department's plans to administer this provision. This Notice sets forth the general manner in which the Department intends to do so.

1. United States citizens who wish to be considered for transfer under this program in academic year 1978-79, should send their names and addresses to:

International Programs Staff, Division of Medicine, BHM/HRA/DHEW, Federal Center Building No. 2, 4th Floor, 3700 East-West Highway, Hyattsville, Maryland 20782.

The procedures for making application will be described in application materials and will require completed applications to be received by the Division of Medicine, postmarked no later than August 1, 1977.

2. Citizens of the United States are eligible for consideration for transfer under this program if they:

(a) Were students in a foreign medical school before October 12, 1976,

(b) Have, by August 15, 1977, successfully completed at least two years in a foreign medical school, and

(c) Have, by August 15, 1977, successfully completed Part I of the National Board of Medical Examiners', examina-

tion (or any successor to this examination).

3. All United States citizens who meet these requirements are encouraged to:

(a) Apply for identification as being eligible for consideration, and

(b) Apply directly for transfer to a United States medical school (schools).

4. Not later than August 15, 1977, the Department will identify citizens of the United States who have applied for identification and who meet the eligibility requirements.

5. United States medical schools which have applied for capitation grants will be apportioned a number of positions to be reserved for the enrollment of eligible United States citizens. The Department intends, in making its apportionment of positions for the school year 1978–79, to take into consideration whether a school has already enrolled in the school year 1977–78 students eligible for the transfer program.

Questions and comments concerning this Notice should be directed to:

Director, Division of Medicine, Bureau of Health Manpower, HRA/DHEW, Federal Center Building No. 2, 4th Floor, 3700 East-West Highway, Hyattsville, Maryland 20782.

The Department will issue regulations necessary for implementation of this provision and will afford the public the opportunity to participate in this process.

Dated: May 13, 1977.

HAROLD MARGULIES, M.D.,
Deputy Administrator,
Health Resources Administration.

National Institutes of Health

PHENFORMIN

Report on Carcinogenesis Bioassay; Availability

Phenformin has been tested for cancer-causing activity with rats and mice in the Carcinogenesis Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary. A bioassay of the carcinogenicity of phenformin hydrochloride was conducted using Fischer 344 rats and B6C3F1 mice. The compound was administered in the diet for 78 weeks to groups of 35 animals of each species and sex, using concentrations of 15,000 and 30,000 ppm for rats and cencentrations of 1,200 ppm and 2,500 ppm for mice. Treatment was followed by a period of observation of 26 weeks. Control groups consisted of 15 untreated animals of each species and sex.

Average weights attained by treated groups of rats and mice were consistently lower than those of control groups in all tests except that for male rats, in which case the weights shown by treated and control animals were indistinguishable. Survival was apparently unaffected in both species by treatment with phenformin, but was poor in mice due to intercurrent disease.

Tumors appearing in treated rats and mice were similar in type and number to those in controls, and no pathologic or statistical evidence of induction of tumors in these species by phenformin was found.

(Catalog of Federal Domestic Assistance Program Number 13.393, Cancer Cause and Prevention.)

Dated: May 9, 1977.

DONALD S. FREDRICKSON,
Director,
National Institutes of Health.

Office of the Secretary

SOCIAL SECURITY ADMINISTRATION

Statement of Organization, Functions, and Delegations of Authority

In FR Doc. 77–9096, appearing at page 16517, in the FEDERAL REGISTER of Monday, March 28, 1977, the following changes should be made:

1. On page 16517, in the third column, the first centered heading which now reads "Sec. CP.00 Office of Program Operations—(Mission)" should be changed to read "Sec. SP.00 Office of Program Operations—(Mission)";

2. On page 16518, in the third column, six lines from the bottom of the page, "(SPE)" should read "(SPS)";

3. On page 16519, in the first column, in the centered heading, the section number should be changed to read "SP.20";

4. On page 16522, in the first column, the thirtieth line from the top should be deleted;

5. On page 16522, in the third column, under the heading "b. *The Integrated Systems Redesign Staff (SPP29)*", in the fourth line, the word "and" should be changed to "of";

6. On page 16523, in column one, in the sixteenth line from the top of the page, "SAA" should be changed to read "SSA";

7. On page 16526, in the first column, in the fifth line from the top of the page, "BLI's" should be changed to read "BDI's";

8. On page 16528, in the third column, in the twenty-sixth line from the bottom of the page, "SSI's" should be changed to read "SSA's";

9. On page 16530, in the first column, in the fourteenth line from the bottom of the page, what now reads "an deffective" should be changed to read "and effective";

10. On page 16530, in the third column, in the third line from the top of the page, "regard-" should read "regarding".

SOCIAL SECURITY BENEFIT INCREASES

Cost-of-Living Increase in Benefits Under Titles II and XVI of the Social Security Act and in Income Limitations for Beneficiaries Under the Supplemental Security Income Program

Correction

In FR Doc. 77–13419 appearing at page 24209 in the issue for Thursday, May 12, 1977, make the following corrections:

(1) In the table on page 24211, the duplicate line for "31.37" should be deleted.

(2) In the table on page 24213, in the right hand column, the 10th entry now reading "452.40" should have read "852.40".

(3) Also in the table on page 24213, right hand column, the 36th entry now reading "514.00" should have read "914.00".

DEPARTMENT OF THE INTERIOR

Bonneville Power Administration

CONTRACTING AUTHORITY

Redelegations of Authority

In accordance with 200 Departmental Manual 1.10, the following sections of the BPA Manual concerning redelegations of contracting authority will no longer be published in the FEDERAL REGISTER:

SECTON 10.10—CONTRACTS MANAGER
SECTION 10.11—CONSTRUCTION AND CLEARING CONTRACTS
SECTION 10.12—MATERIALS, EQUIPMENT, AND OTHER CONTRACTS

These redelegations will now be located in Chapter 11 of the BPA Manual. The Manual can be viewed by contacting the Public Information Office, 1002 NE. Holladay Street, Portland, Oregon 97208; telephone 503–234–3361, extension 5131.

Dated: May 5, 1977.

STANLEY E. EFFERDING,
Acting Administrator.

Bureau of Land Management

OUTER CONTINENTAL SHELF OFF LOUISIANA & TEXAS

Oil and Gas Lease Sale No. 47 June 23, 1977

1. *Authority.* This notice is published pursuant to the Outer Continental Shelf Lands Act (43 U.S.C. 1331–1343) and the regulations issued thereunder (43 CFR Part 3300).

2. *Filing of bids.* Sealed bids will be received by the Manager, New Orleans Outer Continental Shelf (OCS) Office, Bureau of Land Management, Hale Boggs Federal Building, 500 Camp Street, Suite 841, New Orleans, Louisiana 70130. Bids may be delivered, either by mail or in person, to the above address until 4:15 p.m., c.s.t., June 22, 1977; or by personal delivery to Ballrooms No. 1 and No. 2, Delta Towers, 1732 Canal Street, New Orleans, Louisiana 70112, between the hours of 8:30 a.m., c.s.t., and 9:30 a.m., c.s.t., June 23, 1977. Bids received by the Manager later than the times and date specfied above will be returned unopened to the bidders. Bids may not be modified or withdrawn unless written modification or withdrawal is received by the Manager prior to 9:30 a.m., c.s.t., June 23, 1977. All bids must be submitted and will be considered in accordance with applicable regulations, including 43 CFR Part 3300. The list of restricted joint bidders which applies to this sale was published in 42 FR 18905, April 11, 1977.

3. *Rent, royalty and bonus.* Bids submitted on all tracts to be offered at this sale must be on a cash bonus bid basis. The royalty for all tracts is fixed at 16⅔ percent. Leases which may be issued will provide for a yearly rental or minimum royalty of $3 per acre or fraction thereof.

4. *Method of bidding.* A separate bid in a sealed envelope, labeled "Sealed Bid for Oil and Gas Lease (insert number of tract), not to be opened until 10 a.m., c.s.t., June 23, 1977," must be submitted for each tract. A suggested bid format appears in paragraph 16. Bidders are advised that tract numbers are assigned solely for administrative purposes and are not the same as block numbers found on official protraction diagrams or leasing maps. All bids received shall be deemed submitted for a numbered tract. Bidders must submit with each bid one-fifth of the cash bonus in cash, or by cashier's check, bank draft, certified check or money order, payable to the order of the Bureau of Land Management. No bid for less than a full tract as described in paragraph 12 will be considered. Bidders submitting joint bids must state on the bid form the proportionate interest of each participating bidder, in percent to a maximum of five decimal places, as well as submit a sworn statement that the bidder is qualified under 43 CFR Part 3302. The suggested form for this statement to be used in joint bids appears in paragraph 16. Other documents may be required of bidders under 43 CFR 3302.4. Bidders are warned against violation of 18 U.S.C. 1860, prohibiting unlawful combination or intimidation of bidders.

5. *Equal opportunity.* Each bidder must have submitted by 9.30 a.m., c.s.t., June 23, 1977, the certification required by 41 CFR 60–1.7(b) and Executive Order No. 11246 of September 24, 1965, as amended by Executive Order No. 11375 of October 13, 1967, on the Compliance Report Certification Form, Form 1140–8 (November 1973), and the Affirmative Representation Form, Form 1140–7 (December 1971).

6. *Bid opening.* Bids will be opened on June 23, 1977, beginning at 10 a.m., c.s.t., in Ballrooms No. 1 and No. 2, Delta Towers at the address stated in paragraph 2. The opening of the bids is for the sole purpose of publicly announcing and recording bids received and no bids will be accepted or rejected at that time. If the Department is prohibited for any reason from opening any bid before midnight, June 23, 1977, that bid will be returned unopened to the bidder, as soon thereafter as possible.

7. *Deposit of payments.* Any cash, checks, drafts, or money order submitted with a bid may be deposited in a suspense account in the Treasury during the period the bids are being considered. Such a deposit does not constitute and shall not be construed as acceptance of any bid on behalf of the United States.

8. *Withdrawal of tracts.* The United States reserves the right to withdraw any tract from this sale prior to issuance of a written acceptance of a bid for that tract.

9. *Acceptance or rejection of bids.* The United States reserves the right to reject any and all bids for any tract. In any case, no bid for any tract will be accepted and no lease for any tract will be awarded to any bidder unless:

(a) The bidder has complied with all requirements of this notice and applicable regulations;

(b) His bid is the highest valid cash bonus bid; and

(c) The amount of the bid has been determined to be adequate by the United States.

No bid will be considered for acceptance unless it offers a cash bonus in the amount of $25 or more per acre or fraction thereof.

10. *Successful bidders.* Each person who has submitted a bid accepted by the United States will be required to execute copies of the lease specified below, pay the balance of the cash bonus bid together with the first year's annual rental and satisfy the bonding requirements of 43 CFR 3304.1 within the time provided in 43 CFR 3302.5.

11. *Protraction diagrams/leasing maps.* Tracts offered for lease may be located on the following official leasing maps/protraction diagrams which are available from the Manager, New Orleans Outer Continental Shelf Office, at the address stated in paragraph 2.

(a) Outer Continental Shelf Official Leasing Maps—Texas No. 1 through No. 7C. These maps are arranged in two sets, Nos. 1 through 4 (7 maps) and Nos. 5 through 7C (8 maps), which sell for $5 per set.

(b) Outer Continental Shelf Official Leasing Maps—Louisiana Nos. 1 through 11A. This is a set of 26 maps which sells for $15.

(c) Single copies of Official OCS Protraction Diagrams are available at $2 each, as follows:

(1) NG 15–1, East Breaks;

(2) NG 15–2, Garden Banks;

(3) NH 15–12, Ewing Bank;

(4) NG 15–3, Green Canyon;

(5) NH 16–10, Mississippi Canyon.

12. *Tract descriptions.* NOTE.—There are gaps in the sequence of numbers of tracts.

The tracts offered for bid are as follows:

[3] That portion landward of the zone 4 line.
[4] E½E½; N½NW¼NE¼; that portion of the SW¼ SE¼ seaward of the Three Marine League Line; N½ N½NW¼.

13. ***Lease terms and stipulations.*** **Leases issued as a result of this sale will be on Form 3300–1 (December 1976), available from the Manager, New Orleans Outer Continental Shelf Office, at the address stated in paragraph 2. Except as otherwise noted, the following stipulations will be included in each lease resulting from this sale:**

STIPULATION NO. 1

A. (To be included only in the leases resulting from this sale for tracts 47–123, 47–124, 47–125, 47–126, 47–133, 47–134, 47–135, 47–136, 47–137, 47–156, 47–192, 47–216, 47–223):

Operations in a zone extending 3 miles from any 85 meter isobath shall be restricted as follows: All drill cuttings and drilling fluids must be disposed of by shunting the material to the bottom through a downpipe that terminates an appropriate distance but no more than 10 meters from the bottom.

This deep shunting requirement does not apply to mobile drilling units in the zone beyond 1 miles from any 85 meter isobath, provided that a monitoring program is implemented for disposals which are not shunted beyond 1 and within 3 miles from any 85 meter isobath. A monitoring team consisting of qualified independent personnel will submit its findings to the Regional Director, U.S. Fish & Wildlife Service, Manager, New Orleans OCS Office, Bureau of Land Management and Supervisor, United States Geological Survey (hereinafter referred to as Supervisor). This report will be made annually, or immediately in case of imminent danger to the biological community resulting from drilling operations. If it is decided that the methods of disposing of the drill cuttings and fluids are not adequate, the Supervisor will require shunting within 3 miles of any 85 meter isobath. If it is decided by the Regional Director, U.S. Fish & Wildlife Service, the Manager, New Orleans OCS Office, Bureau of Land Management, and the Supervisor that the methods of disposal are adequate, no further monitoring will be required.

B. (To be included only in the leases resulting from this sale for tracts 47–123, 47–124, 47–125, 47–126, 47–133, 47–134, 47–136, and 47–137):

No structures, drilling rigs, or pipelines will be allowed in portions of the aforementioned tracts where the depth of water is 85 meters or less, unless it is determined by procedures prescribed in Secretarial Order 2974 that no significant environmental damage will result from the proposal.

C. (To be included only in the lease resulting from this sale for tract 47–34):

Exploration and development operations are permitted within the circle with a radius of 6,116 meters around point P; located by X=3,742,875, Y=71,280 (Texas Lambert System), with the following restrictions:

All drill cuttings and drilling fluids must be disposed of by shunting the material to the bottom through a downpipe that terminates an appropriate distance, but no more than 10 meters, from the bottom; however, if the shunting method is not adequate, as determined by the monitoring program proceedings outlined in this stipulation, to protect the unique character of the subject area, then the material must be transported a minimum of ten miles from any 50 meter isobath surrounding live reef-building coral before disposal. Disposal sites must be approved by the Supervisor.

No garbage, untreated sewage, or other solid waste shall be disposed of from vessels (work-boats, crew-boats, supply-boats, pipelaying vessels) during exploration and development operations.

No drilling permits will be issued by the Supervisor until he has found that the lessee's exploration and development plan filed under 30 CFR 250.34 is adequate to insure that exploration and production operations in the leased area will have no significant adverse effect on the biotic communities associated with the high value reef sites on the Flower Garden Banks. As a part of the development plan, a reef monitoring program must be included.

The monitoring program will be designed to assess the effects of oil and gas exploration and development operations on the viability of the coral reefs and associated communities. The development plan should indicate that the monitoring program will be conducted by qualified independent scientific personnel and that program personnel and equipment will be available at the time of operations. The monitoring team will submit its findings to the Regional Director, U.S. Fish & Wildlife Service, Manager, New Orleans OCS Office, Bureau of Land Management and Supervisor on a regular schedule established by the Supervisor, or immediately in case of imminent danger to the reefs resulting directly from drilling or other operations.

STIPULATION NO. 2

If the Supervisor, having reason to believe that a site, structure or object of historical or archeological significance hereinafter referred to as "cultural resource", may exist in the lease area, gives the lessee written notice that the lessor is invoking the provisions of this stipulation, the lessee shall upon receipt of such notice comply with the following requirements:

Prior to any drilling activity or the construction or placement of any structure for exploration or development on the lease, including but not limited to, well drilling and pipeline and platform placement, hereinafter in this stipulation referred to as "operation," the lessee shall conduct remote sensing surveys to determine the potential existence of any cultural resource that may be affected by such operations. All data produced by such remote sensing surveys as well as other pertinent natural and cultural environmental data shall be examined by a qualified marine archeologist to determine if indications are present suggesting the existence of a cultural resource that may be adversely affected by any lease operation. A report of this survey and assessment prepared by the marine survey archeologist shall be submitted by the lessee to the Supervisor and to the Manager, Bureau of Land Management (BLM) Outer Continental Shelf (OCS) office for review.

If such cultural resource indicators are present the lessee shall: (1) Locate the site of such operation so as not to adversely affect the identified location; or (2) establish, to the satisfaction of the Supervisor, on the basis of further archeological investigation conducted by a qualified marine survey archeologist or underwater archeologist using such survey equipment and techniques as deemed necessary by the Supervisor, either that such operation will not adversely affect the location identified or that the potential cultural resource suggested in the occurrence of the indicators does not exist.

A report of this identification investigation prepared by the marine survey archeologist or underwater archeologist shall be submitted to the Supervisor and the Manager, BLM OCS office for their review. Should the Supervisor determine that the existence of a cultural resource which may be adversely affected by such operation is sufficiently established to warrant protection, the lessee shall take no action that may result in an adverse effect on such cultural resource until the Supervisor has given directions as to its disposition.

The lessee agrees that if any site, structure, or object of historical or archeological significance should be discovered during the conduct of any operations on the leased area, he shall report immediately such findings to the Supervisor, and make every reasonable effort to preserve and protect the cultural resource from damage until the Supervisor has given directions as to its disposition.

14. ***Restriction on leases.*** **Some of the tracts offered for lease may fall in areas which may be included in fairways, precautionary zones, or traffic separation schemes. Department of the Army permits are required for construction of any structures in or over any navigable waters of the United States pursuant to Section 10 of the River Harbor Act of 1899 (30 Stat. 1151; 33 U.S.C. 403) and for artificial islands and fixed structures located on the Outer Continental Shelf in accordance with Section 4(f) of the Outer Continental Shelf Lands Act of 1953 (67 Stat. 463; 43 U.S.C. 1333 (f)).**

Permit applications and inquiries should be directed to the appropriate

District Engineer, New Orleans District or Galveston District, U.S. Army Corps of Engineers.

15. *OCS Orders.* Operations of all leases resulting from this sale will be conducted in accordance with the provisions of all Gulf of Mexico Area OCS Orders, issued effective January 1977, and any other applicable OCS order as it becomes effective.

16. *Suggested bid form.* It is suggested that bidders submit their bids to the Manager, New Orleans Outer Continental Shelf office, in the following form:

OIL AND GAS BID

The following bid is submitted for an oil and gas lease on the tract of the Outer Continental Shelf specified below:

Tract No.	Total amount bid	Amount per acre	Amount of cash bonus submitted with bid

PROPORTIONATE INTEREST OF COMPANY(S) SUBMITTING BID

[Int. DES 77-18]

PROPOSED OPERATING CRITERIA FOR LOWER TRUCKEE-LOWER CARSON RIVER BASINS, NEV.

Availability of Draft Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 the Department of the Interior has prepared a Draft Environmental Statement on the Proposed Operating Criteria for the Lower Truckee-Lower Carson River Basins. Those basins are located principally in Washoe and Churchill Counties, State of Nevada.

The environmental statement contains human, economic and physical environmental effects associated with the proposal to set and enforce the operating criteria for the Newlands Reclamation Project which diverts water from the Truckee River for use in the Truckee Division and in the North and South Carson Divisions of that project in the Carson River watershed. The proposed action would change the operating criteria of the Newlands Project and restrict the amount of water diverted from the Truckee River. That water would be kept in the Lower Truckee River Basin to preserve Pyramid Lake and assist in the reestablishment of the fishery in that lake. Certain improvements will be made in the operation and management of the Newlands Project. Copies of the statement are available for inspection at the following locations:

1. Bureau of Indian Affairs, Environmental Quality Services, Room 4554, Department of the Interior, Washington, D.C. 20245. Telephone: (202) 343-8248.

2. Bureau of Indian Affairs, Phoenix Area Office, 3030 N. Central, P.O. Box 7007, Phoenix, Arizona 85011. Telephone: (602) 261-4195.

Drug Enforcement Administration

MANUFACTURE OF CONTROLLED SUBSTANCES

Application

Section 303(a)(1) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 823(a)(1)) states:

The Attorney General shall register an applicant to manufacture controlled substances in schedule I or II if he determines that such registration is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on the effective date of this part. In determining the public interest, the following factors shall be considered:

(1) Maintenance of effective controls against diversion of particular controlled substances and any controlled substance in schedule I or II compounded therefrom into other than legitimate medical, scientific, research, or industrial channels, by limiting the importation and bulk manufacture of such controlled substances to a number of establishments which can produce an adequate and uninterrupted supply of these substances under adequately competitive conditions for legitimate medical, scientific, research, and industrial purposes.

Pursuant to § 1301.43 of Title 21 of the Code of Federal Regulations (CFR), notice is hereby given that on April 21, 1977, Regis Chemical Company, 8210 N. Austin Ave., Morton Grove, Illinois 60053, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of mescaline, a basic class of controlled substance in schedule I.

Pursuant to section 301 of the Controlled Substances Act (21 U.S.C. 821), and in accordance with 21 CFR 1301.43 (a), notice is hereby given that the above person has made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the basic class of controlled substance indicated, and any other such person, and any existing registered bulk manufacturer of mescaline, may file written comments on or objections to the issuance of such registration and may, at the same time, file a written request for a hearing on the application in accordance with 21 CFR 1301.54 in such form as prescribed by 21 CFR 1316.47. Such comments, objections and requests for a hearing may be filed no later than June 17, 1977.

Comments and objections may be addressed to the DEA Federal Register Representative, Office of Chief Counsel, Drug Enforcement Administration, Room 1203, 1405 Eye Street NW., Washington, D.C. 20537.

Dated: May 13, 1977.

DONALD E. MILLER,
Acting Deputy Administrator,
Drug Enforcement Administration.

MANUFACTURE OF CONTROLLED SUBSTANCES

Registration

By Notice dated March 23, 1977, and published in the FEDERAL REGISTER on March 30, 1977 (42 FR 16877), Gane's Chemicals, Inc., Lessee of Siegfried Chemical, Inc., Industrial Park Rd., Pennsville, New Jersey 08070, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the basic class of controlled substances listed below:

Drug:	Schedule
Pentobarbital	II
Amobarbital	II
Secobarbital	II
Methaqualone	II

No comments or objections having been received, and pursuant to Section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and 21 CFR 1301.54(e), the Acting Deputy Administrator hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of the basic class of controlled substances listed above is granted.

Dated: May 16, 1977.

DONALD E. MILLER,
Acting Deputy Administrator,
Drug Enforcement Administration.

LEGAL SERVICES CORPORATION

AD HOC COMMITTEE ON CORPORATION'S FACILITIES OF BOARD OF DIRECTORS

Meeting

JUNE 2, 1977.

A meeting of the Ad Hoc Committee on the Corporation's Facilities will be held on Thursday, June 2, 1977, at the offices of the Corporation, 733 Fifteenth Street, N.W., Washington, D.C.

The meeting will begin at 2:00 p.m. and will be for the purpose of considering options available to the Corporation for housing its headquarters offices.

The meeting is open to the public.

THOMAS EHRLICH,
President.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

DANCE ADVISORY PANEL

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that a meeting of the Dance Advisory Panel to the National Council on the Arts will be held on June 12-15, 1977; from 9:30 a.m. to 5 p.m. on June 12, 9 a.m. to 7 p.m. on June 13, 9 a.m. to 6 p.m. on June 14 in Room 1422 Columbia Plaza Building and from 9 a.m. to 5:30 p.m. on June 15, in Room 1115 Columbia Plaza Building, 2401 E Street NW., Washington, D.C.

A portion of this meeting will be open to the public on June 12, from 3 p.m. to 5 p.m., June 14, from 4 p.m. to 6 p.m. and June 15, from 9 a.m. to 2:30 p.m. on a space available basis. The agenda for these sessions will include open workshop and guidelines.

The remaining sessions of this meeting on June 12, from 9:30 a.m. to 3 p.m.; June 13, from 9 a.m. to 7 p.m.; June 14, from 9 a.m. to 4 p.m. and June 15, from 2:30 to 5:30 p.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the FEDERAL REGISTER March 17, 1977, these sessions may be closed to the public pursuant to subsection (c) (4), (6) and 9 (B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, Advisory Committee Management Officer, National En-

dowment for the Arts, Washington, D.C. 20506, or call 202–634–6377.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

MAY 17, 1977.

THEATRE RESEARCH PROJECT MEETING

Meeting

The National Endowment for the Arts has contracted with Mathtech, Inc. to conduct a research study on the condition and needs of American theatre. Consultants representing the theatre community will assist the contractor in this study.

A meeting of these consultants is scheduled from June 9 (2 p.m.) to June 10 (12 noon) and will be held in the Board Room, League of New York Theatres and Producers, 226 West 47th Street, New York, New York 10036.

The agenda will concern plans for the project being initiated. The contractor wishes to receive written statements from interested parties concerning their perceptions of the condition and the needs of American theatre. Such comments should be addressed to the Project Manager, Dr. Robert J. Anderson, Jr., Vice President and Director of Economics, Mathtech, Inc., P.O. Box 2392, Princeton, New Jersey, 08540.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

NATIONAL SCIENCE FOUNDATION

INTERNATIONAL DECADE OF OCEAN EXPLORATION PROPOSAL REVIEW PANEL

Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92–463, the National Science Foundation announces the following meeting:

NAME: Proposal Review Panel for the Office for the International Decade of Ocean Exploration, Ad Hoc Subpanel for the SEAREX Project.

DATE AND TIME: June 9, 1977, 9 a.m. to 5 p.m.

PLACE: National Science Foundation, 1800 G Street NW., Room 643, Washington, D.C. 20550.

TYPE OF MEETING: Closed.

CONTACT PERSON:

Mr. Feenan D. Jennings, Head, Office for the International Decade of Ocean Exploration, Room 605, National Science Foundation, Washington, D.C. 20550, telephone 202–632–7356.

PURPOSE OF PANEL: To provide the IDOE Proposal Review Panel members with additional expertise in the review and evaluation of proposals relating to oceanographic research related to Sea-Air Exchange (SEAREX).

AGENDA: Detailed review and evaluation of proposals for support of the SEAREX Project.

REASON FOR CLOSING: The proposals being reviewed included information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

AUTHORITY TO CLOSE MEETING: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Acting Committee Management Officer.

USES COMMITTEE OF NSF SCIENCE INFORMATION ACTIVITIES TASK FORCE

Open Meeting

In accordance with the Federal Advisory Act, P.L. 92–463, the National Science Foundation announces the following meeting:

NAME: Uses Committee of the Science Information Activities Task Force.

DATE: June 9, 1977.

TIME: 7 p.m. to 10 p.m.

TYPE OF MEETING: Open.

PLACE: National Science Foundation (Conference Room 540), 1800 G Street NW., Washington, D.C. 20550.

CONTACT:

Mr. Robert S. Cutler, Executive Officer, Room 1201, National Science Foundation, Washington, D.C. 20550. Telephone 202–632–5826.

Persons planning to attend should notify Mr. Cutler prior to this meeting.

Summary Minutes: May be obtained from the Committee Management Coordination Staff, Division of Personnel and Management, Room 248, National Science Foundation, Washington, D.C. 20550.

Purpose of the Task Force: To provide advice and recommendations concerning the appropriate roles and responsibilities of the National Science Foundation regarding the communication and use of scientific and technical information. This committee, one of four established by the Task Force, will explore the user needs aspects pertinent to the Task Force's charge.

AGENDA

7 p.m.—Welcome and Introductory Remarks, Chairman.
7:15 p.m.—Discussion of User Requirements Program: User studies aspects.
8 p.m.—Open Public Participation.
8:30 p.m.—Discussion of User Requirements Program: Education and training aspects.
10 p.m.—Adjourn.

M. REBECCA WINKLER,
Acting Committee, Management Officer.

MAY 17, 1977.

[FR Doc.77–14516 Filed 5–20–77;8:45 am]

NUCLEAR REGULATORY COMMISSION

REACTOR SAFEGUARDS ADVISORY COMMITTEE, REGULATORY ACTIVITIES SUBCOMMITTEE

Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the ACRS Subcommittee on Regulatory Activities will hold an open meeting on June 8, 1977 in Room 1046, 1717 H St. NW., Washington, D.C. 20555.

The agenda for subject meeting shall be as follows:

WEDNESDAY, JUNE 8, 1977

8:45 A.M. UNTIL ABOUT 12 NOON

A. The Subcommittee will hear presentations from the NRC Staff and will hold discussions with this group pertinent to the following:

(1) Regulatory Guide 1.122, Revision 1, "Development of Floor Design Response Spectra for Seismic Design of Floor Supported Equipment or Components."

(2) A Working Paper, Regulatory Guide, 1.XX, "Normal Water Level and Discharge at Nuclear Power Plants."

(3) A Working Paper, Regulatory Guide 1.XX, "Reporting of Significant Design and Construction Deficiencies."

1 P.M. UNTIL THE CLOSE OF BUSINESS.

B. The Subcommittee will hear presentations from the NRC Staff and will hold discussions with this group pertinent to activities which affect the current licensing process or reactor operations, including those relating to the following:

(1) Procedures and bases for the possible implementation of new regulatory requirements and improved safety features when scheduled initial plant operation is much more than the normal time period beyond a construction permit.

Other matters which may be of a predecisional nature relevant to reactor operation or licensing activities may be discussed during this session.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety & Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally treat matters pertaining to environmental impacts outside the safety area.

With respect to public participation in the meeting, the following requirements shall apply:

(A) Persons wishing to submit written statements regarding Regulatory Guide 1.122 may do so by providing a readily reproducible copy to the Subcommittee at the beginning of the meeting. Such comments shall be based upon documents on file and available for public inspection at the NRC Public Document Room, 1717 H St. NW., Washington, D.C. 20555.

Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than June 1, 1977 to Mr. G. R. Quittschreiber, ACRS, NRC, Washington, D.C. 20555, will normally be received in time to be considered at this meeting.

(B) Persons desiring to make an oral statement at the meeting should make a written request to do so, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Subcommittee will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Chairman.

(C) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on June 7, 1977 to the Office of the Executive Director of the Committee (telephone 202/634–1374, Attn: Mr. G. R. Quittschreiber) between 8:15 a.m. and 5:00 p.m., EDT.

(D) Questions may be propounded only by members of the Subcommittee and its consultants.

(E) The use of still, motion picture, and television cameras; the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(F) A copy of the transcript of the open portion(s) of the meeting where factual information is presented and a copy of the minutes of the meeting will be available for inspection at the NRC Public Document Room, 1717 H St., NW, Washington, DC 20555 on or after June 15, 1977, and September 8, 1977, respectively.

Copies may be obtained upon payment of appropriate charges.

Dated: May 19, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[FR Doc.77-14659 Filed 5-20-77;8:45 am]

[Docket Nos. 50-338 OL and 50-339 OL]

VIRGINIA ELECTRIC & POWER CO. (NORTH ANNA POWER STATION, UNITS 1 AND 2)

Order

It is ordered, That the evidentiary hearing will resume at 9:30 a.m. on May 31, 1977, in the City Council Chambers on the Second Floor of City Hall, 7th and Main Streets, Charlottesville, Virginia.

Dated at Bethesda, Maryland, this 17th day of May, 1977.

THE ATOMIC SAFETY AND LICENSING BOARD:

FREDERICK J. COUFAL,
Chairman.

[FR Doc.77-14658 Filed 5-20-77;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS

Meeting

In accordance with the purposes of Sections 29 and 182 b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the Advisory Committee on Reactor Safeguards will hold a meeting on June 9–11, 1977, in Room 1046, 1717 H Street NW., Washington, D.C.

The agenda for the subject meeting will be as follows:

THURSDAY, JUNE 9, 1977

8:30 a.m. to 9:15 a.m.: Executive Session (Open)—The Committee will hear and discuss the report of the ACRS Chairman regarding miscellaneous matters relating to activities.

The Committee will also hear and discuss the report of the ACRS Subcommittee and consultants who may be present related to review of the Zion Station, Units 1 and 2. Portions of this session will be closed if necessary to discuss Proprietary Information related to the design and/or operation of this facility. Closed portions will also be held if required to discuss security provisions at this station.

9:15 a.m. to 12:15 p.m.: Zion Station, Units 1 and 2 (Open)—The Committee will hear presentations and hold discussions with representatives of the NRC Staff and the applicant related to the review of outstanding technical issues identified in the ACRS report of June 6, 1976 on proposed full power operation of the Zion plant. Portions of this session will be closed if necessary to discuss Proprietary Information related to the design and/or operation of this facility. Closed portions will also be held if required to discuss security provisions at this station.

1:15 p.m. to 1:45 p.m.: Executive Session (Open)—The Committee will hear and discuss the report of the ACRS Subcommittee Chairman regarding a number of issues related to the design and operation of the Shippingport Atomic Power Station. Portions of this session will be closed if required to discuss security provisions at this facility.

1:45 p.m. to 3:15 p.m. Shippingport Atomic Power Station (Open)—The Committee will hear presentations and hold discussions with representatives of the NRC Staff and the Division of Naval Reactors, ERDA, and its contractors regarding issues related to the design and operation of this station. Portions of this session will be closed if necessary to discuss security provisions for this facility.

3:15 p.m. to 5:30 p.m.: Executive Session (Open)—The Committee will hear and discuss reports of ACRS Subcommittees, Working Groups and members on a number of regulatory matters including standardized nuclear plants and General Design Criterion No. 19. The Committee will also discuss items related to a periodic ACRS report on matters needing the attention of the NRC Commissioners and clarification of ACRS reports at the request of the Commission.

5:30 p.m. to 6:30 p.m.: Executive Session (Open/Closed)—The Committee will meet in open session to prepare a report to the Nuclear Regulatory Commission on the Zion Station, Units 1 and 2 and in closed session to prepare a letter to the Commonwealth of Pennsylvania on the Shippingport Atomic Power Plant. In the event a report to NRC is required regarding the Shippingport Plant, it will be prepared in open session.

FRIDAY, JUNE 10, 1977

8:30 a.m. to 11:30 a.m.: Meeting with NRC Staff (Open)—The Committee will hear presentations and hold discussions with members of the NRC Staff regarding recent operating experience at nuclear facilities, licensing actions, generic matters related to reactor licensing, and the future schedule for ACRS activities. This discussion will include the:

Status of construction at the North Anna Nuclear Power Station, Units 1 and 2;

Equipment performance at the Rancho Seco and Beaver Valley nuclear plants;

Reclassification of the turbine trip without bypass transient.

11:30 a.m. to 12:30 p.m.: Executive Session (Closed)—The Committee will hear and discuss comments by ACRS members regarding reactor safety and safeguards information provided in confidence by a foreign government.

1:30 p.m. to 2:30 p.m.: Meeting with NRC Commissioners (Open)—The Committee will discuss with the Commissioners a periodic report by the ACRS regarding regulatory matters which should be brought to the attention of the Commissioners.

2:30 p.m. to 3:30 p.m.: Executive Session (Open)—The Committee members will discuss proposed ACRS action regarding General Design Criterion No. 19.

The Committee will hear and discuss the reports of ACRS Subcommittees and Working Groups regarding various generic matters including:

Fluid-hydraulic dynamic forces primary and secondary systems;

Reactor fuel performance and surveillance;

Fire protection at nuclear facilities;

Review of reactor safety research programs.

3:30 to 6:30 p.m. Executive Session (Open/Closed)—The Committee will meet in open session to prepare a report to the Nuclear Regulatory Commission on the Zion Station, Units 1 and 2, and in closed session to prepare a letter to the Commonwealth of Pennsylvania on the Shippingport Atomic Power Station. In the event a report to the NRC is required regarding the Shippingport Plant it will be prepared in open session.

SATURDAY, JUNE 11, 1977

8:30 a.m. to 10:30 a.m.: Executive Session (Open/Closed)—The Committee will meet in open session to complete its report to the NRC on the Zion Station, Units 1 and 2 and in closed session to complete its letter to the Commonwealth of Pennsylvania on the Shippingport Plant.

10:30 a.m. to 12:30 p.m.: Executive Session (Open)—The Committee will meet in open session to prepare/complete its report to the NRC on the Shippingport Plant and its reports/comments on other matters discussed during this meeting as required.

I have determined in accordance with Subsection 10(d) of Public Law 92-463 that it is necessary to close portions of the meeting as noted above to protect proprietary data (5 U.S.C. 552b. (c)(4)), to preserve the confidentiality of information related to safeguarding of special nuclear material and the physical protection of nuclear facilities (5 U.S.C. 552b.(c)(1)(4), and material, including classified and proprietary information, provided in confidence by a foreign government [Executive Order 11652, Section 4c. and 5 U.S.C. 552b.(c)(1)(4) and (9)(B)]. That portion of the meeting during which the Committee's letter to the Commonwealth of Pennsylvania is drafted will be closed pursuant to exemption (9)(B) of 5 U.S.C. 552b.(c) since it involves information the premature disclosure of which would significantly frustrate implementation of proposed Committee action. Separation of factual information and information considered exempt from disclosure under exemptions (1), (4), (9)(B), of 5 U.S.C. 552b. during these portions of the meeting is not considered practical.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Committee is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business, including provisions to carry over an incompleted session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety & Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally deal with matters pertaining to environmental impacts outside the safety area.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda items may do so by providing a readily reproducible copy to the Committee at the beginning of the meeting. Comments should be limited to safety-related areas within the Committee's purview. Persons desiring to mail written comments may do so by mailing a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than June 1, 1977, to the Executive Director, Advisory Committee on Reactor Safeguards, Nuclear Regulatory Commission, Washington, DC 20555 will normally be received in time to be considered at this meeting. Background information concerning items to be considered at this meeting can be found in documents on file and available for public inspection at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street, NW, Washington, DC 20555 and at the following Public Document Rooms:

ZION GENERATING STATION, UNITS 1 AND 2

Waukegan Public Library, 128 North County Street, Waukegan, IL 60085.

SHIPPINGPORT ATOMIC POWER STATION

B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, PA 15001.

(b) Those persons wishing to make oral statements regarding agenda items at the meeting should make a request to do so prior to the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Committee will receive oral statements in safety-related areas within the Committee's purview at an appropriate time chosen by the Chairman of the Committee.

(c) Further information regarding topics to be discussed, whether the meeting or portions of the meeting have been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted therefor, can be obtained by a prepaid telephone call on June 8, 1977, to the Office of the Executive Director of the Committee (Telephone: 202-634-1371) between 8:15 am and 5:00 pm, Eastern Time. It should be noted that the above schedule is tentative, based on the anticipated availability of related information, etc. It may be necessary to reschedule items to accommodate required changes. The ACRS Executive Director will be prepared to describe these changes on June 8, 1977.

(d) Questions may be propounded only by members of the Committee and its consultants.

(e) The use of still, movie, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session. Recordings of the proceedings will be permitted only during those open sessions when a transcript is being kept.

(f) Persons with agreements or orders permitting access to proprietary information other than safeguards information may attend portions of ACRS meetings where this materials is being discussed upon confirmation that such agreements are effective and relate to the material being discussed.

The Executive Director of the ACRS should be informed of such an agreement at least 3 days prior to the meeting so that the agreement can be confirmed and a determination can be made regarding the applicability of this agreement to the material that will be discussed during the meeting. Minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to the Executive Director at the beginning of the meeting.

(g) A copy of the transcript of the open portion(s) of the meeting where factual information is presented will be available for inspection during the following workday at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street, NW, Washington, D.C. Copies of the minutes of the meeting will be made available for inspection at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street, NW, Washington, D.C., on or after September 9, 1977. Copies may be obtained upon payment of appropriate charges.

Dated: May 19, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on May 13, 1977 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the clearance office, Office of Management and Budget, Washington, D.C. 20503 (202-395-4529), or from the reviewer listed.

NEW FORMS

TENNESSEE VALLEY AUTHORITY

Comparability Study of Power Plant Operators, single time, companies in vicinity engaged in comparable work, Strasser, A., 395-5867.

VETERANS ADMINISTRATION

Transfer of Ownership Data—Portfolio Loan, 26-8792, on occasion, assumers of VA portfolio mortgages, Warren Topelius, 395-5872.

DEPARTMENT OF AGRICULTURE

Forest Service, Indiana Woodland Owner Timber Sale Survey, single time, Indiana woodland owners, Gaylord Worden, 395-4730.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration:

Coastal Energy Impact Program (Pub. L. 94-370) (Grants, Loans, Guarantees), 36-20, 21, 22, 23, on occasion, State and local governments, Ellett, C. A., 395-5867.

Seafood Industry Survey on the Comparison of Edible Aquatic Species, single time, seafood industry specialist, Warren Topelius, 395-5872.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education, Basic Educational opportunity Grant Application Questionnaire, OE-556, single time, high school counselors and financial aid officers, Warren Topelius, 395-5872.

National Institute of Education, California Beginning Teacher Evaluation Study (Teacher Attitude Questionnaire) (Demographic Data Form), NIE-182 A-B, single time, elementary school teachers San Francisco Bay area, Kathy Wallman, 395-6140.

National Center for Education Statistics Libgis A, B, C, D, E, 2394- 1 and 2, 2395, 2391-1, 2396- 1 and 2, 23, single time, librarians and library agencies, Kathy Wallman, 395-6140.

National Institute of Education:
Cross Project Evaluation of the R. & D. Utilization Program, (Evaluation Instruments T1 and T2), (NIE–181 T1 and T2, single-time, school practitioners administrators housing, veterans and labor division, Raynsford, R., 395–3532.
Survey of Secondary School Principals, NIE–175 A and B, single time, public and private secondary school principals, Kathy Wallman, 395–6140.

Alcohol, Drug Abuse and Mental Health Administration, Impact of Family Therapy Treatment of Client Outcome and Program Functioning, single-time, clients and staff of Federally funded drug abuse treatment program, Richard Eisinger, 395–6140.

Center for Disease Control, Directory on Smoking and Health Research, CDC–65.5, other (see SF–83), scientists engaged in smoking and health research, Richard Eisinger, 395–6140.

REVISIONS

VETERANS ADMINISTRATION

Evaluation of Treatment of Drug and Alcohol Dependent Patients, 10–798, single-time, VA patients in alcohol and drug dependence treatment, housing veterans and labor division, Reese, B. F., 395–3532.

SMALL BUSINESS ADMINISTRATION

Title VI, Compliance Report, SBA 707, annually, small business, Lowry, R. L., 395–3772.

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

Instruction for the Preparation of an Application for a Pilot Grant, on occasion, colleges, universities and schools, Warren Topelius, 395–5872.

EXTENSIONS

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

Instructions for the Preparation of an Application for an Education Project Grant, on occasion, colleges, universities and schools, Warren Topelius, 395–5872.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration:
Jewel Bearings and Related Components in 19——, DIB–941, annually, producers, consumers, and importers of jewel bearings, Warren Topelius, 395–5872.

Defense Materials System-Application for Allotment or Class A Products, DMS–4A, on occasion, manufacturers and contractors who use controlled materials, Warren Topelius, 395–5872.

Defense Materials System—Application for Allotment or Construction, DMS–4C, on occasion, manufacturers and contractors who use controlled materials, Warren Topelius, 395–5872.

Defense Materials System — Detailed Breakdown of Controlled Materials, DMS–4S, on occasion, manufacturers and contractors who use controlled materials, Warren Topelius, 395–5872.

National Bureau of Standards, Survey of Radioactivity Standards Needs, NBS–951, on occasion, purchasers of standard, Warren Topelius, 395–5782.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Administration (Office of Assistant Secretary), Title I Claim for Loss (Property Improvement), FH–7, on occasion, banks, savings and loans, credit unions, etc., housing, veterans and labor division, 395–3532.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration, Material Safety Data Sheet, OSHA–20, on occasion, shipbuilders, Ellett, C. A., 395–5867.

PHILLIP D. LARSEN,
Budget and Management Officer.

PRIVACY ACT OF 1974

Reports on New Systems

The purpose of this notice is to list reports on new systems filed with the Office of Management and Budget to give members of the public the opportunity to make inquiries about them and to comment on them.

The Privacy Act of 1974 requires that agencies give advance notice to the Congress and the Office of Management and Budget of their intent to establish or modify systems of records subject to the Act (5 U.S.C. 552a(o)). During the period May 2, 1977 through May 13, 1977 the Office of Management and Budget received the following reports on new (or revised) systems of records.

DEPARTMENT OF LABOR

System Names:

(1) Investigatory Files—PWBP, Division of Enforcement.

(2) Impact of Disqualification Provisions of State Unemployment Insurance Laws.

(3) Analysis of Delayed and Never Filers for Unemployment Insurance.

Report Date:

April 27, 1977.

Point-of-Contact:

Sofia P. Petters, Counsel for Administrative Legal Services, Department of Labor, Washington, D.C. 20210.

Summary:

The report proposes two new systems, to be operated by contractors pursuant to subsection (m) of the Privacy Act, "to determine the extent of and the reasons for delayed filing or never filing for unemployment insurance benefits." The third proposed system was created out of an existing system by a reorganization.

DEPARTMENT OF JUSTICE

System Names:

(1) Civil Division Case File System.
(2) Civil Division Case File System—Customs Section.
(3) Office of Alien Property File System.

Report Date:

April 28, 1977.

Point-of-Contact:

Mr. Harry Gastley, Department of Justice, Washington, D.C. 20530.

Summary:

This is a proposed modification of the Civil Division Case File System, which separates the system into "three distinct systems which more accurately reflect the categories of records, purposes and functions of the systems."

DEPARTMENT OF COMMERCE

System Names:

Nuclear Reactor Operator Licensees File.

Report Date:

May 8, 1977.

Point-of-Contact:

Mr. Joseph O. Smiroldo, Director, Office of Organization, and Management Systems, Department of Commerce, Washington, D.C. 20230.

Summary:

The proposed system "provides a record documenting that operators of the National Bureau of Standards reactor are trained, tested, and qualified to operate the facility, and forms the basis for subsequent renewal of their operators' licenses by the Nuclear Regulatory Commission."

CONSUMER PRODUCT SAFETY COMMISSION

System Name:

Commissioned Officers Personal Data File.

Report Date:

May 6, 1977.

Point-of-Contact:

Mr. Melnick, Office of the General Counsel, U.S. Consumer Product Safety Commission, Washington, D.C. 20207.

Summary:

This proposed system will support the CPSC's program for commissioning

State and local government officials to conduct examinations, investigations, and inspections.

DEPARTMENT OF DEFENSE

System Name:

DOD Discharge Review Program (Special).

Report Date:

May 10, 1977.

Point-of-Contact:

Mr. William Cavaney, Executive Secretary, Defense, Privacy Board (Room 5H–023), Washington, D.C. 20301.

Summary:

This proposed system will support the President's program to review Vietnam-Era less than honorable discharges and requests of "certain service members presently in a deserter status whose absence commenced during the Vietnam-Era."

DEPARTMENT OF DEFENSE

System Names:

(1) Department of Defense Superior Service Medal.
(2) Standard of Conduct Inquiry File.
(3) Statements of Affiliations and Financial Interests File.
(4) Privacy Act Request for Access File.

Report Date:

May 10, 1977.

Point-of-Contact:

Mr. William Cavaney, Executive Secretary, Defense, Privacy Board (Room 5H–023), Washington, D.C. 20301.

Summary:

1. Superior Service Medal system is intended to keep a record of "names and relevant background information" on individuals who have been awarded this medal. 2. Standard of Conduct Inquiry File will be used "to process cases involving individuals alleged to have violated DOD standards of conduct regulations or the conflict of interest statutes." 3. Statements of affiliations and Financial Interests File is intended to implement the transfer of the function and requirement to review statements of affiliations and financial interests." 4. Privacy Act Request for Files will keep records of requests for access to records received by the Office of the Secretary of Defense and the Office of the Joint Chiefs of Staff.

AGENCY FOR INTERNATIONAL DEVELOPMENT

System Name:

Travel and Transportation Records.

Report Date:

May 13, 1977.

Point-of-Contact:

Mr. Rhea Johnson, Privacy Officer, Agency for International Development, Washington, D.C. 20523.

Summary:

This report proposes changes to the sytem of records to reflect additional categories of records and storage of records on magnetic tapes and discs.

VELMA N. BALDWIN,
Assistant to the Director for Administration.

[FR Doc.77–14533 Filed 5–20–77;8:45 am]

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

TRADE POLICY STAFF COMMITTEE

Acceptance of Petition for Review of Product Eligibility Under the Generalized System of Preferences; Correction

FR Doc. 77–13750 appears on page 24133 in the issue for Thursday, May 12, 1977. In the second line of item 2 of the description of the petition, the Tariff Schedules of the United States Item No. "147.55" should read "547.55."

WILLIAM B. KELLEY, Jr.,
Chairman,
Trade Policy Staff Committee.

PRESIDENT'S COMMISSION ON MENTAL HEALTH

PUBLIC HEARINGS

In accordance with Section 10(A)(2) of the Federal Advisory Committee Act (5 USC Appendix I), announcement is made of the following Presidential Commission public hearings during the month of June, 1977.

THE PRESIDENT'S COMMISSION ON MENTAL HEALTH

(1) June 20, 1977; 9:30 a.m. to 5 p.m., Doubletree Inn, 445 S. Alvernon, Tucson, Arizona 85711.
(2) June 21, 1977; 9:30 a.m. to 5 p.m., Sheraton Palace Hotel, 639 Market Street, San Francisco, California 94119.
Open public hearings.
Contact:
Mary Ann Orlando, Special Assistant to the Chairperson, President's Commission on Mental Health, Room 121, Old Executive Office Building, Washington, D.C. 20500—Tel: 202/456–7100.

Anyone wishing to testify at either of the above Public Hearings should notify the Commission in writing no later than June 10, 1977, indicating the name of organization or organizations, if any, being represented and the subject and particular point of view within the mental health area to be discussed. Requests to testify should be addressed to:

The President's Commission on Mental Health, Room 121, Old Executive Office Building, Washington, D.C. 20500.

Requests to testify will be accepted on a time available basis. Those who are scheduled to testify will be notified by the Commission.

Oral testimony will be limited to 8 minutes, followed by 4 minutes of questioning by the Commission. Additional written data in support of the testimony will also be made a part of the record and must be submitted at the time of testimony.

If time does not permit all to testify, presentations will be accepted in written form and made a part of the record of the proceedings, but must be submitted to the Commission at its offices within one (1) week of the hearing.

In addition, time will be alloted to permit individuals from the audience to testify for a maximum of 3 minutes. Requests to testify from the floor will be accepted at the time of the hearing and will be honored on the basis of time available and relevance of subject matter.

Purpose of Commission: The President's Commission on Mental Health is a policy recommendation commission composed of 20 members representing a broad spectrum of interested and informed private citizens. The Commission was created by the President by Executive Order No. 11973 and was directed to identify the mental health needs of the nation. In particular, the Commission shall seek to identify: How the mentally ill, emotionally disturbed and mentally retarded are being served or underserved and who is affected by such underservice; projected needs for dealing with emotional stress during the next twenty-five years; ways the President, Congress and the Federal Government may efficiently support the treatment of the underserved mentally ill, emotionally disturbed and mentally retarded; methods for coordinating a unified approach to all mental health services; types of research the Federal Government should support to further prevention and treatment of mental illness and mental retardation; roles various educational systems, volunteer agencies and other people-helping institutions can perform to minimize emotional disturbance; and what programs will cost, when the money should be spent and how the financing should be divided among Federal, State and local governments, and the private sector. The Commission shall conduct such public hearing, inquiries and studies as may be necessary, and shall submit a preliminary report to the President by September 1, 1977. A final report with recommendations and priorities shall be submitted to the President by April 1, 1978.

Purpose of Public Hearings: Public hearings are designed to give Commissioners an opportunity to hear first hand the concerns of the American public directly related to the field of mental health.

Further information may be obtained from the above named person.

Attendance by the public will be limited to space available.

The Commission will furnish upon request transcripts of the public hearings at printing cost. Requests for such transcripts should be directed to: The President's Commission on Mental Health, Room 121, Old Executive Office Building, Washington, D.C. 20500.

BENEDICT J. LATTERI,
Administrative Officer, President's Commission on Mental Health.

MAY 16, 1977.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 13542; File No. SR-Amex-77-3]

AMERICAN STOCK EXCHANGE, INC.

Order Instituting Proceedings To Determine Whether Proposed Amendments to Part 1, "Original Listing Requirements," and Part 10, "Suspension and Delisting," of the American Stock Exchange's Company Guide Should Be Disapproved

The American Stock Exchange, Inc. ("Amex") 86 Trinity Place, New York, New York 10006, has filed, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), and Rule 19b-4 thereunder, 17 CFR 240.19b-4, copies of a proposed rule change which would add section 117 to Part 1 and section 1003A to Part 10 of the Amex "Company Guide". Section 117 sets forth alternate criteria for the original listing of common stock, and section 1003A provides for the prospective application of certain delisting criteria with respect to issues which may be listed pursuant to the alternate criteria. Notice of the proposed changes together with the Amex's statement of the basis and purpose thereof was published in the FEDERAL REGISTER on March 24, 1977 (42 FR 15994).

PROCEEDINGS TO DETERMINE WHETHER TO DISAPPROVE PROPOSED AMENDMENTS TO PART 1 AND PART 10 OF THE AMEX COMPANY GUIDE (SR-AMEX-77-3)

The Commission is instituting proceedings pursuant to section 19(b)(2) of the Act to determine whether proposed additions to Parts 1 and 10 of the Exchange's "Company Guide" should be disapproved. Institution of proceedings appears appropriate at this time in view of the substantial legal and policy issues summarized below and does not necessarily indicate that the Commission has formulated any conclusions with respect to any of the issues involved.

GROUNDS FOR DISAPPROVAL UNDER CONSIDERATION

The stated purpose of the Amex proposal is to expand the universe of issuers who may qualify to list shares on the Exchange. This would result from the implementation of the alternate criteria because the latter do not contain any earnings criterion, in contrast to the Amex's present listing requirements for common stock. Nevertheless, we note that the proposed alternate criteria do provide substantially higher standards in certain categories than present numerical standards governing the original listing of such stock. Hence, the proposed amendments do not necessarily constitute an overall lowering of listing standards.

Of the issues which would qualify for listing under the alternate standards, some are currently traded solely in the over-the-counter ("OTC") market. To the extent that OTC issues become eligible and indeed are listed on the Amex, trading in these securities will be governed by the Amex's restrictions respecting off-board principal transactions. Under Amex Rule 5, which outlines the situations where a member may execute a transaction in a listed issue in the OTC market, there is no provision which permits a member, member organization, or affiliated person to act as an OTC market-maker in a listed issue.

In view of the foregoing, the Commission has decided to give notice at this time, pursuant to section 19(b)(2)(B) of the Act of the following grounds under consideration for disapproval of SR-Amex-77-3.

A. Section 6(b)(5) of the Act requires that the rules of national securities exchanges be designed to remove impediments to and perfect the mechanism of a free and open market and a national market system. The proposed modification of the Amex's listing standards would expand the potential universe of issues which would be subject to the Exchange's off-board principal trading restrictions. Accordingly, whether the Amex proposal would establish impediments in conflict with section 6(b)(5) is a ground under consideration for disapproval.[1]

[1] On December 19, 1975, the Commission issued an order (Release No. 11942) (41 FR 4507 (January 30, 1976)) adopting Rule 19c-1 under the Securities Exchange Act of 1934. This Rule provided for the elimination by January 3, 1977 of all exchange rules, policies, or practices which restricted the ability of members to effect agency transactions in listed equity securities (or those traded pursuant to unlisted trading privileges) OTC with a third market-maker or nonmember block positioner. In the release which announced the adoption of Rule 19c-1, the Commission acknowledged the anti-competitive effects of exchange restrictions on the ability of members to effect principal transactions off-board and stated that the viability of such restrictions would be reconsidered during the first quarter of 1977. At an open meeting held in Washington, D.C. on May 13, 1977, the Commission determined to require securities exchanges to eliminate restrictions such as those currently imposed by New York Stock Exchange Rule 390 respecting the ability of members to effect off-board principal transactions in listed issues. Further, January 1, 1978 was set as a deadline for such action.

B. Section 6(b)(8) of the Act requires that the rules of a national securities exchange not impose any undue burden on competition. As a consequence of the listing of a security previously ineligible for Amex listing, no Amex member would be able to act (or continue to act) as an OTC market-maker in such a security. The restrictions of Amex Rule 5 as applied to such newly-listed securities could thus diminish competition which currently exists among OTC market-makers in a particular security as well as potential competition between the OTC and Amex markets. Accordingly, the extent to which the Amex proposal may broaden the sweep of existing anti-competitive restrictions on off-board trading by its members and thereby proscribe the activities of members who may wish to do business as OTC market-makers is a ground under consideration for disapproval.

PROCEDURE

The Commission has determined to provide an opportunity for the presentation of data, views and arguments in conjunction with these proceedings. Interested persons are invited to submit written data, views and arguments within 30 days from the date hereof as to the Amex's rule proposals. Parties wishing to respond to any other person's submission should file a written response within 45 days hereof. Copies of SR-Amex 77-3 and of the submissions will be available for inspection at the Commission's Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of the Amex's submissions are also available at the principal office of the Amex. Persons desiring to make written statements should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-14565 Filed 5-20-77;8:45 am]

[Release No. 20029; 70-6007]

ARKANSAS POWER & LIGHT CO.

Proposed Issuance and Sale of First Mortgage Bonds at Competitive Bidding

MAY 17, 1977.

Notice is hereby given that Arkansas Power & Light Company ("Arkansas"), First National Building, Little Rock, Arkansas 72203, an electric utility subsidiary of Middle South Utilities, Inc., a registered holding company, has filed an application with this Commission pursuant to section 6(b) of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50 promulgated thereunder regarding the following proposed transaction. All interested persons are referred to the application, which is summarized below, for a complete statement of the proposed transaction.

Arkansas proposes to issue and sell, subject to the competitive bidding requirements of Rule 50 promulgated under the Act, $11,000,000 principal amount of its First Mortgage Bonds, percent Series due June 1, 2007. The interest rate on the bonds (which will be a multiple of ⅛ of 1 percent) and the price, exclusive of accrued interest, to paid to Arkansas (which will be not less than 100 percent nor more than 102¾ percent of the principal amount thereof) will be determined by the competitive bidding. The bonds will be issued under Arkansas' Mortgage and Deet of Trust dated as of October 1, 1944, to Morgan Guaranty Trust Company of New York, Trustee, as heretofor supplemented and as to be further supplemented by a Twenty-ninth Supplemental Indenture to be dated as of June 1, 1977, which includes a prohibition until June 1, 1982, against refunding the bonds with the proceeds of funds borrowed at a lower effective interest cost.

Prior to the effective date of Arkansas' Twenty-eighth Supplemental Indenture dated as of July 1, 1975, Arkansas' Mortgage and Deed of Trust as amended provided that in the computation of the "two times interest" coverage test for the issuance of additional bonds, the amount of the company's nonoperating income (as defined) that may be taken into account would not exceed 15 percent of the sum of net operating income plus nonoperating income. This provision differs from the analogous provision of the Commission's Statement of Policy in respect of first mortgage bonds ("Policy Statement") adopted February 16, 1956 (HCAR No. 13105), which restricts the inclusion of nonoperating income to an amount not exceeding 10 percent of operating income. In recent years, the Indenture provision has resulted in higher computed interest coverages than would have resulted from the provision prescribed by the Policy Statement.

As a first step toward conforming the Indenture provision with that of the Policy Statement, Arkansas' Twenty-eighth Supplement Indenture dated as of July 1, 1975, amended the Indenture provision so as to provide that, effective with the first series of bonds to be issued after December 31, 1975, the amount of includable nonoperating income would not exceed 14 percent of the sum of net operating income plus nonoperating income. It is proposed in the instant filing that Arkansas' Twenty-ninth Supplemental Indenture to be dated as of June 1, 1977, provide that, effective with the first series of bonds to be issued after December 31, 1977, the amount of includable nonoperating income shall not exceed 13 percent of the sum of net operating income plus nonoperating income. It is contemplated that said percentage will be successively reduced further in future supplemental indentures so that the Indenture provision (including, ultimately, the base to which the percentage shall apply) will finally conform in substance with the analogous provision of the Policy Statement.

Arkansas proposes to utilize the net proceeds from the issuance and sale of the proposed bonds and preferred stock to pay $11,000,000 principal amount of its First Mortgage Bonds, 2⅞ percent Series due 1977, which mature on July 1, 1977. Fees and expenses incident to the proposed transaction are estimated at $140,000, inclucing counsel fees of $38,500 and accountants' fees of $18,500. The fee of counsel for the successful bidders is estimated at $14,000 and is to be paid by the successful bidders.

The Arkansas Public Service Commission and the Tennessee Public Service Commission have jurisdiction over the proposed issuance and sale of the bonds. It is stated that no other State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than June 13, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as filed or as it may be amended, may be granted as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-13532; File No. 4-191]

BOSTON STOCK EXCHANGE, INC., AND MIDWEST STOCK EXCHANGE, INC.

Program for Allocation of Regulatory Responsibilities Pursuant to Rule 17d-2; Filing of BSE/MSE Plan

The Boston Stock Exchange, Inc. (the "BSE"), and the Midwest Stock Exchange, Inc. (the "MSE"), filed with the Commission a plan for allocation of regulatory responsibilities pursuant to Rule 17d-2 (17 CFR 240.17d-2) ("§ 240.17d-2") on March 14, 1977.

The proposed plan provides that the self-regulatory organization designated to examine for compliance with applicable financial responsibility rules (the "designated examining authority" or

"DEA") pursuant to Rule 17d–1 (17 CFR 240.17d–1) ("section 240.17d–1") will be responsible for processing and acting on certain applications submitted by dual members. The exchange that is not the DEA ("other exchange") will, however, continue to be responsible, subject to further allocation pursuant to § 240.17d–2, for applications to become regular equity or options members. MSE will be responsible for applications for options principal members, registered options principals, and notification of registered representatives certified as qualified to handle accounts involving options transactions.

In addition, under the proposed plan, the DEA will be responsible for reviewing advertisements, market letters, research reports, sales literature, radio, television, and writing and speaking activities of dual members. MSE will conduct such review in relation to MSE listed options. The DEA will also be responsible for taking appropriate action on all inquiries and complaints involving dual members.

The DEA will be responsible for conducting examinations for compliance with financial, operational, and sales supervision by dual members, except in the area of options sales practices, as well as all special examinations, except that both the DEA and the other exchange reserve the right to participate in any special examination. The DEA will be responsible for review of and subsequent action on or in respect of dual members' Financial and Operational Combined Uniform Single (FOCUS) Report and any generally applicable financial reporting requirements. It will also be responsible for review, approval, and retention of all partnership agreements, corporate certificates, by-laws, subordinated loan agreements, and related agreements and amendments including clearing agreements.

Further, the DEA will be responsible for disciplinary investigations and proceedings involving dual members except insofar that the other exchange may assume jurisdiction in investigations relating to a transaction on the other exchange affecting a security listed on the other exchange or any other activity having a unique reference to the other exchange.

In order to assist the Commission in determining whether to approve this plan and relieve the party not designated to the specified responsibilities, interested persons are invited to submit written data, views, and arguments concerning the submission on or before June 22, 1977. Persons wishing to comment should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. 4–191.

Copies of the submission and of all written comments will be available for inspection at the Securities and Exchange Commission's Public Reference Room, 1100 L Street NW., Washington, D.C.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

MAY 12, 1977.

[Release No. 34–13536; File No. 4–195]

BOSTON STOCK EXCHANGE, INC., AND NEW YORK STOCK EXCHANGE, INC.

Program for Allocation of Regulatory Responsibilities Pursuant to Rule 17d–2; Filing of BSE/NYSE Plan

The Boston Stock Exchange, Inc. (the "BSE"), and the New York Stock Exchange, Inc. (the "NYSE"), filed with the Commission a plan for allocation of regulatory responsibilities pursuant to Rule 17d–2 (17 CFR 240.17d–2) ("§ 240.17d–2") on March 28, 1977.

The proposed plan provides that the NYSE will be responsible for processing and acting on certain applications submitted by dual members. The BSE will, however, continue to be responsible, subject to further allocation pursuant to § 240.17d–2, for applications for BSE regular floor members, registered options principals, and notification of registered representatives certified as qualified to handle accounts involving options transactions.

In addition, under the proposed plan, the NYSE will be responsible for reviewing advertisements, market letters, research reports, sales literature, radio, television, and writing and speaking activities of dual members except in relation to listed options. The NYSE will also be responsible for taking appropriate action on all inquiries and complaints involving dual members.

The NYSE will be responsible for conducting examinations for compliance with financial, operational, and sales supervision by dual members, except in the area of options sales practices, as well as all special examinations, except that both BSE and NYSE reserve the right to participate in any special examination. It will be responsible for review of and subsequent action on or in respect of dual members' Financial and Operational Combined Uniform Single (FOCUS) Report and any generally applicable financial reporting requirements. The NYSE will submit to the BSE a computer run summarizing certain pre-defined key data from the monthly FOCUS Reports received by the NYSE from all NYSE members who are participants of Boston Stock Exchange Clearing Corporation ("BSECC"). BSE and NYSE agree to assist each other in examinations if requested due to geographical or other considerations. NYSE will also be responsible for review, approval, and retention of all partnership agreements, corporate certificates, by-laws, subordinated loan agreements, and related agreements and amendments including clearing agreements.

Further, the NYSE will be responsible for disciplinary investigations and proceedings involving dual members except insofar that BSE may assume jurisdiction in investigations relating to a transaction on BSE affecting BSE listed security or any other activity having a unique reference to BSE.

In order to assist the Commission in determining whether to approve this plan and relieve the party not designated to the specified responsibilities, interested persons are invited to submit written data, views and arguments concerning the submission on or before June 22, 1977. Persons wishing to comment should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. 4–195.

Copies of the submission and of all written comments will be available for inspection at the Securities and Exchange Commission's Public Reference Room, 1100 L Street NW., Washington, D.C.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34–13534; File No. 4–193]

BOSTON STOCK EXCHANGE, AND PACIFIC STOCK EXCHANGE, INC.

Program for Allocation of Regulatory Responsibilities Pursuant to Rule 17d–2; Filing of BSE/PSE Plan

The Boston Stock Exchange (the "BSE"), and the Pacific Stock Exchange, Inc. (the "PSE"), filed with the Commission a plan for allocation of regulatory responsibilities pursuant to Rule 17d–2 (17 CFR 240.17d–2) ("§ 240.17d–2") on March 18, 1977.

The proposed plan provides that the self-regulatory organization designated to examine for compliance with applicable financial responsibility rules (the "designated examining authority" or "DEA") pursuant to Rule 17d–1 (17 CFR 240.17d–1) ("§ 240.17d–1") will be responsible for processing and acting on certain applications submitted by dual members. The exchange that is not the DEA (the "other exchange") will, however, continue to be responsible, subject to further allocation pursuant to § 240.17d–2, for applications to become regular equity or, if applicable, options members of the other exchange. The PSE will be responsible for applications for registered options principals and notification of registered representatives certified as qualified to handle accounts involving options transactions.

In addition, under the proposed plan, the DEA will be responsible for reviewing

advertisements, market letters, research reports, sales literature, radio, television, and writing and speaking activities of dual members except in relation to PSE listed options. The DEA will also be responsible for taking appropriate action on all inquiries and complaints involving dual members.

The DEA will be responsible for conducting examinations for compliance with financial, operational, and sales supervision by dual members, except in the area of options sales practices, as well as all special examinations, except that both BSE and PSE reserve the right to participate in any special examination. The DEA will be responsible for review of and subsequent action on or in respect of dual members' Financial and Operational Combined Uniform Single (FOCUS) Report and any generally applicable financial reporting requirements. It will also be responsible for review, approval, and retention of all partnership agreements, corporate certificates, by-laws, subordinated loan agreements, and related agreements and amendments including clearing agreements. The DEA may request assistance of the other exchange in the conduct of any examination, because of geographical or other considerations.

Further, the DEA will be responsible for disciplinary investigations and proceedings involving dual members except insofar that the other exchange may assume jurisdiction in investigations relating to a transaction on the other exchange affecting a security listed on the other exchange or any other activity having a unique reference to the other exchange.

In order to assist the Commission in determining whether to approve this plan and relieve the party not designated to the specified responsibilities, interested persons are invited to submit written data, views and arguments concerning the submission on or before June 22, 1977. Persons wishing to comment should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. 4–193.

Copies of the submission and of all written comments will be available for inspection at the Securities and Exchange Commission's Public Reference Room, 1100 L Street NW., Washington, D.C.

By the Commission.

[Release No. 20024; 70–6005]

CONSOLIDATED NATURAL GAS CO. ET AL.

Proposed Intrasystem Financing, Issuance and Sale of Commercial Paper and Short-Term Notes to Banks by Holding Company, and Exemption From Competitive Bidding

In the matter of Consolidated Natural Gas Company, 30 Rockefeller Plaza, New York, New York 10020, CNG Coal Company; CNG Development Company Ltd.; CNG Producing Company; CNG Research Company; Consolidated Gas Supply Corporation; Consolidated Natural Gas Service Company, Inc.; Consolidated System LNG Company; The East Ohio Gas Company; The Peoples Natural Gas Company; The River Gas Company; West Ohio Gas Company (70–6005).

MAY 10, 1977.

Notice is hereby given that Consolidated Natural Gas Company ("Consolidated"), a registered holding company, and certain of its subsidiary companies, CNG Coal Company ("Coal Company"), CNG Development Company Ltd., CNG Producing Company ("Producing Company"), CNG Research Company ("Research Company"), Consolidated Gas Supply Corporation ("Gas Supply"), Consolidated Natural Gas Service Company, Inc. ("Service Company"), Consolidated System LNG Company ("LNG Company"), The East Ohio Gas Company ("East Ohio"), The Peoples Natural Gas Company ("Peoples"), The River Gas Company ("River"), and West Ohio Gas Company ("West Ohio") have filed an application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a), 6(b), 7, 9(a), 10, 12(b), and 12(f) of the Act and Rules 43, 45, and 50(a)(5) promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transactions.

Consolidated proposes, from time to time during 1977, to make loans aggregating up to $79,000,000 to five subsidiary companies in the amounts set forth in the table below, primarily for the purpose of partially financing their 1977 capital expenditures. Capital expenditures for all of Consolidated's subsidiaries are estimated at $236,400,000 in 1977. The loans will be evidenced by nonnegotiable, long-term notes proposed to be issued by the respective subsidiary companies and proposed to be acquired by Consolidated. The notes will bear interest at a rate substantially equal to the effective cost of money to Consolidated in respect of its issuance and sale of $75,000,000 principal amount of debentures scheduled for June 1977 (File No. 70–6004) and will be payable from 1982 through 1997 in approximately equal annual principal amounts.

Prior to completion of said debenture financing in 1977 by Consolidated, the foregoing loans to said subsidiary companies for 1977 capital expenditures ($74,500,000) will be in the form of open account advances, payable on or before December 31, 1977, with interest at the prime commercial rate (presently 6.25 percent) in effect from time to time at The Chase Manhattan Bank, N.A. ("Chase Manhattan"), with a retroactive adjustment of the interest rate on the advances to conform with the effective cost of money to Consolidated through the sale of its debentures. Following the debenture financing by Consolidated, the interim open account advances to subsidiary companies, to the extent made at that time, will be converted into long-term notes of such subsidiary companies, and, thereafter, loans to subsidiary companies in 1977 for capital expenditures will be evidenced by the aforesaid long-term notes of such subsidiary companies.

Consolidated also proposes to issue and sell up to $100,000,000 of short-term notes to a group of banks during 1977. Such notes will bear interest at the prime commercial rate in effect from time to time at Chase Manhattan. Prepayments may be made in whole or in part, from time to time, upon five days' notice without penalty or premium. There will be no closing or related charges or commitment fee, and the notes will mature not more than twelve months from the date of the first borrowing. No compensating balance requirements will be imposed. The average of deposits regularly maintained by the Consolidated companies in the participating banks for normal operating purposes amounted to approximately $25,500,000 for 1976. It is stated that based on a requirement of 10 percent of the proposed credit line and 10 percent of average borrowings thereunder, the average compensating balances would have amounted to approximately $14,900,000 for the year 1976.

Consolidated proposes to use the proceeds from said bank borrowings to make open account advances to its subsidiary companies aggregating up to $100,000,000 for gas storage inventories, payable as gas is withdrawn and sold during the 1977–78 heating season. The advances to subsidiary companies will bear interest at the same rate as the related bank borrowings by Consolidated and will be made in amounts as set forth in the table below. Also shown on the following table are $37,000,000 of open account advances which Consolidated proposes to make from time to time up to May 31, 1978, to subsidiary companies for working capital requirements from part of the proceeds of Consolidated's proposed issuance and sale (described hereinafter) of up to $50,000,000 of commercial paper and/or notes to a bank. These advances will be repaid not more than one year from the date of the first advance to each subsidiary with interest at substantially the same effective rate as incurred by Consolidated on the related commercial paper sale and/or bank borrowings.

Subsidiary company	Long-term notes	Advances for seasonal increase in gas storage inventories	Advances for working capital requirements
Producing Company	$34,000,000		$5,600,000
Gas Supply	6,000,000	$67,000,000	11,500,000
LNG Company	34,000,000		
East Ohio		21,000,000	9,000,000
Peoples	4,300,000	12,000,000	7,600,000
River	700,000		600,000
West Ohio			1,600,000
Coal Company			300,000
Research Company			300,000
Service Company			500,000
	79,000,000	100,000,000	37,000,000

Consolidated further proposes to acquire, and the subsidiary companies set forth below propose to issue and sell to Consolidated from time to time during 1977, capital stock up to the following amounts at the par value thereof:

	Number of shares ($100 par)	Aggregate par value
Coal Company	30,000	$3,000,000
Producing Company	44,000	4,400,000
Research Company	17,000	1,700,000
Gas Supply	115,000	11,500,000
LNG Company	210,000	21,000,000
River	4,000	400,000
Total		42,000,000

The proceeds derived from the proposed sale of stock will be used to finance, in part, the subsidiaries' 1977 capital expenditures. The purchase of said capital stock by Consolidated will be made principally with funds from internal cash generation, and from the sale of common stock pursuant to its stockholder and employee stock plans. The authorized capital stock of Gas Supply, LNG Company, and River is not sufficient to cover the additional shares they propose to issue. Therefore, in order to accommodate the proposed transactions and to provide for future issues, Gas Supply proposes to amend its certificate of incorporation and increase the number of its authorized shares from 1,700,000 to 2,000,000, LNG Company from 750,000 to 1,000,000, and River from 20,000 to 24,000.

As indicated above, Consolidated proposes to issue and sell commercial paper, in the form of short-term promissory notes payable to bearer, in the aggregate face amount not to exceed $50,000,000 outstanding at any one time to a dealer in commercial paper from time to time up to May 31, 1978. The commercial paper will have varying maturities of not more than 270 days after the date of issue and will be issued and sold in varying denominations of not less than $50,000 and not more than $5,000,000 directly to the dealer at a discount which will not be in excess of the discount rate per annum prevailing at the date of issuance for commercial paper of comparable quality and like maturities. Consolidated proposes to sell commercial paper only so long as the effective interest cost for such commercial paper does not exceed the equivalent cost of borrowings from a commercial bank on the date of sale.

No commission or fee will be payable by Consolidated in connection with the issue and sale of such commercial paper notes. The dealer, as principal, will reoffer such notes at a discount not to exceed one-eighth of one percent per annum less than the prevailing discount rate to Consolidated. Such notes will be reoffered to not more than 200 identified and designated customers on a list (nonpublic) prepared in advance by the dealer and furnished to the Commission. It is anticipated that the commercial paper will be held by customers to maturity; however, if any commercial paper is repurchased by the dealer pursuant to a repurchase agreement, such paper will be reoffered only to others in the group of 200 customers. The issuance and sale of commercial paper is to provide $37,000,000 for working capital advances to subsidiary companies, and the balance of $13,000,000 is for working capital and contingent requirements of Consolidated during the year.

Consolidated proposes, to the extent that it becomes impracticable to issue such commercial paper, to borrow, repay, and reborrow from Chase Manhattan, from time to time up to May 31, 1978, an aggregate principal amount not to exceed $50,000,000 outstanding at any one time, at the prime commercial rate of interest in effect on the date of each borrowing, upon the promissory note or notes of Consolidated having a maturity date not more than 90 days from the date of each borrowing, and with the right of prepayment, in whole or in part at any time or from time to time, without prior notice and without premium. The amount of commercial paper notes and said notes, if any, payabe to Chase Manhattan will not collectively exceed $50,000,000 outstanding at any one time. There will be no closing or related charges and no commitment fee with respect to such bank loans, nor will there be any compensating-balance requirements.

Consolidated requests that, for the period commencing upon the date of the granting of this application-declaration and ending May 31, 1978, an exemption be allowed from the provisions of section 6(a) of the Act pursuant to the first sentence of section 6(b), relating to the issuance and sale of short-term notes, by increasing the 5 percent limitation on such notes to a maximum of 6 percent in order to permit Consolidated to have outstanding at any one time up to $50,000,000 principal amount of short-term notes during such period as proposed herein.

Consolidated requests exception from the competitive bidding requirements of Rule 50 with respect to the sale of commercial paper on the grounds that such commercial paper will have maturities of nine months or less, that current rates for commercial paper for prime borrowers, such as Consolidated, are published daily in financial publications, and that it is not practical to invite competitive bids for commercial paper. Consolidated also proposes that the Rule 24 certificates of notification regarding the issuance and sale of the commercial paper and all subsidiary company financings be filed on a quarterly basis.

It is stated that CNG Development Company Ltd. had no new financing requirements for 1977 at the time of filing and that if such requirements should arise, an amendment to that effect will be filed as part of this proceeding.

The application-declaration states that the Public Service Commission of West Virginia has jurisdication over the proposed long-term and short-term borrowings and stock issuances of Gas Supply; that the Public Utilities Commission of Ohio has jurisdiction over the long-term borrowings and stock issuance proposed by River; and that the Pennsylvania Public Utility Commission has jurisdiction over the long-term borrowings proposed by Peoples. It is further stated that no other State or Federal commission, other than this Commission, has jurisdiction over the proposed transactions. The fees and expenses to be incurred in connection with the proposed transactions are estimated not to exceed $10,500, including $8,000 for the system service company charges, at cost. All of such fees and expenses are to be paid by Consolidated.

Notice is further given that any interested preson may, not later than June 3, 1977, request in writing that a hearing be held in respect of such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified should the Commission order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is

ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 20025; 70-6011]

GENERAL PUBLIC UTILITIES CORP.

Proposed Issue and Sale of Common Stock by Holding Company Pursuant to an Underwritten Rights Offering

MAY 12, 1977.

Notice is hereby given that General Public Utilities Corporation ("GPU"), 260 Cherry Hill Road, Parsippany, New Jersey 07054, a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a), 7 and 12(c) of the Act and Rules 42 and 50 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transaction.

GPU proposes to offer up to 3,770,000 authorized but unissued shares of its common stock for subscription by the holders of its outstanding shares of common stock on the basis of 1 share for each 15 shares of common stock held on the record date. The record date will be June 30, 1977, or such later date as GPU's registration statement under the Securities Act of 1933 may become effective. The subscription price, to be determined by GPU at about 4:15 p.m. on the day preceding the anticipated record date, will not be more than 100 percent and not less than 85 percent, of the closing price of GPU common stock on the Consolidated Tape on the day prior to the record date. The subscription offer will expire July 22, 1977, unless the record date should be later than June 30, 1977, in which event the expiration date will be specified by amendment.

In connection with the subscription rights offering, GPU anticipates that it may effect stabilizing transactions in order to maintain the market price of its common stock at a level above that which might otherwise prevail in the open market. GPU states that it acquire no more than 300,000 shares of its common stock pursuant to these stabilizing activities. The aggregate of the shares of common stock offered pursuant to the subscription offer, including the shares, if any, purchased by GPU in connection with such stabilizing activities, are hereinafter referred to as "additional common stock."

Rights to subscribe to the additional common stock wil be evidenced by transferable subscription warrants which will be issued to all record holders of GPU common stock as promptly as practicable after the record date. No fractional shares wil be issued; however, any holder with more than 15 shares, but not an exact multiple thereof, may purchase, at the subscription price one extra share of additional common stock. A stockholder with less than 15 shares of common stock will be entitled to purchase, at the subscription price, one full share of additional common stock.

In addition, each holder of a warrant or warrants who exercises such warrant or warrants in full will be given the privilege of subscribing, subject to allotment, at the same subscription price, for unsubscribed shares of additional common stock ("over-subscription privilege"). GPU proposes to take such action as is appropriate to effect the admission for trading of the subscription rights on the New York Stock Exchange.

GPU does not propose to mail warrants to stockholders whose registered addresses are outside the United States, Bermuda, Canada and Mexico. To the extent that GPU does not receive instructions from such stockholders to exercise their warrants, the rights evidenced by such warrants may be sold by Hartford National Bank and Trust Company, the subscription agent, for the account of such stockholders.

GPU further proposes to issue and sell, subject to the competitive bidding requirements of Rule 50 under the Act, such of the shares of the additional common stock as are not purchased pursuant to the subscription offer. The subscription price, which will also be the price to be paid by the successful bidder or bidders, will be set by GPU at least 45 minutes before the time of submitting bids. GPU will pay the underwriters for their commitments and obligations a fixed sum, to be supplied by amendment, plus an amount per share to be specified in the bid for each unsubscribed share purchased and for each share purchased by underwriters upon the exercise of rights purchased (but excluding any additional common stock purchased pursuant to the over-subscription privilege).

It is stated that the net proceeds of the sale of additional common stock will be applied by GPU to repay at or before maturity all or a portion of GPU's short-term indebtedness incurred to make additional investments in subsidiaries, to make additional investments in subsidiaries, and/or to reimburse its treasury for prior investments in its subsidiaries.

Fees and expenses to be incurred in connection with the proposed transaction will be supplied by amendment. It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than June 7, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549.

A copy of such request should be served personally or by mail upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney-at-law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

INVESTORS MUTUAL, INC., ET AL.

Application for an Order of Act To Permit Offers of Exchange and for Exemption From Provisions

MAY 11, 1977.

In the matter of Investors Mutual, Inc.; Investors Stock Fund, Inc.; Investors Variable Payment Fund, Inc.; Investors Selective Fund, Inc.; IDS New Dimensions Fund, Inc.; IDS Progressive Fund, Inc.; IDS Bond Fund, Inc.; IDS Cash Management Fund, Inc.; IDS Tax-Exempt Bond Fund, Inc., 1000 Roanoke Building, Minneapolis, Minnesota 55402, and Investors Diversified Services, Inc., IDS Tower, Minneapolis, Minnesota 55402.

Notice is hereby given that Investors Mutual, Inc. ("Mutual"), Investors Stock Fund, Inc. ("Stock"), Investors Variable Payment Fund, Inc. ("Variable"), Investors Selective Fund, Inc. ("Selective"), IDS New Dimensions Fund, Inc. ("Dimensions"), IDS Progressive Fund, Inc. ("Progressive"), IDS Bond Fund, Inc. ("Bond"), IDS Cash Management Fund, Inc. ("Cash Management"), and IDS Tax-Exempt Bond Fund, Inc. ("Tax-Exempt") (collectively referred to as "the Funds"), open-end investment companies registered under the Investment Company Act of 1940 ("Act"), and Investors Diversified Services, Inc. ("IDS"), each Fund's investment adviser and principal underwriter (collectively referred to with the Funds as "Applicants"), filed an application on January 21, 1977, for an order of the Commission, pursuant to section 11(a) of the Act, permitting certain transfers among the Funds on a basis other than their net asset value per share at the time of

transfer and, pursuant to section 6(c) of the Act, exempting such transfers from the provisions of section 22(d) of the Act and Rule 22d–1 thereunder. All interested persons are referred to the applications on file with the Commission for a statement of the representations contained therein, which are summarized below.

IDS, as principal underwriter for the Funds, maintains a continuous public offering of shares of each of the Funds at their respective net asset value plus a sales charge. On purchases of less than $15,000, the sales charge is 3½ percent Bond, 4¾ percent for Tax-Exempt, 7 percent for Selective and 8 percent for each of the other Funds except Cash Management, which does not have a sales charge. For each of the Funds, the sales charge is reduced on larger purchases, except for Bond which has a level 3½ percent sales charge.

Mutual, Stock, Variable, Progressive, and Dimensions propose to offer their shares to shareholders of Selective, Bond, or Tax-Exempt who have held their shares for less than eight months and who redeem their shares and immediately reinvest in its shares, on payment of the difference between the sales charge paid upon the purchase of shares of Selective, Bond, or Tax-Exempt and the sales charge that would have been paid had the offering Fund's shares been purchased originally. Shareholders of Selective, Bond, or Tax-Exempt who have held their shares for eight months or more will be allowed to transfer to the other Funds at net asset value without paying a sales charge. No transfers will be allowed into Cash Management from Selective, Bond, or Tax-Exempt earlier than eight months. Shareholders of the other Funds do not have the privilege of transferring into Bond Fund.

Selective proposes to offer its shares to shareholders of Tax-Exempt or Bond who have held their shares for less than eight months and who redeem their shares and immediately reinvest in shares of Selective, on payment of the difference between the sales charge paid upon the purchase of shares of Tax-Exempt or Bond and the sales charge that would have been paid had the investment been in Selective originally. Shareholders of Tax-Exempt or Bond who have held their shares for eight months or more will be allowed to transfer into Selective at net asset value without paying a sales charge.

Tax-Exempt proposes to offer its shares to the shareholders of the other Funds, except Cash Management, who have held their shares for less than eight months and who redeem their shares and immediately reinvest in shares of Tax-Exempt, on payment of the difference between the sales charge paid on the shares of the other funds from which the transfer is being made and the sales charge that would have been paid had the investment been in Tax-Exempt originally. Shareholders of the other Funds, except Cash Management, who have held their shares for more than eight months, will be permitted to transfer into Tax-Exempt at net asset value without paying a sales charge.

In each case, the reason for the eight month "waiting period" is to discourage attempts at circumventing the higher sales charge which would have been applicable on the shares of the Fund into which the transfer is being made had these shares been purchased initially. For purposes of calculating the eight month period, the length of time the investment has been in the complex of the Funds will be included. In addition, no sales charge will be imposed upon a transfer of shares which were acquired originally at net asset value, except shares of Cash Management acquired by direct purchase, and such shares will be transferred first.

Each of the Funds, except Bond, proposes to offer its shares to the shareholders of Cash Management who redeem their shares and immediately reinvest in its shares on the basis of the net asset value at the time of the transfer, plus the sales charge described in the prospectus of each of the Funds. The additional sales charge would be imposed only upon the transfer of shares of Cash Management originally acquired by direct purchase. Shares of Cash Management that were acquired as the result of a transfer from one of the other Funds will be transferred at net asset value without a sales charge, and such shares will always be transferred first.

Section 11(a) of the Act provides that it shall be unlawful for any registered open-end company or any principal underwriter for such company to make, or cause to be made, an offer to the shareholder of a security of such company or of any other open-end investment company to exchange his security for a security in the same or another such company on any basis other than the relative net asset values of the respective securities to be exchanged unless the terms of the offer have first been submitted to and approved by the Commission.

Section 22(d) of the Act provides, in pertinent part, that no registered investment company or principal underwriter thereof shall sell any redeemable security issued by such company to any person except at a current public offering price described in the prospectus. The sales charge described in the prospectus of each of the Funds is normally greater than the sales charge which would be applicable to a proposed transfer. Rule 22d–1 permits certain variations in sales load, none of which it is alleged are applicable to the proposed transfer privileges.

Applicants state that the purpose of the proposed transfer privileges and the eight month restriction, where applicable, is to discourage attempts to circumvent the higher sales charges that could occur were an investor to purchase a Fund with a lower sales charge and, subsequently, transfer the investment at net asset value for an investment in one of the other Funds which imposes a higher sales charge than the Fund originally purchased. Applicants further state that under certain circumstances it might be found that IDS, as underwriter for all the Funds, would be violating section 22(d) of the Act, since an investor would be able to purchase shares of one of the other Funds at a sales charge other than that described in the prospectus merely by purchasing shares of Selective, Bond or Tax-Exempt and subsequently transferring those shares after eight months at net asset value into shares of one of the other Funds. Appropriate disclosure of the terms of the proposed transfer privileges will be made in the prospectuses of each of the Funds.

Section 6(c) provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction or any class or classes of persons, securities or transactions from any provisions of the Act or of any rule or regulation under the Act, if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than June 6, 1977, at 5:30 p.m., submit to the Commission in writing, a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the addresses stated above. Proof of such service (by affidavit, or in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the rules and regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons, who request a hearing or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

LINCOLN NATIONAL INCOME FUND, INC.

Filing of Application of the Act for an Order Declaring That Company Has Ceased To Be an Investment Company

MAY 12, 1977.

Notice is hereby given that Lincoln National Income Fund, Inc. ("Applicant"), 1301 South Harrison Street, Fort Wayne, Indiana 46801, an open-end, diversified management investment company registered under the Investment Company Act of 1940 (the "Act"), has filed an application pursuant to section 8(f) of the Act for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the facts and representations contained therein, which are summarized below.

The Applicant was incorporated under the laws of the State of Delaware on January 22, 1969, and registered with the Commission under the Act on August 11, 1969. Applicant states that on October 27, 1976, its shareholders approved an Agreement and Plan of Reorganization ("the Agreement") which provided for the sale by Applicant of substantially all of its assets to Selected American Shares, Inc. ("American"). On November 17, 1976, pursuant to the Agreement, 466,943;935 shares of American were delivered to the Applicant, representing an exchange ratio of 1.2461 shares of American for each share of Applicant outstanding. Applicant states further that such shares were delivered to or credited to the accounts of shareholders of Applicant according to their respective interests in liquidation of the Applicant.

Applicant states that on December 16, 1976, it filed a certificate of dissolution with the Secretary of State of Delaware. Applicant represents that it now has no stockholders, no assets or liabilities, and engages in no business activity.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission on its own motion or upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and, upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than June 6, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Applicant at the address stated above. Proof of such service (by affidavit or, in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A FITZSIMMONS,
Secretary.

LINCOLN NATIONAL CAPITAL FUND, INC.

Filing of Application of the Act for an Order Declaring That Company Has Ceased To Be an Investment Company

MAY 12, 1977.

Notice is hereby given that Lincoln National Capital Fund, Inc. ("Applicant"), 1301 South Harrison Street, Fort Wayne, Indiana 46801, an open-end, diversified management investment company registered under the Investment Company Act of 1940 (the "Act"), has filed an application pursuant to section 8(f) of the Act for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the facts and representations contained therein, which are summarized below.

The Applicant was incorporated under the laws of the State of Delaware on January 22, 1969, and registered with the Commission under the Act on August 11, 1969. Applicant states that on October 27, 1976, its shareholders approved an Agreement and Plan of Reorganization ("the Agreement") which provided for the sale by Applicant of substantially all of its assets to Selected Special Shares, Inc. ("Special"). On November 17, 1976, pursuant to the Agreement, 434,615.444 shares of Special were delivered to the Applicant, representing an exchange ratio of 0.4492 shares of Special for each share of Applicant outstanding. Applicant states further that such shares were delivered to or credited to the accounts of shareholders of Applicant according to their respective interests in liquidation of the Applicant.

Applicant states that on December 16, 1976, it filed a certificate of dissolution with the Secretary of State of Delaware. Applicant represents that it now has no stockholders, no assets or liabilities, and engages in no business activity.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission on its own motion or upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and, upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than June 6, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commisison shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Applicant at the address stated above. Proof of such service (by affidavit or, in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commisison, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34–13535 File No. 4–189]

MIDWEST STOCK EXCHANGE, INC. AND NEW YORK STOCK EXCHANGE, INC.

Program for Allocation of Regulatory Responsibilities Pursuant to Rule 17d–2; Filing of MSE/NYSE Plan

The Midwest Stock Exchange, Inc. (the "MSE") and the New York Stock Exchange, Inc. (the "NYSE") filed with the Commission a plan for allocation of regulatory responsibilities pursuant to Rule 17d–2 (17 CFR 240.17d–2) ("§ 240.17d–2") on March 7, 1977.

The proposed plan provides that the NYSE will be responsible for processing and acting on certain applications submitted by dual members. The MSE will, however, continue to be responsible, subject to further allocation pursuant to § 240.17d–2, for applications for MSE equity or options members, registered options principals, and notification of registered representatives certified as qualified to handle accounts involving options transactions. The NYSE will advise the MSE monthly of certain changes

in membership information for dual members.

In addition, under the proposed plan, the NYSE will be responsible for reviewing advertisements, market letters, research reports, sales literature, radio, television and writing and speaking activities of dual members except in relation to MSE listed options. The NYSE will also be responsible for taking appropriate action on all inquiries and complaints involving dual members.

The NYSE will be responsible for conducting examinations for compliance with financial, operational and sales supervision by dual members, except in the area of options sales practices, as well as all special examinations, except that both MSE and NYSE reserve the right to participate in any special examination. It will be responsible for review of and subsequent action on or in respect of dual members' Financial and Operational Combined Uniform Single (FOCUS) Report and any generally applicable financial reporting requirements. The NYSE will submit to the MSE a computer run summarizing certain pre-defined key data from the monthly FOCUS Reports received by the NYSE from all NYSE members who are participants of Midwest Clearing Corporation (MCC). MSE and NYSE agree to assist each other in examinations if requested due to geographical or other considerations.

NYSE will also be responsible for review, approval and retention of all partnership agreements, corporate certificates, by-laws, subordinated loan agreements and related agreements and amendments including clearing agreements.

Further, the NYSE will be responsbile for disciplinary investigations and proceedings involving dual members except insofar that MSE may assume jurisdiction in investigations relating to a transaction on MSE, affecting an MSE-listed security or any other activity having a unique reference to MSE.

In order to assist the Commission in determining whether to approve this plan and relieve the party not designated to the specified responsibilities, interested persons are invited to submit written data, views and arguments concerning the submission on or before June 22, 1977. Persons wishing to comment should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Wahington, D.C. 20549. Reference should be made to File No. 4-189.

Copies of the submission and of all written comments will be available for inspection at the Securities and Exchange Commission's Public Reference Room, 1100 L Street, N.W., Washington, D.C.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

MAY 12, 1977.

[Release No. 34-13533 File No. 4-192]

MIDWEST STOCK EXCHANGE, INC. AND PACIFIC STOCK EXCHANGE, INC.

Program for Allocation of Regulatory Responsibilities Pursuant to Rule 17d-2; Filing of MSE/PSE Plans

The Midwest Stock Exchange, Inc. (the "MSE"), and the Pacific Stock Exchange, Inc. (the "PSE") filed with the Commission a plan for allocation of regulatory responsibilities pursuant to Rule 17d-2 (17 CFR 240.17d-2) ("§ 240.17d-2") on March 15, 1977.

The proposed plan provides that the self-regulatory organization designated to examine for compliance with applicable financial responsibility rules (the "designated examining authority" or "DEA") pursuant to Rule 17d-1 (17 CFR 240.17d-1) ("§ 240.17d-1") will be responsible for processing and acting on certain applications submitted by dual members. The exchange that is not the DEA ("the other exchange") will, however, continue to be responsible, subject to further allocation pursuant to § 240.-17d-2, for applications to become equity or options members.

In addition, under the proposed plan, the DEA will be responsible for reviewing advertisements, market letters, research reports, sales literature, radio, television and writing and speaking activities of dual members. The DEA will also be responsible for taking appropriate action on all inquiries and complaints involving dual members.

The DEA will be responsible for conducting examinations for compliance with financial, operational and sales supervision by dual members, as well as all special examinations except that both MSE and PSE reserve the right to participate in any special examination. The DEA will be responsible for review of and subsequent action on or in respect of dual members' Financial and Operational Combined Uniform Single (FOCUS) Report and any generally applicable financial reporting requirements. The DEA will submit to MSE, for all PSE members who are participants of Midwest Clearing Corporation ("MCC"), for which PSE is the DEA, and the MSE will submit to the PSE, for all MSE members who are participants of Pacific Clearing Corporation ("PCC") for which MSE is the DEA, a summary of certain pre-defined key data from the monthly FOCUS Reports or a copy of such FOCUS Reports. It will also be responsible for review, approval and retention of all partnership agreements, corporate certificates, by-laws, subordinated loan agreements and related agreements and amendments including clearing agreements. MSE and PSE have agreed to assist each other in the conduct of examinations where requested to do so for geographical or other considerations.

Further, the DEA will be responsible for disciplinary investigations and proceedings involving dual members except insofar that the other exchange may assume jurisdiction in investigations relating to a transaction on the other exchange affecting security listed on the other exchange or any other activity having a unique reference to the other exchange.

In order to assist the Commission in determining whether to approve this plan and relieve the party not designated to the specified responsibilities, interested persons are invited to submit written data, views and arguments concerning the submission on or before June 22, 1977. Persons wishing to comment should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. 4-192.

Copies of the submission and of all written comments will be available for inspection at the Securities and Exchange Commission's Public Reference Room, 1100 L Street NW., Washington, D.C.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[Release 34-13528 File No. SR-NASD-77-5]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC.

Self-Regulatory Organizations

Pursuant to Section 19(B)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975) notice is hereby given on February 10, 1977 the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

TEXT OF PROPOSED RULE CHANGE

The following is the full text of the proposed amendment to Appendix A of Section 30, Article III of the Rules of Fair Practice of the National Association of Securities Dealers, Inc.

Amendments to Appendix A of Section 30 were previously filed with the Commission by the Association in File No. SR-NASD-75-2. Subsequent discussions with Commission staff have led to amendments to the proposal and consequently File No. SR-NASD-75-2 is hereby withdrawn and in its place is substituted the filing below. New language is italicized and deleted language is bracketed.

1. *(a) Text of Proposed Rule Change*

The following is the full text of the proposed amendment to Appendix A of Section 30, Article III of the Rules of Fair Practice of the National Association of Securities Dealers, Inc.

SECTION 1—UNCHANGED
SECTION 2—UNCHANGED
SECTION 3—UNCHANGED
SECTION 4 (a)(1),(2), (3)—UNCHANGED

MINIMUM MARGIN

4(a) [(4) Minimum maintenance requirements for put and call options shall be:

(i) 50 percent of the exercise price of any put option or 50 percent of the market value of the security subject to such put options, whichever is lower;

(ii) 50 percent of the exercise price of any call option or 50 percent of the market value of the security subject to such call option, whichever is higher; sold by such customer to or through the member if the customer's account does not contain the corresponding long or short positions in the securities upon which the options are written and,]

(4) Minimum maintenance requirements for any put or call issued, guaranteed or carried "short" in a customer's account shall be:

(i) in the case of puts and calls traded in the over-the-counter market, which are not displayed in the NASDAQ System, 50 percent of the market value of the equivalent number of shares of the underlying securities, plus any unrealized loss or less any unrealized profit;

(ii) in the case of puts and calls listed or traded on a registered national securities exchange, or displayed in the NASDAQ System, 30 percent of the market value of the equivalent number of shares of the underlying security, plus any unrealized loss or less any unrealized profit;

(iii) notwithstanding the foregoing, the minimum margin on each put or call issued, guaranteed or carried "short" in a customer's account shall be not less than $250; and,

SECTION 5, 6—UNCHANGED

SECTION 7

PUT AND CALL OPTIONS

[(a) No put or call option carried for a customer shall be considered of any value for the purpose of computing the margin required in the account of such customer;

(b) A put or call sold or written by a customer shall be considered as a security transaction subject to Section 2 hereof;

(c) For the purpose of Section 4 hereof, puts and calls shall be considered as if they were exercised. Each put or call shall be margined separately and any difference between the market price of the underlying securities and the exercise price of a put or call shall be considered to be of value only in providing the amount of margin required on that particular put or call.]

(a) Each put or call shall be margined separately. Any difference between the market price of the underlying security and the exercise price of a put or call will be of value only in providing margin on that particular put or call. Substantial additional margin must be required on options issued, guaranteed or carried "short" with an unusually long period of time to expiration (generally, more than six months and ten days), or written on securities subject to unusually rapid or abrupt changes in value, or which do not have an active market, or when the securities subject to the option cannot be liquidated promptly.

(b) If both a put and a call for the same number of shares of the same security are issued, guaranteed or carried "short" for a customer, the margin shall be the greater of that required on either the put or the call, except that:

(i) The $250 minimum margin requirement shall apply to only one of the options, and

(ii) If there is unrealized loss on the other option, the amount of margin required shall include that unrealized loss.

(c) When a call that is listed or traded on a registered national securities exchange or displayed in the NASDAQ System, is carried "long" for a customer's account and the account is also "short" a call listed or traded on a registered national securities exchange or displayed in the NASDAQ System, expiring on or before the date of expiration of the "long" listed call and written on the same number of shares of the same security, the margin required on the "short" call shall be the lower of

(i) The margin required pursuant to Section 4(a)(4)(ii) above, or

(ii) The amount by which the exercise price of the "long" call exceeds the exercise price of the short call.

(d) When a put that is listed or traded on a registered national securities exchange or displayed in the NASDAQ System is carried "long" for a customer's account and the account is also "short" a put listed or traded on a registered national securities exchange or displayed in the NASDAQ System expiring on or before the date of expiration of the "long" listed put and written on the same number of shares of the same security, the margin required on the "short" put shall be the lower of:

(i) The margin required pursuant to Section 4(a)(4)(ii) above, or

(ii) The amount by which the exercise price of the "short" put exceeds the exercise price of the "long" put.

(e) When a call is issued guaranteed or carried "short" against an existing net "long" position in the security under option or in any security exchangeable or convertible into the security under option within a reasonable time without restriction other than the payment of money, no margin needs be required on the call provided:

(i) Such net "long" position is adequately margined in accordance with this Rule, and

(i) The right to exchange or convert the net "long" position does not expire on or before the date of expiration of the "short" call, and

(iii) The conversion price of the exchangeable or convertible security does not exceed the exercise price of the call.

(f) When a call is issued, guaranteed or carried short against a net "long" position in an exchangeable or convertible security, as outlined above, margin shall be required on the call equal to any amount by which the conversion price of the "long" security exceeds the exercise price of the call.

(g) When a put is issued, guaranteed or carried "short" against an existing net "short" position in the security under option, no margin need be required on the put, provided such net "short" position is adequately margined in accordance with this Rule.

(h) When determining net "long" and net "short" positions, offsetting "long" and "short" positions in exchangeable or convertible securities or in the same security shall be deducted. When computing margin on such an existing net stock position carried against a put or call, the current market price used shall not be greater than the call price in the case of a call or less than the put price in the case of a put. If a payment of money is required to exchange or convert the net "long" security, such security shall have no value for the purposes of this Rule.

(i) When a member issues or guarantees an option to receive or deliver securities for a customer, such option shall be margined as if it were a put or call.

(j) An exchangeable or convertible security shall cease to have margin purposes as of its expiration date and cannot be used thereafter for purposes of this Rule.

SECTIONS 8-14—UNCHANGED

SECTION 15

ACCRUED INTEREST

(a) *Accrued interest may not be credited to an account except as provided in paragraph (b).*

(b) *A member may credit to a customer's account accrued interest in obligations issued or unconditionally guaranteed by the U.S. Government or any agency thereof provided that such securities are registered in the member's name or that of its nominee or, in the case of bearer bonds, are in the possession of the member and, provided further, that on a concurrent basis accrued interest on the outstanding debit balance in that account is entered as of the same date.*

PURPOSE OF PROPOSED RULE CHANGE

The amendment to Appendix A of Section 30, Article III of the Rules of Fair Practice will cause the NASD margin requirement on options contracts to conform to a uniform standard proposed by the Securities and Exchange Commission and adopted by all the principle stock exchanges.

BASIS UNDER THE ACT FOR PROPOSED RULE CHANGE

Section 7(c) of the Securities Exchange Act of 1934 provides that it shall be unlawful for any broker or dealer, directly or indirectly, to extend or maintain credit or arrange for the extension or maintenance of credit to or for any customer on any security (other than

an exempted security) in contravention of the rules and regulations which the Board of Governors of the Federal Reserve System shall prescribe. On July 8, 1969 the Federal Reserve Board adopted amendments to their regulations designed principally to broaden its control of credit on over-the-counter securities. Under these amendments those OTC stocks meeting certain criteria and debt securities convertible into such stocks became subject to margin requirements. Section 15A(b)(6) provides that a national securities association shall not be registered with the Commission unless it is determined that the rules of the association are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and in general to protect investors and the public interest. Section 30 of the Rules of Fair Practice provides that a member shall not effect a securities transaction in a margin account in a manner contrary to the requirements adopted by the Board of Governors and is intended to prevent manipulative acts, promote just and equitable principles of trade and in general protect investors and the public interest.

COMMENTS RECEIVED FROM THE MEMBERS, PARTICIPANTS, OR OTHERS ON THE PROPOSED RULE CHANGE

Because Section 30 of Article III of the Rules of Fair Practice authorizes the Board of Governors alone to establish the minimum amounts of initial and maintenance margin required to be obtained by members from customers, comments of the membership on the proposed amendment to Appendix A were not solicited or received.

BURDEN ON COMPETITION

It is felt that the proposed rule change imposes no burden on competition not necessary in the furtherance of the purposes of the Act.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities associations, and in particular, the requirements of Section 15A and the rules and regulations thereunder.

Further, the Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof. Such action is necessary to achieve uniformity among the options margin rules of the several self-regulatory organizations, and to lessen the burden of compliance imposed upon members of more than one such organization.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced above be, and it hereby is, approved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C., 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before June 13, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

MAY 11, 1977.

[Release No. 20026; 70-5643]

NEW ENGLAND ELECTRIC SYSTEM AND NEW ENGLAND ENERGY INC.

Proposed Agreement for Sale of Fuel Between Affiliates

MAY 13, 1977.

Notice is hereby given that New England Electric System ("NEES"), a registered holding company, and New England Energy Incorporated ("NEEI"), 20 Turnpike Road, Westborough, Massachusetts 01581, its subsidiary energy company, have filed post-effective amendments to their application-declaration previously filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating sections 6(a), 7, 9(a), 10 and 12 of the Act and Rules 43 and 45(a) promulgated thereunder as applicable to the following proposed transaction. All interested persons are referred to the application-declaration, as amended by said post-effective amendments, for a complete statement of the proposed transactions.

By order dated October 30, 1974 (HCAR No. 18635) issued in this proceeding, NEES was authorized to organize NEEI and to acquire its capital stock. NEEI was authorized to enter into a partnership arrangement with an unaffiliated company to explore for and develop oil and gas deposits. Jurisdiction was reserved over any transactions between NEEI and its associate companies which are subject to sections 12(f) or 13 of the Act and Rules 80–85 thereunder By order dated June 17, 1976 (HCAR No. 19580), NEES was granted an extension of time to invest an additional amount of cash in NEEI to finance fuel exploration and development activities through 1979, subject to the prior reservation of jurisdiction.

By post-effective amendment filed in this proceeding, it is stated that as a result of the initial production of small amounts of oil and gas from a fuel exploration and development program involving NEEI, NEEI is now ready to enter into fuel transactions with its affiliate, New England Power Company ("NEPCO"). NEPCO is the primary source of generation of electricity in the NEES system. NEEI and NEPCO would enter into a fuel purchase contract ("contract") covering the sale of fuel on terms described below.

NEEI proposes to exercise any or all of the following three methods of sale of fuel to NEPCO. It is stated that the choice of method or methods will depend on NEPCO's fuel needs, conditions in the spot market for various fuels, operational constraints of the producing wells and other factors. These options open to NEEI are described as follows:

(1) Arrange to refine the fuel produced through nonaffiliated refineries and sell the product directly or indirectly to NEPCO and the byproducts to nonaffiliates, unless usable to NEPCO.

(2) Exchange with non-affiliates the fuel produced, for fuel meeting the requirements of NEPCO.

(3) Sell the fuel produced to nonaffiliates and use the proceeds to purchase fuel meeting the requirements of NEPCO.

Sale of the fuel under the contract will be made to NEPCO at prices determined as follows:

(a) In the case of (1) above, the price will be NEEI's cost for fuel produced, as defined below; and the subsequent production, refining, transportation, and any other costs of the fuel less the net proceeds from the sale of byproducts.

(b) In the case of (2) above, the price will be NEEI's cost as defined below, for the quantity of fuel produced and exchanged to obtain fuel meeting the requirements of NEPCO, plus any transportation.

(c) In the case of (3) above, the price charged to NEPCO will be the cost of the fuel purchased to meet NEPCO's needs minus or plus, as the case may be, the difference between the revenues from and costs of production associated with the sale of the fuel produced by NEEI and sold to nonaffiliates, minus in the event that revenues exceed costs and plus in the event that cost exceed revenues, plus any transportation or other costs associated with the transaction.

NEEI's "cost" for fuel produced will be all exploration; development, general and administrative, capital and other costs as capitalized into a "full cost pool". The costs in the full cost pool will be charged to income quarterly on the unit of production basis over the total estimated equivalent barrels of reserves. Costs, including capital costs, incurred by NEEI during the period from inception to the approval by this Commission of a fuel pricing policy for NEEI will also be placed in the full cost pool.

It is proposed to determine capital costs for NEEI in the following manner: For the purpose of determining capital costs for NEES investments in NEEI, it will be assumed that NEEI's total capitalization (excluding accumulated deferred federal income taxes) has a structure equal to the permanent capitalization of NEPCO (excluding short-term debt and accumulated deferred federal income taxes). Tax savings arising from NEEI's activities, as exempted by this Commission from the consolidated tax allocation provisions of Rule 45(B)(6) under the Act (HCAR No. 18635), are being reinvested in NEEI at zero capital cost.

Capital costs, including the effect of Federal income taxes, are proposed to be computed quarterly and will be included in the full cost pool. The cost of debt or other forms of financing of NEEI from nonaffiliated sources will be placed into the full cost pool at actual cost. Such financing from outside sources will be included in NEEI's imputed capital structure for the purpose of determining the character of subsequent NEES investments in NEEI. NEES investments after outside financings will be allocated first to common equity until equal to the common equity percentage component of the total imputed capital structure, then to preferred, and then to debt until the total NEEI imputed capital structure equals the capital structure of NEPCO. Thereafter, NEES investments will be spread based on the imputed capital structure of NEPCO. Each investment in NEEI by NEES will seek to maintain the capital structure determined above and will have a cost determined as follows:

(i) The cost of debt and preferred stock applied to the imputed capital structure for NEES investments in NEEI shall be equal to the actual cost of NEPCO's debt and preferred stock issue most recently preceding the respective dates of the NEES investments in NEEI: *Provided, however,* If the most recent NEPCO debt and preferred stock issue occurred more than twelve (12) months prior to the date of investment then the cost of debt and preferred stock shall be the actual cost of the most recent NEPCO debt and preferred stock issues until the date of the next subsequent NEPCO debt and preferred stock issue from which date the cost previously determined as aforesaid shall be recomputed from that time forward to equal the cost of the subsequent issue.

(ii) The cost of common equity applied to the imputed NEPCO capital structure for NEES investments in NEEI shall be equal in each case to the rate of return on common equity provided under the terms of the unit power sales contract of NEPCO permitted to become effective without provision for refund, by the Federal Power Commission most recently preceding the respective dates of NEES investments in NEEI.

By prior order issued in this proceeding, NEEI was also authorized to assume various fuel procurement and inventory activities previously pursued by affiliates. To the extent that NEEI becomes involved in such activities, it is proposed that fuel purchased for storage purposes will be priced at the actual incurred cost and will be segregated from the full cost pool. NEEI's cost for such fuel purchased and sold to affiliates will include invoice cost plus all transportation, operation, storage, inventory, shrinkage, capital, general, administrative and other costs directly attributable to the fuel in storage.

It is stated that no state or federal commission, other than this Commission, has jurisdiction over the proposed transaction. Any fees and expenses to be incurred in connection with the proposed transaction will be supplied by amendment.

Notice is further given that any interested person may, not later than June 8, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, and reasons for such request, and the issues of fact or law raised by said application-declaration, as amended by said posteffective amendments, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above-stated address and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as amended by said post-effective amendments, or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 13530; SR-NESDTCO-77-5]

NEW ENGLAND SECURITIES DEPOSITORY TRUST CO.

Order Approving Rule Change Relating To Participation in Depository Trust Company

MAY 11, 1977.

On March 24, 1977, the New England Securities Depository Trust Company ("NESDTC"), 53 State Street, Boston, Massachusetts 02109, submitted, pursuant to Rule 19b-4 under the Securities Exchange Act of 1934 (the "Act"), a proposed rule change which would establish NESDTC as a participant in The Depository Trust Company.

In accordance with section 19(b) of the Act and Rule 19b-4 thereunder, notice of the proposed rule change was published in the FEDERAL REGISTER (42 FR 17929, April 4, 1977), and the public was invited to comment thereon. Notice of the filing and an invitation for comments also appeared in Securities Exchange Act Release No. 34-13408, March 28, 1977. No letters of comment were received.

The Commission has reviewed the proposed rule change and finds that it is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change contained in File No. SR-NESDTCO-77-5 be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-14573 Filed 5-20-77;8:45 am]

[Release No. 34-13531; File No. 4-194]

NEW YORK STOCK EXCHANGE, INC., AND PACIFIC STOCK EXCHANGE

Program for Allocation of Regulatory Responsibilities Pursuant to Rule 17d-2; Filing of NYSE/PSE Plan

The New York Stock Exchange, Inc. (the "NYSE"), and the Pacific Stock Exchange (the "PSE"), filed with the Commission a plan for allocation of regulatory responsibilities pursuant to Rule 17d-2 (17 CFR 240.17d-2) ("§ 240.17d-2") on March 21, 1977.

The proposed plan provides that the NYSE will be responsible for processing and acting on certain applications submitted by dual members. The PSE will, however, continue to be responsible, subject to further allocation pursuant to § 240.17d-2, for applications for PSE floor members or options principal members, registered options principals, and notification of registered representatives certified as qualified to handle accounts involving transactions.

In addition, under the proposed plan, the NYSE will be responsible for reviewing advertisements, market letters, research reports, sales literature, radio, television, and writing and speaking activities of dual members, except in relation to PSE listed options. The NYSE will also be responsible for taking appropriate action on all inquiries and complaints involving dual members.

The NYSE will be responsible for conducting examinations for compliance with financial, operational, and sales supervision by dual members, except in the area of options sales practices, as well as all special examinations except that both PSE and NYSE reserve the right to participate in any special examination. NYSE will be responsible for review of and subsequent action on or in respect of dual members' Financial and Operational Combined Uniform Single (FO

CUS) Report and any generally applicable financial reporting requirements. It will also be responsible for review, approval and retention of all partnership agreements, corporate certificates, bylaws, subordinated loan agreements and related agreements and amendments including clearing agreements.

Further, the NYSE will be responsible for disciplinary investigations and proceedings involving dual members except insofar that PSE may assume jurisdiction in investigations relating to a transaction on PSE affecting a PSE-listed security or any other activity having a unique reference to PSE.

In order to assist the Commission in determining whether to approve this plan and relieve the party not designated to the specified responsibilities, interested persons are invited to submit written data, views and arguments concerning the submission on or before June 22, 1977. Persons wishing to comment should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. 4–194.

Copies of the submission and of all written comments will be available for inspection at the Securities and Exchange Commission's Public Reference Room, 1100 L Street NW., Washington, D.C.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

PHILADELPHIA STOCK EXCHANGE, INC.

Application for Unlisted Trading Privileges and of Opportunity for Hearing

MAY 12, 1977.

The above named national securities exchange has filed an application with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the security of the company as set forth below, which security is listed and registered on one or more other national securities exchanges:

American Airlines, Inc., File No. 7–4942, warrants (expiring April 1, 1984).

Upon receipt of a request, on or before May 28, 1977, from any interested person, the Commission will determine whether the application with respect to the company named shall be set down for hearing. Any such requests should state briefly the title of the security in which that person is interested, the nature of the interest of the person making the request, and the position he proposes to take at the hearing, if ordered. In addition, any interested person may submit his views or any additional facts bearing on the said application by means of a letter addressed to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, not later than the date specified. If no request for a hearing with respect to the particular application is made, such application will be determined by order of the Commission on the basis of the facts stated therein and other information contained in the official files of the Commission pertaining thereto.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 13529]

PHILADELPHIA STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

MAY 11, 1977.

In the matter of the Philadelphia Stock Exchange, Inc., 17th Street and Stock Exchange Place, Philadelphia Pennsylvania 19103 (SR–PHLX–77–4).

On March 29, 1977, the Philadelphia Stock Exchange, Inc. ("PHLX"), filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Acts Amendments of 1975, and Rule 19b–4 thereunder, copies of a proposed rule change. The proposed rule change would amend the PHLX fidelity bonding requirements for members and member organizations by adjusting the minimum required bonding coverage for members operating pursuant to the provisions of subparagraph (b)(2) of the Commission's Uniform Net Capital Rule and by clarifying the minimum required bonding coverage for those members operating under the alternative net capital provisions set forth in paragraph (f) of the Commission's Uniform Net Capital Rule, among other things.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 13421 (April 1, 1977)) and by publication in the FEDERAL REGISTER (42 FR 19204 (April 12, 1977)).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, Pursuant to Section 19(b)(2) of the Act, that the proposed rule change filed with the Commission on March 29, 1977, be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77–14576 Filed 5–20–77;8:45 am]

[Release No. 34–13537; File No. 4–187]

SELF-REGULATORY ORGANIZATIONS

Program for Allocation of Regulatory Responsibilities Pursuant to § 240.17d–2; Extension of Filing Period

AGENCY: Securities and Exchange Commission.

ACTION: Extension of time for filing plans.

SUMMARY: Rule 17d–2 and the adopting release specify that self-regulatory organizations may file with the Commission initial plans for allocation of regulatory responsibilities for members or participants which they have in common on or before March 15, 1977, or at such later date as the Commission may determine subsequent to the hearings on the implementation of the Rule. The Commission has extended the time for filing such initial plans until May 15, 1977, or such later date as the Commission may specify.

DATES: Plans on or before May 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Daniel J. Piliero II, Associate Director, Division of Market Regulation, Securities and Exchange Commission, 500 North Capitol Street NW., Washington, D.C. 20549 (202–755–1390).

On October 28, 1976, in Securities Exchange Act Release No. 34–12935, 41 FR 49091 (November 8, 1976), the Commission adopted 17 CFR § 240.17d–2 (hereinafter § 240.17d–2) under Section 17(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq. as amended by Pub. L. No. 94–29 (June 4, 1975)). It calls upon self-regulatory organizations to propose to the Commission a plan or series of plans for allocating regulatory responsibilities with respect to members or participants which they have in common.

BACKGROUND

Section 240.17d–2 and the adopting release provide that self-regulatory organizations may file such plans within ninety (90) days of the effective date of the section or at such later date as the Commission may otherwise determine subsequent to the hearings conducted with respect to the implementation of the section. Thereafter, plans may be filed as changes in designation are necessary or appropriate.

Section 240.17d–2 became effective on December 15, 1976. Initial plans were to be filed with the Commission on or before March 15, 1977.

EXTENSION OF TIME FOR FILING PLANS

A large number of the self-regulatory organizations have requested that the Commission extend the time for filing initial plans beyond March 15, 1977 (File No. 4–187). Each of the requests indicates that substantial progress has been made in reaching agreement for the allocation of responsibilities. To date, self-regulators have filed six (6) plans for allocation with the Commission.[1] In addition, a number of self-regulators have reached conceptual agreement on the terms of plans and final drafts are in preparation. They have stated, however, that formal approval of plans by their governing bodies and execution of approved plans will be delayed beyond March 15, 1977.

[1] The joint plan between the New York Stock Exchange, Inc., (the "NYSE") and the American Stock Exchange, Inc., was noted in Securities Exchange Act Release No. 13326 (March 3, 1977), 42 FR 13878 (March 14, 1977) (File No. 4–188). Notices of proposed plans between the NYSE and the Midwest Stock Exchange, Inc., ("MSE") (File No. 4–189), between the MSE and the Pacific Stock Exchange, Inc. ("PSE") (File No. 4–192), between the MSE and the Boston Stock Exchange Inc. ("BSE") (File No. 4–191), between the BSE and the PSE (File No. 4–193) and between the NYSE and the PSE (File No. 4–194) are published herein.

Self-regulators have also suggested that an extension of the filing date will permit them to explore the possibility of agreement in additional areas where duplication currently or potentially exists. In particular, they assert that an extension would facilitate discussion of formal allocations of responsibilities between the exchanges or the NASD and their subsidiaries which are deemed to be self-regulatory organizations by virtue of Section 3(a)(26) of the Securities Exchange Act of 1934, as amended. They indicate that significant progress may also be made in the allocation of responsibility for the collection, processing, and maintenance of registration information and in the coordination of joint examinations for any broker or dealer which is a member of or participant in more than one self-regulatory organization and is subject to multiple examinations.

In light of the progress to date in the formulation of plans for allocation of responsibilities and the continuing efforts of self-regulators to increase the scope of these plans, the Commission has determined to extend the time for filing initial plans until May 15, 1977.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

MAY 12, 1977.

[File No. 500–1]

TWENTIETH CENTURY FOX FILM CORP.

Notice of Suspension of Trading

MAY 13, 1977.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the securities of Twentieth Century Fox Film Corp., being traded on a national securities exchange or otherwise, is required in the public interest and for the protection of investors;

Therefore, pursuant to Section 12(k) of the Securities Exchange Act of 1934, trading in such securities on a national securities exchange or otherwise is suspended, for the period from 10 a.m. (EDT) on May 13, 1977 through May 22, 1977.

By the Commission.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 77–095]

ALABAMA STATE DOCKS TERMINAL RAILROAD BRIDGE, THREE MILE CREEK, MILE 0.7, MOBILE, ALA.

Public Hearing

Notice is hereby given that a public hearing regarding the Alabama State Docks Terminal Railroad bridge across Three Mile Creek, mile 0.7, at Mobile, Alabama, will be held on Thursday morning, June 30, 1977, at 11 a.m., in the Killian Room, International Trade Center, 250 North Water Street, Mobile, Alabama. This hearing is being held under the authority of Section 3 of the Act of June 21, 1940 (Truman-Hobbs Act).

The existing bridge, which has a swing span, provides approximately 53 feet of horizontal clearance in the draw when measured normal to the channel axis. A number of complaints have been received alleging that the bridge is unreasonably obstructive to navigation. The purpose of the hearing is to determine whether alteration is needed and if so, what alteration is required having due regard for the necessity of free, easy and unobstructed navigation upon the waterway. The needs of rail traffic will also be considered.

Public comments, views, and data are required for ascertaining whether the bridge unreasonably obstructs navigation, whether vessels have unreasonable difficulty and delay in passing through the bridge, the extent of costs associated with collisions and delays to navigation, the character and amount of commerce affected, whether the commerce affected is sufficient to justify alteration of the bridge, the changes necessary to render navigation through or under the bridge reasonably free and unobstructed, and the impact of the alteration, if made, upon the quality of the human environment.

Any person who wishes to appear and be heard at this public hearing may do so. Persons planning to appear and be heard are requested to notify the Commander, Eighth Coast Guard District, Hale Boggs Building, 500 Camp Street, Room 1140, New Orleans, Louisiana 70130, any time prior to the hearing indicating the amount of time required. Depending upon the number of scheduled statements, it may be necessary to limit the amount of time allocated to each person. Limitations of time allocated, if required, will be announced at the beginning of the hearing. Written statements and exhibits may be submitted in place of, or in addition to oral statements, and will be made a part of the record of the hearing. Such written statements and exhibits may be delivered at the hearing or mailed in advance to the Commander, Eighth Coast Guard District.

(54 Stat. 498, 33 U.S.C. 513; Section 4(f), 80 Stat. 934, as amended, 49 U.S.C. 1653(f); Section 6(g)(3), 80 Stat. 937, 49 U.S.C. 1655(g)(3); 33 CFR 116.20 and 49 CFR 1.46(c)(6).)

Dated: May 13, 1977.

A. F. FUGARO,
Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Environment and Systems.

PRESIDENT'S CUP REGATTA, WASHINGTON, D.C.

Special Local Regulations

Under the authority of the Act of April 28, 1908 (35 Stat. 69) as amended, and 33 CFR 100.35, as amended this notice promulgates special local regulations for the President's Cup Regatta. These special local regulations are established to insure the safety of life on the Potomac River at Washington, D.C., immediately before, during, and immediately after this regatta.

(a) *Location.* The area subject to these regulations is those waters enclosed by a line drawn from the southern tip of Haines Point northwards along the eastern seawall to a point 1,000 feet from the southern tip of Haines Point; thence easterly to a point 400 feet from the seawall; thence in a southerly direction to a point 1,400 feet distant, thence along a line of bearing 240° T. to the Virginia shore, upstream thence along the Virginia shoreline to the Penn Central Railroad bridge between Washington, D.C., and Arlington, Va.; thence 034° T. to the Potomac Park-Potomac River shoreline; thence along the Potomac Park-Potomac River shoreline to the southern tip of Haines Point.

(b) *Regulations.* (1) Except for participants in the President's Cup Regatta or persons or vessels authorized by the Coast Guard patrol officer, no person or vessel may enter or remain in the area specified in paragraph (a) of these regulations.

(2) The operator of any vessel in the immediate vicinity of the area specified in paragraph (a) above of these regulations shall:

(i) Stop his vessel immediately upon hearing five or more short blasts of a horn or whistle from any vessel displaying a Coast Guard emblem; and

(ii) Proceed as directed by any Coast Guard officer or petty officer.

(3) Any spectator vessel may anchor outside of the area specified in paragraph (a) of these regulations.

(4) The Coast Guard patrol officer is a commissioned officer of the Coast Guard, who has been designated by the Commander, Fifth Coast Guard District.

(5) These regulations and other applicable laws and regulations are enforced by Coast Guard officers and petty officers on board Coast Guard, public, and private vessels displaying the Coast Guard emblem.

(Sec. 1, 35 Stat. 69 as amended, sec. 6(b)(1), 80 Stat. 937; 46 U.S.C., sec. 454, 49 U.S.C., sec. 1655(b)(1); 33 CFR 100.35, 49 CFR 1.46(b).)

Effective dates: These regulations are effective from 10:00 a.m. E.D.S.T. until 6 p.m. E.D.S.T. on June 9, 10, 11, and 12, 1977.

Dated: April 28, 1977.

R. H. WOOD,
U.S. Coast Guard, Commander, Fifth Coast Guard District, Acting.

[FHWA Docket No. 77–8]

IN THE MATTER OF BRIDGES OWNED BY THE DELAWARE RIVER PORT AUTHORITY

Notice of Proposed Order

AGENCY: Federal Highway Administration, DOT.

ACTION: Proposed order.

SUMMARY: The proposed order would amend the Administrator's toll order of May 19, 1975, by establishing a time period during which that order will be in effect. This means that the order would terminate November 30, 1977.

DATES: All comments must be received on or before June 22, 1977. Failure to comment within the prescribed time period shall be a waiver of any right to object or to appeal the order when it is entered as a final order.

ADDRESS: Comments should be submitted to FHWA Docket Number 77–8, Room 4232, HCC–20, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Gerald M. Tierney, Office of the Chief Counsel (202–426–0346), Federal Highway Administration. Office hours are 7:45 a.m. to 4:15 p.m. EDT, Monday–Friday.

The following is the form of the proposed order which will become final upon the entry of an order by the United States Court of Appeals for the Third Circuit dismissing the appeal of the Delaware River Port Authority in case number 77–1047, "Delaware River Port Authority v. Tiemann."

PROPOSED ORDER

The Administrator's toll order of May 19, 1975, is amended to establish a time period during which the order shall be in effect. The order shall be in effect for 2 years to be measured from the date the order setting the tolls originally went into effect, December 1, 1975.

(33 U.S.C. 526, 49 CFR Part 310.)

Issued this 12th day of May 1977, in Washington, D.C.

WILLIAM M. COX,
Federal Highway Administrator.

Materials Transportation Bureau

HAZARDOUS MATERIALS REGULATIONS

Exemptions

AGENCY: Materials Transportation Bureau, DOT.

ACTION: Notice of Grants and Denials of Applications for Exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted April 1977. The modes of transportation involved are identified by a number in the "Nature of Exemption Thereof" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft.

Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

Renewals

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
970–X	DOT–E 970	Callery Chemical Co., Callery, Pa.; Department of Defense, Washington, D.C.	49 CFR 173.21(b), 173.300, 173.301.	To ship diborane in DOT specification 3AA2015 or 3AA2400 cylinders. (Modes 1 and 2.)
2582–P	DOT–E 2582	Matheson Gas Products, Lyndhurst, N.J.	49 CFR 173.304(a)(2).....	To become a party to exemption 2582. (See application No. 2582–X.) (Modes 1 and 2.)
3128–P	DOT–E 3128	Department of Defense, Washington, D.C.	49 CFR 173.304, 175.3.....	To become a party to exemption 3128. (See Application No. 3128–X.) (Modes 1, 2, 3, and 4.)
3187–X	DOT–E 3187	PPG Industries, Pittsburgh, Pa.....	49 CFR 173.21(b), 173.119 (m), 173.218, 173.221(a)(3).	To ship flammable liquid or organic peroxide in DOT specification 2U polyethylene bottles in a DOT specification 12P fiberboard box or in accordance with 49 CFR 173.221(a)(3). (Mode 1.)
3330–X	DOT–E 3330	Babcock and Wilcox Co., Lynchburg, Va.; Teledyne Wah Chang Corp., Albany, Oreg.	49 CFR 173.214(d).....	To ship zirconium alloy metal powder in a 32-oz or 16-oz non-DOT container overpacked in a DOT specification 17C, 17H, or 37A metal drum. (Modes 1 and 2.)
3648–X	DOT–E 3648	Airco Industrial Gases, Murray Hill, N.J.	49 CFR 172.101, 173.315(a)..	To ship liquid helium, liquefied hydrogen in a non-DOT specification vacuum insulated cargo tank designed and constructed in accordance with sec. VIII of the ASME code. (Mode 1.)
3667–X	DOT–E 3667	Groendyke Transport, Inc., Enid, Okla; Phillips Petroleum Co., Bartlesville, Okla.	49 CFR 173.315(a).....	To ship compressed gas, n.o.s. in non-Dot aluminum cargo tanks complying with DOT specification MC–330. (Mode 1.)
3768–P	DOT–E 3768	PPG Industries, Inc., Pittsburgh, Pa.	49 CFR 173.119, 173.245, 173.288.	To become a party to exemption 3768. (See application No. 3768–X.) (Mode 1.)
3897–P	DOT–E 3897	.....do.....	49 CFR 173.139(a)(6); 46 CFR 146.21–100	To become a party to exemption 3897. (See application No. 76–22.) (Modes 1 and 3.)
4248–P	DOT–E 4248	Sargent-Welch Scientific Co., Skokie, Ill.; J. T. Baker Chemical Co., Phillipsburg, N.J.	49 CFR 173.245(a)(27), 173.268(d).	To become a party to exemption 4248. (See application No. 4248–X.) (Modes 1, 2, and 3.)
4291–X	DOT–E 4291	Pacific Engineering and Production Co. of Nevada, Henderson, Nev.; United Technologies, Sunnyvale, Calif.; Kerr-McGee Chemical Corp., Oklahoma City, Okla.	49 CFR 173.239(a)(2).....	To ship ammonium perchlorate in a non-DOT aluminum portable tank. (Modes 1 and 2.)
4393–X	DOT–E 4393	E. I. du Pont de Nemours & Co., Inc., Wilmington, Del.	49 CFR 173.314.....	To ship hydrogen chloride in DOT specification 105A500W and 105A600W tank car tanks. (Mode 2.)
4790–X	DOT–E 4790	Smith Wesson/General Ordnance Equipment Co., Rock Creek, Ohio.	49 CFR 173.305(d), 173.385 (a)(1).	To ship tear gas device in DOT specification 2P containers overpacked in DOT specification 12B fiberboard boxes. (Modes 1 and 2.)
4932–X	DOT–E 4932	Federal Laboratories, Saltsburg, Pa..	49 CFR 172.101, 173.385(a), 175.3.	To ship tear gas devices in a non-DOT telescopic type, cylindrical, woundkraft container, overpacked in a DOT specification 12B fiberboard box. (Modes 1, 2, and 4.)
5022–P	DOT–E 5022	United Technologies Corp., Sunnyvale, Calif.; National Aeronautics and Space Administration, Washington, D.C.	.....	To become a party to exemption 5022. (See application No. 75–111 and 5022–X.) (Modes 1 and 2.)
5186–X	DOT–E 5186	Liquid Carbonic Corp., Chicago, Ill..	49 CFR 172.101, 173.315(a)..	To ship liquefied carbon monoxide in a non-DOT specification perlite-vacuum insulated cargo tank designed and constructed in accordance with sec. VIII of the ASME code. (Mode 1.)
5196–P	DOT–E 5196	Ethyl Corp., Baton Rouge, La.....	49 CFR 172.101, 173.315(a)(1).	To become a party to exemption 5196. (See application No. 5196–X.) (Mode 1.)
5248–X	DOT–E 5248	The 3M Co., St. Paul, Minn.; The Boeing Co., Seattle, Wash.; Monsanto Co., St. Louis, Mo.	49 CFR 173.389(g), 175.3 ...	To ship radioactive materials, n.o.s. in any approved outer type A packaging prescribed in secs. 173.389(j) and 173.394(a). (Modes 1, 2, and 4.)
5372–P	DOE–E 5372	Air Products and Chemicals, Inc., Allentown, Pa.; Airco Industrial Gases, Murray Hill, N.J.	49 CFR 173.301(d)(1), 173.302(a)(3), 173.304(a)(2).	To become a party to exemption 5372. (See application No. 5372–X.) (Modes 1 and 3.)
5456–P	DOT–E 5456	Allied Chemical Corp., Morristown, N.J.	49 CFR pt. 173.....	To become a party to exemption 5456. (See application No. 5456–X.) (Modes 1, 2, and 3.)
5704–X	DOT–E 5704	IMC Chemical Group, Inc., Allentown, Pa.; U.S. Department of Defense, Washington, D.C.	49 CFR 173.93(e), 173.62...	To ship certain class A and B explosives in non-DOT 22 gage steel drums. (Modes 1, 2, and 3.)
5849–P	DOT–E 5849	Lehigh Valley Chemical Co., Easton, Pa.; Olin Chemical Group, Stamford, Conn.	49 CFR 173.217(g)(5), 175.3	To become a party to exemption 5849. (See application No. 5849–X.) (Modes 1, 2, 3, and 4.)
5852–P	DOT–E 5852	Brooklyn Union Gas, Brooklyn, N.Y.	49 CFR 172.101, 173.315(a)...	To become a party to exemption 5852. (See application No. 5852–X.) (Mode 1.)
5944–X	DOT–E 5944	Dow Chemical Co., Midland, Mich....	49 CFR 172.101, 173.315(a)(1).	To ship liquefied ethylene in a non-DOT specification cargo tank designed and constructed in accordance with sec. VIII of ASME code. (Mode 1.)
6045–X	DOT–E 6045	Union Carbide Corp., Tarrytown, N.Y.	49 CFR 173.121.....	To ship carbon disulfide in DOT specification MC–312 cargo tanks. (Modes 1 and 3.)
6083–X	DOT–E 6083	Stauffer Chemical Co., Westport, Conn.	49 CFR 172.101, 173.273, 175.3.	To ship certain corrosive materials in any DOT specification cylinders with certain exceptions. (Modes 1, 2, and 4.)
6121–X	DOT–E 6121	E. I. du Pont de Nemours & Co., Inc., Wilmington, Del.	49 CFR 179.220–19(c).....	To ship certain flammable liquids in DOT specification 115A60W1 and 115A60W6 tank car tanks. (Mode 2.)
6145–P	DOT–E 6145	Union Carbide Corp., Tarrytown, N.Y.	49 CFR 173.154(a).....	To become a party to exemption 6145. (See application No. 75–55.) (Mode 1.)
6154–X	DOT–E 6154	Uniroyal Chemical, Naugatuck, Conn.	49 CFR 173.154(a)(12), 178.205–16.	To ship certain flammable solids in a non-DOT corrugated fiberboard box complying with DOT specification 12B with certain exceptions. (Modes 1, 2, and 3.)
6225–P	DOT–E 6225	Michigan Chemical Corp., Chicago, Ill.	49 CFR 173.252(g).....	To become a party to exemption 6225. (See application No. 6225–X.) (Modes 1 and 3.)
6253–P	DOT–E 6253	Interpool Ltd., New York, N.Y.; Johnson Scan Star, San Francisco, Calif.; Akzo Zout Chemie Nederland, Amsterdam, Holland.	49 CFR 173.119, 173.125, 173.245.	To become a party to exemption 6253. (See application No. 75–202.) (Modes 1, 2, and 3.)
6382–X	DOT–E 6382	Stauffer Chemical Co., Westport, Conn.; Northern Petrochemical Co., Des Plaines, Ill.; El Paso Products Co., Odessa, Tex.	49 CFR 172.101, 173.314(c)...	To ship liquefied ethylene in a non-DOT specification, vacuum insulated tank car tank designed and constructed to comply with AAR proposed specification 113C120W. (Mode 2.)
6418–X	DOT–E 6418	Dow Chemical Co., Midland, Mich.; Great Lakes Chemical Corp., Irvine, Calif.	49 CFR 173.357(b).....	To ship chloropicrin mixture in DOT specification MC–304 or MC–307 cargo tanks constructed of steel. (Mode 1.)
6496–X	DOT–E 6496	Inland Steel Container Co., Chicago, Ill.	49 CFR 173.119(b)(10), 173.359 (a), (b).	To ship class B poisonous liquids and flammable liquids in a DOT specification 37D steel drum. (Mode 1.)
6530–P	DOT–E 6530	Mass Oxygen Equipment Co., Westboro, Mass.	49 CFR 173.302(c).....	To become a party to exemption 6530. (See application No. 6530–X.) (Modes 1 and 2.)
6536–P	DOT–E 6536	Allied Chemical Corp., Morristown, N.J.	49 CFR 172.101, 173.315(a)....	To become a party exemption 6536. (See application No. 6536–X.) (Mode 1.)
6554–P	DOT–E 6554	Utility Chemical Co., Paterson, N.J. Coastal Industries, Inc., Carlstadt, N.J.; Tesco Chemicals, Inc., Marietta, Ga.	49 CFR 173.154, 173.217.....	To become a party to exemption 6554. (See application No. 6554.) (Modes 1, 2, and 3.)
6556–X	DOT–E 6556	Castle and Cooke Inc., San Francisco, Calif.	49 CFR 173.132.....	To ship a flammable liquid in a non-DOT specification single compartment portable tank. (Modes 1 and 3.)
6607–X	DOT–E 6607	Bio-Lab, Inc., Decatur, Ga.....	49 CFR 173.218(a).....	To ship a certain oxidizing material in a non-DOT fiberboard box. (Mode 1.)
6610–X	DOT–E 6610	Oxirane Chemical Co., Pasadena, Calif.	49 CFR 173.221.....	To ship an organic peroxide in DOT specification 111A100W6 tank cars and MC–307 cargo tanks. (Modes 1 and 2.)

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
6695-X	DOT-E 6695	Ugine Kuhlmann of America, New York, N.Y.	49 CFR 173.315	To ship certain nonflammable compressed gases in non-DOT specification portable tanks. (Modes 1 and 3.)
6704-X	DOT-E 6704	Dow Chemical Co., Midland, Mich	49 CFR 173.245a, 173.240, 173.253, 173.294, 173.340, 178.343.	To ship certain corrosive liquids in a non-DOT cargo tank complying with specification MC-312 with certain exceptions. (Mode 1.)
6754-X	DOT-E 6754	Eaton Corp., Southfield, Mich	49 CFR 173.302(a)(4), 178.65, 175.3.	To ship a nonliquefiable compressed gas in a non-DOT nonrefillable welded steel pressure vessel. (Modes 1, 2, 3, and 4.)
6800-X	DOT-E 6800	Plasti-Drum Corp., Lockport, Ill.	49 CFR pt. 173; 178.19	To ship certain oxidizers, corrosive liquids, class B poison, flammable liquids in non-DOT specification reusable molded polyethylene containers. (Modes 1, 2, and 3.)
6806-X	DOT-E 6806	Dow Chemical Co., Midland, Mich	49 CFR 173.302(a), 175.3	To ship hydrogen in a DOT specification 3E-1800 cylinder. (Mode 5.)
6811-X	DOT-E 6811	Eaton Corp., Southfield, Mich	49 CFR 173.302(a)(4), 178.65, 175.3.	To ship nonflammable compressed gases in a non-DOT nonrefillable welded steel cylinder in compliance with DOT specification 39, with certain exceptions. (Modes 1, 2, 3, and 4.)
6814-X	DOT-E 6814	Allied Chemical Corp., Morristown, N.J.	49 CFR 173.272(d), (i)(27)	To ship sulfuric acid in a DOT specification MC-310, MC-311 or MC-312 tank motor vehicle. (Mode 1.)
6825-X	DOT-E 6825	Lox Equipment Co., Livermore, Calif.	49 CFR 172.101, 173.314(c)	To ship liquefied ethylene in a non-DOT specification vacuum-insulated tank car, tank designed and constructed to comply with AAR proposed specification 113C120W. (Mode 2.)
6847-X	DOT-E 6847	United Foam Corp., Compton, Calif	49 CFR 173.346(a)	To ship certain class B poisons in a non-DOT specification steel portable tank. (Modes 1 and 3.)
6880-X	DOT-E 6880	Anchem Products, Inc., Amber, Pa	49 CFR 173.249(a)	To ship certain corrosive liquids in DOT specification 57 steel portable tanks. (Modes 1 and 2.)
6902-X	DOT-E 6902	Halocarbon Products Corp., Hackensack, N.J.; Michigan Chemical Corp., Chicago, Ill.	49 CFR 173.314(c), 179.300-15.	To ship anhydrous hydrogen bromide in DOT specification 110AS900W multiunit tank car tanks. (Modes 1 and 2.)
6932-X	DOT-E 6932	Ugine Kuhlmann, Paris, France	49 CFR 173.264(d)(4)	To ship anhydrous hydrofluoric acid in a non-DOT specification portable tank. (Modes 1 and 3.)
6944-X	DOT-E 6944	U.S. Department of Defense, Washington, D.C.	49 CFR 173.62(a), 177.834 (L)(1).	To ship certain class A explosives in a specially designed non-DOT stainless steel desiccator. (Mode 1.)
6949-X	DOT-E 6949	Monsanto Co., St. Louis, Mo.; FMC Corp., Philadelphia, Pa.	49 CFR 173.190(b)(4)	To ship certain flammable solids in a non-DOT marine portable tank. (Modes 1, 2, and 3.)
6950-X	DOT-E 6950	Ozark Fabricating Co., Tulsa, Okla	49 CFR 173.275	To ship hexafluorophosphoric acid in DOT specification 6D cylindrical steel overpack inside DOT specification 2S or 2SL polyethylene container. (Modes 1 and 3.)
6992-X	DOT-E 6992	Grumman Aerospace Corp., Bethpage, N.Y.	49 CFR 173.302(a)(1), 173.-301(a), 173.305(a).	To ship certain nonflammable and flammable compressed gases in a reservoir-condenser unit forming an integral part of a radiator panel. (Modes 1 and 4.)
7031-X	DOT-E 7031	E. I. du Pont de Nemours & Co., Inc., Wilmington, Del.; Austin Powder Co., Cleveland, Ohio.	49 CFR 173.63, 173.64(a)(2), 173.65.	To ship certain class A and B explosives in a non-DOT specification fiberboard box. (Modes 1, 2, and 3.)
7038-X	DOT-E 7038	Farm Chemicals, Inc., Aberdeen, N.C.	49 CFR 173.358, 173.350	To ship class B poisonous liquids in a non-DOT specification cargo tank. (Mode 1.)
7046-X	DOT-E 7046	J. T. Baker Chemical Co., Phillipsburg, N.J.	49 CFR 178.340-5(c)	To ship certain corrosive liquid in non-DOT glass lined cargo tanks. (Modes 1 and 3.)
7051-X	DOT-E 7051	Ozark-Mahoning Co., Tulsa, Okla	49 CFR 173.246(a), 175.3	To ship antimony pentafluoride in DOT specification 12A and 12B fiberboard boxes. (Modes 1 and 4.)
7066-X	DOT-E 7066	Procter & Gamble Manufacturing Co., Cincinnati, Ohio; Campagnie des Containers Reservoirs, Paris, France.	49 CFR 173.119(m)	To ship flammable liquid, n.o.s. in a non-DOT portable tank. (Modes 1 and 3.)
7073-X	DOT-E 7073	Ethyl Corp., Baton Rouge, La	49 CFR 173.354(a)(6)	To ship antiknock compound in a non-DOT specification IOS type 1C portable tank. (Modes 1 and 3.)
7081-X	DOT-E 7081	Electrochemica Corp., Mountain View, Calif.	49 CFR 173.206(e)(1), 175.3	To ship lithium batteries in exemption 7052 packagings. (Modes 1, 2, 3, and 4.)
7211-X	DOT-E 7211	Kerr-McGee Chemical Corp., Oklahoma City, Okla.	49 CFR 173.251(b)(1)	To ship boron tribromide in DOT specification 37A 8 gal and DOT 37A 30 gal steel drums. (Modes 1, 2, 3, and 4.)
7231-X	DOT-E 7231	American Cyanamid Co., Wayne, N.J.	49 CFR 173.215(a)	To ship certain corrosive liquids in a non-DOT collapsible rubber container named "Sealdtank." (Mode 1.)
7239-X	DOT-E 7239	Atlas Powder Co., Dallas, Tex	49 CFR 173.182(c)	To ship nitro cargo nitrate in a non-DOT collapsible rubber container called "Sealdtank". (Mode 1.)
7259-X	DOT-E 7259	Stauffer Chemical Co., Westport, Conn.	49 CFR 176.76(g)(5)	To ship phosphorus pentasulfide in DOT specification 56 aluminum portable tanks. (Mode 3.)
7277-X	DOT-E 7277	Structural Composites Industries, Inc., Azusa, Calif.	49 CFR 173.302(a)(1), 175.3	To ship compressed air in a non-DOT specification filament-wound reinforced plastic aluminum lined cylinder. (Modes 1, 2, 3, 4, and 5.)
7470-P	DOT-E-7470	Hooker Chemicals and plastics Corp., Niagara Falls, N.Y.; U.S. Industrial Chemicals Co., New York, N.Y.	49 CFR 173.241(a)(3), 173.-272(i)(22), (27), 173.247(a)(11), 173.271(a)(9), 173.263(a)(9), 179.200-18(b)(1), 179.201-1(a), 179.201-7.	To become a party to exemption 7470. (See application No. 7470-N.) (Mode 2.)
7476-N	DOT-E 7476	Thompson Tank and Manufacturing Co., Long Beach, Calif.	49 CFR 173.119(a)(17), 173.245(a) (30), (31), 178.340-7, 178.342-5.	To ship flammable liquids and corrosive liquids in a non-DOT specification cargo tank designed and constructed in accordance with sec. VIII of the ASME code. (Mode 1.)
7542-N	DOT-E 7542	U.S. Cylinders, Inc., Citronelle, Ala	49 CFR 173.303(a)	To ship acetylene in non-DOT specification steel cylinders complying with DOT specification 4BW with certain exceptions. (Modes 1 and 2.)
7546-N	DOT-E 7546	Grumman Aerospace Corp., Bethpage, N.Y.	49 CFR 173.302(a)(1), 173.304(a), 173.305(a).	To ship certain nonflammable and flammable compressed gases in non-DOT heat pipe radiator assemblies built to comply with the ASME code. (Modes 1, 2, and 3.)
7584-N	DOT-E 7584	Orval-Manutention, Paris, France; L'Air Liquide, Paris, France; Laporte Industrials Ltd., Paris, France; Degussa, Frankfurt/Main Germany.	49 CFR 173.266	To ship hydrogen peroxide solution in a non-DOT specification stainless steel portable tank. (Modes 1, 2, and 3.)
7605-N	DOT-E 7605	General Dynamics, Fort Worth, Tex	49 CFR 173.87, 173.92, 173.101, 173.102, 173.113, 175.3, 176.83, 177.848.	To ship partially disassembled aircraft containing various explosives under specified conditions. (Modes 1, 2, 3, and 4.)
7626-N	DOT-E 7626	Commercial Metals Co., Dallas, Tex.; Johnson Sean Star (North America), San Francisco, Calif.	49 CFR 173.1025	To ship certain ORM-C in non-DOT plastic lined freight containers. (Mode 3.)
7633-N	DOT-E 7633	Seat Containers, Inc., Hamilton, Bermuda.	49 CFR 173.119(b), 173.125	To ship certain hazardous materials in a non-DOT specification stainless steel portable tank. (Modes 1, 2, and 3.)
7709-N	DOT-E 7709	National Aeronautics and Space Administration, Washington, D.C.	49 CFR 173.21, 173.304, 173.305.	To ship flammable compressed gases in a solid cryogen cooler overpacked in a non-DOT stainless steel tank or installed in a spacecraft. (Mode 1.)
7719-N	DOT-E 7719	Turner Co., Sycamore, Ill	49 CFR 173.304, 178.65	To ship certain flammable compressed gases in DOT specification 39 nonrefillable steel cylinders. (Modes 1 and 2.)

EMERGENCY EXEMPTION—APPLICATIONS RECEIVED AND GRANTED

EE7722-N	DOT-E 7722	Skagway Air Service, Skagway, Alaska.	49 CFR 172.101(6)(b), 175.3	To ship chlorine gas in DOT specification 3A cylinders. (Mode 4.)
EE7723-N	DOT-E 7723	Farm and Industrial Chemical Co., Dalton, Ga.	49 CFR 173.245(a)(31)	To ship acetic acid in a DOT specification MC-306 tank motor vehicle. (Mode 1.)
EE7724-N	DOT-E 7724	Weather Modification, Inc., Bowman, N. Dak.; Plains Weather Improvement Association, Plainview, Tex.; North American Weather Consultants, Goleta, Calif.; Atomspherics Inc., Fresno, Calif.	49 CFR Chapter I, Subch. C.	To transport certain hazardous materials which are loaded and carried in hoppers, tanks, racks, or devices of aircraft certificated for use in aerial cloud seeding, avalanche control, or fire fighting to be dispensed during such operation. (Mode 4.)

DENIALS

76-383 Request by Intsel Corp., New York, N.Y.—To ship phosphorus oxychloride in drums identified as 117L, denied April 13, 1977. (Docket HM-139 obviates the need).

3460-X Request by E. I. du Pont de Nemours & Co., Inc., Wilmington, Del.—To transport inhibited vinyl fluoride via common carrier in DOT MC-330 and MC-331 cargo tanks, denied April 11, 1977. (Docket HM-139 obviates the need).

5680-P Request by Mobil Chemical Co., Richmond, Va.—To become a party to E 5680 authorizing shipment of organic phosphate materials in DOT Specification 105A300W tank cars, denied April 28, 1977. (Docket HM-139 obviates the need).

6249-X Request by Monsanto Co., St. Louis, Mo.—To ship trichloropropene in DOT Specification 51 portable tanks, denied April 8, 1977. (Docket HM-139 obviates the need).

6260-P Request by Baker Manufacturing Co., Evansville, Wis.—To become a party to E 6260 authorizing shipment of compressed air or nitrogen in non-DOT specification, single-trip welded steel tanks, denied April 21, 1977 as being unnecessary.

6434-P Request by Riverside Chemical Co., Memphis, Tenn.—To become a party to E 6434 authorizing shipment of "Mocap Plus" in 30-pound multiwall paper bags, denied April 19, 1977 as being unnecessary.

6453-X Request by General Motors Corp., Warren, Mich.—To ship Air Cushion Restraint System, denied April 21, 1977 as being unnecessary.

6471-X Request by Magnolia Welding Supply Co., Inc., Pascagoula, Miss.—To extend the retest period for certain DOT Specification 3A and 3AA cylinders to ten years, denied April 11, 1977 as being unnecessary.

6496-P Request by Stevens Industries, Inc., Dawson, Ga.—To become a party to E 6496 authorizing shipment of certain hazardous materials in DOT Specification 37D steel drums (non-reusable container) having a 21-gauge body and 20-gauge heads, denied April 14, 1977 as being unnecessary.

6637-P Request by Troy Chemical Corp., Newark, N.J.—To become a party to E 6637 authorizing shipment of a certain hazardous material in a non-DOT Specification polyethylene (PE) drum of 55-gallon capacity, denied April 21, 1977 as being unnecessary.

6687-X Request by Troy Chemical Corp., Newark, N.J.—To transport Hi-Flow Prist, a flammable gas, aboard passenger carrying aircraft, denied April 14, 1977 as being unnecessary. (Docket HM-139 obviates the need).

6687-X Request by Mellon Bank Hanger, West Mifflin, Pa.—To transport Hi-Flow Prist, a flammable gas, aboard passenger carrying aircraft, denied April 14, 1977 as being unnecessary.

6687-X Request by Asplundh Aviation, Inc., Willow Grove, Pa.—To transport Hi-Flow Prist, a flammable gas, aboard passenger carrying aircraft, denied April 14, 1977 as being unnecessary.

6687-X Request by Northern Air, Grand Rapids, Mich.—To transport Hi-Flow Prist, a flammable gas, aboard passenger carrying aircraft, denied April 14, 1977 as being unnecessary.

6687-X Request by Western Jet Corp., Dallas, Tex.—To transport Hi-Flow Prist, a flammable gas, aboard passenger carrying aircraft, denied April 14, 1977 as being unnecessary.

6687-X Request by Aerojet-General Corp., Ontario, Calif.—To transport Hi-Flow Prist, a flammable gas, aboard passenger carrying aircraft, denied April 14, 1977 as being unnecessary.

6687-X Request by Airkaman Inc., Windsor Locks, Conn.—To transport Hi-Flow Prist, a flammable gas, aboard passenger carrying aircraft, denied April 14, 1977 as being unnecessary.

6687-X Request by Midwest Air Charter Inc., Elyria, Ohio—To transport Hi-Flow Prist, a flammable gas, aboard passenger carrying aircraft, denied April 14, 1977 as being unnecessary.

6687-X Request by Texas Instruments, Dallas, Tex.—To transport Hi-Flow Prist, a flammable gas, aboard passenger carrying aircraft, denied April 14, 1977 as being unnecessary.

6687-P Request by Bud Antle, Inc., Salinas, Calif.—To become a party to E 6687-X authorizing transportation of Hi-Flow Prist, a flammable gas, aboard passenger carrying aircraft, denied April 14, 1977 as being unnecessary.

6687-P Request by Beaver County Airport, Beaver Falls, Pa.—To become a party to E 6687, authorizing transportation of Hi-Flow Prist, a flammable gas, aboard passenger carrying aircraft, denied April 14, 1977 as being unnecessary.

6687-P Request by McGraw Edison Co., West Chicago, Ill.—To become a party to E 6687, authorizing transportation of Hi-Flow Prist, a flammable gas, aboard passenger carrying aircraft, denied April 14, 1977 as being unnecessary.

6687-P Request by Safelite Industries, Wichita, Kan.—To become a party to E 6687, authorizing transportation of Hi-Flow Prist, a flammable gas, aboard passenger carrying aircraft, denied April 14, 1977 as being unnecessary.

6687-P Request by Reserve Oil and Gas Co., Denver, Colo.—To become a party to E 6687 authorizing transportation of Hi-Flow Prist, a flammable gas, aboard passenger carrying aircraft, denied April 14, 1977 as being unnecessary.

6687-P Request by Federated Department Stores, Inc. Cincinnati, Ohio—To become a party to E 6687, authorizing transportation of Hi-Flow Prist, a flammable gas, aboard passenger carrying aircraft, denied April 14, 1977 as being unnecessary.

6725-X Request by E. I. du Pont de Nemours & Co., Inc., Wilmington, Del.—To ship insecticide liquid, classified as a flammable liquid, in a DOT Specification 12P fiberboard box having an inside Specification 2U polyethylene container of five-gallon capacity and minimum thickness of 15 mils, denied April 6, 1977 as being unnecessary.

6775-X Request by Riverside Chemical Co., Memphis, Tenn.—To ship organic phosphate mixtures in MC-330 cargo tanks, denied April 28, 1977. (Docket HM-139 obviates the need.

6800-P Request by FMC Corp., Philadelphia, Pa.—To ship hydrogen peroxide in a non-DOT Specification polyethylene drum of 55-gallon capacity, denied April 5, 1977 as being unnecessary.

6912-X Request by Dow Chemical Co., Plaquemine, La.—To ship hydrogen in a non-DOT Specification sphere aboard passenger-carrying aircraft, denied April 14, 1977.

7026-P Request by Douglas Aircraft Co., Long Beach, Calif.—To become a party to E 7026, authorizing shipment of bromotrifluoromethane pressurized with nitrogen in non-DOT specification spherical steel pressure vessels, denied April 14, 1977 as being unnecessary.

7212-X Request by Hooker Chemicals & Plastics Corp., Niagara Falls, N.Y.—To transport phosphoric anhydride imported in a steel drum of foreign manufacture that meets or exceeds DOT Specification 37A, denied April 8, 1977 as being unnecessary.

7214-X Request by Mobay Chemical Corp., Pittsburgh, Pa.—To ship additional commodities in non-DOT Specification 55-gallon steel drums, denied April 14, 1977. (Docket HM-103/112 obviates the need).

7481-N Petition for reconsideration by Billings Energy Corp., Provo, Utah—To allow relaxation of the retest requirements prescribed in DOT-E 6498, denied April 4, 1977.

7491-P Request by Northern Petrochemical Co., Des Plaines, Ill.—To become a party to E 7491 authorizing shipment of certain hazardous materials in an Association of American Railroads proposed Specification 113C120W tank car, denied April 19, 1977 as being unnecessary.

7512-X Request by Puerto Rico Marine Management, Inc., Elizabeth, N.J.—To allow shipment of aqua ammonia under the provisions of DOT-E 5854, denied April 14, 1977.

7579-N Request by Staple Cotton Services Assoc., Greenwood, Miss.—To ship certain organic phosphate mixtures in DOT Specification MC-331 cargo tanks, denied April 28, 1977. (Docket HM-139 obviates the need).

7583-N Request by Diagnostic Isotopes Inc., Upper Saddle River, N.J.—For an exemption from the requirements in Section 173.390(b) of Title 49, Code of Federal Regulations for shipment of certain radioactive materials, denied April 8, 1977.

7643-N Request by Department of Health, Education, and Welfare, Baltimore, Md.—To ship aerosol containers aboard passenger carrying aircraft, denied April 19, 1977.

EE7725-N Request by Economics Laboratory Inc., St. Paul, Minn.—To allow the shipping description on shipping papers to contain coded information, denied April 29, 1977.

WITHDRAWALS

76-12 Request by Dow Chemical International, Midland, Mich.—To allow shipments of sodium persulfate, packed in non-DOT specification sealed, polyethylene bags and containerized for "House to House" shipments, withdrawn April 12, 1977.

EE7689 Request by Martin Marietta Corp., Denver, Colo—Requesting relief from the provisions of 49 CFR 173.68, withdrawn April 12, 1977.

J. R. GROTHE,
Chief, Exemptions Branch, Office of Hazardous Materials Operations.

National Highway Traffic Safety Administration

MOTOR VEHICLE SAFETY SYSTEMS, MEANING OF "KNOWINGLY RENDER INOPERATIVE"

Replacement of Brake Components on Regulated Air-Braked Vehicles

Interested persons have asked whether section 108(a)(2)(A) of the National Traffic and Motor Vehicle Safety Act (the Act) (15 U.S.C. 1397(a)(2)(A)) permits commercial facilities to replace brake components used in satisfaction of

the early performance levels of Standard No. 121, Air Brake Systems, with brake components that are used in satisfaction of the existing reduced performance levels of the standard. Section 108(a)(2)(A) states in relevant part:

(2)(A) No manufacturer, distributor, dealer, or motor vehicle repair business shall knowlingly render inoperative, in whole or in part, any device or element of design installed on or in a motor vehicle or item of motor vehicle equipment in compliance with an applicable Federal motor vehicle safety standard (except during repair).

This question arises because the level of service brake stopping performance required by Standard No. 121 was reduced on March 1, 1976 (40 FR 8783). In some cases, manufacturers reduced the brake performance of their new vehicles by substituting smaller or otherwise less powerful components (such as brake chambers, slack adjusters, and linings) for comparable larger components that were used prior to March 1, 1976. Owners of the older vehicles are now asking whether section 108(a)(2)(A) prohibits commercial facilities from substituting the newer, less powerful components for those that originally equipped the older vehicles. Recently the Truck and Bus Safety Subcommittees of two Department of Transportation advisory committees requested wide public dissemination of the agency's position on this question.

It is the opinion of the NHTSA that a manufacturer, distributor, dealer, or repair business does not "knowingly render inoperative" a device or element of design by replacing components installed in satisfaction of a safety standard with other components that are used in newer vehicles of the same type in satisfaction of the same standard, even if the standard for the newer vehicles imposes a less stringent level of performance. The current performance level of any safety standard represents the agency's view of the appropriate level of protection that should be provided, subject to future planned changes of those levels. Thus, a commercial facility or private party would not, in the agency's view, violate section 108(a)(2)(A) by substituting components that provide the existing performance level mandated by a standard, whether or not they provide the formerly required level of performance.

This opinion of the meaning of section 108(a)(2)(A) addresses only the factual situation described. Other questions about the meaning of this provision of the Act should be directed to: Chief Counsel, National Highway Traffic Safety Administration, Washington, D.C. 20590.

Issued on May 10, 1977.

JOAN CLAYBROOK,
Administrator.

DEPARTMENT OF THE TREASURY

[Public Debt Series—No. 13-77]

TREASURY NOTES OF JUNE 30, 1981
Series J-1981

1. INVITATION FOR TENDERS

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately $2,000,000,000 of United States securities, designated Treasury Notes of June 30, 1981, Series J-1981 (CUSIP No. 912827 GT 3). The securities will be sold at auction with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued for cash to Federal Reserve Banks as agents of foreign and international monetary authorities.

2. DESCRIPTION OF SECURITIES

2.1. The securities will be dated June 3, 1977, and will bear interest from that date, payable on a semiannual basis on December 31, 1977, and each subsequent 6 months on June 30 and December 31 until the principal becomes payable. They will mature June 30, 1981, and will not be subject to call for redemption prior to maturity.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered and book-entry securities, and the transfer of registered securities will be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. SALE PROCEDURES

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Tuesday, May 24, 1977. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, May 23, 1977.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is $1,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender and the amount may not exceed $1,000,000.

3.3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5 percent of the face amount of securities applied for (in the form of cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a comercial bank or a primary dealer.

3.5. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full at the weighted average price (in three decimals) of accepted competitive tenders, and competitive tenders with the lowest yields will be accepted to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.000. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the weighted average price of accepted competitive tenders.

3.6. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full or when the price is over par.

4. RESERVATIONS

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. PAYMENT AND DELIVERY

5.1. Settlement for allotted securities must be made or completed on or before Friday, June 3, 1977, at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submited, which must be received at such institution no later than:

(a) Tuesday, May 31, 1977, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Friday, May 27, 1977, if the check is drawn on a bank in another Federal Reserve District.

Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve Bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscription or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. GENERAL PROVISIONS

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

W. MICHAEL BLUMENTHAL,
Secretary of the Treasury.

INTERSTATE COMMERCE COMMISSION

Office of Hearings

[Notice No. 395]

ASSIGNMENT OF HEARINGS

MAY 18, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 141804 (Sub-No. 43), Western Express, Division of Interstate Rental, Inc., now assigned July 19, 1977, at San Francisco, Calif., is postponed indefinitely.

MC-FC-75721, General Movers, Inc., Fargo Motor Express, Inc., Modern Truck Lines, Inc., MC 120897 (Sub-No. 3), General Movers, Inc. and MC 120897 (Sub-No. 2), General Movers, Inc., now assigned June 6, 1977, at Chicago, Ill. is postponed indefinitely.

MC 115793 (Sub-No. 22), Caldwell Freight Lines, Inc., now assigned July 14, 1977, at Kansas City, Mo. is canceled and application dismissed.

MC 113658 Sub-No. 11, 13 & 15, Scott Truck Line, Inc., MC 53965 Sub No. 122, Graves Truck Lines, Inc., MC 25869 Sub No. 129, Nolte Bros. Truck Line, Inc., MC 114273 Sub No. 269, CRST, Inc., MC 138018 Subs 31 and 34, Refrigerated Foods, Inc., MC 124679 Sub 71, C. R. England & Sons, Inc., MC 115826 Sub 264, W. J. Digby, Inc., MC 127042 Subs 186 and 197, Hagen, Inc., MC 139973 Subs 22 and 18, J. H. Ware Trucking, Inc., MC 48221 Subs 6 and 8, W. N. Morehouse Truck Line, Inc.,

MC 107515, Refrigerated Transport Co., Inc., MC 25869, Nolte Bros. Truck Line, Inc., MC 118159 Sub 201, National Refrigerated Transit, Inc., MC 113362 Sub 308, Ellsworth Freight Lines, MC 114632 Subs 104 and 110, Apple Lines, Inc., MC 115841 Sub 529, Colonial Refrigerated Transport, Inc., MC 140829 Sub 45, Cargo Contract Carriers Inc.,

MC 124211 Sub 288, Hilt Truck Line, Inc., MC 142964 Sub 2, Ronar Trucking, Inc., MC 142574 Sub 2, Circle C Transportation Co.,

MC 135874 Sub 85, LTL Perishables, Inc., MC 134477 Subs 152 and 161, Schanno Transportation, Inc., MC 138227, Ogallala Transfer, Inc.,

MC 127602 Sub 15, Denver-Midwest Motor Freight, Inc., MC 2860 Sub 155, National Freight, Inc., MC 140033 Sub 24, Cox Refrigerated Express, Inc., MC 143199, COP's, Inc., MC 135684 Sub 34, Bass Transportation Co., Inc., MC 138274 Sub 44, Shippers Best Express, Inc., MC 138274, Shippers

Best Express, Inc., MC 140389 Sub 16, Osborn Transportation, Inc. and MC 133566 Sub 78, Gangloss & Downham Transportation Co., Inc. being assigned June 21, 1977 (9 days) at Denver, Colorado and will be held in the Court of Appeals, Division Two, US Courthouse, 1961 Stout Street and on July 19, 1977 (9 days) at Denver, Colorado and will be held in the Tax Court, Room 587, US Federal Building & Courthouse, 1961 Stout Street.

MC 120477 Sub 2, International Transport, Inc. Common Carrier Application now assigned June 13, 1977 at New York, New York is postponed until July 11, 1977 (1 week) at New York, New York in a hearing room to be later designated.

MC 340 Sub 41, Querner Truck Lines, Inc. previously assigned June 12, 1977 at Dallas, Texas, application hereby dismissed.

MC 120325 (Sub-4), Frames, Morrison & Ryan, Inc., now assigned June 6, 1977 at Philadelphia, Pennsylvania, is canceled and the application is dismissed.

MC 139381 (Sub-No. 4), Spirit of '76 Overland Express, Inc., now being assigned for June 22, 1977, at the Offices of the Interstate Commerce Commission, Washington, D.C.

I&S M-29478, Class Rate Restructuring, C&SMFA, May 1977, now being assigned June 28, 1977 at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 115826 Sub 263, W. J. Digby, Inc. now assigned June 7, 1977 at Seattle, Washington is postponed to August 1, 1977 (1 week) at Denver, Colorado and will be held at the Tax Court, Room 587, U.S. Federal Building & Courthouse, 1961 Stout Street and August 8, 1977 (1 week) at Seattle, Washington and will be held in Room 3086, Federal Building, 915 Second Avenue.

MC 135797 (Sub-No. 61), J. B. Hunt Transport, Inc., now being assigned for continued Hearing on the 6th day of July 1977, at the Offices of the Interstate Commerce Commission, Washington, D.C.

ROBERT L. OSWALD,
Secretary.

[FR Doc.77-14587 Filed 5-20-77;8:45 am]

[Notice No. 168]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under Section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission within 30-days after the date of this publication. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-FC-77103, filed April 29, 1977. Transferee: PREMIER HOMES, INC., 2400 North Seventh Ave., Bozeman, Mont. 59715. Transferor: Junior W. Tschache, doing business as O-Bar-J Trailers, 2000 N. 7th, P.O. Box 716, Bozeman, Mont. 59715. Applicant's representative: James J. Screnar, Attorney at Law, 215 West Mendenhall, P.O. Box 1122, Bozeman, Mont. 59715. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificate No. MC 124790, issued April 7, 1970, as follows: *Mobile homes* and *house trailers*, over regular routes, between Bozeman, Mont., and West Yellowstone, Mont., serving no intermediate points; from Bozeman over U.S. Highway 191, to West Yellowstone, and return over the same route. *Mobile homes* and *house trailers*, over irregular routes, between points in Gallatin and Park Counties, Mont., on the one hand, and, on the other, points in Yellowstone National Park, located in Idaho, Montana, and Wyoming. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77119, filed May 10, 1977. Transferee: PAQUETTE AUTOBUS, INC., 295 Grande Cote, St. Eustache, Quebec, Canada. Transferor: George D. Paquette Bus Lines, Ltd., a corporation, 222 William St., Rosemere, Quebec J7A 2R4, Canada. Applicants' representative: W. Norman Charles, attorney at law, 80 Bay St. Glen Falls, N.Y. 12801. Authority sought for purchase by transferee of the operating rights of transferor set forth in Certificates Nos. MC 134715 and MC 134715 (Sub-No. 2), issued June 21, 1971, and December 17, 1975, respectively as follows: ***Passengers and their baggage*** in the same vehicle with passengers, in charter operations, beginning and ending at ports of entry on the United States-Canada Boundary line located at or near Rouses Point, N.Y., and Derby Line and Norton, Vt., and extending to points in New York and Vermont; and beginning and ending at ports of entry on the United States-Canada boundary line located in Maine, Michigan, New Hampshire, New York, and Vermont, and extending to points in the United States (except points in Alaska, Hawaii, New York, and Vermont). Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77120, filed May 10, 1977. Transferee: DAIRY LEASING SERVICE, INC., 803 Herring Ave., Wilson, N.C. 27893. Transferor: Lonnie P. Stancil, Roy A. Stancil, and Walter T. Stancil, a partnership, doing business as Dairy Leasing Service, 803 Herring Ave., Wilson, N.C. 27893. Applicants' representative: Thomas N. Willess, attorney at law. 1000 Sixteenth St. NW., Washington. D.C. 20036. Authority sought for purchase by transferee of the operating rights of transferor set forth in Permit No. MC 140653, issued December 27, 1976, as follows: *Dairy products and ice cream*, from Winston-Salem and Wilson, N.C., to Miami, Fla.; cottage cheese, from Chambersburg, Pa., to Miami, Fla., and Winston-Salem, N.C.; and orange juice, from Lakeland and Bradenton, Fla., to Wilson, Winston-Salem, and Raleigh, N.C., limited to a transportation service to be performed under a continuing contract, or contracts with Sealtest Foods Division, Kraftco Corporation. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

ROBERT L. OSWALD,
Secretary.

1

AGENCY HOLDING THE MEETING: U.S. Commission on Civil Rights.

DATE AND TIME: May 26, 1977, 11 am.

PLACE: The Washington Room, Los Angeles Hilton Hotel, 931 Wilshire Boulevard, Los Angeles, California.

STATUS: A portion of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED IN OPEN SESSION:

Discussions of agency comments on Criminal Code Reform Act of 1977–S1437.

Consideration of recommendations in report of Indiana State Advisory Committee on Equal Opportunity in Public School System of Fort Wayne, Indiana.

Discussion of Commission's jurisdiction in the area of the administration of justice.

MATTERS TO BE CONSIDERED IN CLOSED SESSION:

Continuation of discussion of the National Media Study Report.

CONTACT PERSON FOR MORE INFORMATION:

Mimi Hartley; in Washington, D.C. office (202-254-6697). In Los Angeles, May 25-26 (213-688-3437).

[S-471-77 Filed 5-19-77;1:21 pm]

2

AGENCY HOLDING THE MEETING: Commodity Futures Trading Commission.

TIME AND DATE: 10 a.m. May 24, 1977.

PLACE: 2033 K Street, Washington, D.C., 5th Floor Hearing Room.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Portions open to the public.

1. Proposed Regulations Governing Commission Review of Exchange Action Under Section 8c of the Commodity Exchange Act.

2. International Trading Group, Ltd. Request for Exemption from Segregation Requirement of the Option Rules.

Portions closed to the public:

Enforcement Matters.

CONTACT PERSON FOR MORE INFORMATION:

Jane Stuckey, The Secretariat (254-6314).

[S-457-77 Filed 5-18-77;2:07 pm]

3

AGENCY HOLDING THE MEETING: Consumer Product Safety Commission.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 23935, May 11, 1977, as amended by notice published in issue of May 19, 1977.

PREVIOUSLY ANNOUNCED TIME AND DATE: 2 p.m., May 19, 1977.

CHANGES IN THE MEETING:

The Commission has added one item to be considered as the first item on the agenda: Election of a Vice-Chairman for the coming year. The remaining items on the agenda are unchanged. In adding this item, the Commission has determined that Agency business requires consideration of the matter without seven days advance notice.

[S-462-77 Filed 5-18-77;3:48 pm]

4

AGENCY HOLDING THE MEETING: Federal Communications Commission.

TIME AND DATE: Approximately 9:30 a.m., Friday, May 20, 1977.

PLACE: Room 856, 1919 M Street NW., Washington, D.C.

STATUS: Open Meeting.

MATTER TO BE CONSIDERED:

The Federal-State Joint Board convened pursuant to Section 410 of the Communications Act of 1934, as amended, will hold an open meeting on the "Impact of Customer Provision of Terminal Equipment on Jurisdictional Separations", Docket No. 20981.

The prompt and orderly conduct of Commission business requires that less than seven days notice be given of this meeting.

CONTACT PERSON FOR MORE INFORMATION:

Samuel M. Sharkey, FCC Public Information Officer, telephone number 202-632-7260.

Issued: May 18, 1977.

[S-460-77 Filed 5-18-77;3:48 pm]

5

AGENCY HOLDING THE MEETING: Federal Deposit Insurance Corporation.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: Not yet published.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10:45 a.m., May 23, 1977.

CHANGES IN THE METING:

An application for Federal deposit insurance for the Bank of Hattiesburg, a proposed new bank to be located at 1300 Hardy Street, Hattiesburg, Mississippi, and a proposal for settling litigation arising in connection with the liquidation of the International City Bank and Trust Company, New Orleans, Louisiana, have been added to the agenda.

CONTACT PERSON FOR MORE INFORMATION:

Alan R. Miller, Executive Secretary, (202-389-4446).

[S-458-77 Filed 5-18-77;2:22 pm]

6

AGENCY HOLDING MEETING: Federal Power Commission.

TIME AND DATE: 2 p.m., May 25, 1977.

PLACE: 825 North Capitol Street.

STATUS: Open.

MATTERS TO BE CONSIDERED: (Agenda).

NOTE.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION:

Kenneth F. Plumb, Secretary. Telephone 202-275-4166.

(This notice of meeting is published pursuant to Section 3(a) of the Government in the Sunshine Act (Pub. L. No. 94-409), 5 U.S.C. 8552B.)

This is a list of the matters to be considered by the Commission. It does not include a listing of all persons relevant to the items on the agenda. However, all public documents may be examined in the Office of Public Information, room 1000.

POWER AGENDA—7619TH MEETING—
MAY 25, 1977

REGULAR MEETING—PART I

P-1.—Docket Nos. E-7795, E-7789, Philadelphia Electric Company, N.Y.

P-2.—Docket Nos. E-8586, et al., Public Service Company, Indiana, Inc.

P-3.—Docket Nos. ER77-5, ER77-6, ER77-7, E-9544 and E-8152, Otter Tail Power Company.

AGENCY HOLDING THE MEETING: United States International Trade Commission.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 24174 May 12, 1977.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 2:00 p.m., May 18, 1977.

CHANGES IN THE MEETING:

The discussion under agenda item No. 4, (Approval of report in investigation No. 332-80—Watches), previously announced as being held in open session, was closed to the public by a vote of a majority of the entire membership of the Commission. The closed session did not begin until public notice thereof had been posted.

CONTACT PERSON FOR MORE INFORMATION:

Kenneth R. Mason (202-523-0161).

By order of the Commission:

KENNETH R. MASON,
Secretary.

MARCH 18, 1977.

[S-456-77 Filed 5-19-77;8:57 am]

8

AGENCY HOLDING THE MEETING: United States International Trade Commission.

TIME AND DATE: 2 p.m., May 19, 1977.

PLACE: Hearing Room, 701 E Street, NW., Washington, D.C. 20436.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. Approval of staff report in Investigation 332-80 (Watches).

CONTACT PERSON FOR MORE INFORMATION:

Kenneth R. Mason, Secretary, 202-523-0161).

[S-467-77 Filed 5-19-77;9:48 am]

9

AGENCY HOLDING THE MEETING: Interstate Commerce Commission, Division 3.

TIME AND DATE: 10 a.m., May 19, 1977.

PLACE: Room 5124, Commission's Offices, 12th and Constitution Avenue NW., Washington, D.C.

STATUS: Supplemental Short Notice of Closed Meeting. A majority of Division 3, Comissioners Brown and Christian, have voted to add the following item to the agenda of the above closed meeting for the reason previously set forth in the prior notice.

ADDITIONAL MATTERS TO BE CONSIDERED:

Docket No. AB-36 (Sub-No. 2). Oregon Short Line Railroad Company and the Union Pacific Railroad Company-abandonment Portion Goshen Branch between Firth and Ammon, in Bingham and Bonneville Counties, Idaho.

CONTACT PERSON FOR MORE INFORMATION:

Public Information Officer, Douglas Baldwin. Telephone 202-275-7252.

AGENCY HOLDING THE MEETING: The Renegotiation Board.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 24801, May 16, 1977.

PREVIOUSLY ANNOUNCED DATE AND TIME OF MEETING: Tuesday, May 31, 1977, 10 a.m.

CHANGES IN MEETING:

Item 9 of the announced agenda is amended to read as follows:

9. Recommended Finding or Determination of Excessive Profits:

a. American Manufacturing Company of Texas Fiscal Years Ended December 31, 1966-1970.

b. General Industrial Corporation Fiscal Years Ended February 29, 1968, February 28, 1969 and March 31, 1969-1972

c. Industrial Park Supply Company Fiscal Years Ended June 30, 1968-1972

Dated: May 18, 1977.

GOODWIN CHASE,
Chairman.

[S-461-77 Filed 5-18-77;3:48 pm]

11

AGENCY HOLDING THE MEETING: Securities and Exchange Commission.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 24801, May 16, 1977.

CHANGES IN THE MEETINGS:

1. May 18.—Delete Item 3 relating to proposed Amendments to Rules 15b10-6 and 17a-4 and Item 4 relating to proposed Rule 15b7-1.

2. May 19.—Delete Item 5—Proposal for Public Comment on revisions to Rule 19b-4. Additional staff consideration of these matters is required.

Chairman Williams, Commissioners Loomis, Evans and Pollack, have determined that Commission business requires the above changes and that no earlier announcement of the changes was possible.

Dated: May 17, 1977.

[S-459-77 Filed 5-18-77;2:46 pm]

12

AGENCY HOLDING THE MEETINGS: Securities and Exchange Commission.

DATES AND TIMES: Wednesday, May 25, 1977 and Thursday, May 26, 1977 at 10 a.m.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

STATUS: Open to Public Observation.

SUBJECT MATTER OF THE MAY 25 MEETING

(1) Proposed opinion respecting co-application of New England Power Company and New England Electric System for approval of sale of utility assets to Fitchberg Gas and Electric Light Company.

(2) Consideration of extension of time period for Commission action on applications for registration by clearing agencies.

(3) Consideration of publication for comment of proposed new or revised registration and annual report forms for management investment companies.

(4) (a) Valuation of debt securities by Money Market Funds and certain other open-end investment companies.

(b) Prospectus disclosure by Money Market Funds with respect to portfolio securities, average portfolio maturity and historical rates of return.

(5) Application of One Liberty Municipal Bond Fund, Inc. for exemption, subject to conditions, of the Fund's purchases of municipal bonds in public offerings in which an affiliate of the Fund's investment adviser participates as a principal underwriter.

(6) Proposed amendments to Exchange Act Rule 10b-4 to prohibit certain practices in connection with partial tender and exchange offers which have the effect of discriminating against shareholders by distorting the calculation of the prorata acceptance formula.

(7) (a) Suggested publication for comment of proposed Exchange Act Rule 15b7-1 establishing minimum qaulification standards for brokers and dealers and associated persons; proposed rescission of present Rule 15b8-1 setting forth qualification standards for SECO brokers and dealers and associated persons; proposed amendments to present Rule 15b10-4 relating to supervision; and proposed adoption of Form U-5 (the Uniform Form for Notice of Termination) for SECO broker-dealers; and

(b) Authorization for the staff to communicate to the NASD preliminary reactions on the NASD's proposed amendments to Schedule C relating to qualification requirements for members and persons associated.

The subject matter of the meeting scheduled for Thursday, May 26, 1977 will be:

(1) Meeting with representatives of the National Association of Securities Dealers, Inc. to discuss the "recapture" of underwriting discounts by investment companies.

Dated: May 18, 1977.

[S-468-77 Filed 5-19-77;11:36 am]

13

AGENCY HOLDING THE MEETING: Tennessee Valley Authority.

TIME AND DATE: 10:30 a.m., May 25, 1977.

PLACE: Conference Room B-32, West Tower, 400 Commerce Avenue, Knoxville, Tennessee.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Discussion of matters involved in *Distributors Opposing Objectionable Rates, Inc., et al.* v. *Tennessee Valley Authority and Distributors Intervening For Fair and Equitable Rates*, No. CA 76-P-1734-NE (N.D. Ala., Apr. 5, 1977).

PART II

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service

INDIAN HEALTH CARE IMPROVEMENT ACT

Health Professions Recruitment and Scholarship Grant Programs, Etc., and Preferential Purchasing

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service

[42 CFR Part 36]

INDIAN HEALTH CARE IMPROVEMENT ACT PROGRAMS

Proposed Rulemaking

AGENCY: Department of Health, Education, and Welfare.

ACTION: Proposed Rules.

SUMMARY: These proposed rules prescribe requirements for Indian health professions recruitment and scholarship grant programs, continuing education allowances for employees of the Indian Health Service, contracts with urban Indian organizations, and leasing with Indian tribes authorized by the Indian Health Care Improvement Act. These programs are intended to encourage Indians to enter the health professions and to ensure the availability of Indian health professionals to serve Indians.

DATE: Comments on these proposed rules must be received by July 7, 1977.

ADDRESS: Written comments on these proposed rules may be sent to the Director, Indian Health Service, Room 5A-55 Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

FOR FURTHER INFORMATION CONTACT:

Robert C. Birch, Indian Health Service, (301-443-1044).

SUPPLEMENTARY INFORMATION: These proposed rules prescribe requirements for Indian health professions recruitment and scholarship grant programs, continuing education allowances for employees of the Indian Health Service, contracts with urban Indian organizations, and leasing with Indian tribes authorized by sections 102, 103, 104, 106, 502 and 704 of the Indian Health Care Improvement Act, Pub. L. 94-437 (25 U.S.C. 1601 et seq.). Appropriations are authorized by the Indian Health Care Improvement Act for the grant and contract programs covered by these proposed rules beginning in fiscal year 1978 (October 1, 1977 through September 30, 1978) and section 702 of that Act requires final publication of implementing regulations by July 31, 1977.

The Assistant Secretary for Health, with the approval of the Secretary of Health, Education, and Welfare, proposes to add a new Subpart J to 42 CFR Part 36.

The proposed subpart J is divided into seven subdivisions as follows:

J-1.—Provisions of General and Special Applicability.
J-2.—Health Professions Recruitment Program for Indians.
J-3.—Health Professions Preparatory Scholarship Program for Indians.
J-4.—Indian Health Scholarship Program.
J-5.—Continuing Education Allowances.
J-6.—Contracts With Urban Indian Organizations.
J-7.—Leases With Indian Tribes.

Recruitment Program

Health professions recruitment grants under subdivision J-2 are intended to assist grantees to: (1) Identify and recruit Indians with a potential for education or training in the health professions and (2) provide technical assistance and counseling to help those Indians enroll in health professions schools or undertake the post-secondary education or training necessary to qualify them to enroll. Health professions schools are defined in the proposed regulations and include schools of medicine, osteopathy, dentistry, veterinary medicine, optometry, podiatry, pharmacy, public health, nursing and the allied health professions.

Section 102 of the Indian Health Care Improvement Act, which authorizes the recruitment grant program, requires a preference for Indian tribes and tribal organizations in the award of grants. To contribute to Indian self-determination, the proposed regulations also give a preference to Urban Indian organizations and other Indian health organizations, although any public or nonprofit private health or educational entity is eligible.

Scholarships

Preparatory scholarships under subdivision J-3 may be awarded to Indians who have completed their high school education and demonstrated the capability to successfully complete courses of study in health professions schools. The scholarships, authorized by section 103 of the Indian Health Care Improvement Act, are for "compensatory preprofessional education", which is defined to mean preprofessional education necessary to compensate for deficiencies in an individual's prior education in order for that individual to qualify for enrollment in a health professions school. The preparatory scholarships may be awarded for the period (not to exceed two academic years) necessary to complete a recipient's compensatory preprofessional education. The proposed regulations at § 36.320 specify three examples where the scholarships would apply:

(1) Where an individual has a high school education but needs compensatory education to qualify for enrollment in a health professions school;

(2) Where an individual has a baccalaureate degree but needs compensatory preprofessional education to qualify for enrollment in a health professions school; or

(3) Where an individual has been enrolled in a health professions school but is no longer enrolled and needs compensatory preprofessional education to qualify for readmission.

Section 104 of the Indian Health Care Improvement Act amends section 225 of the Public Health Service Act to authorize the award of Indian Health Scholarships to students in health professions schools under section 225. Regulations implementing section 225, which authorizes the Public Health and National Health Service Corps Scholarship Training Program, are set out at 42 CFR Part 62. The proposed regulations at subdivision J-4 add certain requirements for purposes of Indian Health Scholarships consistent with the amendments to section 225 added by section 104 of the Indian Health Care Improvement Act, such as a preference for Indians and an obligation to serve Indians upon completion of academic training.

It is noted that the Indian Health Scholarship Program is part of section 225 of the Public Health Service Act which was repealed effective October 1, 1977 by section 408(b) of the Health Professions Educational Assistance Act of 1976, Pub. L. 94-484. However, regulations for the Indian Health Scholarship Program are proposed at this time on the expectation that Congress may take corrective action before the repeal becomes effective.

Section 36.303 of the proposed regulations requires Indians applying for scholarships under subdivisions J-3 or J-4 to submit evidence of tribal membership as specified in that section. Members of State recognized tribes or tribes terminated since 1940 are also required to submit evidence that their tribes are State recognized or terminated since 1940 unless their tribe appears on a list of such tribes to be published from time to time by the Secretary in the FEDERAL REGISTER.

Urban Program

Contracts with urban Indian organizations under subdivision J-6 will assist those organizations to carry out programs in urban centers to make health services more accessible to the urban Indian population. An urban center is defined in § 36.302(s) as "any city, with a population of 50,000 or more as determined by the United States Census Bureau, which the Secretary determines has a sufficient urban Indian population with unmet health needs to warrant assistance under Title V of the Indian Health Care Improvement Act."

Attention is also called to the definition of "urban Indian organization" in § 36.302(u). Among other things, effective October 1, 1977 an urban Indian organization must: (1) Have the provision of health programs as its principal function and (2) be governed by a board of directors elected by the members of the organization. Any organization administering an urban Indian health project under a contract entered into prior to October 1, 1977 will have until the conclusion of the contract period to meet these two requirements. The delay in imposing these requirements is proposed in the interest of program continuity as certain organizations currently administering urban health projects have other major purposes besides provision of health programs.

Leases With Indian Tribes

Under subdivision J-7, the Indian Health Service may lease from Indian tribes any land or facilities which the Service would otherwise be authorized to acquire or build. This authority is provided in section 704 of the Indian Health Care Improvement Act which authorizes leases with Indian tribes for not to exceed 20 years. Under this new long term

leasing authority, the Service may lease directly from Indian tribes without going through the General Services Administration.

2. There have been, since Pub. L. 94-437 was enacted, over 110 meetings in 47 communities involving IHS staff working with national and regional Indian organizations, Indian leaders, other Indian and Alaska Native people, and other interested parties. This consultation process and active participation has been instrumental in the development of the rules and regulations necessary to implement the Act, and has satisfied both the spirit and intent of the NOI.

Section 702(a)(1) of the Act states:

> Within six months from the date of enactment of this Act, the Secretary shall, to the extent practicable, consult with national and regional Indian organizations to consider and formulate appropriate rules and regulations to implement the provisions of this Act.

The Indian Health Service (IHS) on October 1, 1976, the day after the Act was signed by the President, initiated a national "joint-effort" involving the American Indian and Alaska Native people and IHS staff working together to plan the implementation of Pub. L. 94-437.

Since the Act specifies strict time frames for certain activities to be accomplished, including publication of proposed rules and regulations in the FEDERAL REGISTER within eight months from enactment, and promulgation of implementing rules and regulations within ten months from enactment, the IHS designed a plan to meet the time requirements stated in the law while preserving the opportunity for public input into the process of regulations development inherent in the Secretary's new regulations policies.

Major activities involved in encouraging and achieving maximum public participation of American Indian and Alaska Native people and other interested parties in the Pub. L. 94-437 Process, including regulations development, are described as follows:

October

1. The Project Manager for Pub. L. 94-437 was selected and seven key IHS Headquarters personnel were designated as Title Managers, one for each of the Act's titles. This group was identified as the IHS Core Team whose objective was:

To assist the Director, Indian Health Service, in preparing for the Indian Health Service to implement the provisions of this Act in an orderly, timely and complete manner.

One of the Core Team's first activities was to analyze the experiences IHS gained in plainning and implementing the Indian Self-Determination and Education Assistance Act—Pub. L. 93-638.

2. The Director of each of the twelve IHS Area or Program Offices selected a key staff member as Pub. L. 94-437 Coordinator. Although the IHS Area Director was administratively responsible for all Pub. L. 94-437 activities in the geographic Area of his or her responsibility, the Coordinator was responsible for coordinating all such activities, and communicating to and from the Indian people and other interested parties throughout the Area and to and from the Project Manager for Pub. L. 94-437 and the IHS Core Team.

3. Since IHS plans national health activities with representatives of national Indian organizations, four major national Indian organizations were invited to select a representative to serve on the Pub. L. 94-437 Policy Council. The purposes of the Policy Council were:

a. To recommend to the Director, Indian Health Service, policy and program actions involved in the Pub. L. 94-437 process;

b. To review progress of IHS Core Team activities; and

c. To participate with the IHS Core Team in Pub. L. 94-437 activities.

The Policy Council consists of six persons, four representing National Indian Organizations. Members are representatives selected by the National Indian Health Board, National Congress of American Indians, National Tribal Chairmen's Association, American Indian Health Care Association, IHS Council of Area Directors, and IHS Core Team. The Policy Council, a majority (67 percent) of the members of which are Indian people, considers the needs and problems of all American Indian and Alaska Native people. The Council meets at least monthly. Results of Policy Council actions are distributed routinely to national Indian organizations and IHS Headquarters staff by the IHS Core Team; and to regional Indian organizations, tribal governments and tribal organizations, urban Indian groups, IHS Area and Service Unit Health Boards, CHR tribal coordinators, IHS staff, and other interested parties by IHS Area Pub. L. 94-437 Coordinators.

4. The IHS developed a direct method of communication for securing public input (questions, comments, ideas, suggestions, recommendations) using Communication Cards (COMMCARDS) which are duly considered in the preparation of the proposed regulations with appropriate responses provided to the originator of the input.

5. *October 14.* Presentation made to the National Tribal Chairmen's Association Board of Directors regarding Pub. L. 94-437 opportunities, plans and activities.

6. *October 15.* About 2,000 sets of Pub. L. 94-437 briefing materials were sent in the first massive mailing to National Indian Organizations and, through the twelve IHS Area Pub. L. 94-437 Coordinators, to Regional Indian organizations, tribal governments, tribal organizations, urban Indian groups, IHS Area and Service Unit Health Boards, CHR tribal coordinators, IHS staff, and other interested parties. The briefing materials included the Act, an analysis of the Act, a copy of the signature document, a statement of differences between authorization and appropriation legislation, and a progress report.

7. *October 18-22.* The IHS Core Team participated in the annual meeting of the National Congress of American Indians in Salt Lake City, Utah, as an invited resource to the Health and Social Welfare Concerns Committee and presented a briefing on Pub. L. 94-437 that was actively attended by about 100 persons. The meeting involved representatives of the National Tribal Chairmen's Association, National Indian Health Board, American Indian Health Care Association, and other national and regional Indian organizations.

8. *October 25-30.* IHS Core Team members, with the respective Area Pub. L. 94-437 Coordinators, presented briefings for IHS staff and Indian and Alaska Native leaders in various locations in the IHS Areas to inform the Indian people about Pub. L. 94-437 and secure their comments, questions and suggestions on COMMCARDS for study and consideration throughout the Pub. L. 94-437 Process—including development of regulations.

9. *October 27.* Presentation made to National Indian Health Board Executive Council regarding Pub. L. 94-437 opportunities, plans and activities.

November

1. *Various dates.* Area Pub. L. 94-437 Coordinators (continued to conduct briefings in their Areas. Examples of locations where those briefings were held included: Alaska—Anchorage; Arizona—Phoenix, San Xavier, Tempe, Tucson, Window Rock; California—Sacramento; Colorado—Denver; District of Columbia—Washington; Massachusetts—Boston; Maryland—Bethesda, Rockville; Minnesota—Bemidji, Cass Lake, Duluth; Montana—Billings, Lame Deer, Poplar; North Carolina—Pembroke; North Dakota—Bismarck; New Mexico—Albuquerque, Santa Fe; Nevada—Schurz; New York—New York City; Oklahoma—Oklahoma City, Shawnee, Tulsa; Oregon—Portland; Pennsylvania—Philadelphia; South Dakota—Aberdeen, Pierre, Rosebud, Sisseton; Tennessee—Nashville; Utah—Salt Lake City; Washington—Yakima.

2. *November 12.* Second massive mailing of informational materials including summary of November 4-5 meeting of Policy Council; strategy to encourage maximum participation of American Indian and Alaska Native people in the Pub. L. 94-437 process, responsibilities of Area Pub. L. 94-437 Coordinators; names, addresses, and phone numbers of Policy Council members; names and phone numbers of Area Pub. L. 94-437 Coordinators.

3. *November 26.* Third massive mailing of Pub. L. 94-437 materials including House and Senate reports for study and use by Indian and Alaska Native people throughout the United States in understanding Congressional Intent in enacting Pub. L. 94-437.

4. *November 29-December 1.* The IHS Core Team and Policy Council conducted a three-day Training Workshop in Albuquerque, New Mexico to prepare persons from each of twelve IHS Areas and Programs to be able to conduct workshops in December and later in their own Area or Program. Priority attendees were five

Tribal (non-IHS) Title Representatives (Titles I, II, III, IV, VI of the Act) and one Urban (non-IHS) Title Representative (title V) and the Area Pub. L. 94–437 Coordinator. Other attendees were six additional IHS Title Representatives for Titles I, II, III, IV, V, VI. Results—over 200 participants at the Workshop of whom about 63 percent were Indian or Alaska Native people representing about 60 different Indian tribes or Alaska Native groups. An excellent example of the "joint effort" was the Indian and Alaska Native (non-IHS) Title Representatives working together with IHS Title Representatives to plan and organize their Area Workshops in December and later.

DECEMBER

1. *Various Dates.* Pub. L. 94–437 Workshops conducted in each of twelve IHS Areas and Programs to better inform Indian and Alaska Native people about Pub. L. 94–437 and to secure their input on COMMCARDS for study and consideration throughout the Pub. L. 94–437 Process—including development of regulations. All COMMCARDS were forwarded to IHS Headquarters to the IHS Core Team for review, response, and inclusion in Title MASTER LISTS of questions, responses, recommendations, and other; and return of copy of completed COMMCARD to the Area Pub. L. 94–437 Coordinator to return a copy to the person who originated the input. Examples of locations where these Workshops were held include:

Alaska—Anchorage; Arizona—Flagstaff, Phoenix, Tucson; Minnesota—Duluth; Montana—Billings; New Mexico—Albuquerque; Nevada—Reno-Sparks; Oklahoma—Oklahoma City; South Dakota—Pierre; Tennessee—Nashville; Washington—Seattle.

2. *December 20.* Fourth massive mailing of Pub. L. 94–437 materials including progress report through December 15; summary of December 6–7 meeting of Policy Council; and minutes of IHS–NIAAA meeting of November 22–23, 1976.

JANUARY

1. *January 3–7.* Pub. L. 94–437 Writing Workshop conducted at IHS Headquarters in Rockville, Maryland. The workshop was publicized and participation was open to the public. Purpose—to develop recommended guidelines and draft specifications for regulations. Participants—six Tribal (non-IHS) Core Representatives—one for each title—selected at the Training Workshop in Albuquerque, New Mexico, November 29–December 1 to participate in this Workshop; IHS Core Team, twelve IHS Area Pub. L. 94–437 Coordinators and other Indian people who participated because of their own interest. Each participant considered the needs and concerns of all Indian and Alaska Native people. The first day or more was spent with the participants studying and considering all input from Indian and Alaska Native people and other interested parties that had been received by the IHS Core Team through the Area Pub. L. 94–437 Coordinators during October–November–December and early January. Thus, public input was utilized, and will continue to be utilized throughout the Pub. L. 94–437 Process.

To verify that the IHS has the organizational structure, experience, and ability to communicate directly and effectively with Indian leadership on the local, regional, and national levels, the following summarized data are presented for the period October 1, 1976–February 15, 1977:

Number of Pub. L. 94–437 meetings held throughout United States	110
Number of different communities in which meetings were held	47
Number of people at meetings	4,306
Indian/Alaska Native people represented at meetings	[1] 800,000
Number of COMMCARDS processed by IHS Core Team	2,151

2. *January 8–17.* IHS Core Team continued work on specifications for proposed regulations, studying and considering all input on COMMCARDS to date from Indian and Alaska Native people and other interested parties.

3. *January 18–19.* IHS Core Team reviewed specifications for proposed regulations with Policy Council. Recommendations made by Policy Council to Director, Indian Health Service.

Written comments concerning the proposed regulations set out below are invited. Written data, views, or arguments relating to the proposed regulations may be presented in writing to the Director, Indian Health Service, Room 5A55, 5600 Fishers Lane, Rockville, Maryland 20857. Commentors are encouraged to reference their comments by section of the proposed regulations although this is not required. All material received will be available for public inspection and copying at the above address on weekdays (Federal holidays excepted) between the hours of 9 a.m. and 5 p.m. and all material received on or before July 7, 1977 will be considered in the preparation of the final regulation.

The Department of Health, Education, and Welfare has determined that this document does not contain a major proposal requiring prepartion of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: March 22, 1977.

JAMES F. DICKSON,
Assistant Secretary for Health.

Approved: May 11, 1977.

JOSEPH A. CALIFANO, Jr.,
Secretary.

Part 36 of Title 42 is amended by adding the following subpart:

Subpart J—Indian Health Care Improvement Act Programs

SUBDIVISION J–1—PROVISIONS OF GENERAL AND SPECIAL APPLICABILITY

Sec:

36.301 Policy and Applicability.
36.302 Definitions.
36.303 Indians applying for scholarships.
36.304 Additional Conditions.

[1] Estimated.

SUBDIVISION J–2—HEALTH PROFESSIONS RECRUITMENT PROGRAM FOR INDIANS

Sec.
36.310 Health professions recruitment grants.
36.311 Eligibility.
36.312 Application.
36.313 Evaluation and grant awards.
36.314 Payment and use of funds.
36.315 Publication of list of grantees and projects.
36.316 Alteration or renovation.
36.317 Grantee accountability.
36.318 Publication and copyright.
36.319 Applicability of 45 CFR Part 74.

SUBDIVISION J–3—HEALTH PROFESSIONS PREPARATORY SCHOLARSHIP PROGRAM FOR INDIANS

36.320 Preparatory scholarship grants.
36.321 Eligibility.
36.322 Application and selection.
36.323 Scholarship and tuition.
36.324 Publication of a list of recipients.

SUBDIVISION J–4—INDIAN HEALTH SCHOLARSHIP PROGRAM

36.330 Indian Health Scholarships.
36.331 Eligibility.
36.332 Selection.
36.333 Service obligation.
36.334 Distribution of scholarships.

SUBDIVISION J–5—CONTINUING EDUCATION ALLOWANCES

36.340 Provision of continuing education allowances.

SUBDIVISION J–6 CONTRACTS WITH URBAN INDIAN ORGANIZATIONS

36.350 Contracts with urban Indian organizations.
36.351 Application and selection.
36.352 Fair and uniform provision of services.
36.353 Reports and records.

SUBDIVISION J–7—LEASES WITH INDIAN TRIBES

36.360 Leases with Indian tribes.

Subpart J—Indian Health Care Improvement Act Programs

AUTHORITY: Sec. 102, 103, 104, 106, 502, and 704 of P.L. 94–437 (25 U.S.C. 1612 and 1613, 42 U.S.C. 234(1), 25 U.S.C. 1615, 1652, and 1674; sec. 702 of P.L. 94–437 (25 U.S.C. 1672).

SUBDIVISION J–1 PROVISIONS OF GENERAL AND SPECIAL APPLICABILITY

§ 36.301 Policy and applicability.

(a) *Policy.* (1) It is the policy of the Secretary to encourage Indians to enter the health professions and to ensure the availability of Indian health professionals to serve Indians. The recruitment and scholarship programs under this subpart will contribute to this objective.

(2) The regulations of this subpart are intended to be consistent with principles of Indian self-determination and to supplement the responsibilities of the Indian Health Service for Indian health manpower planning and for assisting Indian tribes and tribal organizations in the development of Indian manpower programs.

(b) *Applicability.* The regulations of this subpart are applicable to the following activities authorized by the Indian Health Care Improvement Act:

(1) The award of health professions recruitment grants under section 102 of the Act to recruit Indians into the health professions (Subdivision J–2);

(2) The award of preparatory scholarship grants under section 103 of the Act to Indians undertaking compensatory preprofessional education (Subdivision J–3);

(3) The award of Indian Health Scholarship grants pursuant to section 225(i)(2) of the Public Health Service Act, as added by section 104 of the Act, to Indian or other students in health professions schools (Subdivision J–4);

(4) The provision of continuing education allowances to health professionals employed by the Service under section 106 of the Act (Subdivision J–5);

(5) Contracts with urban Indian organizations under section 502 of the Act to establish programs in urban areas to make health services more accessible to the urban Indian population (Subdivision J–6); and

(6) Leases with Indian tribes under section 704 of the Act (Subdivision J–7).

§ 36.302 Definitions.

As used in this subpart: (a) **"Act"** means the Indian Health Care Improvement Act, Pub. L. 94–437 (25 U.S.C. 1601 et seq.).

(b) "Academic year" means the traditional approximately 9 month September to June annual session, except for students who attend summer session in addition to the traditional academic year during a 12 month period, for whom the academic year will be considered to be of approximately 12 months duration.

(c) "Budget period" means the interval of time into which the approved activity is divided for budgetary purposes, as specified in the grant award document.

(d) "Compensatory preprofessional education" means any preprofessional education necessary to compensate for deficiencies in an individual's prior education in order to enable that individual to qualify for enrollment in a health professions school.

(e) "Health or educational entity" means an organization, agency, or combination thereof, which has the provision of health or educational programs as one of its major functions.

(f) "Health professions school" means any of the schools defined in paragraphs (l), (m) or (n) of this section.

(g) "Indian" or "Indians" means, for purposes of Subdivisions J–2 and J–3 of this subpart, any person who is a member of an Indian tribe, as defined in paragraph (t) of this section or any individual who (1), irrespective of whether he or she lives on or near a reservation, is a member of a tribe, band or other organized group terminated since 1940 and those recognized now or in the future by the State in which they reside, or who is the natural child or grandchild of any such member, or (2) is an Eskimo or Aleut or other Alaska Native, or (3) is considered by the Secretary of the Interior to be an Indian for any purpose, or (4) is determined to be an Indian under regulations promulgated by the Secretary.

(h) "Indian health organization" means a nonprofit corporate body composed of Indians which provides for the maximum participation of all interested Indian groups and individuals and which has the provision of health programs as its principal function.

(i) "Indian tribe" means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or group or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.), which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

(j) "Nonprofit" as applied to any private entity means that no part of the net earnings of such entity inures or may lawfully inure to the benefit of any private shareholder or individual.

(k) "Project period" means the total time for which support for a project has been approved, as specified in the grant award document.

(l) "School of allied health professions" means a junior college, college, or university—

(1) Which provides, or can provide, programs or education leading to a baccalaureate or associate degree (or to the equivalent of either) or to a higher degree in medical technology, optometric technology, dental hygiene, or in any of such other of the allied health professions curricula as are specified by regulation of the Secretary;

(2) Which is affiliated with a teaching hospital; and

(3) Which is accredited or assured accreditation by a recognized body or bodies approved for such purpose by the Commissioner of Education.

(m) "School of medicine," "school of dentistry," "school of osteopathy," "school of pharmacy," "school of optometry," "school of podiatry," "school of veterinary medicine," and "school of public health" means a school which provides training leading, respectively, to a degree of doctor of medicine, a degree of doctor of dental surgery or an equivalent degree, a degree of doctor of osteopathy, a degree of bachelor of science in pharmacy or an equivalent degree, a degree of doctor of podiatry or an equivalent degree, and a graduate degree in public health, and including advanced training related to such training provided by any such school, and is accredited or assured accreditation by a recognized body or bodies approved for such purpose by the Commissioner of Education.

(n) "School of nursing" means a collegiate, associate degree, or diploma school of nursing, as those terms are defined in this paragraph below, which is accredited or assured accreditation by a recognized body or bodies approved for such purpose by the Commissioner of Education:

(1) The term "collegiate school of nursing" means a department, division, or other administrative unit in a college or university which provides primarily or exclusively a program of education in professional nursing and allied subjects leading to the degree of bachelor of arts, bachelor of science, bachelor of nursing, or to an equivalent degree, or to a graduate degree in nursing, and including advanced training related to such program of education provided by such school;

(2) The term "associated degree school of nursing" means a department, division, or other administrative unit in a junior college, community college, college, or university which provides primarmily or exclusively a two-year program of education in professional nursing and allied subjects leading to an associate degree in nursing or to an equivalent degree;

(3) The term "diploma school of nursing" means a school affiliated with a hospital or university, or an independent school, which provides primarily or exclusively a program of education in professional nursing and allied subjects leading to a diploma or to equivalent indicia that such program has been satisfactorily completed.
